The human eye is like an inflated balloon. It keeps its global form because it is under pressure—the highest in any organ in the body. Unless kept well inflated wrinkles might form on the cornea, which would cause astigmatism, a condition that would blur vision.

Pressure in the eye results from lymph generated by the ciliary body, a group of muscles and ligaments which also control the shape of the lens. In a healthy eye the pressure is regulated by a vein which allows the fluid to drain off, like a safety valve. If, as sometimes happens with advancing age, the safety valve does not work very well, the lymphatic fluid backs up, causing excessively high pressure.

Allied Cemetery

Not so well known is the fact that one small part of the Gallipoli peninsula in Turkey was later made over in perpetuity to the Allies.

This territory, known as the Anzac area, is situated on the southwest coast of Gallipoli. It was set aside, under the treaty of Lausanne, as an international cemetery for members of the expeditionary force who lost their lives in the campaign of 1915-16. The treaty provided, however, that Turkey should retain control of access to the Anzac section; that no fortifications should be erected there, and that only such buildings be put up as those needed for housing the custodians of the graves.

DELAY PASTURING UNTIL GRASS HAS GOOD START

It's wise to continue grain feeding of the cows until the grass in the pasture is 3 to 4 inches high, according to Arthur Porter, Iowa State College extension dairyman. Pastures may be greening up, and at a distance it may appear that there's plenty of feed for dairy cows. Actually, there is little feed, because the grass is short and has a high percentage of moisture.

Rye seeded to use before the bluegrass is ready should be 4 to 6 inches tall before grazing, Porter states. Keeping the cows on a grain feed and off the pasture will also trampling of the sod, and total production of feed for the season can be expected to be that much greater.

WEEKLY NEWS ANALYSIS

U. S. Heavy Bombers Blast Balkans, Hammer German Industries in France; Jap Forces Advance in India Theater; Congress Studies New Draft Problems

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.

EUROPE:
Aid Russ

With Allied troops in Great Britain poised for the jump into western Europe, U. S. bombers took to the air to blast the Balkans in conjunction with the Russian armies' advance into Rumania.

In the English Isles, an electrical tenseness was reported as Gen. Dwight D. Eisenhower's high command was said to have set the zero hour, and Allied planes continued to roar over the channel to blast Nazi defenses and industries in France and Germany.

As the Russians edged toward the vital Rumanian oil fields of Ploesti, U. S. bombers thundered over the city from the south to blast railway tank cars filled for the long haul to western Europe. U. S. bombers also dropped explosives on aircraft factories and railroad yards of the Hungarian capital of Budapest.

In Italy, heavy artillery bombardments punctuated bitter ground sparring below Rome at Anzio and Cassino.

Psychological War

Leaving no stone unturned, the Allies have been showering Axis Europe with propaganda leaflets as well as bombs in an effort to undermine German morale and encourage underground resistance in occupied countries.

Flashy leaflets have told the Germans that their surrender during the last war left most of their industries intact, while continued resistance in this war will only result in the complete demolition of their factories. Other leaflets have condemned Nazi officials for failing to provide for evacuation of the civilian population from bombed areas.

Small newspapers dropped in France have informed the people of guerrilla activity, and of the Allied objectives in bombing Nazi targets in the country, while similar publications dumped over Holland have pointed up America's war effort and the heavy assaults on Berlin.

AGRICULTURE:
Egg Supports

To bolster sagging egg markets, War Food Administrator Marvin Jones told a group of mid-western senators led by Senator Wherry (Neb.), that WFA planned to support prices by purchases of from 27 to 32 cents per dozen in distressed areas where handlers paid producers a minimum of 26 cents a dozen.

Sen. Wherry

Declaring that the WFA's biggest problem was disposal of the eggs, Jones called upon the congressmen to support legislation for sale of perishable commodities below parity levels. At present, perishables cannot be sold at such prices until they evidence deterioration, with the result that rot often sets in, Jones said. If the civilian population would eat one more egg per week per person, the surplus egg problem would be largely solved, Jones added.

Although adequate storage space has been found for frozen eggs, Jones said, production has been influenced by manpower problems. Wherever possible, the government has increased its contracts for the product, he said.

Canadian Oats

Seeking to relieve the tight feed situation, the War Food administration has arranged for the importation of 20,000,000 bushels of Canadian oats by May 15 via rail and the Great Lakes.

Under the plan, U. S. railroads would immediately send 75 cars daily into the Canadian interior for the grain, with 25 more to be sent later, if domestic needs for the cars are not pressing. The rails would carry the oats to Duluth, whence they would be routed to Chicago and Toledo by boat. From 15 to 20 days generally would be requird for the round trip, officials estimated.

Because competitive bidding between the two cities would bring Canadian grain above the U. S. price ceiling, the Commodity Credit corporation might purchase the oats directly from Canada for resale at lower prices in the U. S.

GOP Favorite—Republicans boom Gov. Tom Dewey (left) as Wendell Willkie steps out.

GOP:
Willkie Quits

Stormy petrel of the Republican party since 1940, big, blustery Wendell Willkie withdrew his bid for leadership of the GOP, while New York's Gov. Thomas E. Dewey was assuming the position through a popular draft.

Willkie's sudden demise and Dewey's ascension were occasioned by progressive Wisconsin's elections for delegates to the Republican national convention in Chicago, June 26. Although Willkie actively campaigned through the state, he failed to win even one delegate, while Dewey, who had asked that his name be withdrawn from the election, won 18.

Since Wisconsin has long been noted for its liberalism, Willkie deliberately selected it as the grounds for a test of Republican sentiment, basing his bid for delegates on a program for heavier war sacrifices and extensive U. S. cooperation in world affairs.

DRAFT:
26-29 Next

Both selective service and congress struggled over the problem of supplying the military services with younger men and maintaining record war production, with continued emphasis on shifting 4-Fs in unimportant work to essential occupations.

Referring to the decision to only defer key industrial and agricultural workers in the 18 to 25 age group, Draft Director Lewis B. Hershey declared that the same policy would next be extended to the 26 to 29 class.

In seeking to channel 4-Fs into necessary work, the house military affairs committee called upon selective service to obtain a list of essential occupations and manpower shortage areas for use in guiding the employment of 4Fs, who would face induction into a labor battalion if failing to take vital jobs.

State Inductions

With 1,265,000 men, New York is scheduled to lead the states in the number of soldiers and sailors to be inducted by July 1, with Pennsylvania with 904,000, and Illinois with 700,000, ranking second and third.

Other states with high totals include California with 667,000; Ohio with 610,000; Texas with 554,000, and Michigan with 452,000.

Nevada with 11,000 is scheduled to contribute the smallest amount of men, with Wyoming and Delaware with 23,000, the next lowest.

PACIFIC:
Eye Stilwell

While U. S. bombers continued to pummel Jap defense outposts in the Pacific, British troops strived desperately to check the enemy's stubborn advance toward the American operated Bengal-Assam railroad, 80 miles within India.

Working over the whole Jap outpost system in the Pacific, navy fliers pounded the enemy's storage and defense installations on Truk in the Carolines, while army airmen repeated heavy attacks on the Nips' supply base of Hollandia in New Guinea, feeder point for barges operating along the coastline.

Seeking to cut the Assam-Bengal railway feeding Lieut. Gen. Joseph Stilwell's U. S.-Chinese troops fighting to carve out a new supply road to China in northern Burma, the Jap attack in India was concentrated in the rugged hills above Imphal.

SOUTH AMERICA:
'Money to Burn'

South America's huge accumulation of gold and foreign exchange, of which dollars form the greatest part, looms as another factor in the promotion of economic activity in the postwar world.

Because South American countries have been sending the U. S. and other nations more goods than they have been able to buy back, the U. S. department of commerce reported they have built up a cash balance of over 2 billion dollars, which will be available for foreign trade when warring powers return to civilian production.

In 1943, the department reported, the U. S. bought $1,300,000,000 worth of goods in South America, while selling only approximately $800,000,000, thus leaving the Latin countries with a cash balance of nearly $500,000,000.

PENICILLIN:
New Plants

Costing $20,000,000, 21 new penicillin plants in the U. S. and Canada soon will go into the production of sufficient quantities of the magic drug to meet the needs of 250,000 severe cases and 2,500,000 milder ones of the armed forces.

Despite the increase in production, penicillin only will be available to civilians who cannot be treated with the sulfa drugs.

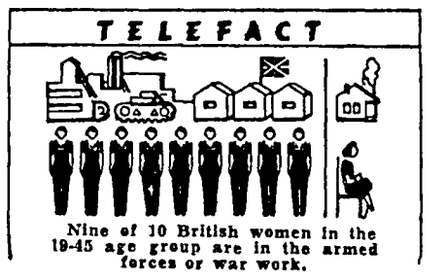
New methods have been developed for making penicillin and costs have dropped 84 per cent within a year, but because the drug is derived from a mold which still must be grown and only small quantities can be refined at a time, demands continue to surpass supplies.

GREAT BRITAIN:
Act Against Strikes

Plagued by strikes which resulted in a loss of 1,000,000 working days in March, the British government drafted an order under which incitement of labor unrest would be a criminal offense.

Even as the government considered drastic action, 70,000 miners in Yorkshire remained idle over deductions from their wages for coal for their homes, and over 20,000 shipyard workers were on strike in Belfast in protest of the jailing of aircraft shop stewards for participating in unauthorized walkouts.

While the government moved to check the strike wave, the Trades Union Congress warned British labor that continuance of work stoppages would imperil an Allied victory.



Nine of 10 British women in the 19-45 age group are in the armed forces or war work.

ITALY:
Political Unanimity

Liberated Italy's six anti-Fascist parties were prepared to participate in a new government when King Victor Emmanuel abided by his reported decision of retiring as actual ruler and designating his son, Prince Humbert, as his lieutenant to represent his interests.

In settling this knotty problem of at least temporarily preserving the institution of the monarchy while still satisfying the demands of the anti-Fascists that the king get out, the king's advisors fell back on an old precedent in Italian history.

Although the Communists who are reportedly vying for control of the defense and police ministries in any new Italian government, recently declared their intention of cooperating with the king, other anti-Fascist elements held fast to their contention that his removal was requisite to the establishment of a strong democratic administration in the state.

U. S. TREASURY:
Record Receipts

Boosted by receipts of $5,161,000,000 for quarterly income tax payments, the treasury collected $6,573,000,000 in March, but expenditures also were at a record level of $8,525,000,000, leaving a deficit of $1,952,000,000.

Of the heavy expenditures in March, $7,726,000,000 went directly for war activities, topping the November, 1943, peak of $7,541,000,000.

During March, $268,000,000 in war bonds was redeemed, representing 38 per cent of the month's sale of $708,000,000.

Plans for the Fifth War Loan drive to get under way June 12 call for a goal of $16,000,000,000, about $730,000,000 less than was actually raised during the Fourth campaign. Of the total, individuals will be asked to purchase $6,000,000,000 worth of bonds, more than they bought during the last drive.

TRAIN BANDITS

In shades of Mexico's more turbulent days of three decades ago, Mexican highwaymen have gone back into business, concentrating on trains bringing back native laborers enriched with hard earned wages from six months of agricultural work in the U. S.

Armed with machine guns and pistols, 60 bandits reportedly held up a train in Sinaloa province, hoisting $100,000 from 600 homebound agricultural workers and making a clean getaway.

HIGHLIGHTS . . . *in the week's news*

BUTANE FOR AUTOS: A Los Angeles man charged with installing equipment in automobiles to permit them to use unrationed butane gas instead of gasoline, has been indicted by the grand jury. Butane is a material in the production of synthetic rubber. Some equipment was sold for as high as $1,000. At least 40 persons have bought the outfits, it is alleged.

PARALYSIS: A vaccine to prevent infantile paralysis may be in process of development at the Mayo foundation in Minnesota. Dr. Carl Rosenow states that he has identified the organism, which he says is a streptococcus in one stage of its growth. He is working on a serum prepared from streptococci and has had some success in making clinical tests.

Washington, D. C.

JOB TO DO IN LONDON

Those close to Secretary of State Hull say he is not happy over the mission to London undertaken by energetic young Undersecretary Ed Stettinius. Originally, the trip was planned partly to please the British, who hinted that we had sent no important emissaries to London since Harry Hopkins' call on Churchill two years ago.

However, Stettinius is on the way to turning the mission into something really important. He is scheduled to discuss five important subjects with the British. They are:

1. Stabilization of the dollar and pound after the war.
2. A world bank.
3. Stabilization of commodities. This would mean the application of Wallace's ever-normal granary to all basic commodities such as tin, rubber, copper, sugar, with a system of buying and selling to keep prices stabilized.
4. Oil and the Near East. The United States wants to avoid a cutthroat battle for oil such as occurred with Britain after the last war and which is already threatened as a result of the Arabian pipe-line wrangling.
5. The future boundaries of Germany.

German boundaries were tentatively discussed at Teheran, but now Dr. Isaiah Bowman, famed geographer, has accompanied Stettinius to London to talk details. Bowman was Woodrow Wilson's geographic expert at Versailles, and some officials are critical of his chopping-up of Europe.

This imposing agenda has irked Secretary Hull. Apparently, it was pretty well arranged while he was in Florida. Also, Hull was always jealous of the trips Sumner Welles took to Rio, Rome, London and Berlin, and now it looks as if his new undersecretary might also be crowding him for the limelight.

* * *

MORE HORSE LEATHER

Representative Calvin Johnson of Illinois has been badgering the war department and the War Production board to get more harness for farm horses. With leather short, and harness buckle metal diverted to war production, harness is scarce. Also, the army has bought up tremendous supplies of harness.

In campaigning for more harness, Representative Johnson suddenly bumped into the fact that the army was only just now releasing from its Jeffersonville, Ind., quartermaster depot a total of 30,000 sets of harness — carefully stored away since the last war.

* * *

FREE RADIO TIME

Broadcasters are wondering how many other congressmen will follow the example recently set by Maryland's Senator Millard Tydings. At the close of his regular weekly broadcast, he announced that he would discontinue the series because he did not wish to subject the radio station, WBAL, to charges of unfairness during the coming senatorial campaign.

* * *

OIL SUBSIDY

The OPA has now recommended a system of oil subsidies to Economic Stabilizer Vinson ranging from 25 cents to 75 cents a barrel for all low-producing wells, namely those oil wells averaging nine barrels per day or less. This would give a subsidy to about 80 per cent of the nation's wells and would cost the government about $60,000,000 a year.

The plan was secretly worked out by some of the independents but, when the big companies heard about it, they raised such a howl that the little fellows backed out, stating publicly that they had not been cooperating with the government in devising the subsidy scheme.

However, it looks as if the plan would go through. Pennsylvania wells, which are the deepest, will get the highest subsidy.

* * *

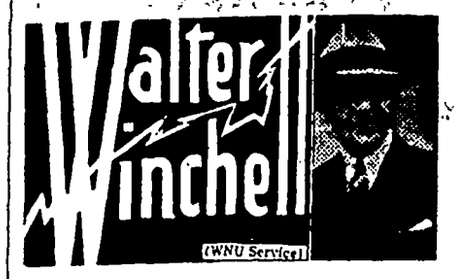
MERRY-GO-ROUND

¶ The United States is cutting off its nose to spite its face in regard to De Gaulle and the Free French. We are still freezing French funds in order to hamstring De Gaulle, which means that we will have to dig down into our own U. S. treasury to pay France's share of the UNRRA fund. Each nation is supposed to contribute a share to this world relief fund, and since we are tying up French funds, we will have to find the money some place.

¶ In Recife, thousands of cheering Brazilians welcomed Mrs. Roosevelt by singing "God Bless America" in Portuguese.

¶ A conspiracy is on to euchre another sizable hunk of the manpower problem out from under Paul McNutt. Undersecretary of War Patterson, rubber czar Bradley Dewey and WPB's production wizard, Charles E. Wilson, want to take the deferment of skilled industrial workers away from McNutt and put it under a special committee headed by Wilson.

¶ Reason for sparse publicity on the First Lady's Latin-American tour was the war department's refusal to let the newswomen who usually cover Mrs. Roosevelt go along.



Springtime in Manhattan

Streets coated with glistening rain while puddles are polka-dotted with raindrops . . . Baseball gab invading war dialogues . . . The well-sharpened notes of warbling birds giving happiness a sound track . . . Islands of defeat scattered around town where sunshine only magnifies its poverty . . . A gray-eyed sky clearing the thunder in its throat and displaying its white-fanged lightning . . . Playful breezes juggling the ancient weathervane atop St. Paul's Cathedral . . . The shy rustle of balmy winds caressing faces with invisible baby fingers.

The Hudson River cobwebbed with streaks of gleaming sunlight . . . Shop windows glowing with Spring finery composing visual poetry of vivid hues . . . Sunrise lighting a fiery dawn on the stub of a warm night . . . Brisk winds brushing the last few dead leaves from trees as nature weaves its annual green gown around them . . . Relaxed humans anchored to park benches allowing contentment to find a home in their spirits . . . A soldier strolling with his girl . . . Workers eagerly sipping lungs full of antiseptic air before plunging into subway dungeons . . . The everlasting beauty of twilight balanced on the fingertips of a departing day.

The Magic Lanterns: "See Here, Private Hargrove" is loaded with familiar comedy gags, but it's got so doggone much good feeling that you skip the stencils. Besides, it's got a pair of likable lads—Robert Walker and Keenan Wynn—as the rookies, and Donna Reed as the lookie . . . "The Fighting Seabees," means to be a back-slap for that useful arm of the military, but sometimes the praise gets gibbery. The thing is too Hollywood-flavored to look like war . . . "The Heavenly Body" does not refer to Hedy Lamarr, who's in it. The title comes from Wm. Powell's monkeying with the stars. Sometimes the going gets funny, but too often you can almost hear Powell's suspenders give from the strain of carrying the frail tale . . . "Tunisian Victory," action shots by the USA and British cameras, records some lovely shots of the Rats on the run, than which there is nothing more entertaining.

It's simple to spot a debater on a radio forum who has lost the argument . . . He's the first to lose his temper . . . Have a nifty innovation: The recordings of Dorothy Parker's witty monologs—by stage stars . . . Some critics objected to a fine film, "The Purple Heart," because, they complained, it made us hate Japs . . . All right, doctor. I'll go quietly . . . Add invitations to murder: Swingsters who mangle the gay "Oklahoma" lilts . . . The war film, "Tunisian Victory," is the best yet. Keeps you sitting on the edge of your suspense . . . Variety reports that Movieburg is losing interest in bandleaders "because they lack acting ability" . . . Sure took H'wood a long time to find it out . . . If the film biz depended on acting ability—Hollywood would have only one actor—Spencer T.

Good to see Fred Allen climbing in the popularity surveys . . . He's one radio jester who makes an honest stab at trying something original . . . Gamblers about midtown are wagering the war'll be over in Yurrop by July 4th . . . Might be a good way to win the bet—by getting into the fracas and helping fight it . . . Here's a repeat boost for Ben Hecht's exciting book: "A Guide for the Bedevilled" . . . Don't miss it—it'll make you a better American . . . The jokes that helped kill vaudeville are now making radio writers wealthy and famous.

Elastic fingers of sunlight reaching into shadowy skyscraper canyons . . . Children bubbling with happiness—finding thrilling adventures in the fairyland of youth . . . Fresh air fiends draped across park lawns getting a kick out of breathing . . . Romancers driving out fears of insecurity around them with a personal fortress of blue skies and rainbows . . . The cool kindness of Spring mornings that drain the ache from people's souls and inspire them to attack problems of the day like a conquering hero . . . Spring busily nursing the trees and flowers that patiently waited for her during the bitter Winter months . . . The forest fire of noise that blazes along the Main Stem, destroying the silky calm the season brings . . . Lovely stenogs discussing their sweethearts during lunch hour, putting a period at the end of each sentence with a dimple.

The natural snob near the East River: A private park where children aren't allowed . . . Skyscraper peaks holding tiny pools of sunshine . . . Harlem's elegant boulevard lined with well-manicured dainty trees, but flanked by miserable dwellings . . . Pasty-faced Main Stemmers blinking in the afternoon sun as if it was a stranger they wanted to avoid . . . Silence flooding the park after midnight when each little hush holds a mystery of its own . . . The farm inside a big city—on upper Tenth Ave.

shington Correspondent

an facilities for develw models of military are being enlarged, personnel is being avoid a tragic thing happened on several . New models of planes sent into battle before e thoroughly tested in atories of the national committee for aerone of the government least known because s work has been secret, hich has made as great bution toward winning as any civilian agency.

etermined effort to gain of the air and save thouives by hastening victory, improving the performmerican aircraft the NACA increase its present staff 5,000 technicians by 1,500 men and women. The Langley Field, Va., which largest staff, will be inby about 750. The Clevelatory will get about 550 loyees, and the research Moffett Field, Calif., near will be increased by about technicians.

ion depends upon the men en who staff these laboratre than any others to keep the Nazi scientists in deaircraft that will take and trol of the skies. If the were to design aircraft that dy and outshoot our own—responsible for American lesign declare that possibilthe war in the air over ight come to a stalemate.

my and navy have recogupreme importance of oratories by giving their s special draft considerathey are inducted into the d then transferred as inservists. They are always r active duty; but they do uniforms and they receive ay and United States Civil status.

or Engineers Needed.

sent there are needed aero- mechanical and electrical s of junior grade. They re-,400 a year. Physicists, ticians and naval archihe same grade are needed. n, such as instrument mak- makers, electricians, met-, pattern makers and airechanics are needed. They prevailing rates of governy on an annual basis.

may qualify for a variety ions. Those with skill in atics and physics are aso research projects, while h training as stenographers, nd clerks are also needed.

e committee is not looking r just ordinary help. The which these people are on are among the most vital uccess, and the committee g only for unusual young d women, who can be adas vacancies occur—people oyalty and intelligence and an be depended upon.

ommittee was born in the from the necessity of our ervices for airplanes that mpete with those of the enen war broke out in Europe leadership in aircraft develhad passed from American In March, 1915, congress auan advisory body to be apby the President and to ithout compensation.

ership, increased from 12 to 29, included heads of milival and civil aeronautical tions of the government, of au of standards, the weather and the Smithsonian instind specially qualified mem- civil life. The chairman ed annually. The paid staff d by Dr. George W. Lewis, of aeronautical research, John F. Victory, secretary committee, who directs its trative work.

rst appropriation was $5,000 for five years. With that start the committee set gaining for America a posieadership in military flying. CA emerged from World War research laboratory buildangley Field, and with its d tunnel under construction. propriations of about $200,ear in the era of disarmament and peace treaties, this laboratory laid the foundation for the new science of aeronautics, which again brought leadership to America.

Nazi Research Expanded.

But when Hitler came to power in 1933, he recognized that he must have the strongest air force in the world if he was to subdue the world. With foresight and intelligence, Germany began by concentrating upon scientific research. German laboratories were expanded and multiplied, until at the time of the Pact of Munich the German aeronautical research establishment had become five times the size of that of the United States. But not until Germany was convinced that it could make aircraft superior to that of any other nation did it go into mass production.

A FIGHTER PLANE, the Brewster XF2A—1, is shown mounted on struts in the full scale wind tunnel, ready for testing. The struts are connected to instruments in the room below the platform, which record the various stresses which the plane undergoes in this largest wind tunnel in the world. (All pictures are official photographs released by the National Advisory Committee for Aeronautics.)

The NACA recognized the menace, and in 1937 started a study of the relation of its organization to national defense in time of war. The result was a doubling of the research facilities at Langley Field, and the authorization by congress of two additional major research centers—the Ames Aeronautical laboratory at Moffett Field in 1939 and the Aircraft Engine Research laboratory at Cleveland in 1940.

These are operated in close teamwork with the military services and the aircraft industry. It works like this: Suppose the army air forces want a certain aircraft manufacturer to produce a new type of pursuit plane. The design engineers at the factory confer with experts of the materiel command of the air forces at Dayton, Ohio, and agree tentatively upon general design and specifications. Both groups then confer with NACA experts at Langley Field to incorporate the latest knowledge gained through research.

NACA Checks New Models.

The program calls for the factory to go into production by a certain date. The manufacturer assembles tools and material and makes contracts for sub-assemblies. The army materiel command plans and provides the military equipment, including instruments, armor and armament. The NACA responsibility involves, first, making of dynamically balanced small flying models for experimentation in its free-spinning wind tunnel and in the free-flight wind tunnel.

The free spinning wind tunnel is a vertical tube 20 feet wide with a propeller mounted on the top and drawing air upward. Into the middle of this ascending column of air the airplane model is tossed with its controls set to continue to spin. The controls operated by remote electromagnetic force, are moved just as a pilot would move them to bring the plane out of the spin.

IN THE SMALL wind tunnel, tests are made on new models, many of them highly secret.

If the controls are effective, the airplane recovers by going into a dive and is caught in a net. If the controls are not effective, the model continues spinning. Adjustments are made in the control surfaces until satisfactory control is attained. Information to revise the design of the controls is relayed at once to the army and to the manufacturer, and is used to correct the design.

A second model is prepared with similar care and is tested in the free-flight tunnel. That is a wind tunnel 12 feet in diameter inclined at an angle which will permit the model to glide forward through a moving stream of air. The model is equipped with delicate electrical mechanisms which operate the controls, and which enable the research staff to determine what changes are necessary to assure, in advance of production, that the new design will be easily maneuvered and controlled and will have stability.

When these tests have been made, and the necessary information obtained, the NACA makes larger and sturdier models with solid steel cores to be firmly mounted on recording balances in wind tunnels operating at air speeds up to 600 miles an hour. These tunnels measure the lift and drag, as well as the pitching, rolling and yawing movements of the plane at various angles of attack.

Add 20 Miles Per Hour.

When the first full-sized plane is produced, it is placed on the NACA full-scale wind tunnel to determine how to increase further its speed by reducing the drag through better streamlining, or removing, or reshaping protuberances. In such full-scale tunnel tests, the NACA has never failed to add at least 20 additional miles per hour to the speed of a plane about to go into production.

Special tests are provided for particular types of planes. For high speed fighters, aerodynamic experiments are conducted in low air pressures, such as are encountered at high altitudes. In a huge domed structure, pressures are created to simulate air conditions at altitudes up to 12,000 feet.

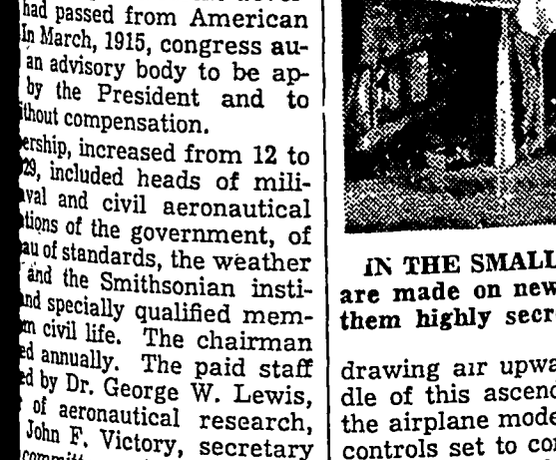
Taking off and landing abilities of seaplanes are tried out in a basin 600 feet long, containing seawater. A large scale model of a seaplane, or of the floats only, is towed behind an electrically powered crane, at speeds up to 80 miles per hour.

Experimental planes are flight tested under carefully controlled conditions, and a record is made of its performance on movie film. The test pilot is given orders by radio telephone from the ground, and he performs the turns, loops, dives, climbs, and other maneuvers.

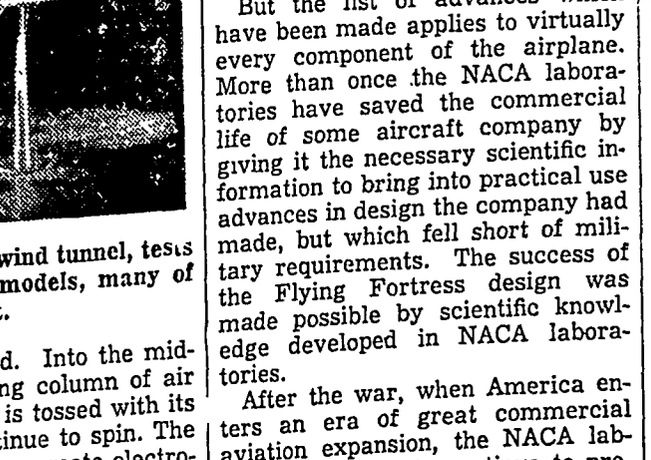
One of the recent outstanding contributions of the Ames laboratory has been the use of exhaust heat from airplane engines to heat the leading edges, wings, tail surfaces, and windshields of airplanes to prevent the formation of ice. This has permitted safe flight under conditions that otherwise would have grounded planes. The ice hazard has been eliminated.

But the list of advances which have been made applies to virtually every component of the airplane. More than once the NACA laboratories have saved the commercial life of some aircraft company by giving it the necessary scientific information to bring into practical use advances in design the company had made, but which fell short of military requirements. The success of the Flying Fortress design was made possible by scientific knowledge developed in NACA laboratories.

After the war, when America enters an era of great commercial aviation expansion, the NACA laboratories expect to continue to provide the basic scientific research upon which American air supremacy is based. It now has a plant worth some $70,000,000, which at least equals the research facilities of the Germans. It probably will continue to be in competition with German scientists and facilities, but our armed forces hope congress never again will let it fall behind in staff and equipment.



HIGHLY trained specialists read the complicated dials that indicate results of the various tests.



AN EXPERT metal worker carefully machines a metal air foil to exact specifications.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

PAUL WINS RECOGNITION FOR GENTILE CHRISTIANS

LESSON TEXT: Acts 15:23b-29; Galatians 2:1, 2, 9, 10, 20, 21.

GOLDEN TEXT: Being therefore justified by faith, we have peace with God through our Lord Jesus Christ.—Romans 5:1.

Problems and differences of opinion need not be harmful if they are properly met and honestly settled. In the church at Antioch a question had arisen which had to be answered, authoritatively, and once for all.

The early converts of the church were naturally from among the Jews, and they carried with them into their new-found faith the traditions of their religion. Some of them did not recognize that the salvation they had in Christ was entirely by grace apart from any works of the law. They not only felt that they must observe the law, but insisted that the Gentile believers must also fulfill the Jewish rite of circumcision. This promptly raised the question whether Christ alone could save, or if men were saved by grace plus works.

To settle this matter, Paul and Barnabas went up to the church at Jerusalem, and there a great council discussed it freely, and came to a decision which was then transmitted by letter and a committee. We find—

I. Fundamental Principle Established—Salvation by Grace (Acts 15:23b-29).

The believers at Antioch were to abstain from those things which would hinder their spiritual progress and harm their testimony. That was important and right, but it must not be allowed to confuse them regarding the basis of their salvation. They were not saved by works, no, not even by the most commendable.

Salvation is by grace, through faith, not of works, lest any man should boast (Eph. 2:8, 9). That principle, which is absolutely foundational in all Christian thinking, was established then, and is valid and blessedly true for all time.

Is it not strange, then, that all through the church's history there has been a determined effort on the part of some in the church to add something to God's redeeming grace as a ground for salvation? One would think that all the peoples of the world would rejoice in such a gloriously simple and altogether divine redemption.

It is well worth our attention to observe how the matter was handled. Observe the plain rebuke given to the teachers of error in verse 24. It is no light matter to trouble and mislead the souls of men, by injecting our worldly wisdom or our opinions, when we should be teaching the truth of God's Word.

Note that there was fine courtesy in sending the message to the church at Antioch by messengers who were men of distinction and great spiritual courage. It was not a case of abruptly telling this new church what to do, and end it there, but of using this trying situation as a means of drawing the churches together in fellowship and mutual faith.

II. Sound Practice Observed—Walking by Faith (Gal. 2:1, 2, 9, 10, 20, 21).

The life of grace is not just something to be written or talked about, or to glory in, although it is all of these. It is to show forth in the daily walk of the Christian.

Paul in Galatians 2 tells of his experience in Jerusalem, of his meeting and discussion with the brethren. It was all of vital importance to him and to the cause of Christ, but it is not the record of an academic argument, or the vaunting of a personal victory which he presents.

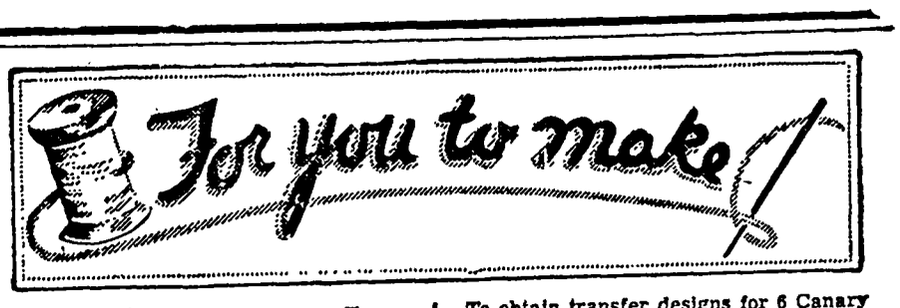
He rises to the high point of Christian experience, the realization of the fact that a believer has died to self. He is crucified with Christ—and yet he lives.

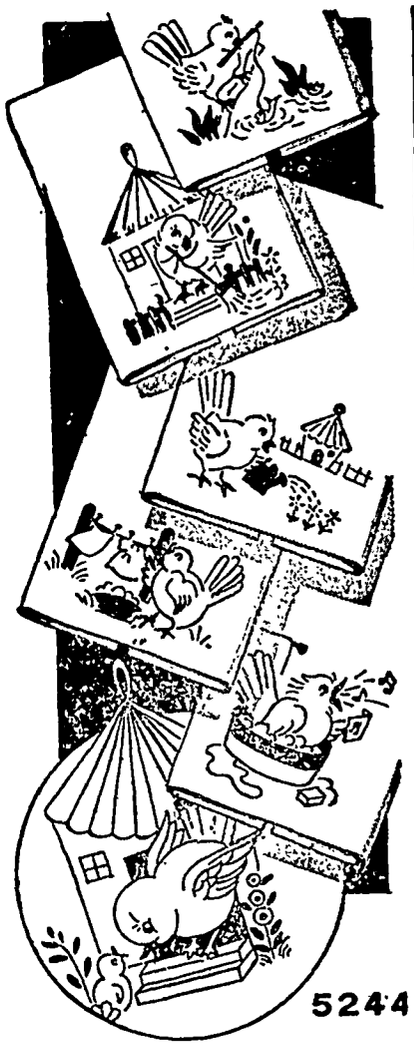
Yes, he lives in a newness of life which is not his own, but Christ living in him. There is the secret of real Christian living—a complete acceptance of all that Christ is, in and for the believer.

This truth is at once deeply spiritual and completely practical. Again we say, it is not something about which one theorizes. It is an actuality—something which Christians can and do live out in daily experience. It is "the life which I now live" of which Paul speaks, and that is by "the faith of the Son of God," who loved us and gave Himself for us.

To fail to receive and appropriate this grace by seeking to be made righteous through the deeds of the law is to deny the need of the death of Christ, in fact, to make it a vain thing.

Some may feel that all this is too deeply theological for them, but it really is not, for God does not expect us to explain it, but only to accept it. This is His work, and it is indeed wonderful in our sight (Ps. 139:6), but not too wonderful to receive by faith, to rest and rejoice in, and to declare to others.





THE first days of spring are no more colorful than the colors of this gay little canary, done life-size and in bright yellow with flowers of red, green and blue. Each design for tea towels, breakfast cloth or place doilies is 6 by 6 inches. Embroider them in simple line stitch for gifts!

To obtain transfer designs for 6 Canary Towels (Pattern No. 5244) color chart for embroidering, send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Ancient Rose Bush

Unless it has been crushed under the Nazi heel, a rose bush planted 1,000 years ago is still growing in Germany. Set by an emperor in a garden near Hildesheim, the bush was known to be blooming up to the time of the war.

NONE SURER St. Joseph ASPIRIN WORLD'S LARGEST SELLER AT 10¢

Muffins your family will love!

*Prune or Bacon Muffins

Kellogg's ALL-BRAN Muffins

2 tablespoons shortening
¼ cup sugar
1 egg
1 cup Kellogg's All-Bran
⅝ cup milk
1 cup sifted flour
½ teaspoon salt
2½ teaspoons baking powder

Blend shortening and sugar thoroughly. Add egg and beat well. Stir in All-Bran and milk. Let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture. Stir only until flour disappears. Fill greased muffin pans ⅔ full. Bake in hot oven (400°F.) about 30 minutes. Yield: 8 large muffins.

* For prune muffins, add ½ cup well-soaked, pitted and chopped prunes to dry ingredients.
* For bacon muffins, add ¼ cup crisp, diced bacon to dry ingredients.

And remember, too, KELLOGG'S ALL-BRAN by itself is a rich, natural source of the whole grain "protective" food elements — protein, the B vitamins, phosphorus, calcium and iron!

SORETONE
soothes fast with
COLD HEAT* ACTION
in cases of
MUSCULAR LUMBAGO OR BACKACHE
due to fatigue or exposure
MUSCULAR PAINS
due to colds
SORE MUSCLES
due to overwork
MINOR SPRAINS

Naturally a man looks old beyond his years when he's sore from lumbago or other muscle pains. The famous McKesson Laboratories developed Soretone Liniment for those cruel pains—due to exposure, strain, fatigue or over-exercise. Get the blessed relief of Soretone's *cold heat* action;—

1. *Quickly Soretone acts to enhance local circulation.*
2. *Check muscular cramps.*
3. *Help reduce local swelling.*
4. *Dilate surface capillary blood vessels.*

Soretone contains methyl salicylate, a most effective pain-relieving agent. There's only one Soretone—insist on it for Soretone results. 50¢. A big bottle, only $1.

MONEY BACK—
IF SORETONE DOESN'T SATISFY

*Though applied cold, rubefacient ingredients in Soretone act like heat to increase the superficial supply of blood to the area and induce a glowing sense of warmth.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Shop in Klemme on Wednesday nights.

Mr. and Mrs. Mike Kinsella, Pat and Junior, were callers at the Dan Webner home Monday evening.

Mr. and Mrs. Emil Beier were at Clear Lake Sunday for a visit with Mrs. Beier's mother

Mr. and Mrs. Roy Schaefer and children visited at the Fred Gates home at Clear Lake, Sunday.

Mr. and Mrs. Les Hartbeck entertained to dinner Sunday Rev. Calvin Grosshuesch and family, and Mr. and Mrs Fred Barz.

Mr. and Mrs. Bert Mathews and Mrs. Mary Petersen of Clear Lake were dinner guests Sunday at the J. N Day home.

Mr and Mrs. J. A. Chambers and daughter Thelma, were dinner guests Sunday at the home of Mr. Chambers' brother at Algona.

Mr. and Mrs. Verner Lewis entertained to dinner Sunday Mr. and Mrs. Wallace Pavey; Mrs. John Clements and baby son, James Lloyd; Mr. and Mrs. Benn Coobs and Peggy; and Mrs. Don Speer.

Mr. and Mrs. Burton Hanson of Wesley and Mr. and Mrs. Arthur Wellemeyer and John Griewe of Klemme were dinner guests Sunday at the Donald Bacon home near Leland.

Dr. Missman attended a medical meeting in Des Moines last Wednesday. Mrs. Missman, who had been in Des Moines for a few days visiting with her sister and family, returned home with him Thursday.

Rev. and Mrs. H. E. Harvey and daughter La Nell, visited with Miss Bernice Tanner at the Mercy hospital, Sunday. Miss Tanner underwent a major operation last week and is reported to be making a good recovery at this writing.

Mr. and Mrs. George Thieman; Mr. and Mrs. E. J. Schneider, and Miss Marie Blank drove to Des Moines Monday for a visit with Miss Stella Thieman, daughter of Mr. and Mrs. Geo. Thieman, who was ill and in bed.

Mrs. P. M. Wilson returned Monday afternoon from Des Moines where she spent a week visiting with her daughter, Mrs. Robt. Risser and son, Bobbie. Bobbie was very ill with a siege of measles but was quite well when Mrs. Wilson returned home.

Mrs. Frank Coyier and daughter Marcella, and son Pvt. Harley Coyier of Clear Lake, who is home on a furlough from the Aleutian Islands where he was stationed for a year, and Mrs. Mike Kinsella of Ventura, were visitors at the Dan Webner home last Tuesday.

Manager Glen Bridges is making the office building at the Klemme Cooperative Grain Company more attractive by the installation of a short picket fence on the north side of the building. Above the fence will be a sign carrying the Company's name. It is a nice improvement.

Mr. and Mrs. Wm. Beier of Goodell were dinner guests Sunday at the home of Mrs. Daisy Lemke.

Mr. and Mrs. John Rapp were at Mason City Tuesday where Mrs. Rapp is receiving treatment at the Mercy hospital. Mrs. Rapp has been ill for several months but is now greatly improved.

Mrs. Asa Arnold of Ames came Friday and spent the week end in Klemme visiting with relatives and friends. Mrs. Arnold had received a cablegram from her husband, Sgt. Asa R. Arnold, stating that he had arrived safely at his destination over-seas. He is probably in the British Isles.

Carpenters have been at work the past week doing some remodeling at the Reformed parsonage. Rev. Grosshuesch's parents from Wisconsin will reside at the parsonage and the study room on the first floor was made into a bedroom and a bathroom was built on the house.

You can always buy it in Klemme for less. Trade in Klemme.

The local Red Cross needs more old felt hats, men's or ladies'. Give your old hat to the Red Cross.

After this week Klemme stores will be open on both Wednesday and Saturday nights.

Mrs. Asa Arnold of Ames, and Mrs. Lena Schroeder were dinner guests at the home of Mr. and Mrs. Fred J. Arnold, Saturday evening.

Mrs. Gifford, and the Misses Patricia Kudje, Julia Bell and Eunice Larsen spent the week end at Cornell College, Mt. Vernon, and at Waterloo.

Sumner Trumbell was back on the job again Tuesday carrying mail on route one after an absence of about ten days due to illness, during which time George Lawhorn drove the mail route.

Mr. and Mrs Dan Webner and Etta Lou; Mrs. Kenneth Schlawin and Bobbie, and Mrs. Willard Palmer and Dorothy, were visitors at Mrs. Etta Haskins' home in Garner Sunday afternoon.

Why Lady Bountiful's Face is Red. The story of a British woman who used her employer's funds to make others happy, much in the way Robin Hood did in the long-ago, will appear in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American 1tp

Mr. and Mrs Paul Grange of Mason City returned home Saturday from Greenville, Texas, where they spent ten days visiting with their son, Lt. Dorance Grange, who is a flying instructor at Majors Army Air Field. Mrs. Grange had the good fortune of taking a 25 minute ride with her son in a light army training plane.

Mr. and Mrs. R. A. Jorgenson drove to Des Moines on business last Thursday and from there took the train for Kansas City to spend the week end with Mrs. Jorgenson's brother-in-law and sister, Mr. and Mrs. Hugh Chapman, and her father, Titus Davis. Lt. Ray Jorgenson, Jr. and family of Dodge City, Kansas were also at the Chapman home spending a week's leave from army work.

KLEMME GIRL SCOUTS HELD MEETING MONDAY EVE

The Klemme Girl Scouts held their eighth regular meeting April 24 at the schoolhouse at 7:15 p. m We played two singing games, Shoo Fly, Shoo, and Four In A Boat, led by Mrs. Schaeffer. In Patrol Corners roll call was answered with the name of a flower and dues were paid.

The For-Get-Me-Not Patrol did badge work and the White Rose Patrol spent the remaining time doing second class work in Health and Safety Field.

Posters were made containing pictures of foods for the three healthful meals. Irene reported on how France Celebrates Christmas, told about Anna Howard Shaw, an outstanding immigrant who became a citizen of the U. S. and prepared a list of household tasks.

Marjorie also prepared the story of nutmeg and showed us an original drawing and sketch maps.

Audra completed part of second class Homemaking.

The White Rose Patrol studied good posture with Mrs. Chambers and Mrs. Wicks. Peggy Coobs made a report on posture.

HELLO, FOLKS!

Mr. and Mrs. Curley Lucas of Receda, California, are the parents of a baby daughter, weight 6 lbs., 14 oz., born to them April 17th.

Mrs. Lucas is a daughter of Mr. and Mrs. Henry Keeper of Kleme. Mrs. Keeper is at the Lucas home helping care for the new daughter who has been named Lois Ann.

CARD OF THANKS

I want to take this means of expressing my sincere thanks for the visits, cards and flowers which I received during my illness.

(1tp) —Mrs. Lynford Back.

A weary soldier, fresh from the trenches moved slowly up the aisle of the theater.

"Oh, I say, soldier," said the usher, "You can't sit there. The front is reserved for officers."

"Well, the one I just came from wasn't!" the soldier snapped back in reply.

"Do you know the difference between a cigaret and a stick of dynamite?"

"No, what what is it?"

"Well, you had better find out!"

SENIOR CLASS PLAY IS NEXT WEEK THURSDAY EVE.

"Little Women," will be presented by the Senior class of Klemme High School on Thursday, May 11, in the High School Auditorium.

The play is an extremely clever adaption of Louisa M. Alcott's book and follows the major events very closely. It begins with the four "little women" when they are young and takes them through maturity. The four little women are Meg, Jo, Beth and Amy, played respectively by Corrine Merkel, Julia Bell, Clara Koehler and La Vohn Schlawin.

It is a very different type of play as well as a different one as the setting, furniture and clothing must all conform to the correct time in our history. The time is during the Civil War and covers approximately six years of the "little women's" lives.

This play cannot be typed as either a drama or comedy as it is full of heart-warming scenes that will tear at the heart and still just as many that will provoke a smile and hearty laugh. Those that have read the book will remember how one minute they cried and the next minute laughed. Since the book had so many readers both young and old this is a play which should appeal to everyone.

Others in the play besides those mentioned above are: Eunice Larsen, Richard Legge, Mildred Busse, Mavis Nuehring, Allen Lau, Carroll Etchen and Larry Van Syoc Mrs. Howard Campbell is directing the play.

PREVENT CHICK LOSSES BY PROPER MANAGEMENT

Iowa poultry producers can avoid last year's 32 percent death loss of chicks and also save thousands of tons of feed wasted in dead chicks through better management, says W. R. Whitfield, extension poultryman at Iowa State College.

Few, if any, authentic cases of chicks have been reported, according to Whitfield. But millions of chicks die because of starvation. It is especially important that the chicks have starting mash before they are more than 2 days old, Whitfield states. This not only starts a normal feeding habit but also prevents impaction of the gizzard with foreign material, due to the chicks' picking at litter instead of feed.

Adequate Feeders

As soon as the chicks are put out in the brooder house, they should have adequate feeders and watering pans, well distributed throughout the brooder house. At least one 4 foot feeder for every 50 chicks is recommended. Fewer feeders will cut down the labor involved in keeping them filled.

Widely fluctuating temperatures during April and May— the chick brooding months—not only cause the chicks to bunch at one side of the hover, resulting in bowel trouble and death loss, but may cause pneumonia in the flock.

Avoid Crowding

Too many windows on the south side of the brooder house causes temperatures to build up during the day and drop at night. To remedy this, cover all but one of the south windows with cardboard and install one window in the east end and another in the west end of the brooder house. This should give a suitable temperature if the brooder is termostatically controlled.

Perhaps the most difficult thing to surmount is the overcrowded brooder house. It is false economy, too. Brooder house space and fuel are cheap when compared with dead or stunted chicks and the feed invested in them. The only solution is to give the chicks more room. Not more than 2 chicks to the square foot should be allowed in the house, up to the time the chicks are 8 weeks of age.

"These are sateen bloomers," said the clerk.

"Well, I want some that have never been used before," said the customer.

Klemme Couple Surpised On Silver Wedding Anniversary

MR. AND MRS. LESTER STILLE MARRIED 25 YEARS

Surprise Anniversary Dinner Held For Them Sunday

Friday, April 28th, was the Silver Wedding Anniversary of Mr. and Mrs Lester Stille, but the event was not celebrated until Sunday which turned out to be a surprise dinner planned by their daughter, Ruth of Des Moines and Mrs. R. C. Ludeke of Clear Lake.

While Mr and Mrs Stille were attending church, preparations were being made at the Stille home The table was decorated with a beautiful bouquet of red roses presented by Ruth to her parents and two beautifully decorated cakes, one from Ruth and one baked and decorated by Mrs Ludeke served as the centerpiece.

The guests who had arrived all brought well filled baskets for the big wedding dinner

The following guests were present: Ruth Stille, Des Moines; Lois Stille, Klemme; Wm. Stille, Klemme; Mrs. Lydia Hartzel, Klemme; Mr and Mrs. R. C. Ludeke, Stanley and Marilyn, Clear Lake.

Mrs. Jack Dominoc and daughter Jill, Clear Lake; Mr. and Mrs. Lee Anderson, Charles City; Mr. and Mrs Ben Hartzell, Grace and Dale, Britt; Clarence Hartzel and family of Britt; Mr. and Mrs. Art Jass and family, Garner.

Mr. and Mrs. J D. Bailey, Cedar Falls; Mr and Mrs. Morris Bailey and family, Mason City; Mr and Mrs. A. G Koerner, Klemme; Mr. and Mrs. Aug Lau, Klemme; Mr. and Mrs. J. E. Stille and Mrs. Donald Turgasen, Klemme; Mrs. Emelia Arnold, Klemme; and Mr. and Mrs. Harry Gibbs and Isabell, of Klemme.

NORTHERN LUMBER CO. HAS NEW PAINT DEPARTMENT

Factory Representative At Northern Wednesday And Thursday

The Northern Lumber Company here has put in a new paint department, featuring the B. P. S. line of products.

A representative from the B. P. S. factory will be at the Northern's show room this week Wednesday and Thursday for the opening of the new department and will meet customers to explain the B. P. S. line and discuss painting and decorating problems and offer suggestions.

METHODIST WILL HOLD SUB-DISTRICT MEETING HERE

Missionary From India Will Speak Morning And Afternoon

A Sub-District meeting will be held at the Klemme Methodist Church on Wednesday, May 10th, beginning at 9:30 a. m. with a noon lunch followed by an afternoon program.

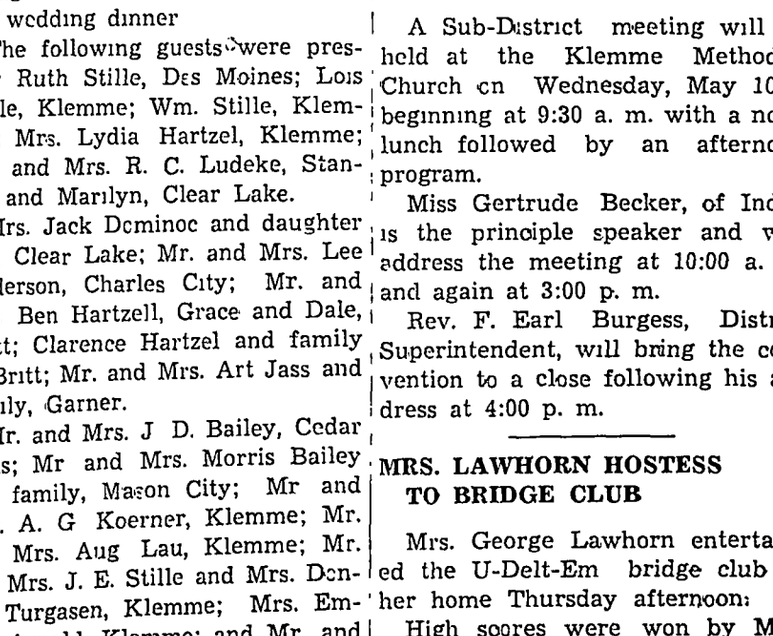
Miss Gertrude Becker, of India, is the principle speaker and will address the meeting at 10:00 a. m. and again at 3:00 p. m.

Rev. F. Earl Burgess, District Superintendent, will bring the convention to a close following his address at 4:00 p. m.

MRS. LAWHORN HOSTESS TO BRIDGE CLUB

Mrs. George Lawhorn entertained the U-Delt-Em bridge club at her home Thursday afternoon.

High scores were won by Mrs. Art Kudje, Mrs. R. A. Jorgenson, and Mrs. P. M. Wilson.



PALS IN SERVICE—Cpl. Wayne G. Buseman (left) and Sgt. Dwaine A. Johnson, Klemme boys, started to school together, were graduated in the same class, enlisted in the service together and have been together ever since. Their birthdays are in the same month. They took training together at Ft. Des Moines, Iowa, at Ft. Leonard Wood, Mo., then went to Camp San Obispo, California. They left for overseas in August 1943 and landed in Hawaii. Since February they have been in New Guinea and are serving in the field artillery.

KLEMME GIRL WINS NATIONAL HONOR IN MUSIC CONTEST

Miss Patricia Kudje, daughter of Mr. and Mrs. Arthur Kudje of Klemme, brought highest honors to herself and the Klemme high school when she won a first place, with national honors, for her alto saxophone solo in the music contest at Carroll, Iowa, last Friday.

Miss Kudje played "Concert in E Flat" by Glazaunoy and Petiot, and was accompanied on the piano by Mrs. Turgasen.

Miss Kudje is a junior in Klemme high school this year.

Last year Miss Kudje won a first place rating in the state contest, and this year entered the national competition, winning one of the few first places with national honors in the high school contest.

Miss Kudje was accompanied to Carroll by Supt. and Mrs. Leo Esbeck and Prin. Mrs. D. O. Turgasen.

ELSIE WARD GRADUATES AT IOWA UNIVERSITY

Miss Elsie Ward, daughter of Mr. and Mrs. Frank Ward of Klemme, graduated from a four year course in Home Economics at the University of Iowa at Iowa City on Sunday, April 23rd.

Miss Ward expects to remain in Iowa City for a few weeks and will then come home for a vacation. She expects to teach this coming year.

EAR CORN IS IN DANGER OF MOLD

Tests Show Some Corn Taking Up Rather Than Losing Moisture Lately

Iowa farmers who have not checked conditions of stored ear corn which was husked early last fall might profit by doing so, according to I. W. Arthur, extension economist, and Joe L. Robinson, agronomist, at Iowa State College They report that in eastern and central Iowa, particularly, continued wet weather has caused molding in the cribs.

The condition is difficult to detect by examining the outside of the crib, they state. Spoilage often starts in the center of the crib, where the elevator drops loose husks and shelled corn into a solid mass which prevents ventilation. Coming of warmer weather is sure to speed up the spoilage. In general, corn that contains more than 15 to 18 percent moisture cannot get through hot weather without spoilage from mold.

Move Corn

Moving such corn to market not only may avoid trouble later this summer, but would also greatly benefit the war effort. The war production program of this country is treatened with interruption because of a shortage of corn available to war industries. The flow of corn from farm to factory has fallen off to a mere trickle. As a result many processing plants manufacturing war materials may be forced to shut down.

If there is packing and mold. the corn can be let out into the driveway or moved to another crib for ventilation. If the corn is to be sold moving it now will prevent spoilage.

Moisture Increased

A farmer who is unable to judge the condition and moisture content of his corn might well get in touch with the elevator man, shellers or former corn sealers in the neighborhood, and get their opinions as to moisture content, danger of spoilage and measures to be taken.

A moisture test made on April 22, on 1942-crop corn stored on the Iowa State College farm, showed 15 percent moisture. Normally, according to Robinson, such corn would contain 12 to 13 percent moisture at this time of year. The same corn had been as low as 12 percent moisture, but now is increasing rather than decreasing its moisture content.

When you have company or take a trip, that's news. Phone 12.

LIVES IN OLD PALACE

Lt. Harold Kothenbeutel, son of Fred Kothenbeutel of near Klemme recently wrote to his wife at Garner from somewhere in England that he is quartered in an old palace in which several generations of kings had lived. He occupies a bedroom in the palace which was formerly the king's private chamber. The old castle was built at a cost of $1,200,00 and Lt. Kothenbeutel says the place is not a bad "shack" for a soldier to live in. It was built in the 14th century, and while the building has not been kept up, the grounds have been because of their historic background. Mrs. Kothenbeutel and 2 children are residing at Garner during the lieutenant's absence.

(Picture Courtesy of Mason City Globe-Gazette.)

BARIUM CARBONATE IS BEST OF RAT POISONS

Precautions must be taken in using barium carbonate to poison rats. Harold Gundersen, extension entomologist at Iowa State College warns that while barium carbonate is the best rat poison available, it is poisonous to all animals.

Baits should be placed with care. If they cannot be placed inside buildings where there are no livestock or pets, baits should be protected Gundersen suggests placing baits on a newspaper or board and leaning another board over them so that they are not out in the open. Uneaten baits should be picked up, and the surrounding area should be carefully inspected to be sure the rats did not move any.

An alternative way to protect the baits is to take a cardboard box, cut a hole—or several holes—in the side. Then set it, upside down, over the bait. The same practice should be followed in pre-baiting in order that the rats will become accustomed to going through the holes in search of food.

Hog prices during the next few months will be largely governed by the amount of government purchases, say economists at Iowa State College

WAR BONDS in action

Meat Ball Pancakes.
(Serves 6)

3 eggs
½ pound ground beef
¼ teaspoon baking powder
½ teaspoon salt
Dash of pepper
1 teaspoon lemon juice
1 tablespoon minced parsley
1 tablespoon grated onion

...at egg yolks until light, blend ...emainder of ingredients and last ...y beaten egg whites. Drop ...nfuls on hot griddle. When ...wned and puffed, turn and brown ...r side. Serve with mushroom ...e, if desired.

HOSTESS LUNCHEON MENU
Salmon Asparagus Custard
Jellied Grapefruit—Lime Salad
Whole Wheat Muffin
Rhubarb Crisp

... delicate custard with perfect ...ure is the base of this menu— ...ge-pink in color with green as... ...gus tips. Rhubarb Crisp is a ... delightful dessert very much in sea... son.

Liquor from the canned salmon contains precious vitamins and minerals; it should be used in the custard as part of the liquid and for purposes of flavor.

Salmon Asparagus Custard.
(Serves 4)

1 pound canned salmon
¼ cup salmon liquor
¾ cup chicken broth (or 1 chicken cube dissolved in ¾ cup hot water)
1 cup light cream
3 eggs, slightly beaten
Salt, pepper
1 cup asparagus tips (cooked in boiling water for 10 minutes)

Flake salmon into large pieces. Scald salmon liquor, chicken broth and cream. Add to slightly beaten eggs. Season to taste with salt and pepper, then add flaked salmon.

Arrange asparagus tips around edges of ramekins so that the tips show just above the edge of the ramekin. Pour custard mixture into ramekins. Bake in a pan of hot water in a moderate (350-degree) oven for about 45 minutes until custard is set.

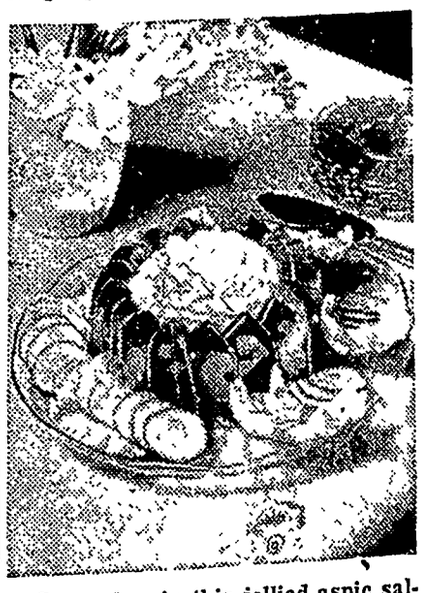
Rhubarb Crisp.
(Serves 5 to 6)

¼ cup butter or substitute
¾ cup sugar
1 egg
¼ teaspoon nutmeg
¼ teaspoon vanilla
1 cup toast cubes
2 cups cereal flakes
2 cups diced fresh rhubarb

Blend ¼ cup sugar with butter. Add egg and beat well. Stir in nutmeg, flavoring, toast cubes and cereal flakes. Spread half of the mixture in buttered baking pans and arrange rhubarb evenly over top; sprinkle with remaining sugar and cover with remainder of mixture. Bake in a moderate oven (375 degrees) about 40 minutes, until rhubarb is tender. Serve warm with cream, if desired.

HOSTESS BUFFET DINNER
Ham Ring with Creamed Potatoes
Garnish: Spiced Peaches
Buttered Green Beans
Cucumber Pear Aspic
Hot Rolls — *Spread*
Devil's Food Cake
Beverage

A few large, attractive platters will hold the menu placed on a large dining room table or buffet for easy self-service. As soon as the ham ring is unmolded, spoon creamed potatoes into center, and garnish outside of ring with parsley and spiced fruit. Set green beans in vegetable dish, salad on another large platter.



Cucumber in this jellied aspic salad is just the thing to give tartness to a bland meal. Make the salad in a large mold and serve from buffet for real effectiveness.

Cucumber Pear Aspic.
(Serves 6)

1 package lime-flavored gelatin
1¾ cups hot water
2 tablespoons vinegar
½ teaspoon salt
1 cup drained diced cucumber
1 cup diced pears

Dissolve gelatin in hot water. Add vinegar and ¼ teaspoon salt. Chill until slightly thickened. Season cucumber with ¼ teaspoon salt; add pears. Fold into slightly thickened gelatin. Turn into mold and chill until firm. Garnish cucumber slices and crisp lettuce.

THE REDSKIN AND THE RACES

One of the high spots in the Florida racing season is the day, recently observed, when the Seminole Indians were admitted to the track free and spent the afternoon in the infield. It is a colorful annual spectacle. The Red Man in his native costumes squats or meanders around the infield while the White Man does his stuff at the betting windows.

And you don't need the customary three guesses to decide which is the Indian.

—*—

We just discussed this idea with an old Indian, Chief Heap-Much-Puzzled. "This is quite an idea letting the Indian inside a race track once a year," we said.

"White Man much good to Indian," the chief replied. "Yeah fair."

"How?" we asked.

"White Man let Injun come to track but no let him near betting windows," said the chief.

"We never thought of it quite that way," we said. "We thought the Indian was kept from the windows just because he didn't have two dollars."

"Indian no think White Man small enough to look at it like that," said the Redman.

—*—

"What does an Indian think of his annual view of the White Man at the races?"

"Heap interesting. Very good for papoose. Papoose watch White Man running around in circles trying to run a clamshell into string of beads. Make fine lesson. Red Man have no juvenile problem."

"How does it affect the adult Red Man?"

"Adult Injun watch race crowd ten minutes and know why White Man so screwy. One thing puzzle Red Man much."

"What's that?"

"White Man has plenty wampum, plenty clothes, plenty food. Why he always in such hurry to get more wampum?"

"He does it for sport," we explained.

"Injun no understand that kind of sport. Injun think sport means to hunt, fish and shoot."

"That's what the White Man does at a race track. He hunts for good things, fishes for tips and shoots the bankroll."

—*—

"No fun hunt horse. More fun hunt deer."

"Yes, but all race-track addicts think a horse is going to turn out to be a deer. We notice that the Indians at a race track sit down most of the time, yawn openly and often go to sleep. They never stand on a chair and yell."

"Indian got more sense."

"They never curse a horse."

"No. Horse good friend of man."

"They never curse the boy on horseback."

"Boy on horseback okay think Indian."

"And we have never yet heard a Red Man yell 'Foul,' 'Thief' or 'Robber' at the races."

"Red Man not sure enough to yell such things."

—*—

"At the end of the day we have noticed that the Indian squaws look fresh, and gay and happy while the white ladies look frazzled, exasperated and all in. How come?"

"White lady more civilized," said the chief. "Indian squaw uncivilized."

"Oh yeah!"

"Oh plenty yeah," concluded the Indian.

* * *

Renaming the Stars

A. P. Herbert has the Idea of the Century. In fact of all the centuries. Realizing that the Greatest Show on Earth has no popular following and no mass audiences because of the difficult names pinned on the performers, he proposes that something be done about it.

—*—

What show is he talking about? The heavens at night! The great boundless array of stars and constellations.

—*—

Mr. Herbert would label the stars so that Joseph P. Doakes could feel a warm interest in them. And we second the motion. Only an astronomer could oppose it. And he could do so only because he wants to keep the heavens all to himself, and has the necessary reference books.

—*—

The man or woman never lived who didn't wish to know the stars and understand the heavens. But what happens? One or two flirtations with all those tongue-twisting names, and it's all over.

* * *

One bottle of Scotch and a case of beer are being given to soldiers who capture a Jap on Bougainville. We thought Scotch and beer worth more than that everywhere on earth.

* * *

"Spare Parts of Poultry Provide Food Novelties"—Headline.

SNAPPY FACTS ABOUT RUBBER

Navigation is impossible even for a canoe on some of the tiny branches in the Amazon headwaters in the remote Bolivia rubber country. Air transport is now serving in the rubber development in these areas. Tappers cut their way through the jungle, with from 100 to 150 wild rubber trees serving as each tapper's route.

Tire experts hold that greater mileages are returned from truck tires if, when they are new, they are "broken in" for several thousand miles under normal or sub-normal conditions. Using new tires on front wheels before shifting them to the rear is one way of "seasoning" tires.

Ink Spots And Spatters

By Jergie

THE NEW DEAL "STRONG ARMS" PRIVATE BUSINESS

We have no sympathy for the mail order houses, but the Chicago "incident" has made us wonder if the same kind of New Deal "invasion" might not also strike at other businesses, factories, farms and even homes. None of them are now immune from the same kind of invasion that struck the Chicago mail order house.

People in the mid-west stood aghast while troops with guns and fixed bayonets—troops drafted to fight Japs and Nazis—invaded the Chicago mail order house, forcifully carried out the president of the concern from his private office—to take it over under presidential order. All because of a dispute between employers and union heads over a wage contract. The troops which marched in had no opportunity to quibble about a wage contract. They had no choice between fighting a mail-order war or a war in Europe or the Pacific.

It is all very confusing Is this democracy, or is it dictatorship the very thing that fathers, brothers, sons, husbands and sweethearts are fighting against in the battle-fronts of the world?

To us it smells of New Deal dictatorship.

SOME MORE MONKEY BUSINESS!

Here's a bit of "poetry" that came to our desk. Perhaps you've read it before:

"On a lovely little island on a southern sea, lived a chattering tribe of monkeys; they were happy as could be.

They lived on nuts and foliage, and each had his share, there was always enough to go around and often some to spare.

While some of them were satisfied, there were some who seemed to feel that if they would have a leader, they would get a better deal.

So they had a big election and they did the thing up grand. They chose a great big monkey, the very bravest of the band. He made a great acceptance speech and said. "My friends, I guess you have named the proper monkey to straighten out this mess."

He said, "If we would prosper, now plainly can I see, we must take half the cocoanuts and throw them in the sea. And then a little later when the peanuts start to grow, we will have to get together and dig up every other row."

So they dug up half the peanuts; they worked for days and days, for he had promised them a profit on the ones they didn't raise.

But later in the season in the leader's first report, they found the crop of cocoanuts was very short.

Now the little baby monkeys with their hair as soft as silk, depend upon the cocoanuts for their supply of milk.

And before the common monkeys knew what it was all about, the cunning ones cornered all the food and they were left without.

Now, the stronger ones are hungry and the weaker ones are dead, and the scheme to help monkeyland is sadly in the red.

Of course, it's monkey business, and we shouldn't make a fuss, but what if some big ape should try a stunt like that on us?"

Hancock County National Bank vs. Martin E. Thompson. Law. The Plaintiff asks for judgment on a promissory note.

Marie J. Halverson vs. Vernon C. Halverson. Equity Divorce.

John S. Geibel, et al vs. George H. Geibel et al. Equity Case. to quiet a title.

BETTER IOWA GARDENS

An unusally cloudy, wet April has set the garden season back. And, happy is the gardener who protected his garden seeds with the proper seed disinfectant such as Spergon, Arasan, Semesan, or other dust. It's a good reminder that we should disinfect seed that is to be planted during May and early June.

* * *

Even though we have had a setback in the garden season, early cabbage and broccoli should be planted as soon as the soil is dry enough to work. Small successive plantings of beets, carrots, kohlrabi, lettuce and radishes may be made until May 15. Plantings of beets and carrots may be continued until about the last of June or early July to insure good roots for storage.

* * *

Wait for a balmy spell during the fore part of May to plant the warm-loving vegetables. Nothing is gained by trying to rush the season on tender vegetables. Snap beans and pole beans normally may be planted in early May. To be safe, wait until the middle of May or later to plant edible soybeans, lima beans, cucumbers, muskmelon, peppers, squash, tomatoes and sweet corn.

* * *

When setting out plants, be sure to provide an ample-sized hole for each. Roots must not be cramped.

* * *

Why not give your cabbage, tomatoes and other plants set in the garden a flying start? Dissolve about 3 tablespoonfuls of Victory garden fertilzer in 4 quarts of water and feed each plant set in the garden with 1 cupful of the solution at the time of planting.

* * *

The earlist maturing varieties of sweet corn must be planted to get those first roasting ears. The crop will also mature earlier if some phosphate (0-20-0) is placed several inches from the row and on each side. The fertilizer should be slightly below the level of the seeds. Wait at least 3 weeks before making the second successive sweet corn planting. Later plantings may be made at about 15-day intervals up until early July.

* * *

Sweet corn should not be planted next to field corn or popcorn, because they cross readily and cause uneveness of maturity in the sweet corn. Fresh sweet corn seed, properly treated or disinfected, and planted in a medium heavy to light soil, will germinate readily. Under such conditions one seed may be planted every 12 inches in the row to save seed. Too many gardeners plant corn too thickly and do not thin out the rows.

South American Liberty Fostered in Colombia

Colombia's first bid for freedom was manifested in 1781, when the comuneros, or "common people" of Santa Fe de Bacata, as the country was then called, revolted against excessive taxation and the abuses of their Spanish overlords. The uprising was soon quelled, but for the first time the peace-loving Colombian people were conscious of their strength as a nation.

Despite this reverse, the revolutionary movement against Spanish domination spread throughout the country as a series of isolated campaigns, waged by patriots separated by the rough terrain and lack of roads. On July 20, 1810, the revolutionary junta of Bogota proclaimed itself the government of Nueva Granada, embracing present-day Colombia, Ecuador, Venezuela and Panama. And at Boayaca, on August 7, 1819, Simon Bolivar dealt the Spaniards another devastating blow which resulted in his entering Bogota three days later.

A few months later, on December 17, 1819, the independence of the Republic of Gran Colombia was proclaimed. Two years later a congress met on January 1, 1823, to determine whether the three departments of Cundinamarca, Venezuela and Quito should form a highly centralized nation or a loosely bound federation of states. A year later the infant nation was recognized by the United States.

In 1829 the Department of Venezuela broke away from the union of Gran Colombia and declared itself an independent republic. A year later, the Department of Quito followed suit, as the Republic of Ecuador. Neither of these separations was strenuously opposed by the government in Bogota.

Canada Land Rich in Resources and Industry

Canada is a bountiful bread-and-fruit basket; figures its field crops, farm animals, milk, poultry and eggs, and vegetables in millions of dollars; normally ships wheat, meat and cheese to foreign customers. Fishing is a major industry.

Value of manufactured products—newsprint paper, lumber, chemicals, textiles, iron and steel goods, animal and vegetable products—runs into billions of dollars.

Native fur-bearing animals are the source of sizable income. Foxes, minks, beavers, muskrats, racoons, martens, and fishers are raised on farms.

Bigger than the United States (excluding Alaska), Canada runs the full topographic scale. From the coastal plains in the east, the rocky areas of Quebec Province, the barrens north of Lake Superior, the prairies and western foothills, to the towering Pacific highlands, Canada unrolls in a majestic ocean-to-ocean sweep.

Hawk Owl

The American hawk owl (Surnia ulula caparoch) is little known since it inhabits the vast forests of Canada and Alaska. More conspicuous in appearance than other forest owls, its slender body is about 16 inches long and heavily feathered as a protection against the cold. It is able to hunt both day and night, a useful ability in the long days and nights of the far north. Its food is chiefly mice and lemmings, but it eats insects in summer and sometimes kills birds the size of the ptarmigan. Protective of its nest, its sharp, dangerous claws are used fiercely against intruders. This owl is easy to hunt, for its unusual fearlessness brings it into the open and it has an attention-attracting habit of sharply jerking its tail. During the winter many of them come across the border into northern United States.

Growing Gullies

Thousands of acres of land are growing gullies which should be growing trees. Because of steep slopes, poor soil, and other adverse conditions, much of this land can best be used for growing trees. Many farmers have demonstrated conclusively that erosion may be controlled, gullies stopped, and the land put into production on small areas by using materials found on the average farm—plus trees.

In planning to stop the gullies and plant the trees, it is suggested the farmer first consult his county agent. Gullies draining more than 10 acres require planning by an experienced agricultural engineer. Final control must in all cases be accomplished by vegetation.

Young trees, usually pine or black locust, planted after the erosion control measures have been taken, will become established and provide protection from further erosion.

Seed Disinfection

Seed treatment improves seedling stand and vigor. Beet, carrot, celery, corn, cucumber, eggplant, muskmelon, peas, pepper, pumpkin, spinach, squash, swiss chard, tomato and watermelon seeds respond most favorably to treatment with red or yellow copper oxide (Cuprocide) or organic mercury (semesan) dusts. Broccoli, brussels sprouts, cabbage, cauliflower, Chinese cabbage, collards, kale, kohlrabi, radish and turnip seed may be injured by copper (Cuprocide). Special organic mercury compounds are standard for potatoes and corn. Manufacturer's directions accompany each package.

EXTRA

LIFT ALL POINTS ON MEAT EXCEPT STEAKS, ROASTS

The office of price administration Wednesday made all meats except beef steaks and beef roasts ration free, effective at midnight, May 3.

The removal o ration points, announced by OPA Administrator Bowles, covers all cuts of pork, veal, lamb and mutton; all beef except the steaks and roasts; beef hamburger, beef stews, all kinds of variety meats, sausage, ready-to-eat meats, canned meats and canned fish.

Red points are still needed, however, for butter, margarine and evaporated milk.

Died of Heartbreak

"I shall die," throbbed the suitor, unless you consent to marry me."

"I'm sorry," said the maiden kindly, but friendly, "but I will not marry you."

So the fellow went out West and after 62 years, 3 months, and 1 day became suddenly ill and died.

WEED NOTICE

To All Property Owners, and to whom it may concern:

BE IT RESOLVED, by the Board of Supervisors of Hancock County Iowa:

That pursuant to the provisions of Chapter 131 Acts of the 47th General Assembly it is hereby ordered:

1 That each owner and each person in the possession or control of any lands in Hancock County, shall cut, burn, or otherwise destroy all noxious weeds thereon as defined in this chapter, at such times in each year and in such manner as shall prevent said weeds from blooming or coming to maturity, and shall keep said lands free from such growth of any other weeds as shall render the streets or highways adjoining said land unsafe for public travel. Noxious weeds shall be cut or otherwise destroyed on or before the following dates and as often thereafter as is necessary to prevent seed production

Group 1.
June 20, 1944, for Leafy Spurge, Perennial Peppergrass, Sour Dock, Smooth Dock, Sheep Sorrel.

Group 2.
June 20, 1944, for Canada Thistle, Russian Knapweed, Buckhorn and Wild Mustard.

Group 3.
July 10, 1944, for Field Bindweed, Wild Carrot.

Group 4.
July 15, 1944 for Horse Nettle, Perennial S o w Thistle, Quack Grass, Butterprint, Puncture Vine, Cocklebur

2. That each owner and each person in the possession or control of any lands in Hancock County infested with any primary noxious weeds including quack grass, perennial sow thistle, Canada thistle, field bindweed, horse nettle, leafy spurge, perennial peppgrass, Russian knapweed shall adopt a program of weed destruction, prescribed by the Weed Commissioner, which in five years may be expected to destroy and will immediately keep under control such infestations of said primary noxious weeds.

3 That all weeds other than primary noxious weeds on all county trunk and local County roads, and between the fence lines thereof shall be mowed by the adjoining property owner to prevent seed production, on or before July 4, 1944

4. That if the owners or persons in possession or control of any land in Hancock County fail to comply with the foregoing orders, the Weed Commissioner shall cause this to be done and the expense of said work, including costs of serving notice and other costs, if any, to be assessed against the land and the owners thereof

5 That the County Auditor be and is hereby directed to cause notice of the making and entering of the foregoing order by one publication in each of the official newspapers of the County.

Published by order of the Board of Supervisors of Hancock County Iowa, this 24th day of April A D. 1944
(SEAL) FRED C MISSAL,
County Auditor
in and for Hancock County, Iowa.

Our Men In The Service

Dear Jergie,

I received The Klemme Times today and was glad to get it. I have been receiving them for the last while and certainly do enjoy it. A lot of the fellows around here read it too even though they don't know anybody. I guess they just know it is from the good old U. S A. Everybody reads the funnies. I use to think that when I read these comic books that it was just for kids but I guess they all read them besides myself. Some of the fellows have them sent to them so I don't feel so bad when I get caught reading one In fact they usually ask you for it next. I guess Superman is about the most popular. I guess we just are a buch of kids at heart

This Austrailia is quite a place, just about fifty years behind time There trains, boy are they something, they have signs in the coaches "do not get off the train to pick flowers while the train is in motion". I thought some of those trains that pulled through home were noisy but these take the cake Top speed is a good fast dog trot They do have very modern theaters and they show all American films. The people are sure good to us and that helps a lot. Nothing like home.

I am staying in the relief camp and am working on the subs, that come in. So I am a dry land sailor again We did all right while we were out on the run at least it might help the war to get over with a little sooner. Things have been looking pretty favorable. It can't be too soon for me.

I sure did receive a lot of Christmas cards. It is sort of talking about Christmas, but I wish you would thank them all that sent me one. I received sixty of them altogether. It makes a guy feel good to know they are thinking about you.

I guess I better close for tonight and will be looking forward to the next Klemme Times.

A friend,
Evert Barz E.M. 3|c

April 13, 1944
Admiralty Islands

Dear Jergie,

Just a few lines to night. Seems as though a person cannot get in a good writing mood here, and another thing is we have not had mail for a long time. I have had tough luck finding anyone I knew since I left the States. Went fishing with hand grenades the other day and had fair luck, what sort of fish I caught is hard to tell as I never had seen anything like them before, ate them and lived. If you have or know a few APO's that may be here over here send me the names and I will try to look them up. This Aug. will make one year in jungle boots and hope that is the last. Hope this finds everyone well there and I will try to write again when I find time.

As ever Milo,

P S. Am inclosing a sheet of Guinia Gold, a field paper.

S-SGT. CLIVE RUKA AND HIS ENTIRE SQUADRON RECEIVE GENERAL'S CITATION

Mr. and Mrs. Earl Ruka recently received a copy of a Citation which was presented to their son, Staff Sergeant Clive E. Ruka and the members of his bomber squadron for their action in India.

The Citation is as follows:

Signal Corps, United States Army
Received at 490th Bombard-
Squadron (M) AAF
31 January, 1944

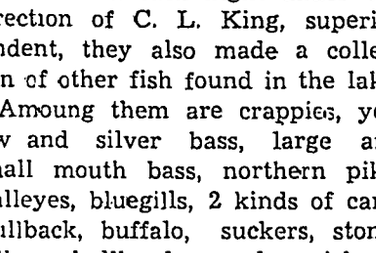
To: Major McCarten:

To you CMA your Bridge Busters and all the boys on the ground who keep 'em flying on their successful accomplishments, my personal congratulations PRD your devastating results have been received with glee. (Signed)
Maj. Gen. Davidson.

Staff Sergeant Clive E. Ruka is a son of Mr. and Mrs. Earl Ruka of Klemme. He graduated from the Goodell High School and then attended Iowa State College for two years, taking a course in vocational training. He entered the Service in February 1942, and has been in India for the past year and a half. He took his army training in the air corps at Lowry Field, Colorado.

S-Sgt. Ruka is a flight chief and has charge of four bombers. His outfit has made a fine record in India, specializing in demolishing bridges, the reason why they are called "Bridge Busters."

HELLO, FOLKS!



Mr. and Mrs. Raymond Barz are the parents of an 8 pounds, 2 ounces baby boy born to them at the Mercy hospital, Mason City, Saturday morning, April 29th.

GILLNETTING FINISHED

The 160 jars at the State Hatchery are all filled with pike eggs, probably about 50 million of them, and they will begin to hatch in a few days, the time depending on the temperature of the lake water that runs through the jars continuously extends over a period of 2 weeks.

While the five crews of 2 men each worked each night under the direction of C. L. King, superintendent, they also made a collection of other fish found in the lake.

Amoung them are crappies, yellow and silver bass, large and small mouth bass, northern pike, walleyes, bluegills, 2 kinds of carp, quillback, buffalo, suckers, stoneroller, bullheads, and pickerel which are on display in vats at the hatchery.

The hatchery is open every day until the season is ended and the baby pike have been placed in the lake, which may take 3 weeks longer. —Clear Lake Reporter

DRUG WITH SALT WILL CHECK STOMACH WORMS

A mixture of salt and phenothiazine fed to sheep on pasture is an effective, convenient method of controlling stomach worms during the summer, according to C. W. McDonald, Iowa State College extension sheep specialist. One part of salt is the correct proportion. The mixture is placed in a covered container, and sheep are allowed free access to it at all times.

The method is not a substitute for drenching. The mixture is not strong enough to kill large worms in sheep, but does kill the small worms which lambs pick up while on pasture. The entire flock should be drenched in the spring before going on pasture and again in the fall.

Phenothiazine is a common drug which is available from many drug stores. The mixture, already prepared, also may be obtained through sheep breeders' associations, wool marketing cooperatives and similar groups.

WASTE OF TIME TO DISK STALKS BEFORE PLOWING

Raking and burning, disking, or cutting of cornstalks before plowing the ground are largely a waste of power and labor in the opinion of Iowa State College agricultural engineers. None of those practices increases corn yields.

Most farmers who cut, disk, or rake and burn their stalks do so because the shorter lengths of stalk are turned under more readily. It is ture that plowing under standing stalks may cause trash to hinder cultivation if pointed shovels are used. Sweeps used in place of pointed shovels work better.

Plows equipped with large, sharp coulters, jointers and covering wires will turn under trash. Notched coulters do a better job than those with smooth edges, and 16-inch plows turn under trash better than 14-inch plows.

ELAINE NEUBERGER CELEBRATED BIRTHDAY

Elaine, daughter of Mr and Mrs. Melvin Neuberger, was nine years old Sunday and a number of relatives came to her home in the afternoon to enjoy ice cream and cake with her.

Those present were Donald Neuberger and family; Mrs. Lester Neuberger and baby; Mrs. Lewis Neuberger, and Wert Loger.

Elaine received many nice gifts.

When chicks are 8 weeks old they should be self-fed whole oats and cracked or whole corn in separate hoppers.

Some ground that was planted for oats but was too wet to plant in April might well be plowed and planted to soybeans.

Dry, Ventilated Quarters For Sheep During Winter

For winter shelter of the farm sheep flock, dry, well - ventilated quarters should be provided. Wide doorways and convenient feed racks should be arranged. It is generally considered best to divide large flocks into groups of similar size and condition, so that the ration can be suited to the needs of each group. For example, yearling ewes will need a little more feed than mature ewes, as they are still growing.

The ewes should be wintered so that they will gain 15 or 20 pounds during the time they are carrying lambs, and at lambing time be in medium flesh and vigorous condition. Insufficient feed or an unbalanced ration will result in weak lambs and a scanty flow of milk, and therefore reduces the profits. This does not mean, however, that expensive rations are needed, containing a large proportion of concentrates. On the contrary, ewes should be wintered, up to lambing time, chiefly on good roughage, including plenty of legume hay, if possible.

If the ewes go into the winter in good condition and are then fed legume hay, with or without silage or roots in addition, they will usually need no grain or other concentrates at all until four to six weeks before they lamb. Then not more than half a pound per head daily is commonly required.

First Patent Granted Narrow Bladed Scythe

The first patent granted in the new world was for an agricultural tool, a scythe. This was invented about 1646 by Joseph Jenks, a famous ironworker of colonial days, who was granted a patent which gave him a monopoly of the manufacture of the scythe for a period of 14 years. The scythe consisted of a long narrow blade similar to the scythes now in use. It represented a great improvement over the sickle shaped like a quarter moon, and Jenks built up a prosperous manufacturing business at Pawtucket, R. I. These New England scythes were so superior that many of them were shipped to Pennsylvania and bar iron returned in payment. It was not until about 150 years later that someone thought of attaching a series of wooden fingers to the scythe and so making a cradle which would be useful in the reaping of wheat as well as the mowing of hay.

The replacement of the sickle by the scythe doubled the speed with which hay could be cut, but it required more manual labor, and, made with poor steel, the scythe was soon dulled. It became the custom to store the best barrel of hard cider on every farm, to be broached at harvest time, when it was known as "the scythe sharpener." The haying season meant hard work but with a barrel of hard cider it became a festive event.

Pilots Lonely

There is something about the loneliness of a pilot's life in the air that contributes to mysticism. Any pilot who has done any appreciable amount of flying can tell strange stories if he feels that he is with kindred spirits. There are cloudscapes of unbelievable grandeur to be seen upstairs; lonely ice fields of cloud, towering castles, mountain ranges, strangest of all, the faces of people cut sharply in cloud shapes.

Some pilots claim that they have seen the same person, or perhaps several people, time after time in the clouds—that there is expression on their faces, and that sometimes these faces warn of dangers ahead. Some pilots have worried when, over a period of time, a certain face was missing. Other pilots, of course, laugh at such fancies as these. And few, even those who believe, will risk ridicule by discussing such matters with any but people they trust implicitly.

Ignored Critics

When Zane Grey was still an unknown trying to sell his book manuscripts, a publisher told him he had no ability for writing fiction.

The first time George Gershwin ever played the piano on the stage he was laughed out of the theater by both the audience and his fellow actors.

Marconi was bawled out by his father for wasting time when he first began to experiment with radio.

And when Thomas A. Edison was in school he was always at the foot of his class because he couldn't remember his three R's. His teachers called him stupid and doctors predicted he'd have brain trouble.

Oil Reserve

Underlying anywhere from 10,000 to 30,000 square miles in Northern Alberta is the most tremendous reserve of oil yet discovered. It is a layer of sands, 100 to 200 feet thick, saturated with oil. Reliable estimates have been made that anywhere from 100 to 250 billion barrels of oil may be extracted from these sands. Although known and mapped in 1913, it was not until the 1930s that an attempt was made to extract any oil commercially. At that time a plant was erected to extract some 350 barrels daily. Although not strictly a U. S. reserve, gasoline derived from this reserve undoubtedly will be available to American motorists.

Farmers in the 11 Corn Belt states had about 23 percent fewer cattle in their feedlots on April 1 this year than a year earlier.

Ornamental and shade trees are usually pruned too much rather than too little.

Italy—New Zealand troops close on German sniper in Cassino ruins.

EUROPE:
Invasion Path

While Russia's land armies carried the war into the Balkans, Allied bombers continued pounding Axis military and industrial installations throughout Fortress Europe, concentrating on the invasion path in the west.

As the Russians stormed into Rumania, other Red forces drove ahead in the Crimea, huge chunk of land thrust into the Black sea and guarding the water route to the eastern Balkans. As the Russians approached the Rumanian rail junction of Jassi, they encountered stiffening resistance from native troops, fighting by the side of German soldiers, strengthened by shorter defense lines.

In continuing their whirlwind assaults to smoothen an invasion path, Allied bombers struck at airfields, railroad junctions and military defenses throughout the French and Belgium area. Far to the southeast, U. S. bombers based in Italy hammered Nazi airplane factories in the Vienna and Budapest regions. In ground fighting below Rome, both sides were reported making extensive troop movements in preparation for a resumption of bitter fighting.

Warn Neutrals

Having suspended oil shipments to Spain and announced restriction of steamship service to Ireland, Great Britain and the U. S. next demanded termination of Sweden's ball-bearing trade with Germany in a determined campaign to halt the neutral countries' commerce with Axis Europe.

At the same time, it was announced that the Allies would look into Turkey's increased chrome shipments to Germany during the last three months, with a view toward limiting the traffic through a curtailment of our own trade with the Turks, whose lend-lease aid already has been cut down.

In hearing the Allies' demands, the Swedes said they were in no position to comply without breaking their formal agreement with Germany, which, they said, the Allies approved last September. Although there was objection to the ball-bearing shipments, Sweden's iron ore deliveries to the Nazis were not emphasized.

WOOL:
Big Stocks

With an all-high stock of foreign and U. S. wool, the Commodity Credit corporation was directed to go into the market to support the 1944 domestic clip estimated at 450,000,000 pounds.

Whereas U. S. stocks stand at record levels today, there were prospects of serious shortages when the Japs launched their South Pacific drive, threatening the Australian and New Zealand producing areas. Approximately 400,000,000 pounds of foreign wool is now owned by this country, with the Defense Supplies corporation holding 330,000,000 pounds and dealers and manufacturers the rest. At the same time, 550,000,000 pounds, is being held in this country for British account.

Because the U. S. clip sells about 18 cents a pound above foreign wool, the CCC has encountered difficulty disposing of the domestic stock, although the army now specifies its use in purchases and about 10 per cent of navy orders are expected to call for it.

PACIFIC:
India Threatened

With their backs against the rugged slopes of the Naga hills in central India, British and Indian troops fought desperately against persistent Japanese attempts to cut off their supply lines and entrap them in a huge pocket.

While the British and Indians were locked in their death struggle, U. S. bombers operated over a wide range in the Pacific, blasting Japanese installations in the Kurile islands, strung out to the north of Nippon, and plastering enemy bases on New Guinea, as part of the grand strategy to wipe out their strongholds on this flank of the Philippines.

In India, the Japs' continuing three-pronged drive pressed against British and Indian supply routes running both north and south and also to the west to the Assam-Bengal railroad, used to feed Lieut. Gen. Joseph Stilwell's American and Chinese troops clearing a communications highway in northern Burma to China.

INDUSTRY:
Postwar Reserves

Looking forward toward the problems of postwar readjustment, U. S. industry has set aside hundreds of millions of dollars out of profits for switching back to civilian production, rebuilding plants or providing lay-off payments to workers during the period of change.

To meet the emergency, United States Steel company has established a nest egg of $104,153,557; General Motors, $76,051,805; General Electric, $73,562,337; E. I. Du Pont, $31,613,430; Sears, Roebuck, $28,500,000; United Aircraft, $28,004,464; International Harvester, $20,000,000; Goodyear Tire and Rubber company, $15,462,912; Borden company, $11,305,185; National Dairy Products, $10,000,000, and General Foods, $4,492,712.

Since such reserves cannot be taken out of income before taxes like deductions for depreciation, debt retirement and depletion, they must be put aside out of industry's profits.

Economic Protection

To prevent a repetition of the widespread bankruptcies and foreclosures which followed World War I, the Commodity Credit corporation is empowered to make loans at 90 per cent of parity on basic crops for two years after the end of hostilities, War Mobilization Director James F. Byrnes declared.

James Byrnes

While outlining the protection for farmers, Byrnes also proposed to help labor laid off from slackening war industries, through a system of federal unemployment benefits to be paid in addition to regular state payments. To relieve the problem of future unemployment, Byrnes suggested that workers be shifted from lagging war plants to busier ones now while jobs were available.

Byrnes advocated legislation for quick settlement of cancelled war contracts to aid industry in the reconversion to civilian production, and he also called for congressional action to facilitate the orderly disposal of surplus war goods without disruption of regular markets.

HIGHLIGHTS . . . *in the week's news*

EGGS: Another record in egg production was turned in by America's hard-working hens during March, the third consecutive month of all-time highs. There were 6,763,000,000 eggs laid last month, 4 per cent above March last year and 49 per cent over the ten-year average, 1933-42. Number of laying hens increased 5 per cent from March, 1943, to 433,985,000.

MIDGET FURNACE: A tiny furnace, weighing only 21 pounds, may be sufficient to heat a 20-room house, if a new type of heating unit now used only in military aircraft can be applied to homes. The little furnaces would be only about the size of a waste basket and would cost about $50. Demonstration models have given encouraging results it was said.

WHEAT:
Good Prospects

Because of improved prospects as a result of a recent rainfall, the U. S. Department of Agriculture predicted a winter wheat crop of 601,759,000 bushels for 1944, 72,153,000 more than 1943 production.

Based on official returns, the domestic supplies of wheat for 1944-'45 were estimated at 1,130,000,000 bushels, compared with last year's 1,440,000,000 bushels.

Although moisture deficiency in western Kansas and the adjoining wheat sections in Texas, Oklahoma, New Mexico and Colorado was offset by rainfall, Nebraska was reported in need of precipitation.

U. S. ACES:
'Rick' Topped

To army air force Captains Richard I. Bong of Poplar, Wis., and Don S. Gentile of Piqua, Ohio, went the honor of breaking Capt. Eddie Rickenbacker's famed record of shooting down 26 enemy aircraft, established in World War I.

Operating in the South Pacific in a Lightning fighter with the portrait of his fiance, Marjorie Vattendahl of Superior, Wis., painted on the nose, Captain Bong was credited with destroying his 27th enemy craft in the air on April 12.

Previously, Captain Gentile had been credited with bagging 30 enemy planes in Europe, but seven of them were shot up on the ground. During World War I, Captain Rickenbacker's total of 26 included five observation balloons, so that Captain Bong paced the field in the number actually knocked out in sky fights.

Of all of war's experiences, few were as harrowing as Sgt. James A. Raley's, who was trapped in the tail section of a Flying Fortress when it broke off from the rest of the plane during a bombing mission and fell 19,000 feet down to earth.

When the tail section finally landed miraculously on a tree top, the 27-year-old sergeant from Henderson, Ky., emerged with only a slight cut on the chin.

Sgt. Raley.

POLITICS:
FDR, Dewey Lead

With the Democratic and Republican conventions still two months off, the candidacies of President Roosevelt and Gov. Thomas E. Dewey, N. Y., have picked up steam as a result of the popular favor shown them in the selection of nominating delegates.

As of April 12, 46 delegates were openly pledged for the President and 157 others claimed for him, for a total of 203 out of 236 already picked. At the same date, 25 delegates stood pledged to Dewey and 123 others were claimed for him, for a total of 148 out of 356 selected.

While the President polled a large vote in the Nebraska preferential primary, big highlight was the heavy write-in vote Dewey obtained.

U. S. NAVY:
Plan Bigger Growth

To provide for the heavy fighting ahead, congress was asked to pass a naval appropriations bill of $32,647,000,000 for the fiscal year beginning July 1.

By July of 1945, the navy will have 10,244 self-propelled ships, 74,925 other craft, including landing vessels, and 37,735 airplanes.

Also by July of 1945, naval personnel is expected to reach 3,657,000 officers and men, including women. Biggest planned expansion is for the marine corps to a total of 478,000.

LABOR:
Hit Power Politics

Asserting that territorial and frontier problems of Europe should be settled by popular vote of the affected people, the American Federation of Labor's Vice President, Matthew Woll, assailed Soviet Russia's alleged alteration of the continent in defiance of principles of the United Nations.

Taking his place beside Woll, David Dubinsky, president of the AFL's International Garment Workers Union, deplored the development of policies designed to divide the world up into spheres of influences, in which the big nations would dominate militarily and politically.

Decrying the proposal to compensate Poland for the loss of territory to Russia by giving her part of eastern Germany, Dubinsky declared: " . . . This means that Poland, or what remains of her, will remain a center of bitter and constant struggle — a football for the powers."

BLACK MARKET GAS

So extensive has the black market in gasoline become that it is imperilling the whole civilian motor fuel program, Petroleum Administrator Ickes warned. He said that more than 2,500,000 gallons a day is sold through illicit channels, with counterfeit coupons one of the most widely used means of evasion.

The most hopeful possibility for an increase in the allowance to civilian drivers is through the crushing of the nationwide illegal traffic in gasoline, Mr. Ickes declared.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

BITTER DEFERMENT FIGHT

The backstage fight over who is to direct the deferment of essential war workers is approaching white heat. It is being waged between certain of the biggest war chiefs in Washington, having developed into a row between the army-navy, WPB boss Donald Nelson, his vice chairman Charley Wilson, and Paul McNutt.

Only the White House will be able to straighten out the tangle.

Trouble began when Undersecretary of War Patterson and the army proposed that the question of industrial draft deferments be placed in the hands of the Production Executive committee of which WPB Vice Chairman Charley Wilson is chief. The army-navy, which started out by trying to cut Wilson's throat, now loves him, but continues to hate Donald Nelson. So their recommendation of Wilson to handle draft deferments was a slap at Nelson.

Nelson immediately slapped back. He and War Manpower Commissioner Paul McNutt went to the White House and told the President that industrial deferments were the job of the War Manpower commissioner. In fact, McNutt hinted that, if the President didn't consider the War Manpower commission competent to handle the question, he could get another Manpower Commissioner.

Donald Nelson backed him up. Since this meant taking the deferment job away from Nelson's own War Production board, it was a direct slap at Charley Wilson. Nelson even went further and indicated that Wilson and the Production Executive committee were controlled by the army.

More Civilian Goods?

This row over essential war-worker deferments also has brought to light another important inside debate over reconversion for civilian production. Chief battlers in this row are Nelson and Wilson, with the army-navy rooting for Wilson.

Wilson would like to begin production of 200,000 automobiles soon, but Nelson flatly opposes. Aside from autos, however, Wilson does not favor getting back into too much civilian production any time soon. To study the problem, he appointed a committee to formulate a policy on reconversion—which brought no enthusiasm at all from his nominal boss, D. Nelson, who disbanded the committee.

Nelson's cancellation, in turn, roused the ire of General Lucius Clay, General Somervell's chief production man, and Clay is now threatening to appoint an army-navy committee to study reconversion and make Wilson its head.

Behind this Nelson-Wilson row over reconversion is the basic conflict between big business and little business. Big business doesn't want any reconversion until it is finished with its war orders and, at present, it is chock-a-block with war orders. On the other hand, little business, which didn't get so many war orders, would like to begin right now making alarm clocks, electric irons, bicycles and a lot of small stuff which the public needs. Big business, however, doesn't want little business to get a head start.

In this row, Nelson sides with little business. His friends also claim that Wilson favors the big business viewpoint and wants to wait until the war is over, so everybody can line up at the starter's tape and get an equal start. The army sides with Wilson and big business for fear the second front may take more production than we realize.

Those are the issues. Meanwhile, some insiders, especially the army, are out again to get Nelson's scalp.

* * *

ARMY FURLOUGHS

Young Congressman Henry ("Scoop") Jackson of Washington has just been mustered out of the army to go back to congress. One of his first acts after getting into civilian clothes was to call on Lieutenant General McNair, head of army ground forces, and effect a major change in handling men about to go overseas.

He told McNair that one big gripe of the boys was that they often got no chance to visit their homes before being shipped abroad. All men were given seven-day furloughs regardless of where they lived — even if their homes were on the West Coast and they were in camp on the East Coast.

So the army has now agreed to the following:

1. No man will be sent overseas without getting a ten-day furlough.
2. This furlough provides that he will actually get ten days at home, plus time to travel from his base and back.

* * *

CAPITAL CHAFF

¶ King Carol of Rumania is reported readying himself for a Soviet call back to Bucharest by way of Natal. The diplomatic grapevine has it that he will be reinstated by the Russians.

¶ Loyal General Jim Ulio, who served as best man to Captain Alf Heiberg when he married Mrs. Louise Atwill, the former Mrs. Douglas MacArthur, later was kidded about his wedding duties. He replied: "If Louise can come down from four stars to two bars, I can."

Walter Winchell

(WNU Service)

Candid Shot of a Man Doing a Col'm:

Harold Lloyd is no sissy, but he plays with a doll. The toy has an interesting and tragic history. Harold was a long-time friend of Lillian Leitzel, the lovely circus aerialist. She fell to her death in Copenhagen several years ago while performing her famed act . . . Her mother took the costume in which Lillian was killed and cut it up into mementos for the star's closest friends . . . Some received pin-cushions, others got similar tiny tokens . . . Lloyd was sent a little doll from the material. It is one of his treasured possessions.

Groucho Marx was singing the praises of one of the movie firms recently. "They're absolutely tops!" he said. "When they make a lousy picture—none of the other film companies can come near it!"

Have a Debunker: Novelist Rose Wilder Lane told a reporter she isn't earning money because she doesn't want to pay income tax to support government agencies, including the Writer's War board . . . Lady, the writers who work for that board take no fees for their work. The taxes may pay salaries of people you dislike, but taxes also support the army, navy and marine corps, which protect Americans such as Rose Wilder Lane.

Have some irony: "Strange Fruit," the exciting novel which has been banned in Boston (the cradle of Yankeeism), was written by a Southerner and preaches equality . . . The current Magazine Digest credits Sid Sheldon with the anecdote about "Tootsie Rolls" being on a Russian menu. "Tootsie Rolls?" asked the guest. "What's Tootsie Rolls?" . . . The reply: "Lend-Lease!" . . . When it appeared here months ago the locale was Italy . . . Will Mr. Sheldon kindly forward the check he took for that one to the Red Cross? . . . That's peachy.

"The Adventures of Mark Twain" movie makers had considerable material to go on because Mark Twain is one of the few modern authors who had more books written about him than those he wrote. Mr. Twain wrote 24 volumes. He had 305 written about him . . . Bert Six, the movie photographer, was taking a likeness of a character. "Okay," said Bert, "I've finished. You can look unpleasant again" . . . Jimmy Starr's book, "The Corpse Came C. O. D.," is a click . . . Paul Henreid and Hedy Lamarr were rehearsing love technique for scenes in "The Conspirators" . . . Mrs. Henreid was watching with others . . . She got a howl when she called out: "Paul, you ought to try that kissing technique at home some time!" . . . Of all things: Radio station KPAS in Hollywood interrupts their midday preacher with race results!

Love Letter Dep't: The colyum thanks the Poly Spotlight's Instructor of Journalism (of Riverside, California) for the press pass. It reads: "Press Club, Poly Spotlight. Reporter's Pass. This certifies that Walter Winchell is a member of the Journalism classes of The Riverside Polytechnic High School, and a staff reporter for 'The Spotlight.' All courtesies extended for obtaining or forwarding news will be appreciated. Signed: F. Wayne Coons (Journalism instructor) and Bill Cornwell, editor." The pass expires in 1950.

Thank you very much. But by 1950 you boys and girls will be making and writing the news . . . However, I will always treasure it, and tack it on the back of my wheel chair.

Bob Dunn, one of the better cartoonists, sends this Bed-time Story to Keep the Baby Awake: A Big Front Door who was a Daddy Door had a Little Son who was a Little Door. So the Daddy Door wanted to measure the Little Door to see if he was growing. So he stood the Baby Door up against a Boy and marked on the Boy's neck, how high the Baby Door was. And that's why all children should wash their necks. Now go to sleep, d'ya hear?

At a stuffy motion picture party, Rosalind Russell was approached by a grande dame who said maliciously, "What lovely pearls! Are they genuine?" Rosalind nodded.

"Of course, you can always tell by biting them," said the cat. "Here, let me see."

"Gladly," said Rosalind, proffering the jewels. "But remember, you can't tell real pearls with false teeth."

The trailer for Warner's "In Our Time" (now in some local theaters) reads: "See it with someone you love." When this is flashed on the screens all the unescorted girls out front groan . . . Starlet Eleanor Parker of that studio has a pup that performs a cute trick. She says to it: "Which'd you rather be—a dead dog or an actor waiting for a break?" . . . The dog rolls over and plays dead . . . "Diplomacy," says Jack Warner, "is cutting the other fellow's throat without using sharp words."

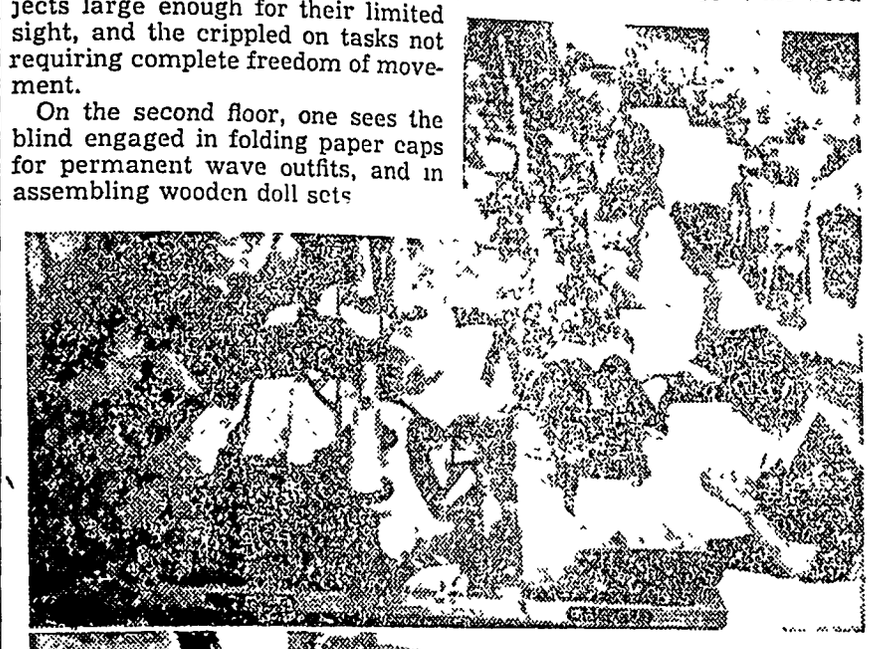
cases where such institutions are partly financed by private contributions, like the Illinois Industries, they are not expected to sell their goods below the market price, although they can sell above it.

Employment for 125.

A visit to the Illinois Industries for the Blind plant in Chicago at once impresses one with the capability of the 125 blind, partially blind and crippled employees. At one time, the factory had a peak employment of 230 people, many of whom have since gone to accept positions in various war industries.

On all three of the floors, one will find the handicapped busily engaged in different forms of work suited to their capacities, with the blind chiefly employed on jobs where some form of mechanical guides are provided, the partially blind on objects large enough for their limited sight, and the crippled on tasks not requiring complete freedom of movement.

On the second floor, one sees the blind engaged in folding paper caps for permanent wave outfits, and in assembling wooden doll sets



On the third floor about 40 women turn out sheets and pillow cases at good speed, despite their handicap. After two months of training, a woman can put seams in about 66 dozen pillow cases a day. The hemmers, who must have 10 per cent or better vision, can finish about 90 dozen cases daily.

An "electric eye," shown below, protects the operators from injury by stopping the sewing machine when fingers get too close to the needle and interrupt the beam of light that must shine constantly while the machine is running.

Those proficient in folding paper caps can turn out as many as 986 a day and average around $5.50 for eight hours' work. There is not so much skill required in cap making, as there is a familiarity, or feel, of the paper.

Turning from the paper cap folders, one comes to a long assembly line of blind filling little cardboard boxes with parts of wooden dolls, and then packing these along with containers holding different water colors into single sets. Holes in the body of the wooden dolls into which the head, arms and legs are inserted are drilled by blind on mechanical equipment up on the fourth floor of the plant. Ten workers can assemble about 1,000 sets a day.

Sheets and Pillow Cases.

One of the most interesting and important of the plant's operations is on the third floor, where blind and partially blind women produce sheets and pillow cases.

Under a full-sighted supervisor, 40 impaired women keep the latest type sewing machines with necessary adjustments buzzing at top speed.

First, there are the women who put seams into the pillow cases, being able to turn out about 66 dozen daily, after two months of training. Machines are equipped with a "seeing eye," which stops their operation when the workers' fingers stray too close to the needle.

Then there are the hemmers, with partially blind with at least 10 per cent vision being preferred for this more exacting work of turning the material over, smoothing and then securing it. After six months' training, a good hemmer averages 90 dozen a day, but a blind person could produce only half of this.

At the time the plant was visited, a young woman was being broken into the overlocking process of overstitching on the outside to give better strength and appearance. Time and again, she practiced guiding the material to the needle, patiently training her partial sight on the work.

Because the blind could not inspect the finished goods and the bright glare of the white material could not be withstood by the partially blind, full-sighted people are employed for this work.

Since undertaking government work, the Illinois Industries for the Blind has delivered over 2,000,000 sheets and pillow cases to the services.

Make Wooden Mats.

Up on the fourth floor of the plant, one sees a cripple and the blind combine to produce colored wooden mats under the supervision of a partially blind foreman, Gerard Harold, Canadian born and English educated, who once ran a coffee importing business in Africa.

Cut to size by a cripple, the wooden rods forming the skeleton of the mat through which the different colored pieces are strung, are drilled by a blind person, who possesses a remarkable mechanical touch, according to Mr. Harold. Because of this touch, Harold said, the blind man can sense any imperfection in the operation of the machine, and then go about correcting it.

The mats themselves are strung by the blind, who figure how many pieces go into each one, and thereby are able to judge just where the colored beads are to be placed. Trained in three or four weeks, a blind person can average about 40 mats daily.

Also on the fourth floor is the leather department, worked by crippled and blind. Using discarded leather scraps from shoe factories, the crippled punch out fancy strips, while the blind make holes, as for the insertion of elastic bands for suspenders.

Also on the fourth floor, the plant had received old looms, which it was contemplating setting up for the future production of yarn for mops, using handles produced by the Illinois Industries, Mattoon, Ill., broom factory.

In the office of the plant, one met Ethel Heeren, blind executive secretary, and Earl Barrett, partially blind general manager. One also met partially blind Wells Mori, active little public relations officer of the plant.

Earn $25 a Week.

From Mori, one learned that ambitious employees of the plant average about $25 weekly, which with their useful work, gives them position in society.

"Younger handicapped people coming to us who are broken in early into useful social occupations, develop a healthier point of view than the older people who have always more or less been felt to be a burden," Mori said.

"Sometimes, the most difficult problem is inculcating the work habit into some of the older people," Mori continued. "Laxity in coming down on time, or sometimes not at all, and of not producing at their capacity are shortcomings of many handicapped people which can only be ironed out by careful handling, since you cannot push them.

"We do not take all of the handicapped, of course," Mori continued, "but most of those that we do take develop the work habit and become proficient workers.

"Because of differences in aptitudes and the need for stimulating their efforts, workers are paid on a piece-work basis," Mori said. "But even though their production rates are high, they still usually fall below the sighted standards. In those cases, our products must sell at higher levels on the market."

As an indication of the skill and earning power of many of the Illinois Industries for the Blind employees, some have been hired by the nation's busy war plants to assist in the battle of production, while a goodly number were only too proud to take their place in line and pay Uncle Sam an income tax for the first time out of their wages.

d Complexity of Modern Living Imposes on Eyes Unknown to Primitive Peoples

king hours and difficult are imposed upon the odern civilization, says al bulletin issued by the n Institute, New York. had to pay a price for e advances of civiliza- he remained in the te he lived according to an. He rose with the fished during the day-light hours, and slept when it was dark," goes on the bulletin. "Eyestrain was practically unknown. With the invention of the printing press, thousands began to read, and not always by the light of the sun. Eyes which for centuries had become accustomed to distance vision were now suddenly called upon to adapt themselves to close range focusing. New work, new problems for the eye! The almost miraculous progress that has been made in recent years in artificial illumination has driven men more and more indoors. Sunset no longer marks the end of the day. The quest for recreation, and comfort continues with little thought to the needs of the eyes.

"Of all human possessions sight is among the most precious. As with most of nature's gifts we take sight for granted. Only when it is injured do the majority of us suddenly make frantic efforts to regain it."

PAUL CROSSES INTO EUROPE

LESSON TEXT: Acts 16:13-15; Philippians 3:7-14.

GOLDEN TEXT: I press on toward the goal unto the prize of the high calling of God in Christ Jesus.—Philippians 3:14.

Pressing "toward the mark" (Phil. 3:14) well describes the zeal and intense devotion with which Paul lived his life for Christ. He was wholehearted in giving himself to the preaching of the gospel. Our lesson tells of his carrying of the gospel into Europe by the guidance and blessing of the Holy Spirit.

It seems appropriate to consider the two Scripture portions in reverse order, looking first at Paul's declaration in Philippians of his passion to know Christ, and then in Acts of his purpose to make Him known. The man with vision is eager to serve. "A task without a vision makes a man a drudge; a vision without a task makes him a visionary; a task and a vision makes him a missionary."

I. Paul's Passion to Know Christ (Phil. 3:7-14).

There were many things in Paul's life of which he was proud, until he met Christ, and then everything else lost its importance and interest.

All things in life are relative in value and our attachment to them is determined by our heart attitude.

Now being spiritually minded and having found in Christ real satisfaction for his soul, the Christian counts as refuse the things in which the world takes such pride and satisfaction.

To "know Him" calls for a depth of experience, sacrifice and of joy which is not easy to describe in words. It begins with a divine righteousness imparted by faith. Self-righteousness will not suffice. This is not a matter of law, but of grace.

It is a resurrection faith and therefore powerful. It is a faith which accepts suffering for Christ as a part of fellowship with Him—not only bearable but glorious because it is in the power of His resurrection.

That fellowship is one day to be complete and eternal, for there is to be for Paul the assured experience of a personal resurrection out from among the dead (v. 11). The faith of a Christian looks beyond the grave.

All this has to do with the present, as well as the blessed future. The man who has this kind of spiritual experience shares the purpose of Paul expressed in verses 12-14. Here there is no resting back in self-satisfied comfort, no pride in one's past victories, no sense of having "arrived."

Paul saw not only the necessity but the blessedness of going from victory to victory. Too many Christians of today are entirely satisfied with what they have attained (and it is usually all too little).

There is a prize to be gained, the prize of our "high calling in Christ Jesus." Let us, like Paul, be filled with holy dissatisfaction with ourselves until we reach that blessed goal.

The man who had such a vision was ready for God's call to carry the gospel into Europe.

II. Paul's Purpose to Make Christ Known (Acts 16:13-15).

The story of the conversion of Lydia has many elements of special interest. It presents the turning point in the progress of the gospel, which by the grace and leading of God brought it northward to Europe rather than southward into Africa. Many of us have heard because of the way Paul was led, and one wonders if Europe and America might not otherwise have been the "dark continents" rather than Africa. We are what we are by the grace of God.

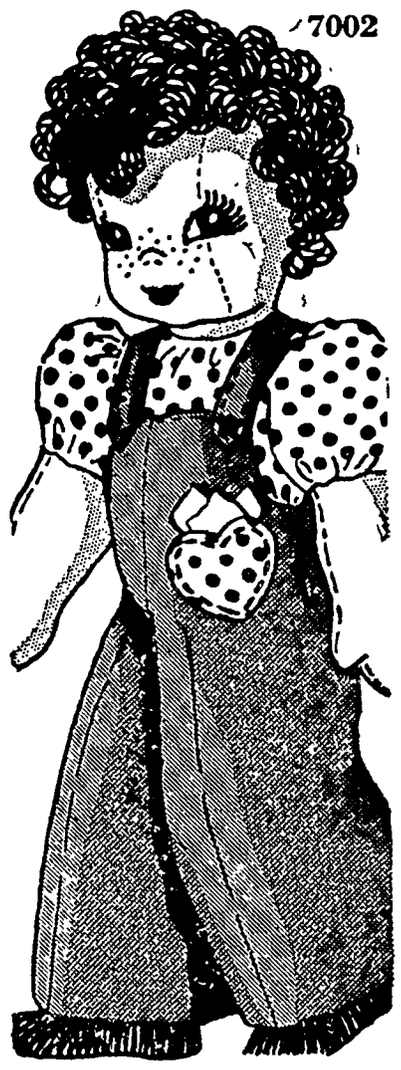
Then we note that the first convert was a woman. She was not the last woman to give an attentive ear and a believing heart to the gospel message. The church through all its history has been blessed by the readiness of women to bear and heed the gospel.

We like to note that she set a pattern of hospitality and service which her sisters in the church have maintained (see v. 15). She "constrained" the visiting preachers to enjoy the comforts of her fine home, and thus put forward the work of Christ (see III John 5-8).

It is encouraging to note how perfectly the leading of the Holy Spirit worked out in the experience of Paul and his brethren. The Lord sent His prepared messenger to the place where there was a prepared heart waiting to receive the Word with gladness.

We may confidently go on the errands of our God, knowing that when He leads, He goes before and prepares the way. That does not mean that there will be no trials and difficulties. Paul had plenty of them (see II Cor. 11:23-33). But it does mean that we may go with the assurance of blessed results, in His name, and with the grace to bear whatever comes along the way—for His glory.

For you to make



7002

MAKE this freckle-faced tyke for your mascot . . . let her mischievous eyes and tousled yarn hair chase your gremlins, too. She's made simply . . . just of rags. You can choose her clothes from your scrap bag.

If you know a Navy man, don't ever call him a "gob"—sailors consider the name an insult. You can get on the right side of him though if you offer him a Camel—or better yet, send him a carton. Camels are the favorite cigarette with men in the Navy (Army, Marines, Coast Guard, too, for that matter) based on actual sales records from the service men's stores. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines and Coast Guard **wherever** they are.—Adv.

Klemme, Iowa

The Senior Class, held their annual Skip Day last Wednesday and went to Mason City where they visited. Hamilton's School of Commerce and the Coca-Cola Bottling works.

Walter Eisberg, from northwest of Garner was a business caller in Klemme Monday afternoon. While in town Walter dropped into the Times office for a chap with the Editor and also to renew his subscription to The Times.

There was a large crowd present at the Methodist church dinner on Sunday when a dinner was given in honor of those who had joined the church during Rev. Harvey's pastorate here. A program was enjoyed after dinner.

Mrs. Arnold Blau and little daughter have moved into the Schwichtenberg house in the south east part of Klemme. Mr. Blau is in the service. Mrs. Blau is the daughter of Mr. and Mrs. David Schwichtenberg.

Crashed into a nest of giant reptiles. That's what a pilot did in the jungles of Nicaragua, but he saved himself and his two terror-stricken passengers. Read how he did it in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Pvt. and Mrs. Wesley Patterson and little daughter, Paige, visited with Klemme friends Monday. Pvt. Patterson was home on a furlough visiting with his parents at Bancroft. He was athletic director in the Klemme high school before entering the service last year.

Mrs. Frank Ward returned home last week from Iowa City where she went to attend the graduating exercises of Iowa University. Her daughter, Elsie was a graduate in the Home Economics department and received her degree and diploma for four years of work. Mrs. Ward also visited with relatives at Clarion for a few days beore returning home.

Mr. Smith was sitting down to breakfast one morning when he was astounded to see in the paper an announcement of his own death.

He rang up his friend, Howard Jones at once. "Halloa, Jones!" he said. "Have you seen the announcement of my death in the paper?"

"Yes," replied Jones, "Where are you speaking from?"

"How'd you sleep last night?"
"Oh, lying down, as usual."

Trade in Klemme and save.

Sunday, May 14th is Mother's Day.

Mrs. J. N. Day spent Tuesday at the Alex Ross home at Garner.

Shop in Klemme on Wednesday and Saturday nights.

Mrs. C. A. Larsen, Eunice and Junior, were Mason City visitors on Saturday.

Mrs. Lena Schroeder and Mrs. Evert Barz were visitors at Kanawha Friday.

Mrs. Leo Esbeck left Monday for Keokuk, being called there by the illness of her sister.

Mr. and Mrs. Verle Keraus and children of Garner, were visitors at the E. C. Buntenbach home Sunday.

Miss Ruth Stille of Des Moines spent the week end visiting with her parents, Mr. and Mrs. Lester Stille near Klemme.

Mrs. Earl G. Schaeffer spent the week end at Storm Lake visiting with her parents, Rev. and Mrs. C. Wilson.

Mr. and Mrs. R. A. Jorgenson were in Des Moines Friday to attend the annual convention of the Iowa Press Association.

Mr. and Mrs. Wallace Pavey and Mrs. John Clements and Jimmie visited at the Wayne Pavey home at Webster City, Sunday.

Mr. and Mrs. Sumner Trumbull, Mrs. George Lawhorn, Mrs. Daisy Lemke and Mrs. Rhine Lemke were Mason City callers Monday.

Cadet Nurse Luella Lewis of Des Moines, spent the week end visiting with her parents, Mr. and Mrs. Verner Lewis of near Klemme.

Mr. and Mrs. Art Kudje and Mr. and Mrs. Ed. Jacobs drove to Grundy Center Sunday for a visit with Mrs. A. H. Dulmes.

Mary Ellen, baby daughter of Mr. and Mrs. John Waddingham, has been ill with pneumonia, but is improving at this writing

Junior Larsen spent Saturday evening and Sunday in Mason City visiting with his aunt, Mrs. Buford Meyers.

Mr. and Mrs. Dan Green recently moved into one of the Wessels houses west of the depot. They had been living with their son on the farm south of Klemme.

Mrs. George Born, Mrs. Clara Barz, Miss Avis Barz and Raymond Barz visited with Mrs. Raymond Barz and baby son at the Mercy hospital, Sunday.

Mr. and Mrs. A. L. Kingery of Seneca were in Klemme on business over the week end. Mr. Kingery will be superintendent of our schools the coming year.

The weather took a sudden turn for the better last Thursday and the sunshine was most welcome to farmers who have been delayed in getting their spring work done.

Mr. and Mrs. Frank Ward were dinner guests Sunday at the home of her mother and brother, Mrs. August Ridder and son, Harold, of near Forest City.

Miss Ardella Nelson, who is a student at Hamilton's School of Commerce at Mason City, spent the week end visiting with her parents Mr. and Mrs. Verner Nelson.

Mrs. Evert Barz and children moved last week from the apartment in Mrs. C. F. Keraus's house to the Tom Blank house in southwest Klemme.

Mr. and Mrs. R. W. Elder visited with the Wm. Trafords and E. G. Ells at Belmond Sunday. Both Mr. Trafford and Mr. Ell are connected with the Thompson Seed Corn Co. at Belmond.

Mrs. Frank Gruetzmacher and daughter, Glenna of Des Moines, will return to Klemme as soon as school is out and will live in Mrs. Gruetzmacher's apartment during the summer.

Klemme business places are now open two nights a week; Wednesday and Saturday.

Pvt. Aaron Wille arrived home from Biloxi, Miss., to spend a furlough visiting with his parents, Mr. and Mrs. C. J. Wille and family. He will report back to a camp in Louisiana on his return.

Relatives have received word that Seaman Roland Barz is ill with a case of scarlet fever at Camp Farragut, Idaho. Roland had expected to be home on a furlough this week.

Mr. and Mrs. Lyle Liebendorfer of Forest City, and Mrs. Robert Liebendorfer and son Jon, of Preston, Minnesota, were supper guests at the R. A. Jorgenson home Sunday evening.

Sgt. "Pete" Paul writes his parents, Mr. and Mrs. Herman Paul, inquiring: "Do hens still lay eggs with shells on?" "Pete" is somewhere in Italy and evidently would like some nice fresh Iowa eggs.

Work is going right along on F. J. Arnold's new building. A sizeable portion of the block walls have been layed at this writing. Mr. Arnold expects to move into his new building about June 1st.

Mr. and Mrs. J. A. Chambers received a letter dated April 28th from their son Wayne who is in Algiers. The letter arrived here May 2nd, which was certainly fast mail service

Four Klemme men are now employed at the Britt hemp mill, Roy Schaefer, Bernard Smid, Phillip Bock and Frank Ward. So far the plant is only operating on a daytime shift.

Mr. and Mrs. Otto Schlawin of Garner and Mr. and Mrs. Menno Eenhuis of Hayfield, visited briefly in Klemme Monday morning on their way to Lohrville for a visit with Mrs. Herbert Cole, daughter of Mr. and Mrs. Schlawin and sister of Mrs. Eenhuis. Herbert Cole was recently inducted into the U. S. Army and is now stationed in California.

We can print anything. Call at the Times Office.

JUNIOR-SENIOR BANQUET HELD FRIDAY EVENING

Dutch Theme Carried Out In Decorations And Banquet

The Junior-Senior banquet was held in the high school gymnasium, Friday evening, May 5th A Dutch theme was carried out and thus at the entrance was a white picket fence with Dutch figures and windmills in the background The Senior motto was displayed on the west wall, while stone crepe paper representing a dike was the background on the north wall.

The tables were very attratively arranged with centerpieces of multicolored tulips surrounded by white picket fences. Yellow candles, napkins, and doilies added to the color of the tables. Nut cups were in the form of pots of tulips. Each girl received a white carnation while each boy received a red carnation, these being the Senior class flowers. Programs were cleverly printed in make-believe Dutch

Ewald Grosshuesch, junior class president, gave a few words of welcome to the guests, consisting of the Senior class and faculty.

The program consisted of the girls' sextette singing "Wooden Shoes," and "Windmills of Holland," by Carrington.

The Senior response was given by the president, Carrol Etchen. A choral reading by the speech class consisted of "Dutch Lullaby" by Eugene Field, and "The Conga" by Vachel Lindsay. 'In An Old Dutch Garden" was played by th esaxophone quartette, after which Supt Leo Esbeck gave an address.

Between courses Dutch songs were sung.

Mothers of members of the Junior class prepared the meal and the Freshman class served as waiters and waitresses.

MRS. WINNIE BEIER BRIDE OF ROCKWELL MAN

Couple Lives At Rockwell Where Groom Owns Restaurant

Mrs. Winnie Beier, daughter of L. G. Avery, Goodell, and Wilbur Smith, of Rockwell, were united in marriage Sunday afternoon, April 23 at 2 o'clock in the Methodist church in Mason City, with the Rev. M. B. Korbon, pastor, officiating. They were attended by the bride's and daughter-in-law, Mr. and Mrs. Avery Beier.

The bride was attired in a navy blue tailored suit with matching hat and wore brown accessories. The bridegroom wore a brown suit.

Mr. Smith owns and operates a cafe at Rockwell, where they went immediately after the ceremony where a luncheon was served to the wedding party. They began housekeeping at once in rooms in the cafe building.

Sunday, May 14th, is Mothers Day. Don't foget mother.

SCHOOL PICNIC WILL BE HELD TUESDAY NOON, MAY 16

With the Baccalaureate service to be held at the Methodist Church on Sunday evening, May 14th; the Commencement Exercises at the school auditorium on Monday evening, May 15th, Klemme schools will come a close with the annual community picnic on Tuesday, May 16.

Each family is requested to furnish sandwiches and two covered dishes. Also be sure to bring your own dishes and silverware for your family

BOARD LETS CONTRACT TO CLEAN DRAIN DITCH

The Hancock and Winnebago county boards of supervisors have awarded a contract for the cleanout of joint drainage district No. 51 of Hancock county, and No. 36 of Winnebago county, to the Empire Contractors, Inc., of Omaha, Nebr.

The total cost of the project is $3,040.08. Work will start June 1st and must be completed by October 1 this year.

Wm Henschen was appointed construction engineer to supervise the project. This district is a short distance east of Woden.

PLANS ARE MADE FOR COUNTY 4-H GIRLS RALLY DAY

Mrs. C. J. Wille, county 4-H girls committee chairman and Miss Hazel Grimes met with fourteen committee members, 4-H club leaders and assistant leaders to plan for a county-wide 4-H Rally Day.

It was decided to hold Rally Day for all Hancock County 4-H girls' clubs on the afternoon of June 6, at the high school auditorium in Britt.

Election of new county officers, reports on club activities and the bond campaign and a view of the coming year's work will be an important part of the meeting. In addition, a revue, "Living The 4-H Pledge," will be presented and traditional installation and flag ceremonies will be part of the days activities.

Klemme Girl Will Teach At Lakota Coming School Year

Miss Elsie Ward, daughter of Mr. and Mrs. Frank Ward, will teach in the Lakota high school this coming school year.

Miss Ward recently graduated at Iowa University with a degree in Home Economics. She will remain at Iowa City, where she has a good position, until August 1st.

GAME FISH SEASON OPENS MAY 15

This Boy Had Good Luck Fishing Bullheads

Monday, May 15th, marks the opening date for taking some of Iowa's game fish, namely: Northern Pike, Wall-eyed Pike, Yellow Perch, Yellow Bass, Striped Bass and Silver Bass. The Trout and Catfish season is already open. A continuous season exists on Bullhead, Sheephead, Suckers, Red Horse, Carp, Buffalo and Quill Back.

The catch limit on Northerns and Wall-eyes is 8 per day; Perch and Yellow, Striped and Silver Bass, 15. Total daily limit 25 for all varieties.

"LITTLE WOMEN" SENIOR PLAY THIS THURSDAY

Eleven Senior Take Part In Old Story By Louisa Alcott

As their final high school play, the Klemme Senior class will present an adaption from Louisa M. Alcott's story, "Little Women," on Thursday evening, May 11 (this week) at 8:00 o'clock in the high school auditorium. It follows the book very carefully, beginning with the four "little women" in their early youth, taking them through their troubles up through maturiy and marriage. Both sadness and happiness are present and will provide plenty of humor and a few tears.

Eleven members of the Senior class take part: Julia Bell, Corrine Merkel, Clara Koehler, LaVohn Schlawin (the four "little women,) Eunice Larsen, Richard Legge, Mildred Busse, Mavis Nuehring, Allen Lau, Carrol Etchen and Larry Van Syoc.

Wava Schoenwetter is stage manager with two members of the cast assisting. The play is directed by Mrs. Howard Campbell.

A great deal of work and trouble has gone into the presenting of this play. Costumes, furniture and properties have been secured from every source, and the class is grateful to all those who have assited them in their search. An interesting feature of this play will be the "make-up jobs" put on by the cast with the exception of three of the boys. Make-up was studied in Speech Class in preparation for this event.

GOODELL GRADUATION THURSDAY EVE., MAY 18

Judge S. A. Clock of Hampton will deliver the address to the graduates of Goodell high school at the Goodell Community Hall, Thursday evening, May 18th.

The Baccalaureate sermon will be delivered by Rev. H. Knight at the Goodell U. B. Church on Sunday, May 14th at 8:00 p. m.

The Goodell school closes with a picnic on Friday noon, May 19th.

The graduates are Loran Fjetland, Lula Peterson and Christie Peterson.

MARRIAGE CEREMONY AT METHODIST CHURCH

Pvt. Joseph N. Mehus and Miss Evelyn Mae Pringnitz, both of Kanawha, were united in marriage at the Klemme Methodist Church on Thursday afternoon, May 4 at 5:0 p. m., with the Rev. Herschel F Harvey officiating, who read the ceremony using the double ring service.

The couple were attended at the altar by the bride's parents, Mr and Mrs. Franz Pringnitz of near Kanawha.

The bride wore a light blue sport suit.

Private Mehus is in training at a camp at Tonopah, Nevada, and after a short honeymoon he will return to his camp, while Mrs. Mehus will remain with her parents.

SIX HANCOCK COUNTIANS BECAME NATURALIZED

Hearings on the naturalization of six persons were held Thursday morning before Judge T. A. Beardmore at the courthouse in Garner.

Those who applied for citizenship were John Sweede, Woden; Nicco Waage, Goodell; Mrs. Grace Pannhoff, Forest City; Harm Delger, Kanawha; Mrs. Marie Lacey, Goodell; and Mrs. Catherine M. De Vries, Garner.

SCHOOL PICNIC HELD AT AVERY CENTER FRIDAY

The Avery Center School, of which Miss Evelyn Arnold is the teacher, held its closing day exercises and picnic Friday.

A large crowd was present for the program and the picnic dinner which followed.

AT KANSAS AIR BASE—T. Sgt. Graydon Back, son of Mr. and Mrs. Herman Back of Klemme, is now stationed at Great Bend, Kansas, where he is a machinist in the air corps. Sgt. Back is a graduate of Klemme High School and was farming before entering the service.

(Picture Courtesy of Mason City Globe-Gazette)

EXPERT IN RADIO—T. Sgt. Lester D. Merkel, son of Mrs. Peter Merkel of Klemme, is a radioman with the field artillery. He left for overseas in February this year after his basic training at Camp Pickett, Va. Sgt. Merkel, who worked with Decker's at Mason City before entering service, is now in New Guinea.

(Picture Courtesy of Mason City Globe-Gazette)

WORKS IN HOSPITAL — Sgt. Francis Pearson, son of Mr. and Mrs. Carl Pearson of near Klemme, is stationed at Brigham, Utah, where he serves at Bushnell General Hospital which cares for servicemen suffering with nervous exhaustion. Mrs. Pearson, the former Betty Lass, is living with her husband in an uptown apartment and is employed in a telephone office.

(Picture Courtesy of Mason City Globe-Gazette)

MORE MEN LEAVE FOR ARMED SERVICE

The following boys who had previously passed their Pre-induction physical examination at Camp Dodge, Iowa reported back for active duty into the Navy, May 2, 1944:

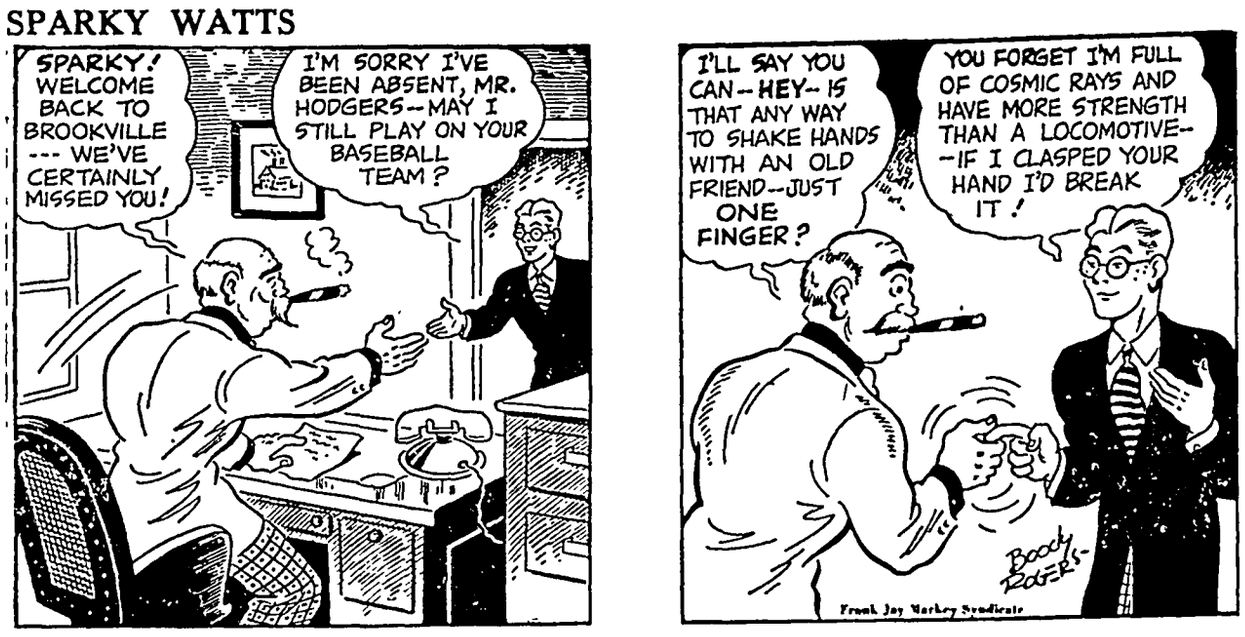
Robert E. Trainer, Jr. Kanawha, Ia.
Donald E. Hampe Britt, Iowa
Rudolph C. Johnson Britt, Iowa
Harold T. Askildson Kanawha, Ia.

Frederick J. Sorensen Britt, Iowa was transferred to this County for induction into the Navy.

When you have company or take a trip, that's news. Phone 12.

Fun for the Whole Family

SPARKY WATTS



SPARKY! WELCOME BACK TO BROOKVILLE --- WE'VE CERTAINLY MISSED YOU!
I'M SORRY I'VE BEEN ABSENT, MR. HODGERS--MAY I STILL PLAY ON YOUR BASEBALL TEAM?
I'LL SAY YOU CAN--HEY--IS THAT ANY WAY TO SHAKE HANDS WITH AN OLD FRIEND--JUST ONE FINGER?

Help Yourself to a Salad!
(See Recipes Below)

Salad Magic

lads are in season summer, winfall and spring, but in spring you can really have all the variety you want. There are crisp greens aplenty, perhaps fresh from your own garden, and loads of fresh fruits and tables to complete the demands ealth and satisfy the appetite eally fresh - from - the - garden

erywhere you go you hear peosaying, "A salad is just the ," or "I want something green crisp." It's a sign of spring, desire to eat foods that fit with ewness and freshness of spring. new idea for serving is to try a buffet for it will save your aring individual salads for ev-ne. Simply set salad ingredin bowls, park them on a tray whisk them into the dining room everyone to make up his own bination. In the picture illusd above, you will notice the of salad dressing is surroundy crisp greens, and then there owls of grapefruit sections with ado pears. strawberries, pears eaches and prunes stuffed with ge or cream cheese and nuts—e makings for salad for helping self to any combination that ap-s to you and your guests.

lads can double for both the d and dessert course, or they be the mainstay of your lunchfor the club.

***Salad-Dessert Loaf.**
(Serves 6)

velope plain unflavored gelatin
up cold water
g yolks
blespoon melted butter or substitute
up mild vinegar
blespoons vinegar
easpoon salt
easpoon paprika
grains cayenne, if desired
up milk
blespoons canned pineapple juice
p prepared fruit
p evaporated milk, whipped

ften gelatin in cold water. Beat yolks and salt. Add vinegar, butter, cay-, paprika and apple juice dually. Whip ly. Add milk cook in top of ble boiler un- custard con-ency, stirring constantly. Re-e from fire and dissolve softened tin in hot custard mixture. Chill, ing occasionally while cooling. n mixture begins to set, fold in pped, evaporated milk and fruit, in small pieces (orange, cher-canned pineapple, grapefruit,

peaches, pears or any desired fruit combination). When firm, unmold on platter and garnish with green pepper. Trim platter with salad greens.

Shrimps in a salad can make up the main dish for a warm night supper without too much fussing on your part:

Shrimp Salad.
(Serves 6)

2 No. 1 cans shrimp
2½ cups diced cooked potatoes
1 cup diced celery
¼ cup chopped green pepper
½ cup french dressing
2 tablespoons lemon juice
½ teaspoon salt
½ cup mayonnaise
Salad greens
3 whole tomatoes, cut in wedges
8 green pepper rings
Ripe olives

Combine shrimp, potatoes, celery and green pepper. Add french dressing, lemon juice and salt. Chill. Just before serving, moisten with mayonnaise. Serve on chop plate garnished with salad greens, tomato wedges, green pepper rings and ripe olives.

A salad that's substantial and really good is one that combines fish with macaroni. A subtle combination of seasonings makes it just perfect eating:

Macaroni-Salmon Salad.

1½ cups flaked salmon, tuna or crabmeat
1 cup cooked macaroni
1 cup canned peas
½ cup diced celery
2 tablespoons minced pimiento
2 tablespoons chopped sweet pickle
Salt and pepper to taste
Mayonnaise

Combine ingredients in order given. Toss lightly with dressing and serve, well chilled in lettuce cups.

The following salads are cool and vitamin-rich, perfect foil for warmer weather:

Raw Vegetable Salad.

2 cups raw carrots, grated
1 cup raw cabbage, shredded
¼ cup raw celery, chopped
¼ cup onions, diced
Cooked salad dressing

Mix together vegetables with just enough dressing to hold together.

Lettuce Rolls.

1 head lettuce
1 cup cottage cheese
½ cup seedless raisins
½ cup chopped nuts
½ cup mayonnaise
Salt

Combine cheese, raisins and nuts. Blend well with mayonnaise. Add salt to taste. Use large lettuce leaves and spread with cheese mixture. Roll as for jelly roll; chill and serve.

Dressing Variations.

French Dressing: Crumble ¼ pound roquefort cheese into 1 cup french dressing. Serve over greens.

Lemon Cream Dressing: To 1 cup chilled, evaporated cream, whipped, add 3 tablespoons honey and 1 tablespoon lemon juice. Serve with Fruit Salad.

Mayonnaise: Add ¼ cup chili sauce, 2 tablespoons pickle relish, and 2 hard-cooked eggs, chopped to 1 cup mayonnaise. This is good over lettuce.

Speaking of Sports
by Bob McShane

Released by Western Newspaper Union.

THE current season's most unpleasant task confronts us, so in deference to tradition this department makes its annual baseball selections. In order to prolong the agony, today's soul-stirring outpouring will be devoted solely to the National league.

And that is as it should be. The job is considerably easier in the senior circuit. The National league contains the only first class club in baseball this season — the St. Louis Cardinals.

All in all, the Western clubs are stronger this year. There is a very good chance that an Eastern team will not be able to break into the first division.

Cardinals Strong

Things wouldn't be so gloomy if the strength in the Western clubs were evenly divided. But the Cardinals are more menacing than they were a year ago. They haven't as strong a club as the 1943 offering, but they haven't been hurt nearly as much as the seven other clubs in the league. Remember that the Cards won by 18 lengths over the Reds, with Brooklyn 23½ games behind and the Pirates 25.

Here is the way this department muddles things up:

St. Louis	**Brooklyn**
Chicago	**New York**
Cincinnati	**Boston**
Pittsburgh	**Philadelphia**

The Cardinals have suffered but few important losses — Outfielder Harry Walker, who may return with a medical discharge, Second Baseman Lou Klein, Infielder Jimmy Brown and Pitchers Al Brazle, Murry Dickson, Howard Krist and Ernie White.

Manger Billy Southworth still has Pitchers Harry Brecheen, Mort Cooper and Max Lanier. His World Series infield shows only one change, Emil Verban from Columbus having replaced Klein at second. The outfield presents three veterans—Stan Musial, Johnny Hopp and Danny Litwhiler. Walker Cooper, one of the best catchers in the game at the beginning of the last season, is available. So are many other stars of the St. Louis cast.

Billy Southworth

It's customary to pick the Cubs for second place. In fact, one gets in a disagreeable rut by naming the Cubs to place. Last year Mr. Wrigley's hired men wound up an inglorious fifth, 30½ games out. But the present season finds the club fairly well equipped with experienced pitchers. And good pitching can land the club in second place. (Somewhere we've heard that song before.)

Mound Losses

We string along with Cincinnati for third place largely because of Manager Bill McKechnie. The Reds have been hard hit in their once-strong department — the pitching staff. They have lost Johnny Vander Meer and Clyde Shoun. They will mourn the loss of Lon Frey at second. Others—including Eddie Miller and Gerald Walker—are susceptible to the draft.

But Master William McKechnie is a sound, resourceful and reliable leader. He has a habit of successful operations. The rejection by the military service of First Baseman Frank McCormick has strengthened the Cincinnati club. McCormick is a long distance hitter who will make quite a difference in the final standings.

The Pirates may prove to be a surprise club. Frank Frisch has a good infield, with Babe Dahlgren replacing Elbie Fletcher at first base, Bob Elliott back at third, and Frank Gustine and Pete Coscarart in between.

The Dodgers' unhappy plight is made all the more evident by the report that Manager Leo Durocher is likely to play.

The Giants are weak. They will do well to end up in sixth place and may be forced to get along without the services of Manager Mel Ott, who is 1-A.

The Braves have a new bankroll to work with. Bob Coleman, the new manager, is widely known as a developer of young players. But the present emphasis isn't on youth in the big leagues.

We will not attempt to discuss the Philadelphia Story other than to remind you that the club is now known as the Blue Jays. Remember that names don't mean a thing.

SPORTS SHORTS

¶ Frank Mancuso, rookie catcher for the St. Louis Browns, was making his fifth parachute jump when he suffered injuries which led to his honorable discharge from the army. Regulations call for five jumps from a plane to qualify as a jumper.

¶ The Jim Corbett-Bob Fitzsimmons match at Carson City, March 17, 1897, was the first fight to be filmed.

¶ Harry Stuhldreher will conduct a clinic for state high school football coaches at the University of Wisconsin late in August.

The Once Over

CAMPAIGN AGAINST SUPERSTITION

("The war production board proposes a campaign to overcome the superstition against lighting three cigarettes on the same match. It would save matches."—News item.)

The scene is the WPB office.

The characters are a WPB chief and two advertising experts.

Chief—Now what we want to do is to overcome this aversion to three on a match. It is a ridiculous superstition, don't you think?

First Advertising Expert *(nervously watching the chief light a second cigarette with the same match)*—Absolutely. And thank you for blowing that **one** out!

—*—

Chief—You'd be surprised how many Americans are wasting matches.

First Advertising Expert *(lighting his own and carefully throwing the match away)*—It's really startling.

Second Advertising Expert—And all so silly.

Chief *(secretly rubbing a rabbit's foot)*—What we've got to do is to start a campaign against superstition.

First Advertising Expert — We could try it out in the 13 original states as a starter.

Second Advertising Expert *(uneasily)*—Let's make it twelve or fourteen. I don't believe in such things, but on the other hand, why go out of your way?

Chief—Nonsense. Thirteen is no more unlucky than any other number. Ahem. Still, let's make it 12 states.

—*—

First Advertising Expert—Suppose we take a few days and whip up a few suggestions for an anti-superstition campaign?

Second Advertising Expert — We could get something ready by Friday.

First Advertising Expert *(wincing)*—Not Friday, please!

Chief—Make it Monday. I'd feel better, too. Now, have you any suggestions in a general way? *(They take another cigarette. He lights his own and holds the match for the First Advertising Expert.)*

First Advertising Expert — Let's each light our own.

—*—

Second Advertising Expert—Maybe we had better call it off for today. Come to think of it, I got out of bed on the wrong side this morning.

Chief—We want to be in the right mood when we start this war on superstitions. I'm willing to forget it for today.

(The two advertising men start to leave, but return and sit down at once after opening the door.)

First Advertising Expert — We can't leave now.

Chief—Why not?

First Advertising Expert—Somebody put a ladder in the hall right over the doorway!

* * *

THE TELEPHONE TAX

Of all the new taxes the increase in those on telephone calls seem the hardest to understand. From now on you will pay 25 per cent on every out-of-town call and 15 per cent on every local call. That runs into folding money.

—*—

And we can't see the logic. Does Washington hold that telephoning is an amusement?

—*—

Would anybody claim it's a pleasure under war conditions?

—*—

And no matter how ornamental those telephone instruments may be manufactured, you can't classify them as costume jewelry, can you?

—*—

Maybe the tax framers hold that conversation is a luxury. Perhaps Washington feels we are all talking too much.

—*—

We had come to think the telephone was a household necessity, almost like water and gas. We used to possess a phone in the belief it was an economical convenience. Now we just sit around worrying over a fear that somebody may use it for an outside call.

—*—

The old-time light-hearted manner of the average telephone user is shrinking up. There used to be laughter and gay chatter on the wire. Now it's a business venture.

—*—

A 25 per cent tax on out-of-town calls is terrific, even if you refuse to pay it. It is almost as expensive to go out of town by telephone as it is by auto.

—*—

And if she is a slow talker you're slated for bankruptcy.

—*—

And a tax of 15 per cent on your bill for local calls from your own bungalow is disturbing. You're losing money the minute you take off the receiver and give central the number.

—*—

By the time you've said "Is this you, honey?" you're in debt over your head.

—*—

"Call me up some time," used to be accepted as a friendly expression of regard. It now becomes an invitation to extravagance.

PATTERNS
SEWING CIRCLE

THE new low neckline, edged with a frill, the ribbon side-lacing, topped with a dainty flower applique design, makes it a memorable dress.

* * *

Barbara Bell Pattern No. 1936 is designed for sizes 11, 13, 15, 17 and 19. Size 13, short sleeves, requires 3⅛ yards 39-inch material; 2 yards ribbon.

For Summer Parties

JUST the sort of flattering party dress any young girl likes to wear—it can be made in silk crepes or in crisp dotted muslins. Done in percales it is a splendid school frock.

* * *

Barbara Bell Pattern No. 1938 is designed for sizes 6, 8, 10, 12 and 14 years. Size 8, short sleeves, requires 2½ yards of 39-inch material; ¼ yard contrast for collar.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

ASK ME ANOTHER?
A General Quiz

The Questions

1. How great an area does the Vatican City cover?
2. "Ad valorem" is a duty levied according to what?
3. How long will it take 1,000 airplane workers on a 40-hour week to replace 60 bombers lost in one raid?
4. January 25, 1944, was the start of what year for China?
5. A febrile person is what?
6. What is the average length of an adult porpoise?
7. What country is on Mexico's southern border?
8. Which way is shorter to Japan from San Francisco—by way of the Aleutians or via Hawaii?
9. James J. Davis was secretary of labor under how many Presidents?
10. In business what is meant by a silent partner?

The Answers

1. About 100 acres.
2. Value.
3. One year.
4. The 4641st year.
5. Feverish.
6. Five and one-half feet.
7. Guatemala.
8. By way of the Aleutians is shorter by 1,700 miles.
9. Three—Harding, Coolidge and Hoover.
10. One who has invested money in the business without having assumed an active role in its administration.

Shroud Is Bridal Gown

In Japan it is the custom for an engaged woman to make a burial shroud for herself. She wears it first when she is married, then when she is dead.

SNAPPY FACTS ABOUT RUBBER

A researcher in things rubber reported that in 1858 the trade in rubber products ran between four and five million dollars annually and the industry employed 10,000 workers. Vulcanization had been known less than 20 years then.

The extra man-hours required in the manufacture of heavy tires for military airplanes, trucks, combat vehicles and for civilian trucks, buses and farm tractors mean that the major share of the tire-building manpower and facilities available must be devoted to this job, in the opinion of John L. Collyer, B. F. Goodrich president. These are the essential needs from a current tire standpoint.

Ink Spots And Spatters

By Jergie

YEP, WE'RE ALREADY SPOKEN FOR

A few weeks ago Herman Stromer, farmer-sportsman living just north of Klemme, was taking it easy one evening and listening to the radio.

Herman was quite tickled with things in general when it was announced that business men would be expected to help the farmers with their work this year because of the man-power shortage. And he sat right up and laughed out loud when the announcer further continued, "and this includes NEWSPAPERMEN and bankers."

So before any other farmer could get a crack at this writer, Herman was in town the next morning bright and early (about 9:30 a.m.) and put the "bee" on us. Sure, we agreed to help Herman this summer and practically drew up a contract to the effect that money meant nothing, but we expected to be fed plenty of thick, juicy steak, potatoes and gravy, strawberries and thick cream, etc. That was all O.K. with Herman and just as he left us, he turned back and said:

"Just one more thing, Jergie, but keep this to yourself: be sure to bring your fishing tackle along when you come out to work."

Now just what could Herman mean by that?

Anyway Herman has "strings" on us, so you other farmers will have to pick out some other man along the Main drag for your helper this summer.

CONGRATULATIONS TO THE CLASS OF 1944

You are a fine group of young men and ladies. We say men and ladies because you are no longer boys and girls but you are stepping out into the world to take your place along with other men and women.

You are to be congratulated for completing your four years of high school study. You are among the few who have taken the opportunity that is extened to all boys and girls who seek an education. Four years from now only a very small percent of your class will again receive diplomas, this time for completing four years of college work. We hope that the majority of you will try to attend college as there is going to be a greater need than ever before, after the war, for college educated men and women.

This is not a very bright world at present to step into from your study rooms. In a few weeks, or months, many of the young men in this class will be in the uniform of the United States. Perhaps some of the young ladies will also be wearing Uncle Sam's uniform this summer.

We are depending on the young men and women of TODAY to straighten out the mess we have gotten into. You will be playing an important part in winning the war, winning the peace, rehabilitation of the world and rebuilding it into a place again fit to live in, so that in years to come other graduates will have more to look forward to than you do today.

Good luck, Seniors.

A PRICE COMPARISON

—Earl Hall's Eye Observing in Globe-Gazette

I found the following figures a fairly good answer to the claim sometimes voiced that "prices are just as high as they were at the end of the last war." There might be some argument concerning the use of 1920 figures, of course, since that was the top of the inflation curve, just before prices broke in July, 1920. The 1943 prices listed are the ceiling prices under OPA regulations:

Item	1943	1920
Sugar	$ .08	$ .18
Flour	1.85	4.00
Coffee	.35	.60
Raisins	.16	.30
P & G Soap	.05	.10
Rice	.10	.20
2 lbs. peanut butter	.59	.90
Peas, canned	.15	.20
Bacon (in slab)	.34	.52
Lard	.19	.37
Quart dill pickles	.27	.50
Gold Dust	.23	.35
American cheese	.42	.55
Butter	.54	.75
1 qt. corn syrup	.78	1.10

IT'S AN OLD STORY BUT WORTH TELLING

Perhaps the most common mistake made by those engaged in dealing with public problems is to assume that because some fact was at one time told to the people, we can proceed on the theory that it is generally known.

In the hurry and confusion of living, particularly in these trying times, we will find it necessary to keep repeating over and over again the things we want people to remember, because, if for no other reason, there are so many of us too busy at any one time to listen attentively.

And so we are going to again try to impress upon YOU, dear reader, this oft repeated truth—there are only three ways to reduce public spending, one, to PAY LESS for something; two, to BUY LESS of something; three, to NOT BUY something.

This was the burden of Frank Arnold's address at the first annual meeting of the Iowa Taxpayers Association nine years ago this fall, and we have repeated it several times, but is cannot be too often told.

Today almost all of the six thousand tax-levying bodies in Iowa are seeking ways of avoiding sharp increases in their budgets for next year, due to rising costs of almost every item, but principally in salaries and wages of public employes.

Certainly the first of the three methods— to PAY LESS—seems to offer no hope, for there is scarely an item in any proposed budget for another year that does not appear to cost as much, and in most cases more.

It is therefore quite obvious that any offsetting economies must come from one or both of the other possibilities, to BUY LESS and to NOT BUY some of the things we would like and would ordinarily buy and use. Of course, some of these we can't buy today and in a great many other cases, postponement of purchases will further the war effort.

The taxpayers of Iowa are not going to expect the impossible and they are willing to provide for the necessary increases in cost of indispensable items of public service, but they do expect all of you who are changed with the responsibility of scheduling next year's expenditures and taxes to provide for nothing you can safely do without and for no more than is absolutely necessary.

This is the patriotic course and the sound business procedure.

Our hero, Jerome Spiltch walked into a haberdashery store bent upon the purchase of a shirt. The clerk, received him cordially and inquired as to his wants. Jerome stated that he wished a shirt with a 14 collar and 34 sleeves.

"What's it for," asked the clerk with a leer, "a centipede?"

The old lady, visiting an insane asylum, observed the lunatics at work. One man was standing in the corner idle.

"My good man," inquired the old lady, "why don't you work? Aren't you crazy?"

"Yes, mum, but not that crazy," the man replied.

Samson: "My strength lies in my hair."

Delilah: "Why don't you wash it?"

Our Men In The Service

HOWARD SCHOENWETTER GIVEN M. M. APPOINTMENT

Howard Schoenwetter, son of Mr. and Mrs. George Schoenwetter of Liberty township, was given an appointment by a Georgia congressman to the Merchant Marine Cadet Corps on April 24.

Cadet Midshipman Howard K. Schoenwetter is a graduate of the Klemme High School and of the National Electronic Television school of Detroit, Michigan, and has completed three years of work at the University of Georgia Also during the past three years he was engaged in broadcasting work and the teaching of enlisted men in the Signal Corps of A. S T. P.

Mr. Schoenwetter is a member of Sigma Pi Sigma, honorary physics society, Pi Nu Epsilon, honoray mathematics society; the Institute of Radio Engineers, and the Sigma Nu social fraternity, Nu Chapter

Mr. Schoenwetter is now at Henderson's Point, Pass Christian, Miss. where he is receiving his Merchant Marine training. Upon completing his schooling he will garduate as an Ensign. His new address is:
C-M Howard K Schoenwetter, ID2
USMMBS, Henderson's Point,
Pass Christian, Mississippi.

PVT. LOREN GAST LIKES "COMMUNITY LETTER"

San Antonio, Texas,
May 5, 1944

Dear Jergie:

On the first of May our camp address was changed so would appreciate it if you would send the "K. T." to our house address: Pvt. and Mrs. Loren C. Gast, 1110 West Ashby Place, San Antonio, Texas. However, our location and work did not change.

We always appreciate scanning through the good old home town paper. We get the immediate home news from our folks, but the "K. T." gives us a "community letter" of the latest happenings.

Thanking you, always,
Ruth and Loren Gast.

Mr. and Mrs. Anton Boller, of Goodell have recently been notified of the advancement of their two sons in the army. Kenneth, Jacksonville, Fla., has been promoted to Staff Sergeant, while Wesley, at Camp Wallace, Texas, is now a corporal.

Wayne Bachman, Seaman 2-c, who has seen service for the past year in the Aleutians, spent the past week visiting with his sister, Mrs Rob Roths and family, and at Belmond with his parents, Mr. and Mrs Fred Bachman

Pvt Aaron Wille, who has been spending his furlough visiting with his parents, Mr and Mrs. C. J. Wille of near Klemme, will report back for army duty at Camp Pope, La., where he will check in May 12. Pvt Wille was stationed at Keesler Field, Biloxi, Mississippi before coming home.

BETTER IOWA GARDENS

Most fruit trees are full of bloom, and prospects are for a good crop of fruit this year. However, if a good crop is wanted of clean, high quality fruit, it must be protected throughtout the summer from the ravages of insects and diseases. Spraying is most important.

* * *

Apple scab is likely to be quite serious with so much rain this spring. Three sprays are necessary to provide adequate control of this disease. The first should be the cluster bud spray, put on just before blossoming. This should be followed by a spray right after the petals fall, and another spray in about 2 weeks.

* * *

Here's the correct way to make a lime sulfur-lead arsenate spray mixture: Dissolve each material separately in pails of water. Then pour them together in the diluted form. The best mixture is obtained when the lime sulfur is added first, then hydrated lime, with the lead arsenate going in last. Never mix these materials together in the concentrated form.

* * *

Some trees may not get sprayed before coming into full bloom If not, spray at once but leave out the lead arsenate. Lead arsenate will kill bees Spraying in full bloom with lime sulfur alone will not seriously hurt the pollination of the flowers and the set of fruit.

* * *

For the spraying season, fruit growers should have on hand lime sulfur in either the liquid or dry form, lead arsenate and hydrated lime. For each large 20-year-old apple tree, where four sprays are to be applied, it will require 2 quarts of liquid lime sulfur or 2 pounds of dry lime sulfur, 1 pound of hydrated lime and ½ pound of lead arsenate. Young trees will take much less.

* * *

Mix only enough spray materail to do the present job of spraying. Spray mixture deteriorates quite rapidly. Any material left over after one spraying should be discarded. The pump should be thoroughly washed out with clean water after applying each spray as these materials are corrosive

* * *

Many people spray and get no results Success depends upon: (1) Applying enough sprays during the season to control the pests present in the orchard; (2) using the right materails; (3) correct timing of the spray; (4) doing a thorough job in covering every part of the tree with the spray mixture.

A glass of hot water every morning will make you feel like a tiger. Especially when your wife spills it on you while you are sleeping.

The protein feed outlook should be more favorable next fall than it has been in 2 years, economists at Iowa State College say.

It is a good idea to mark the pigs from the sows that produce good litters so that when it comes time to select gilts to breed next fall one can idenify those from the good sows, suggests E .L. Quaife of Iowa State College.

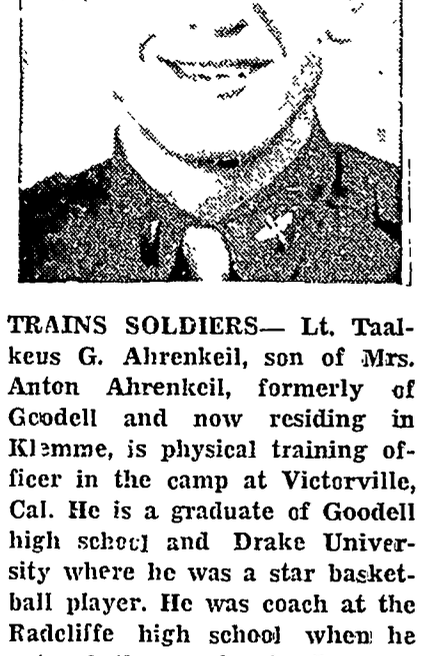
Operators of small sized farms have been increasing the number of cows milked while large farms are cutting down.

IS IN ENGLAND — Cpl. John Hubbard, son of Mr. and Mrs. W. H. Hubbard of Goodell, spent 19 months in the army medical corps at Ft. Riley, Kansas, and is now somewhere in England. He is a graduate of Mason City high school. During World War I he was in the S. A. T. C. at Iowa City. He is a member of the American Legion post at Mason City.

(Picture Courtesy of Mason City Globe-Gazette.)

TRAINS SOLDIERS— Lt. Taalkeus G. Ahrenkeil, son of Mrs. Anton Ahrenkeil, formerly of Goodell and now residing in Klemme, is physical training officer in the camp at Victorville, Cal. He is a graduate of Goodell high school and Drake University where he was a star basketball player. He was coach at the Radcliffe high school when he entered the service in January, 1942. He received his training at Camp Wolters, Texas, and officers' training at Victorville.

(Picture Courtesy of Mason City Globe-Gazette.)



NINE MONTHS ON ATTU—Alvin Albers, carpenter's mate 3rd class, son of Mr. and Mrs. Fred Albers, Sr., of Goodell, has been in service for over 2 years, and spent 9 months on the island of Attu in the Aleutians. He was home recently on a furlough.

Globe-Gazette.)

IMPORTANT TO PLANT CORN BEFORE BEANS

Use of Early Bean Variety Will Assure Maturity If Planted Late

Although soybeans consistently show greater yields when planted May 10 to 20 in central Iowa, corn is still Iowa's most important crop and probably should be planted first, says E. S Dyas, extension agronomist at Iowa State College.

By choosing an early variety, beans can be matured if planted as late as June. If the right varieties are selected, there is less loss in delayed planting of beans than in planting corn late.

Yields Suffer

In central Iowa, Richland beans have been included in planting trials for the past 6 years. Except in 1942, they have matured when planted up to June 14, but yields were not as high as when planted May 23.

For northern Iowa, an early Manchu strain, such as Wisconsin Manchu 606, matures about a week earlier than Richland. Mandarin is almost 2 weeks earlier than Richland and could be planted in northern Iowa up to June 15 or 20. Habaro is another variety that is early enough for June planting in the norther part of the state.

Inoculation Essential

Dyas warned farmers not to be in such a rush to get beans planted that they fail to inoculate the seed. In actual trails, inoculation has increased the yield per acre by 4½ bushels; increased the protein content of beans; and put more nitrogen back into the soil when the straw was left on the fields.

CAN REPLACE CORN WITH WHEAT AS POULTRY FEED

Iowa poultry producers need not be too greatly disturbed by the recent War Food Arministration corn freeze ruling, nor by prospects for a smaller 1944 oats crop. They can feed wheat.

W. R. Whitfield, extension poultry specialist at Iowa State College says results of feeding wheat to poultry 2 years ago were successful. He reports that wheat can replace one-half of the corn and one-half of the oats in the grain ration. And ground wheat may replace all the oats, or all of the corn, in the mash mixture. But ground wheat should not replace both the oats and the corn in the same mash mixture. Too much wheat has a laxative effect, and poor growth will result if too great quantities of wheat are fed.

Because wheat does not contain vitamin A in quantities found in yellow corn, compensation should be made by feeding alfalfa meal or other green feeds when the corn is reduced. Wheat can be self-fed whole in hoppers, both to young and old stock. But other feeders of corn or oats, or both, should be used at all times.

Sudden or frequent changes in the content of wheat in the poultry ration are not advisable. Whitfield says poultrymen should plan their corn-wheat-oats ration to cover a considerable period of time.

SAFETY RULES FOR TRACTOR OPERATION

Farm labor shortages are just as critical this year as in 1943, or even more so, which emphasizes the need for careful operation of the farm tractor. A careful operator is the best insurance against accident with all arm machinery, and County Extension Director, Paul Henderson suggests these rules:

1. Always drive at speeds slow enough to insure safety, especially over rough ground or near ditches
2. Reduce the speed before making a turn or applying the brakes. The hazard of overturning the tractor increases four time when speed is doubled.
3 Keep in gear when going downhill.
4. Be extra careful when working on hillsides. Watch out for holes or ditches into which a wheel may drop and cause the tractor to overturn.
5. Always engage the clutch gently, especially when going up a hill or pulling out of a ditch
6. When the tractor is hitched to a stump or heavy load, always hitch to the drawbar and take up the slack in the chain slowly.
7. Always ride on the seat or stand on the platform of the tractor. Never ride on the drawbar or on the implement.
8. Never permit persons other than the driver to ride on the tractor when it is in operation.
9. Always wait until the tractor is stopped before getting on or off.

See no evil, hear no evil, speak no evil, and you'll never be a newspaper man.

Guard to convict: "Hey you! Get to work!"

Convict: "Go ahead, fire me!"

Judge: "What possible excuse did you jurymen have for acquitting that murderer?"

Jury Foreman: "Insanity."

Judge: "What, the whole 12 of you?"

The damage of European corn borers last year in the United States is estimated to be 33 million dollars.

One of the most promising ways to check Bang's disease in cattle is to vaccinate all calves when they are 4 to 8 months old.

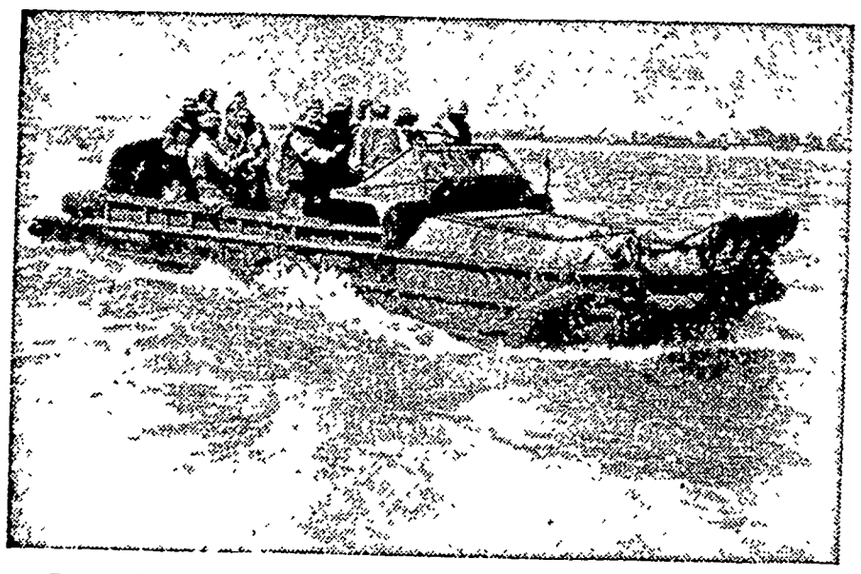
WEEKLY NEWS ANALYSIS

Unending Allied Air Offensive Blasts Nazi's Western Defenses, Railroads; Lag Seen in Farm Machinery Output; Dutch East Indies Bombed by British

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Camp Gordon, Fla.—Newspaper men touring southeastern camps ride amphibious tank at Camp Gordon, Johnston, Fla.

EUROPE:
Unending Raids

An unending procession of U. S. and British bombers soared over western Europe blasting the invasion path, while in the Balkans to the southeast, Axis forces went over to the attack to shore up the Russians' drive on Rumania and Hungary.

Big bombers, medium bombers and strafing fighter planes all participated in the Allied aerial attacks on France, the Lowlands and Germany, with rail communications leading to the invasion coast and airports and aircraft factories the principal targets. In one 36-hour period alone, Allied aviators made no less than 6,000 individual flights over the west.

Axis counterattacks in the Balkans took form as the Russians advanced on Carpathian mountain passes leading into the rolling Hungarian plains, and other Red forces threatened the rich Rumanian oil fields around Ploesti. In the Crimean peninsula jutting into the Black sea, Russian forces laid siege to the big naval base of Sevastopol, where Axis troops flocked after a lengthy retreat.

Demand Loyalty

As western Europe crackled under the Allies' savage bombing offensive to clear the invasion path, Nazi No. 2 Hermann Goering and Nazi No. 3 Joseph Goebbels used Hitler's 55th birthday to loudly appeal to the German people for unquestioned loyalty during the hectic period to follow.

Hermann Goering

Said Goering: "A thousand dangers may lie ahead . . . New anxieties and burdens may prove inevitable . . . No sacrifice and no privation should be too great to make for Germany . . . Our gift to the fuehrer is our vow not to lay down arms until we have assured the Reich's future."

Said Goebbels: " . . . Even the greatest leaders of history will be faced with occasional setbacks and defeats . . . It will not be possible to form an accurate and just idea of the individual war events and factors which have been decisive in the war until the war is over . . . So to serve our aims means to be loyal to the fuehrer and to follow him through all the storms of war. . . "

FOREIGN HOLDINGS:
U. S. Stake

After a canvass of more than 200,000 individuals, estates and trusts, and 16,000 business firms, the U. S. Treasury established American holdings in more than 50 foreign countries at $13,300,000,000.

Although two-thirds of the holdings of household goods, bonds and factories are in Allied or friendly nations, U. S. national's stake in Axis or occupied countries totals $3,775,000,000, of which $1,290,000,000 is in Germany, $265,000,000 in Italy, $90,000,000 in Japan, $65,000,000 in Rumania and $55,000,000 in Hungary.

By far the largest U. S. investments are in Canada, aggregating $4,375,000,000 and holdings in Great Britain total $1,030,000,000. Investments in Cuba amount to $785,000,000; Mexico, $420,000,000; Argentina, $355,000,000, and Brazil, $330,000,000.

MANPOWER:
Biggest Problem

During 1944, manpower and not material will constitute the biggest obstacles to resumption of the production of civilian goods, the War Production board's planning and statistical chief, Stacy May, revealed.

Although reductions in certain munitions programs may reach considerable proportions toward the end of 1944, the question of converting facilities to the manufacture of civilian goods will revolve around the army's call for manpower for casualty replacements, May said. Because of declines in construction employment and increasing efficiency in factories, however, more workers may be made available for consumer goods, May declared.

Sufficient steel, aluminum and copper probably could be obtained for civilian production later in the year, May said, but shortages of necessary parts or accessories might form serious bottlenecks.

PACIFIC:
Raid Treasure-House

Storehouse for Japanese oil, tin and rubber, the Dutch East Indies were hit by British bombers for the first time in nearly a year and a half, with docks, warehouses and shipping left in flames in the northern end of the islands.

While the bombers whacked at this treasure-house of natural resources which have fed the Japs' industrial sinews of war, British and Indian troops continued their desperate defense of the Bengal-Assam railroad in eastern India, feeding U. S. and Chinese forces hacking out a supply road to China in northern Burma.

In the South Pacific area, U. S. army and navy bombers teamed up to plaster the Japs' Caroline islands, gateway to the inner approaches of the enemy's principal Asiatic holdings.

AGRICULTURE:
Machinery

Because of the necessity of stepping up production of landing barges and other invasion craft demanding critical material, farm machinery output this year may not reach expected levels, War Food Administrator Marvin Jones revealed.

Although too early to make predictions, Jones said, machinery output should exceed 1940 figures. None has been allocated to the United Nations Relief and Rehabilitation administration or for export, he said.

As of April 1, Jones revealed, machinery production totaled 36,000 combines, 9,000 balers, 23,000 side rakes, 44,000 spreaders, 121,000 tractors and 15,000 cornpickers.

Labor

At a time when Selective Service was tightening up on farm deferments, the U. S. department of agriculture reported that farm workers as of April 1 totaled 9,080,000, or about 228,000 less than a year ago.

With a better organized farm labor program and seasonal help from volunteer workers, however, the USDA expected rural America to meet this year's expanded food goals despite the inroads into help.

Although only 2 per cent lower than April, 1943, the farm labor supply was 54 per cent of the prewar average, the USDA declared.

GOP:
Keynoter Named

Selection of Gov. Earl Warren of California as opening speaker, or keynoter, at the Republican national convention in Chicago, June 24, has served to modulate the extreme nationalist and internationalist elements in the party.

Brawny, 6-foot Governor Warren, who first jumped into the political spotlight on the west coast through his racket-busting, stands by the GOP's Mackinac declaration on foreign policy, stressing international cooperation with other nations without impairing U. S. sovereignty.

Said Warren: "As Republicans, we must avoid discord that would interfere with our displacing the White House palace guard with an administration more competent to win the war and solve our postwar problems, domestic and foreign."

LEND-LEASE:
Extension Debated

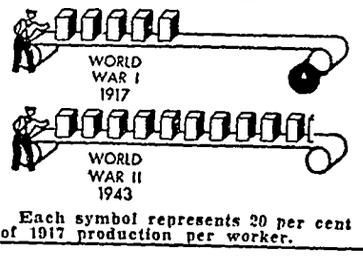
With congress considering extension of lend-lease until June 30, 1945, debate centered around subjecting the President's final settlements with foreign recipients to legislative scrutiny.

Under terms of the lend-lease measure, the President had sole authority to make final settlements, but in extending the act to 1945, the house wrote in an amendment which prohibits him from negotiating final settlements involving international committments without congressional approval.

During the course of house debate on the new measure which was sent to the senate by a 334 to 21 vote, the majority killed Republican efforts to compel foreign nations to return lend-lease munitions to the U. S. after the war.

TELEFACT

OUTPUT PER U. S. WORKER DOUBLES BETWEEN TWO WORLD WARS



Each symbol represents 20 per cent of 1917 production per worker.

PLAY BALL:
Majors Open

More than 123,000 fans were on hand to witness the opening of the 1944 major league baseball season, with the largest crowd of 30,154 watching the Chicago Cubs spank the Cincinnati Reds, 3 to 0, at Cincinnati, and the smallest of 4,030 watching the St. Louis Cardinals blank the Pittsburgh Pirates, 2 to 0, at St. Louis.

The New York Yankees' Johnny Lindell drove out the majors' first home run against the Boston Red Sox to lead his team to a 3 to 0 victory, and the Philadelphia Athletics and Washington Senators played the first extra inning game, with the A's winning in the 12th, 3 to 2, when Rookie Erwin Hall doubled home Babe Siebert.

STRIKES:
In U. S., Canada

Strikes at Montgomery Ward and company and the Ford Motor company of Canada crowded the labor spotlight.

At Ward's, the nation's No. 2 mail order house, the company resumed shipment of freight and parcel post after railroad and teamster unions had tied up deliveries in sympathy with the CIO's United Mail Order, Warehouse and Retail Employees union, which struck over the firm's refusal to extend a bargaining contract upon order of the War Labor board.

About 14,000 employees of the Ford company's Canadian plants remained idle after a walkout in protest over the firm's discharge of CIO stewards for investigating members' grievances during working hours, and the company's subsequent cancellation of the union's contract.

SOLDIERS' WIVES:
Arrive in U. S.

Anxious to look over their new homeland, 90 Australian brides or fiancees of American soldiers arrived in the U. S. from "Down Under," with one expressing the belief that if they got good Irish stew now and then, they should learn to get along.

Wife of a marine corporal from Shinnston, W. Va., Mrs. Doris Jean Lebash, said: "The American boys . . . bluntly told some of us, we in Australia were 10 years behind the times. They told us we couldn't wear American clothes, and that we'd never see such beautiful girls as we'd see in this country."

Australian wives of U. S. soldiers may apply for citizenship after two years. Any of their children born overseas automatically become citizens with five years residence under the U. S. flag.

G. I. BOARD

It is costing the government less this year to provide "board and room" for the millions of enlisted men in the army. Economies have trimmed the annual expenditure to an estimated $465.06 this year.

The estimated figures include $215.35 for food, $173.70 for clothing, $44.70 for individual equipment (excepting arms and ammunition), and $31.31 for barracks equipment. Production costs on many items supplied by contractors have been reduced.

HIGHLIGHTS . . . *in the week's news*

PROFITS: The meat packing industry had a net income of only 1.1 per cent on sales in 1943, the lowest for any major manufacturing industry, the American Meat institute reports.

BANANAS: Shortage of shipping between South American and United States ports is seriously handicapping importation of bananas, trade officials say.

HERO: In a curious case of a marine hero, who is also a deserter from the marines and the army, First Class Private William B. Murphee of Tennessee left the army after nearly six years of service and then joined the marines to win the navy cross as a member of Carlson's Raiders. Walking away from a marine hospital, he was later detained and held for discipline.

Washington, D. C.

More U. S. Troops for India?

Certain senators, even including some of the President's supporters, are irked over curtailment of the Australian army, simultaneous with British requests that we send more U. S. troops to India.

The British request was made by Field Marshal Sir John Dill, former British Chief of Staff, now liaison officer in Washington. Sir John, personally one of the most charming and popular members of the British embassy, suggested to U. S. war chiefs that, in view of the Jap invasion of India, the United States might send more troops to that area.

The reply he got was: "What about the tremendous army you already have in India?"

Sir John had to admit that this huge British army is spread out through India largely for the purpose of preventing internal revolt.

Senators who have learned about this conversation are all set to do some blasting, should the White House send more U S. troops to save the British Empire in India. However, they probably won't have to blast, because the President himself is understood to feel strongly on that subject.

KAISER'S NEW PLANE

Very little has been heard of the giant wooden transport plane which Henry Kaiser proposed building more than a year ago. However, the plane is nearing completion—though with no thanks to the navy.

Behind the scenes, the navy has done all it could to block the plane and at one time proposed cancelling the contract. Some insiders attribute this to pressure from the Martin bomber plant, which has already constructed a giant flying boat, Mars, for the navy.

However, the new Kaiser wooden transport plane will be so big that the Mars could almost be carried inside. Its fuselage alone will be big enough to hold a freight car. Its wing spread is 100 yards and it can carry a pay load of 60 tons, in addition to gasoline.

At one time, the navy got so insistent that the contract for the plane be cancelled that famous record-holder Howard Hughes, now a partner of Kaiser's, had to plead with the RFC to let him continue. The big flying boat is being financed by RFC funds, and Hughes actually promised to put up a $500,000 performance bond in case of non-fulfillment of contract, plus a guarantee to pay all costs personally beyond a certain date.

The big plane should be finished early in the summer.

* * *

FARMERS GET A BREAK

Chalk up a score for Congressman Lyndon Johnson of Texas and Economic Czar Fred Vinson in helping the farmer on the price of eggs; also in cutting the profits of dried-egg manufacturers to the tune of several million dollars a week.

It happened through a queer quirk in price ceilings. The price on dried eggs had been fixed by the OPA at 25 cents a pound, but meanwhile the price at which farmers were selling their eggs to the dried-egg processors dropped from around 40 cents a dozen to 20 cents a dozen. Despite this drop in price, the dried-egg processors continued to get the benefit of the high ceiling price, while buying eggs from the farmers at one-half what they did before.

The spread between what the farmers got paid and what the egg processors sold for was so great that the processors were making money at the stupendous rate of $6,000,000 a week — until Texas' Lyndon Johnson stepped in with protests to Judge Vinson. The latter has now upped the price which the farmer gets for his eggs.

* * *

RUSSIAN WEARINESS

U. S. officials just back from Russia report a war weariness among the Russian people. This is not to be confused with military strength or weakness. Obviously, the military machine is operating with an efficiency such as never before.

For 25 years, Russia has been torn by war, revolution, or internal strain. Even during days of peace, the severe economic effort deprived the ordinary citizen of many elementary comforts of life.

But now, they see victory around the corner and want it to come quickly. Beyond that, they see security coming from cooperation with the other big powers of the world, giving them the time necessary to build up a state in which, according to the precepts of the Soviet philosophy, the dignity of the individual can be recognized and enjoyed.

* * *

MERRY-GO-ROUND

Judge Sam Rosenman now occupies the suite of offices vacated by the late Marvin McIntyre, White House secretary. Rosenman formerly had only a tiny cubicle under the eaves . . . White House intimates suggest that the President probably doesn't intend to fill Mac's place. Instead of three secretaries Steve Early, "Pa" Watson and McIntyre) he will have only two, plus Sam Rosenman as counsel . . . If FDR intended to run again, he might be more anxious to fill the vacant post,

Walter Winchell

(WNU Service)

Tales of the Big Town:

Williston Rich of the Time mag factory tried for years to convince his colleagues there that Bob Hope would make an interesting profile . . . But he was always nh-nh'd . . . So he went on a short holiday, and the bosses suddenly decided that Hope should be given a salute . . . The piece was prepared by the guy pinch-hitting for Mr. Rich . . . So what? . . . So Reader's Digest picked it up and sent the pinch-hitter a check for $1,000!

Some of the men from a redistribution center were entertaining at the Latin Quarter the other midnight . . . When they finished they tipped the waiters lavishly and called over a bus-boy to hand him a few dollars . . . "Thank you, Lieutenant," he said, "but I couldn't accept any gratuity. Just waiting on you has been a pleasure. You see, I was wounded in your sector, discharged, and I'm now back helping the war effort by serving you and all other men in the war" . . . Then he opened his white coat and displayed his campaign ribbons . . . The officers stood and saluted the bus-boy. It was all very lumpy-in-the-throat and thrilling.

A group of midtowners were gabbing about charges of "innuendo" over the radio, and a veteran recalled this Jimmy Walker story . . . During his first campaign for Mayor of New York, LaGuardia charged the popular Walker with all sorts of corruption, and Walker never answered.

"Why should I make his campaign for him?" he said to a pal. "I won't build him up. It would be fun, though, to ask him one question. What was he doing in Waterbury on July 16, 1928?"

"Was LaGuardia there then?" asked the friend.

"I dunno," replied Walker, "but if I asked that question he could deny it until he was blue in the gills. A lot of suckers would still believe there was something fishy about him and Waterbury!"

Sid Sheldon reports that a company of boys from the Army Signal Corps were sent to the induction station for overseas physicals. One of them (in the army three years) wandered into the wrong line and wound up being examined with selectees. The final doctor told him he was 4-F.

"But," protested the soldier, "I'm already in the Army!"

"Nonsense," snapped the medico, "get dressed and go home!"

The poor soldier got back into uniform, returned to camp and said nothing. How do you explain to a Top Sarge that you're 4-F?

Congress refused to put another heavy tax on horse racing. It imposed 30 per cent tax on night clubs where servicemen get real recreation. Racing has a powerful lobby in Washington, and the night club owners (with a 600 million dollar industry) had a very weak lobby.

Some Chicago cafe people, however, sent the members of the Ways and Means Committee (and the Senate Finance Comm.) large posters, which burned the legislators to a crisp because they know they are true. The posters show thousands of people throwing away their money at race tracks. The caption: "No tax here! They had a powerful lobby!"

The opposite side shows men in uniform in night clubs enjoying themselves dancing, etc. The caption: "These boys are giving their blood and had no lobby. They pay 30 per cent extra for their fun!"

That tax is the highest on anything in our history.

The Intelligentsia: Tommy Harmon, the hero, will do a book on his war adventures for Crowell . . . Poet Joseph Auslander's "The Unconquerables" (poetry in epic form) is his best . . . Senator James A. Mead's book, "Tell the Folks Back Home," will arrive May 8th via Appleton-Century . . . Kyle Crichton of Collier's once wrote "the novel is a dying literary form. Stories are best told via straight reporting or biog" . . . Kyle's first novel, "The Proud People," is in its 3rd printing . . . Eighty-seven year old S. S. McClure (founder of the old McClure's mag) will receive the Order of Merit plus $1,000 cash prize from the Nat'l Institute of Arts and Letters . . . Stanley Richards' new play script (a cartoon in three acts) is titled: "Marriage Is for Single People" . . . When Billy Rose hears about some heel or no-good he marks the name down on his very long "Drop Dead List."

After a recent raid in Italy (according to Irv Hoffman) an Army surgeon told the chaplain that one poor fellow was beyond hope. The chaplain leaned over the wounded man and said: "My dear fellow, you are badly hurt. Have you anything to say or any word for your family?"

"My inside coat pocket," moaned the soldier, painfully.

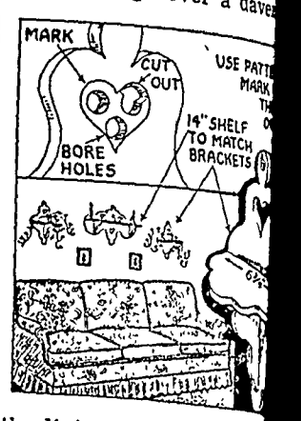
The chaplain felt the pocket and removed a wallet. "Is this what you want?" he asked . . . "Yes," whispered the soldier, "I'll bet you THAT that I won't die!" He didn't.

ON THE HOME FRONT

with RUTH WYETH SPEARS

DO YOU have a large space somewhere in your home that you do not fill it with a group of pictures? Or a house that looks rather bare? Wall brackets on which you may display an attractive arrangement of bric-a-brac and trailing vines?

This sketch shows a set of wall brackets in a quaint old-fashioned heart design over a davenport in the living room. The center bracket is fourteen inches wide with two of the matching smaller brackets on each side. The sketch also shows how easy it is to cut the heart design with a sharp knife after boring holes with a drill and bit. Any school boy who has the use of a coping saw or even a jig saw may make these useful brackets.



* * *

NOTE—Mrs Spears has prepared actual size pattern for all the parts of this set of wall brackets, with complete directions for cutting, assembling and finishing. The lines of these brackets are so well proportioned that you will be glad to own them. Ask for Pattern 2. Enclose 15 cents, which covers cost and mailing. Address:

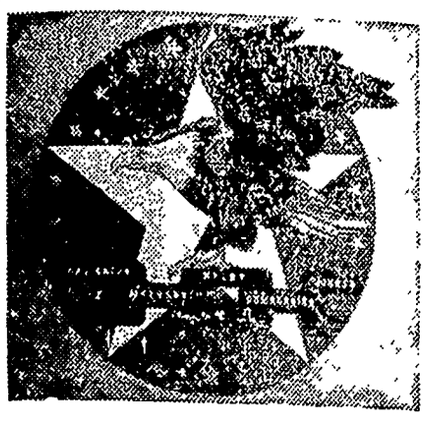
. and their stories are the like to hear, too, because ghbors of yours will all be rial front lines when the comes home to the Nazis. were three Texans in that t, and as you approach its r you see this sign over- he Gangsters' Roost: Texi- uded."



A MARAUDER soars through fleecy clouds over the patchwork English countryside, en route to a bombing mission on the continent. The B-26 is the fastest medium bomber in the world, with a speed of more than 350 miles per hour, delivered by its two 18-cylinder, 2,000-horsepower engines. (All pictures official U. S. Air Force photos.)

THE CREW of a medium bombing plane is a strongly welded five-link chain, in the conception of Sergt. W. D. Morey of Kelly Field, Texas. The five men—navigator, mechanic, pilot, bombardier and gunner—train, fly and fight as one.

Inside, around a warm, pot-bellied stove, there is Ramon Western, a crew chief from Alvord, Texas. And next to him there is a young mechanic by the name of Tommy Busselle, a Houston youth who used to play a saxophone in a home-town orchestra. Then, to round out the Texas trio, there is Bob Allen, another Houstonian and an aircraft electrician.

I wondered about that legend on the door, and Tommy Busselle gave me the details.

"We call it the 'Gangsters' Roost' because that explains how some of us ground crew chiefs get our equipment." (This with a wide grin playing across Tommy's face.) "And as for the word 'Texicans,' that was the brain child of a sergeant from New Jersey who doesn't know how to spell 'Texans.' These 'foreigners' hand us a lot of laughs," he told me.

Ramon Western is a Texan with a clear-cut idea of what he's going to do to help win this war.

A crew chief, he sent one bomber, "Damita," on 40 missions to Hitler's tottering European fortress. Then, when the trim Marauder went down one day, Ramon took up the fight with a successor, "Damita II." He has been in England since June, 1943, and he'd be as happy as a bomber mechanic knee-deep in grease if the invasion started tomorrow morning.

Before the war, Ramon worked his way through three years of school — at John Tarleton Junior college, at Stephensville, and Texas A. & M. college. He lacks only a few hours' credit for a degree in agriculture, and when he gets back to Texas he wants to go back for that sheep-skin. Only this time he won't have to work his way, because he's bought a pile of War Savings bonds for that education.

Wants to Go 'Jap-Hunting.'

And when the war in Europe is won, Ramon says he'd like to take his Marauder (always a crew chief calls the ship he works on "his ship") to the South Pacific and send it out "Jap-hunting."

The two Houston youths in that Nissen hut told me that those sentiments were theirs, in spades!

Bob Allen, for example.

Bob is an electrician for several ground crews at this field, and he doesn't kid himself about his summer sleeping schedule. "These summer nights in England don't start till midnight . . . which means we'll darned near work the clock around, I guess. But I'll just put off the shut-eye until I get back home."

And when he gets back, he says he'll probably finish this education at the University of Texas. Then he wants to take up where he left off as a field salesman for a heating system firm in Houston.

One of the most colorful characters at this station is Walter Scott, a robust youth who proudly boasts that he is three-fourths Indian (Seminole and Delaware tribes) and then adds, grinning: "The other 25 per cent of me is as Irish as Paddy's pig."

Walt (or "Chief," as he's known at this field) is one of the crack crew chiefs in his group. His ship, "Baby Bumps," has gone out on 53 missions without turning back, and the Chief, who is a former oil field roustabout from Dewey, Oklahoma, is plenty proud of that record.

Walt likes to talk about such things as the coming invasion, and the day when he can go back to the Oklahoma oil industry.

"Well, I volunteered in this man's army, didn't I?" the "Chief" blasted out. "And until this war's over in both leagues I'm goin' to stick it out."

When the war in Europe is all wrapped up, the Chief wants to take his Marauder over to the South Pacific (with Ramon Western, his crew chief pal from Alvord, Texas) and send it out against the little yellow men.

Then Walt says he'll be ready to head back to Oklahoma. Is he going back to the oil fields? "Hell, yes," is the Chief's reply to that one.

As I was leaving Walt with his second helping of steak and potatoes that day, he told me that I should have met the real hero of the Scott "tribe."

"He's my kid brother, Yoeman," Walt said. "Right now he's finishing up aviation training back home, but one of these days you'll be hearing big things from him. No, he's no lousy grease monkey like me . . . he's a bomber pilot, de luxe."

And that's the story, as I heard it, of the Scotts' personal offensive against the Axis.

Two McKinney Boys.

Before I left this Marauder station that afternoon, I happened across a couple of aerial gunners who made me wonder if I were standing on Main street in McKinney, Texas.

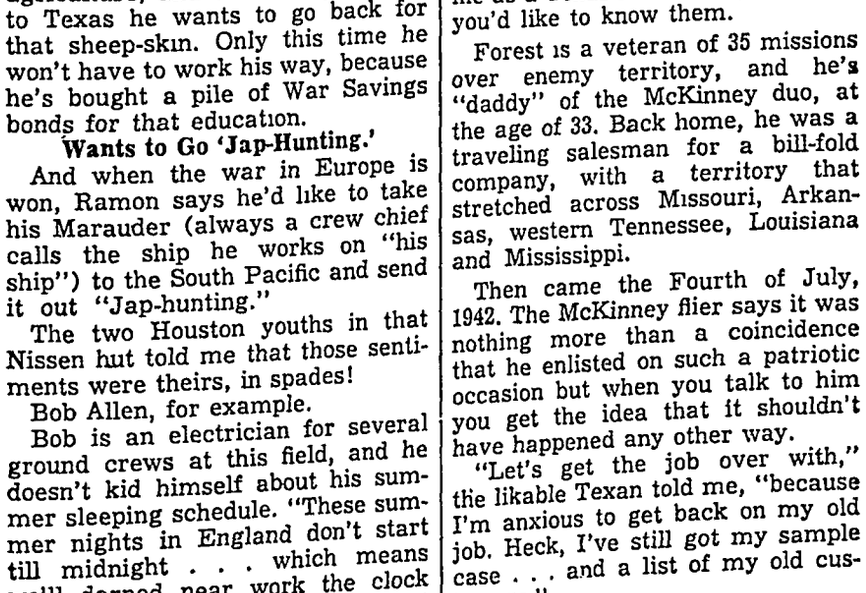
First, there was a fighting son of the Lone Star state by the name of Forest (Staff Sergeant Forest C.) Board, and before I had even gotten his name, I was introduced to 19-year-old Jimmy Ashley, another staff sergeant gunner. Both of these air force fighting men came from McKinney to fight their share of this war, and because their thoughts on this "Invasion Eve" are as genuine as a Texas handshake, I thought you'd like to know them.

Forest is a veteran of 35 missions over enemy territory, and he's "daddy" of the McKinney duo, at the age of 33. Back home, he was a traveling salesman for a bill-fold company, with a territory that stretched across Missouri, Arkansas, western Tennessee, Louisiana and Mississippi.

Then came the Fourth of July, 1942. The McKinney flier says it was nothing more than a coincidence that he enlisted on such a patriotic occasion but when you talk to him you get the idea that it shouldn't have happened any other way.

"Let's get the job over with," the likable Texan told me, "because I'm anxious to get back on my old job. Heck, I've still got my sample case . . . and a list of my old customers."

And there you have the real story of how these fighting sons of America's great Southwest are meeting the great challenge. There's a gleam in their clear, straight-looking eyes. And there's determination in their hearts. Texan and Oklahoman together, they'll be over here until it's time to make the welcome trek back home.



G CADETS at Ellington xas, practice their radio ing and receiving with the e great motors thundering rs. These future bombar- navigators know that when in air combat they will hear above the crash of rackling of machine guns ing of ack-ack as well as the engines.
g schools of Texas are t thousands of air corps kly.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for May 14

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

PAUL IN THESSALONICA

LESSON TEXT: Acts 17:1-4; I Thessalonians 2 1-12.

GOLDEN TEXT: Rejoice always; pray without ceasing; in everything give thanks. —I Thessalonians 5:16-18.

Strong, active, missionary-minded churches do not just "happen." They are the result of the preaching of a true and powerful message by a faithful and sacrificial messenger. Other factors enter in, but these are the fundamentals.

Paul's ministry at Thessalonica, which is described in Acts 17 and explained in I Thessalonians 2, reveals what should be preached and what kind of a preacher is needed. Perhaps some dead or unsuccessful church may learn the secret today and come to new life for Christ.

1. The Message—Christ the Saviour (Acts 17:1-4).

Paul had already met the varying lot of both persecution and acceptance, and had now come to Thessalonica, a large and important city in Macedonia, where he had a lengthy ministry and established a strong church.

What was the message which so signally succeeded in this great strategic center? Well, it was not (as some modern preachers in large cities would seem to think) a series of social, political, or literary discourses. Paul preached Christ. He reasoned with them and presented the Saviour (v. 3) as One who was—

1. Dead for our sin. These people were like us in that they needed a solution for their sin problem. There were doubtless other questions which Paul might have discussed, but he wisely went to the root of their difficulty and showed them "that Christ must needs have suffered."

Without the death of Christ there is no salvation for any man. Only through the shedding of blood can there be remission of sin (Heb. 9: 22). Paul had no part in the folly of a "bloodless gospel"—as though there were any such gospel.

2. Raised for our justification. It was not enough that Jesus died, marvelous as that is in our sight. For many a man has died for his convictions, but none has risen from the dead. Christ could not be holden of the grave. He arose the victorious Redeemer.

3. Declared to be the Christ. He is more than a man, more than a great leader and an earnest teacher. He is God's anointed One, Himself divine—and our Lord.

Thus Paul presented to the Jews their Messiah, "the Man of Sorrows" (Isa. 53), whose resurrection declared Him to be the Son of God with power (Rom. 1:4), their Redeemer and Lord. Blessed results followed such preaching (v. 4).

II. The Messenger—Approved of God (I. Thess. 2:1-12).

Sometimes a man with a true message largely nullifies its value by the manner in which he presents it, or by his manner of life in the community.

1. He was faithful (vv. 1-6). One of the great temptations facing the one who is a preacher or teacher of God's Word is to let his fear of men cause him to adjust his message, to use a bit of flattery, to please men.

Paul was "bold in our God" (v. 2), not trying to deceive or mislead anyone (v. 3), seeking only God's approval (v. 4), not trying to make money for himself or gain standing with men by smooth words (v. 5), and not claiming a high position or authority over men (v. 6).

2. He was affectionate (vv. 7-9). How often those who are faithful and bold in preaching the truth ruin the effect of their work by being harsh and unkind. Here is a lesson many of us need to learn.

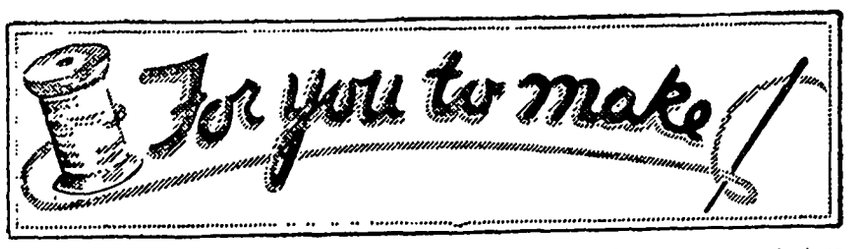
To be gentle (v. 7) a man must be strong. The cardinal quality of a strong Christian should be that he is a gentleman, or she a gentlewoman. If not, there is not real strength in the life.

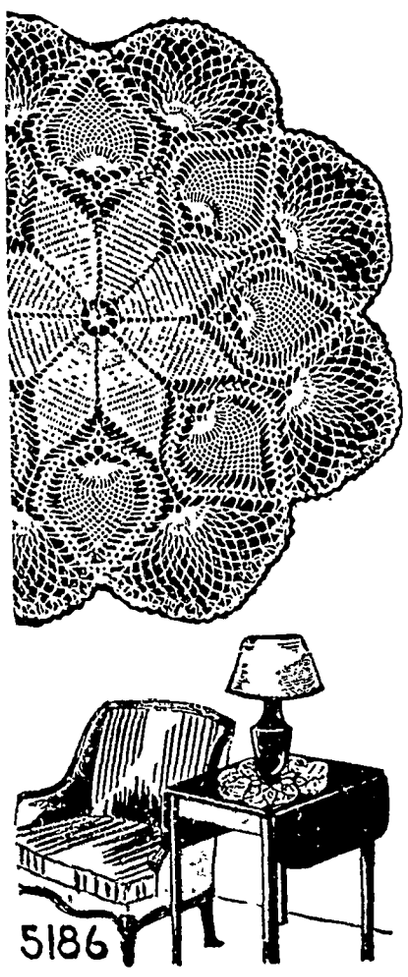
Paul gave not only a message, he gave himself—his very soul (v. 8). The people to whom he ministered were "dear" to him. The pastor who looks down at his congregation with hardness, and perhaps hatred for some individual, needs to read this passage and find Paul's secret of success.

He labored with his hands to support himself (v. 9), lest anyone think he was a burden to them. Let no one think that this means that a preacher is not worthy of support. Christ Himself declares that the laborer is worthy of his hire (Luke 10:7). But it does show Paul's fine spirit of devotion and sacrifice.

3. He was unblamable (vv. 10-12). Holy in his life before God, Paul was ready to live righteously before men, and thus to stand unblamable before them and before his Lord. This indeed is a life worthy in the sight of God (v. 12).

In other words, the preacher was able to say to his listeners, "My life shows you what I mean by my preaching." The true preacher of the gospel will never be satisfied to be a signpost, pointing a way in which he does not walk.





ONE of the easiest of the famous "pineapple" designs to crochet—it takes only 3 balls of cotton thread—measures 16 inches across and is a charming combination of pineapple motifs, palm leaves grouped around a center diamond design.

To obtain complete crocheting instructions for the Pineapple Doily (Pattern No. 5186) send 16 cents in coin, your name, address and the pattern number.

* * *

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

HOUSEHOLD HINTS

To keep moths from your knitting yarn, take old tobacco containers and give them a coat of paint and use these cans thus prepared as a parking spot for the knitting yarn.

* * *

To pipe with rickrack, turn the raw edge of the fabric once or twice to the inside and stitch rickrack over it.

* * *

For painting shelves that are too close together to use an ordinary brush and for other tight corners, make a "right angle brush." Cut the handle off an ordinary brush and fit the remaining stub of handle into a hole bored in a piece of wood about 10 inches long.

* * *

When following a recipe in a cookbook or magazine, it is easier to fasten an ordinary trouser hanger at the top to hold the pages open, hanging it on a hook or nail above the kitchen table. In addition to being easier to read, it keeps the cookbooks and magazines from getting soiled.

* * *

Prolong the life of rubber footwear by keeping it away from light, heat, grease and cleaning fluid. Heat weakens and cracks rubber, and makes it sticky. Sunlight has two rubber enemies—heat and light. Oil, grease and tar make rubber swell and get weak, and cleaning fluid also weakens it.

* * *

A worn anklet makes a good cover to pull on over the old wax applicator when it needs freshening. Wrap the applicator first with soft cloths, then the sock is pulled on and it's ready for service.

Johnny Was for Making Most of His Resources

Little Johnny's mother had just presented the family with twins, and the household was in a state of excitement. Father beamed with pride as he took Johnny on one side.

"If you'll tell your teacher about it, I'm sure she will give you a day's holiday," he said.

That afternoon Johnny came home radiant. "I don't have to go to school tomorrow," he announced proudly.

"Did you tell your teacher about the twins?" asked his father.

"No, I just told her I had a baby sister. I'm saving the other for next week."

HANCOCK FARMERS PROMISE CORN FOR WAR PLANTS

The Hancock County Triple A officials reported Friday that a total of 366,000 bushels of corn has been promised in Hancock County to aid in keeping vital corn plants open. Weather conditions have made shelling almost impossible the past two weeks and it is doubted that much of this corn can be moved until the 1944 crop has been planted.

HANCOCK DISTRICT COURT GRANTS DIVORCE

Peter Smidt of Orthel township was granted a divorce in district court at Garner Friday from Vivian Smidt, by Judge T. A. Beardmore, Charles City, who is presiding over the May term of Hancock County District Court.

The plaintif charged cruel and inhuman treatment. The couple was married at Mason City March 1, 1944.

NEW SUPERINTENDENT FOR GOODELL PUBLIC SCHOOLS

Fred Fee, at present agricultural and science instructor in the Plymouth school, has signed a contract as superintendent of the Goodell independent school for the coming year

Mr. Fee will attend summer school at Iowa University and with Mrs. Fee, plans to move to Goodell in August. They are the parents of five grown children.

U-DELT-EM CLUB LADIES ENTERTAINED HUSBANDS

The members of the U-Delt-Em bridge club entertained their husbands Sunday evening at the home of Mr. and Mrs. George Lawhorn, where contract bridge was played at four tables.

High scores for ladies was won by Mrs. Lawhorn and Mrs. Kudje, while high scores for men were won by Ed. Jacobs and Clarence Waterman.

Lunch was served after games had been played.

For the nation as a whole the amount of corn on hand April 1 showed a drop of 19 percent and oats 20 percent as compared with a year ago.

School Picnic Tuesday, May 16.

Sunday, May 14, Mother's Day.

Mr. and Mrs. Raymond Barz have named their baby son, Leland Ray.

The annual Klemme school picnic will be held Tuesday, May 16.

Klemme business places are open on Wednesday and Saturday evenings.

J. A. Chambers of Klemme, has sold his house in the north part of Goodell to Pete Peterson.

Mrs. E. G. Ell of Belmond came Tuesday for a few days visit at the C A. Larsen home.

Mrs. Lena Schroeder, Mrs. Clara Barz and Mrs. Martin Barz were Mason City visitors Friday.

Mr. and Mrs. Emil Patet attended funeral services for a friend last Thursday at Algona.

Mrs. Clara Stille spent all of last week visiting at the Arthur Carlson home at Clear Lake.

Mrs. George Stille and daughter of Goodell, spent Thursday visiting at the Quentin Stille home here.

Pvt. Allen Barz was a dinner guests Monday evening at the Art Kudje home.

Just to keep history straight: it snowed in Iowa on Thursday evening, May 4th, followed by a few nights of frost!

The Goodell Juniors and Seniors held their annual banquet at the Hanford Hotel in Mason City last Thursday evening.

Fred Blank and daughter, Gracka of West Bend, came Saturday evening and spent Sunday visiting at the parental T. Blank home.

Miss Elsie Ward, of Iowa City, came the latter part of the week for a visit with her parents, Mr. and Mrs. Frank Ward.

Miss Thelma Chambers, teacher at Britt, spent the week end here visiting with her parents, Mr. and Mrs. J. A. Chambers.

Mr. and Mrs. Art Kudje and children enjoyed a dinner of spring fried chicken at the home of Mr. Kudje's neice near Britt, Sunday.

Mr. and Mrs. Earl Ruka drove to Goodell Tuesday evening and enjoyed supper with Mrs. Ruka's mother, Mrs. T. Neilson.

W. L. Lawhorn of Garner was a business caller in Klemme Saturday afternoon and also called at the Times office.

The Britt hemp mill began operating again Monday after being shut down for a short time due to engine trouble.

E. C. Buntenbach has purchased the E. M. Dusenberg cottage on the north shore of Clear Lake. Possession to be given the new owner on May 20th.

Mrs. Lesley De Merritt and children have moved into the tenant house at the Will Ax farm where they are comfortably settled. Mr. De Merritt is in the service.

Mrs. Oscar Hansen of Clear Lake came Friday to spend a week at the Harold Johnson home near Klemme and to care for her daughter and baby.

Bert Chelsvig of Des Plaines, Ill. spent the past week in Goodell visiting with his parents, Mr. and Mrs. Nels Chelsvig. Mrs. Chelsvig has been ill the past few weeks.

Mrs. Paul Kramer's many friends in this community are glad to hear that she is now feeling quite well after her long illness, and is able to be out of doors and visit around.

Mrs. Frederick Schneider came Tuesday evening from Sioux City for a visit at the E. J. Schneider home. Her husband is in the navy on the east coast.

Mrs. Albert Koerner, Mrs. Gerald Koerner and Terry, and Mrs. Jess Gregory and son, and Mrs. John Clements were Mason City visitors Saturday.

Mrs. Phillip Bock, Mrs. Roy I. Schaefer and Harlan Stille started to work at the Britt hemp mill on Tuesday. Other Klemme people now employed at the mill are Roy Schaefer, Frank Ward, Phil Bock and Bernard Smid.

The Work Circle of the Methodist W. S. C. S. will meet Thursday afternoon, May 18th at the church. Mrs. Martha Bredbenner and Mrs. R. A. Jorgenson are the hostesses. The ladies will sew on a quilt.

Mrs. Peter Merkel had not heard from her son T. Sgt. Lester D. Merkel for over two months, but Saturday she received four letter from him saying that he arrived safely in New Guinea and that he had seen Peterson and Nuehring there.

Pvt. Allen Barz left Monday evening for Madison, Wis., where he will take a special course in an army radar work. He had been at Biloxy, Miss., and enjoyed a few days at home visiting with his mother, Mrs. Clara Barz and other relatives

Mr and Mrs Wm. Waddingham have been enjoying a rare treat at their home the past week. The variety of tulips near their house was a real thrill to flower lovers. The tulip bed was set out by Mrs. Einar Salling and husband, from whom the Waddinghams purchased their present home in Klemme.

"Highlights to Charm"— David Wright, distinguised British artist, adds another delightful portrait to his series with the painting, "The Gloves." Look for it on the front color page of The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American. 1tp

Sunday dinner guests at the Wm. Ax home were Mr. and Mrs Lloyd Ax of Mason City and Mrs. Lesley De Merritt and children Afternoon guests at the Ax home were Mr. and Mrs George Schoenwetter; Dean and Ralph Nuehring and Alvin Goll. Evening callers were Mr. and Mrs. Charles Ax of Garner and Richard Ax and family of Ventura.

Near the little German settlement of Selma, Texas, is Randolph Field, one of the largest military airdromes in the world, training center for the Army Air Corps. Here at the Post Chapel men of all faiths attend divine services.

Similar chapels in Europe are deserted, some reduced to rubble. Freedom of worship is gone. To keep the Four Freedoms here, buy War Bonds.

War Bonds Mean Freedom From Want

Funeral Services Held Saturday For Lt. Dorance S. Grange

MILITARY RITUAL GIVEN BY LEGION AND AUXILARY AT THE GRAVESIDE

Legion Firing Squad And Bgulers Paid Final Tribute With Three Rifle Salutes and Taps

Funeral services were conducted at the Klemme Reformed Church Saturday afternoon, May 13th, at 3 00 o'clock for Lieutenant Dorance S Grange, 21, of Majors Field at Greenville, Texas, only son of Mr and Mrs Paul Grange of 216 South Vermont, Mason City, Iowa, former residents of Klemme

Prior to coming to Klemme, services were held at 1 15 p m at the Wesley Methodist Church at Mason City, with the Rev Paul Arnold Peterson, officiating

Services at the Reformed Church in Klemme were conducted by the Rev Calvin Grosshuesch, assisted by the Rev Peterson who paid tribute to the wonderful Christian character of Dorance in his eulogy In his sermon the Rev Grosshuesch brought out his own observations of Dorance's life from boyhood up through manhood

Special music was provided by a mixed quartet composed of Edwin Thieman, Mrs Edmund Josten, Miss Avis Barz and Harvey Barz accompanied by Mrs H G Voetberg at the piano Mrs Paul Peterson of Mason City sang a beautiful solo

A touching note was added to the service when an unknown army pilot flew over the church just as the final prayer was being given in commemoration of Lt Grange, the soft purring of the bomber's motors blending in with the comforting words of the minister, and as if the pilot was saluting a fallen comrade of the skies.

The high esteem in which "Dode" was held was vividly shown by the many flowers which completely filled the front of the altar and made a beautiful background for the flag-draped casket The church was packed to over-flowing despite the fact that a loud speaker was set up in the basement, which was also filled with people, as was the balcony and a side room in the church

After the services at the church the Klemme American Legion and Auxiliary and the Boy Scouts, led by the Color Guard and Firing Squad, all in uniform, accompanied the funeral procession to the cemetery.

The casket bearers were Sumner Trumbell, George Lawhorn and W C Keraus of Klemme; Fred Steffen, Lyndon Wilkinson, Robert Glazier, Larry Folsom, Walter Thomas and Johnny Johnson of Mason City.

Graveside services were conducted by the American Legion, who paid their tribute to Lt. Grange by firing three volleys over the grave and the Boy Scout buglers sounded Taps at the grave, followed by an echoing Taps from a distance, after which the flag on the casket was folded up and presented to Mrs. Grange by Lt. Suckow.

APPEAL TO TOWN PEOPLE TO HELP WITH FIELD WORK

Every man, woman or youth who can operate a tractor, even for only a few hours a day, is urged to enroll for relief driving to H. H Mullin, Britt; George Harlan, Corwith; A. R. Janssen, Crystal Lake; Paul Henderson, Garner; Ira Langlitz, Goodell; Oliver H. Schnebly, Hayfield-Tel. 17J11 Garner; Emmett Sheets, Hutchins-Britt address; L E Faber, Kanawha; Ed Thompson, Klemme or Ray Valley, Woden

This emergency appeal was made today by County Extension Director Paul Henderson who explains that the delay in spring planting can win the food battle for the Axis unless every possible step is taken to keep the tractors going around the clock when weather permits.

Placement centers will serve as the clearing house for all requests from farmers and for enrollment of all volunteers.

Relief tractor operators already have accounted for hundreds of acres of oats that could not have been seeded until weeks later without their help.

Volunteer town women will be needed to relieve farm wives of housework so that they can help in the field The placement center will endeavor to fill such calls for help from farm wives.

High schools are excusing youths who can operate tractors. Such youths will answer calls through the placement center unless their services are already spoken for through the schools.

Henderson points out that this emergency calls for a commando organization on the food front and that this is one beachhead that must be estabished on schedule if Iowa is to do its share in feeding the fighting forces.

CARD OF THANKS

I wish to take this means of expressing my sincere thanks to all who sent me flowers, letters and cards and who called on me during my illness

—Bernice Tanner. 1tp

Interment was on the family lot at the side of Dorance's little sister, Doris, who died in 1922.

Following the services, the ladies of the Reformed Church served a lunch at the church to visiting relatives and friends of the Granges.

Lt. Suckow, a close friend of Dorance, was sent as a Military Escort from Majors Field. He stayed for a few days after the funeral.

CARD OF THANKS

We wish to take this means of expressing our heartfelt thanks for the many messages of comfort sent to us in our hour of deepest sorrow, and for the many beautiful floral offerings presented in loving memory of our son, Dorance, and for the help and many acts of kindnesses extended to us.

—Mr. and Mrs. Paul Grange.

NAMES ON THE JUNE PRIMARY ECECTION BALLOTS

Stillness of Campaigning Fails To Bring Out Facts And Arguments

—Mrs. Art Polsdofer. 1tp

TRAINS FOR ACTION—S. Sgt. Alvin P. Lass, son of Mr. and Mrs. John Lass of near Klemme, is a truck master at an army base near Tucson, Ariz., where his wife and baby are also living. Sgt. Lass farmed with his father near Klemme before entering the service in January of 1942.

(Picture Courtesy of Mason City Globe-Gazette)

OBITUARY

Mrs. C. J Franklin was born April 16, 1880 in Frankfort, Illinois. She received her education in the Joliet public schools. She was baptized and confirmed in the Evangelical church of which she remained a member during her lifetime

Her father died while she was very young and she did housework to help support the family

On Sept 21, 1898 Anna Sophia Johnsen and Chas. J Franklin were united in marriage at Joliet. They made their home there until 1915 when they brought their family to Hancock County where they have farmed ever since Last spring they retired and made their home with their son at Klemme

For the past year she had suffered from a heart ailment and had been bedfast for the past three months The evening of May 10 she passed away quietly at her home She had reached the age of 64 years, and 24 days.

She leaves to mourn her passing four sons, Floyd of Klemme, George of Nora Springs, Iowa, Ernest of Milwaukee, Wisc and Charles of Mason City, Iowa, 12 grandchildren and 1 great grandchild

943 CHRISTMAS SEAL SALE SETS RECORD

Des Moines, May 15--Iowa's 1943 Christmas Seal Sale attained an all-time record total of $279,574 29, a 42 percent gain over the previous year, according to a final report from the Iowa Tuberculosis Association.

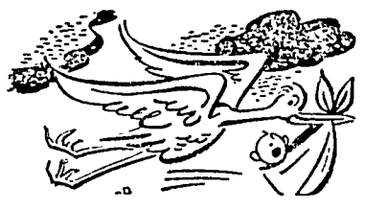
Every county recorded a gain with increases ranging from 12 to 260 percent The sale represents an average purchase of 12 seals each man, woman and child in the state.

Hancock county residents bought $1,895.42 worth of 1943 seals as compared with $1,217.23 in 1942. The county per capita was 13.8 cents.

Five counties with per capita sales of 20 cents or more led in the state. They are Audubon with 24 9 cents per capita; Johnson, 22.6; Dickinson, 21.8; Ida, 20.9 and Grundy 20.4.

The seasonal egg production decline will probably follow its usual pattern. Careful culling of the flock will save feed and increase profits.

HELLO, FOLKS!



Word has been received by the grandparents, Mr. and Mrs. Art Polsdofer of Liberty township of the birth of a son to Mr. and Mrs. Virgil Rice of Clear Lake. The Rices now have two daughters and one son.

75¢ WORTH OF NITRAGIN PAID $390.00 IN MY CLOVER FIELD

One farmer writes that he spent 75c to inoculate half of 30 acres of red clover with NITRAGIN and got $390.00 worth of seed extra from the 15 acres he inoculated.

Inoculate all Legumes with NITRAGIN

With clover seed at 25¢ and alfalfa 50¢ or more per pound, you can't afford not to inoculate every pound of seed you plant with NITRAGIN. For a few cents an acre, NITRAGIN makes up to 50% bigger yields of richer feed and helps build fertility. Tests show it pays to inoculate all legumes regardless of previous cropping. NITRAGIN is the oldest, most widely used inoculation. It costs only a few cents an acre . . . produced in the most modern laboratory of its kind. Be sure you get NITRAGIN for soybeans, alfalfa, clover—other legumes. Get it where you buy seed.

PAUL IN CORINTH

LESSON TEXT—Acts 18 1-4; I Corinthians 13.

GOLDEN TEXT—But now abideth faith, hope, love, these three, and the greatest of these is love.—I Corinthians 13 13.

Who is a Christian? One might answer in a number of ways. He is one who has been saved by the redeeming grace of Jesus Christ. He is one who seeks to live a life in accord with the will of God He is a witness for God, and so on But the answer that the whole world understands is a life in which the redeeming love of Christ begets a true love for one's fellow man.

I. An Example of Christian Love (Acts 18:1-4).

Teaching and preaching are God's ordained way for presenting the truth. They are effective, but only when done by one whose life exemplifies the truth. In his letter to the Corinthians Paul gives the greatest discussion of love known to the world, but before he wrote it he had lived that truth before them The Holy Spirit spoke through him of love, because He had already lived the truth out in the preacher.

Two things appear here Paul was:

1. Working (vv 1-3). The world's most distinguished missionary and preacher had arrived in Corinth Where was the welcoming committee of local dignitaries? There was none. Whose comfortable home would receive him? None was offered. His was the lot of the pioneer for Christ. He had to hunt up a Jewish fellow craftsman and go to work to earn his bread

Paul, like every other Jewish boy, had learned a trade, something he could do with his hands He was a tent and sail maker, and was not ashamed to work at his trade. A more recent follower of Christ put it thus: "My business is to preach the gospel, but I pack meat to pay the expenses."

But notice that Paul did not let this work become the chief thing. As the Lord prospered him he did not decide to "go back into business." No, for his real business was:

2. Witnessing (v. 4). He began, as was his custom, in the synagogue, presenting Christ to Jews and Greeks. The Jews opposed him (see v. 6), and then Paul addressed himself to the Gentiles.

God prospered that ministry and encouraged Paul by a vision, assuring him that the Lord had "much people" (v. 10) in that wicked city. The love of Christ in Paul thus shone forth as a light in the darkness of sin and superstition.

Love was something which the heathen world of Paul's day had so misrepresented and distorted (even as it has today) that it needed definition and exposition. So we have—

II. An Explanation of Christian Love (I Cor. 13).

This is one of the outstanding chapters of all Scripture. Its magnificent discussion of the greatest of all themes has drawn forth many choice expositions.

The thought centers around the emptiness of the loveless life, the glory of the life of love, and the eternal unchangeable power of love. We gather it up in three words.

1. Indispensable (vv. 1-3). Without love man's attainments are empty. He may become an orator with a "heavenly" gift of speech, but unless he truly loves, his elegant and persuasive talk is just a meaningless noise. How true!

One may also have marvelous gifts of prophetic insight and a wonder-working faith, and find that it is all a vain and empty experience without love. Our world leaders could well study that verse just now.

Sacrificial interest in the needs of mankind is a fine trait in man, but it must have the love of Christ in it or it too is profitless. As we think of feeding the hungry nations of the earth, let us not forget to make it worth while by doing it in Christian love.

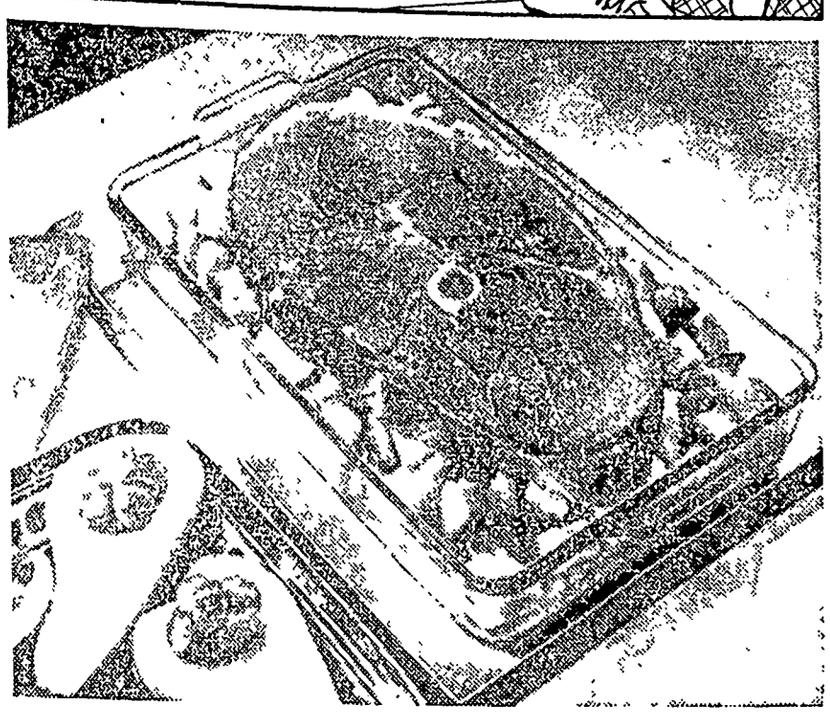
2. Incomparable (vv. 4-7). The standard for the life of a Christian is a very high one; in fact, it is impossible of attainment apart from the grace and power of Christ. Naturally, we find ourselves to be impatient, proud, suspicious, resentful, etc. The new nature in Christ is just the opposite, for love rules.

Note that phrase "endureth all things." We need that in these days when it is so hard to keep on going, or as someone said, "to keep on keeping on." Love endures all things.

3. Immutable (vv. 8-13). All things in life change and pass away. Love is eternal and unchangeable. Even the spiritual gifts have their fulfillment and pass from view, but love shall endure through all eternity. God, the Eternal One, is love (I John 4:8, 16).

When we shall come to that perfectness of understanding which is to be ours one day, when we shall know even as God now knows us, then we shall see love as the supreme gift, eternal in its power and validity.

HOUSEHOLD MEMOS by Lynn Chambers



Savory Dressing Extends the Ham Slice
(See Recipe Below.)

Spring Notes

'Tis the season for foods to don spring dress—to try on new colors, to keep Mrs Homemaker cool while the sun becomes warmer and brighter, to perk up appetites that lag because "it's too warm to eat"

I'm not advocating any sulphur and molasses diet because you can do a better job in a much smarter way, that is, by serving foods keyed to the season and making the most of them.

The first rule to follow in pepping up menus is to take foods which are choice and fresh In the vegetable group you'll find asparagus, peas, carrots, radishes, lettuce, spring onions, beets, string beans, spinach, endive, chicory, dandelion greens, escarole and wild greens.

In fruits, there is not as much variety, but the quality is lovely. You can have delicate pink and tender rhubarb, apples, pears, pineapple, cherries, strawberries and oranges

Keeping Cool.

It's the smart homemaker who cooks her food quickly and stays out of the kitchen during the hot weather Use the refrigerator as much as possible and plan meals that cook in an hour or less. If it's possible, make ready in the cool hours of the morning, and then just before dinner, pop foods into the oven, broiler or surface units to cut down preparation time. It's a good recipe for remaining cool and crisp.

Here is the first suggestion for today. The ham is cleverly extended with a dressing and may be baked with the garnish and dessert.

MENU I.
Ham on Dressing
Baked Pears *Green Salad*
Rolls
Strawberry-Rhubarb Pie

Ham on Dressing.
(Serves 6)

1 ham slice, 1 inch thick
1 cup chopped celery
2 cups soft bread crumbs
1 teaspoon salt
¼ teaspoon pepper
¼ teaspoon thyme or marjoram
½ medium-sized onion, minced
⅓ cup bacon or meat drippings

Toss together celery, bread crumbs, salt, pepper, thyme and onion Add bacon drippings. Put into slightly greased baking dish. Top with ham slice. If desired, spread slice with thin layer of prepared mustard. Bake in a moderate (350-degree) oven for 1 hour.

Save Used Fats!

Cranberry Baked Pears.

Pare, halve and core large, firm pears. Place in baking dish and fill hollows with cranberry sauce. Cover bottom of pan with water and bake covered in a moderate oven about 20 minutes or until tender.

Strawberry-Rhubarb Pie.

2 cups strawberries, washed and hulled
2 cups rhubarb, cut in ½-inch pieces
1½ tablespoons quick-cooking tapioca
1¼ cups sugar
¼ teaspoon salt
1 tablespoon melted butter
1 pastry recipe for 9-inch pie

Mix strawberries and rhubarb together. Blend tapioca, sugar and salt together. Mix with fruit. Add melted butter. Let stand about 10 minutes while pastry is being made.

Make pie crust and line pastry tin. Add filling, cover with top crust, cutting slits in top to permit steam to escape. Bake in a hot (450-degree) oven for 15 minutes; decrease heat to 350 degrees, and bake 30 minutes longer.

Save Used Fats!

Lynn Says

The Score Card: Egg supplies are at an all-time high, so scramble them, poach, fry, boil them. Use them in custards, puddings, or pies, but use them for economy's sake and for health.

Cheese production is in for another cut, and there will be less cheese, except cottage cheese, of course. Use it wisely.

Fat supplies and oils for civilian use are getting smaller. Use them sparingly, and salvage what you can to turn in to your butcher for points and money. On the Also Save list are tin cans and waste paper. Salvage all that you possibly can.

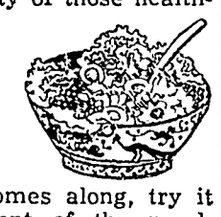
SAVE VITAMINS!

When you're preparing vegetables for summer meals, observe these cautions for conserving vitamins:

As soon as food comes in from the garden or market, wash and refrigerate. Don't prepare vegetables ahead of time for cooking and let stand in water, as this destroys vitamins.

Prepare fruit cups and salads just before serving. Cut surfaces exposed to air destroy vitamin C.

Springtime is the best time to start getting plenty of those health-giving salads into your menus. It's true that during cooler weather, you usually use salad as a side course, but when warm weather comes along, try it as the main event of the meal. Here's a menu that's planned to keep the family as well as the cook delightfully cool:



MENU II.
Supper Salad Bowl
Rye Bread Sandwiches *Olives*
Lemon Sherbet *Sponge Cake*

Supper Salad Bowl.
(Serves 6)

1 head lettuce
2 tomatoes, quartered
4 hard-cooked eggs, cut in halves
4 green onions, chopped
¼ pound sliced luncheon meat or leftover meat
¼ pound American cheese

Shred lettuce coarsely, place in salad bowl. Over it arrange tomatoes, eggs, chopped onion, luncheon meat and cheese, cut in squares or strips. Just before serving pour over french dressing enough to moisten.

French Dressing.
(Makes ¾ cup)

1 teaspoon sugar
½ teaspoon salt
½ teaspoon dry mustard
½ teaspoon paprika
Dash of cayenne
2 tablespoons lemon juice
2 tablespoons vinegar
½ cup salad oil

Put all ingredients in a bottle; cover and shake well.

Save Used Fats!

Here is a grand recipe for making that best liked of all sherbets. It may be used as a dessert, or if you like combination salad plates, serve it with that. It's refreshing and delightfully cool:

Lemon Sherbet
(Serves 6)

¾ cup sugar
Few grains of salt
1 cup water
½ cup rich milk
½ cup lemon juice
2 egg whites
¼ cup sugar

Combine ¾ cup sugar, salt and water; cook 5 minutes. Cool. Add milk, then lemon juice. Freeze firm in automatic refrigerator tray. Turn into chilled bowl; beat thoroughly. Beat egg whites, gradually add remaining sugar; continue beating until stiff and sugar is dissolved. Fold into frozen mixture. Return to tray; freeze firm.

PATTERNS SEWING CIRCLE

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago
Enclose 20 cents in coins for each pattern desired.
Pattern No.....Size.....
Name .....
Address .....

Sailor-Princess

THE best features of both—a princess frock and the trim, clever lines of a sailor collar and tie—are combined in this spirited frock. Make it of launderable cotton in a light shade. Do the trim in bright blue linen or in a pastel.

* * *

Barbara Bell Pattern No 1966 is designed for sizes 11, 13, 15, 17 and 19. Size 13, short sleeves, requires 3⅞ yards of 39-inch material, ¾ yard contrast for collar, bow and cuffs.

Collarless Two-Piecer

IT HAS the new stripped neckline look — the clean, comfortable lines of the collarless cardigan! Do it in soft rayon crepes or in fresh-as-paint summer cottons. Make the tailored collar vestee of pique — interchange it with a frilled jabot for dressy wear.

* * *

Barbara Bell Pattern No 1930 is designed for sizes 32, 34, 36, 38, 40, 42, 44 and 46 Size 34 jacket, short sleeve, requires 2 yards of 39-inch material; skirt, 2 yards.

Household Hints

Keep a small box near your laundry tubs. You'll find it convenient to hold the buttons, snaps and other pieces that may come off clothes during the washing process.

* * *

If you have any made-up starch left after washing, use it on the linoleum. It lends a gloss and the floor stays clean longer.

* * *

To remove a tight glass stopper, wrap around the neck of the bottle a cloth that has been wrung out of hot water, or soak it in vinegar for a while. Work it gently and it will soon loosen.

* * *

A piece of velvet or corduroy placed in the heel of your shoe will make your stockings wear longer.

* * *

Dip your measuring cup or spoon in scalding hot water just before measuring molasses. You'll find the molasses will run out easily.

* * *

The clothesline can be cleaned by wrapping it around the washboard and scrubbing it with a brush and soapsuds.

* * *

Always keep on hand a package of fancy paper plates. Then when taking cookies or cake to a neighbor or friend, put the gift on one of these, with or without a paper doily. The food looks attractive, and the plate doesn't need to be returned.

It's New!

A. HOLLATZ CAPTURES TEN YOUNG FOXES

Adolph Hollatz, who lives 5 miles northwest of Clear Lake, dug 10 little foxes from 2 dens Wednesday afternoon. One den was in the open field and the other near the edge of a woods. Will Hollatz, Alec Allos and Fred Linahon assisted him. The dens had the remains of chickens, pheasants, robins, gray gophers and other food that the large foxes had brought, so even though the bounty is only 50 cents for young foxes, Mr. Hollatz felt that the time was well spent. The dens were about 3 feet underground, and no adult foxes were captured.

WARNING ISSUED TO GET WINTERS COAL SUPPLY NOW

Government Urges You To Put In Your Stock During Summer Months

At a recent conference of coal dealers, distributors, and producers of this area, E. N. Ahlfeldt, Area Distribution Manager of Solid Fuels, expressed concern because home owners and school districts haven't heeded Government warnings to store bituminous (soft) coal now.

"While many home owners have taken advantage of present opportunities to acquire their supply of coal for the coming winter," Mr. Ahlfeldt said, "Others are throwing this chance away. We are disturbed over householders' and school districts failure to buy their coal now apparently they are waiting to secure their favorite coals, but such coals will not be available in sufficient quantity to suppy their needs."

"Full year-round production of mines in this district," he continued, "must be mantained if a fuel shortage is to be kept to the minimum. Demands of railroads, utilities, and the War Department's requirements for use in the United States and for export, are such that home owners must buy coal and accept delivery now, in order export, are such that home owners must buy coal and accept delivery now, in order to protect themselves and their families with an adequate supply for next winter Coal consumers must be convinced that this is not a coals dealers sale campaign but that they are urged by their Government as a wartime measure designed to see them through a critical crisis"

Less coal is being moved into consumers' bins than at this time last year, and officials stated that this will result in serious consequences to consumers because it is not reasonable to hope that the coming winter will be as mild as the last one

Members of the coal industry in attendance at the conference agreed that continued negligence of home owners and school district to stock soft coal now will create a difficult situation next winter

KILLING WEEDS IS ONLY CORN CULTIVATION NEED

Some farmer put more labor into corn cultivation than results obtained will justify Seldom is there any reason for cultivating more than three times, in the opinion of C H Van Vlack, agricultural engineer at Iowa State College

Practicaaly speaking, the only reason for cultivating row crops is to kill weeds If there are no weeds, there isn't much need for cultivating The old theory that it is necessary to maintain a good dust mulch on the surface in order to prevent loss of moisture has been thoroughly disproved

Early cultivation with a sweep cultivator after the corn is large enough for a thorough covering of weeds in the corn row will destroy practically all the weeds present Sweeps do a better job of cultivating than shovels However, disk hillers are the most effective equipment for killing weeds in the corn row Iowa farmers are generally convinced that shallow cultivation gives better yields than deep cultivation or corn

Where corn is drilled, proper seedbed preparation is especially important It is necessary to kill weeds at this point because cross cultivation is impossible

Our Men In The Service

KLEMME MEN GET TOGETHER IN AUSTRALIA

Capt H. G. Voetberg and Seaman Evert Barz ran into each other in Western Australia and they made a date to have dinner together on Sunday, April 23rd. Needless to say they "made more talk" than a ladies aid meeting.

Thursday Evening
May 11, 1944

Dear "Jergies",

It is approaching very near to three years since the army singled me out and told me I was to have a year of training and I wouldn't trade any of the time for a lot I gripe as much as the next one, but I still enjoy it Looks like I might get into it before too long a time elapses, for I'm finally out of a training camp and into a division. Just what comes next, I don't know, but I'm enjoying my work here, and looking forward to whatever follows.

I got orders from Camp Fannin to the 99th, the 29th of April, and reported here on the 1st of May. Since then I have been pretty busy as we are short of officers. We are beginning to fill up, though, so maybe the work will slack off a little

A couple of weeks before I left Fannin, I had the good fortune to run in to Elmer Trampel. I was waiting for a bus, talking to another fellow, on a Saturday night, when I spotted a walk that looked familiar The soldier was going away from me when I spotted him, but I felt that it surely must be Elmer Nobody else had such a nonchalant strut. I even hollored, "Hey 'Gazook'", and without even looking around, he sounded off, "Kilgore where are you?" I always called him "Gazook", so I guess that's how he knew it was me. He is taking Basic Training in Company D, 82nd Training Battalion at Fannin That's a specialist battalion and he is to have Intelligence training. He's a good boy and probably won't be a private long. We had quite a talk that night, and then a few nights later he came over to my quarters and we really had a gab-fest. Felt good to meet an old friend, and that's the first time since I've been in the army that I have ever just bumped into one.

What do you hear from Ray, Jr. and family? I suppose they are doing alright. Should write them soon and let them know I'm still alive. I'd like to see their family, and I'd also like to get home and see that new nephew of mine. When I do get a leave it is going to seem funny to go to Fort Dodge rather than Klemme to see the folks. I only lived in Klemme about 5 years, but they were good years, and it will always seem like home to me.

Tell everybody hello for me, and if you run out of anything to do climb on the old Oliver and bat out a few lines in my direction.

As Ever,
"Pete"

STATE TREASURY HAS BIG BALANCE

Five Million Invested In Government Bonds

A total of $5,544,800 of state of Iowa funds is invested in U. S. government bonds, according to a report of State Treasurer J. M. Grimes made as of the end of the first quarter of the year. This sum includes $2,395,000 in soldiers' bonus funds and $1,500,000 in state office building funds.

The March 31 gross balance in the state treasury amounted to $48,812,409, giving a net expendable balance of $36,679,924, Mr. Grimes said. The gross balance was more than five million dollars larger than at the end of the previous quarter.

HANCOCK COUNTY REAL ESTATE TRANSFERS

Ralph B Dahl and Martha L. to Otto S. Ostercamp. Contract 4-10-44, $3,500. Lots 10 and 11 except north 6 inches of 10, in block 7, of Anderson's Add. to Britt.

Louis Schmidt, widower to Arnold Schmidt. Wty Deed 5-2-44, $1. S½ SE¼ section 27 and N½ N½ NE¼ section 34-96-24.

Walter F. Thompson, Gdn of Marcie Hunsley, Inc. to Hazel D. Durin. Guardian's Deed 4-8-44, $90. Lots 5, 6, 7, 8 block 3 unincorporated Village of Stilson.

Fred J. Schlichting and Clara to William Ax. Wty Deed, 3-22-44, $100. W½ lots 12 and 13 block 10 Original Town of Klemme.

Hattie M. Love and Willis A. to William Holck and Margaret. Wty Deed 4-24-44, $1.00. The west 2 a. of south 4 a. of north 8 a. of south 22 a. of E 3-4 of NW¼ SE¼ and all that W½ W½ NW¼ SE¼ lying between above described and county road, section 28-96-25 in the Incoroporated Town of Britt.

George H. Geibel and Fay to John S. Geibel, Joe C. Geibel and Marie Stevenson. Wty Deed 5-4-44, $1,335 49. NE¼ 9-95-26.

Gladys E. Fillenwarth and Wm E to Harold L. Missman and Bette J. Wty Deed 4-28-44, $1.00. Lot 7, block 16 Andersen's Add. to Britt.

H R. Morgan and Marjorie to Joe Osman. Wty Deed 4-18-44, $4,650 SW¼ block 4 in Stubbin's Add to Britt.

E. P. Hanson and Margaret to Donald R. Naser. Wty Deed 4-29-44, $1.00. Lot 13 block 33, Original Town of Garner. Also ½ interest in brick wall between lots 12 and 13 and between lots 13 and 14.

Lynn K. Thompson and Laura J. to Wesley Kahl. Wty Deed 5-2-44, $1.00. NW¼ 16-95-26.

H. J. Kuhl and Dorothy to Eva Hage Wty Deed 3-29-44, $2,300 NE¼ NE¼ 14-94-26.

Nellie A. Vail, single, to Ella Vail and Nellie A. Vail. Wty Deed 4-20-44, $1 00. SW¼ 1-95-23.

Matilda A Carr, Ex. and Trustee of Estate of James Carr, deceased. Ex. and Trustee Deed 4-24-44, $2,-640. 66 acres in NE¼ 32-97-24 lying south of railroad.

George P. Newman and Teresa to W. L. Torkelson. Wty Deed 4-26-44, $5,000. SE¼ except 1 acre for school, and except 30 acres off north side section 4-97-23.

W. L. Lawhorn and Edna to Chester R Stille. Wty. Deed 5-3-44 $1.00. Lot 7 in block 16 of the Original Town of Garner.

HEALTH DEPARTMENT WANTS SERUM BLOOD

Patients Recovered From Disease Needed

Usually giving warning about communicable diseases the state health department today made an about-face and issued a call asking for the services of Iowans who have had either measles, scarlet fever, or whooping cough.

The department is trying to lay in a supply of convalescent serum for use next fall and winter and wants these persons to serve as blood donors during the coming months.

Serum for prevention or treatment of these diseases is made from the blood of recovered patients. The department is scheduling clinics now throughout the state to get blood this summer.

Though it probably will not be possible, the department said, to reach everyone willing to contribute blood, efforts will be made to go into all areas and obtain donations.

"We need to know," the department brought out, "where all cases have occurred, and it would be helpful in planning clinics to have reports on every case.

"Individuals as well as doctors, can help by sending information of cases to their local health officer or local board of health."

Clinics will be scheduled in areas from which the most donors can be obtained at one time.

From each donor a half pint of blood is taken and paid for at the rate of five dollars. Donors must be 12 years of age or over. Contributors of scarlet fever or measles blood must have had the disease within six months prior to the time the blood is contributed and whooping cough donors within three years.

BETTER IOWA GARDENS

Victory Gardens.

Rodents such as field mice ,pocket gophers, rabbits and ground squirrels can be expected to rob your victory gardens of some of its produce Watch carefully for these pests. Eternal vigilance is the price of freedom—from all garden pests.

* * *

Strychnine-poisoned bait may be used successfully to control these pests. Poisoned oats, wheat or corn exposed in tablespoonful quantities along the rows which show mouse or ground squirrel damage will effectively control these rodents. Potato, carrot, parsnip or turnip sticks (¼ inch square and 1 to 1½ inches long) poisoned with powered strychnine and inserted into the main runway will stop the pocket gophers.

* * *

Since rabbits are game animals protected by law, it is illegal to shoot or poison them. If rabbits are seriously damaging your garden, contact your local game warden or conservation officer and follow his advise.

* * *

Sulfur may be used with considerable success to repel rabbits from the garden. Apply the sulfur to the plants which are most heavliy attacked and to the ground around them. Fresh applications of sulfur should be made after each rain.

* * *

Black pepper and other "hot" spices also have been used with some degree of success as repellents against rabbits Commercial repellents which work with varying results also are available.

* * *

You wouldn't have moles in your garden if you didn't have a lot of nice, juicy earthworms, cutworms, wireworms, white grubs and other insects to attract them Moles are beneficial in that they destroy huge numbers of soil-inhabiting insect pests Hoever, if you don't like them in your garden, plan to spend a lot of time and energy in getting rid of them. Trapping and gassing are the only two sure methods of killing moles.

* * *

You may be able to keep moles out of the garden by using 1 pound of lead arsenate per 100 square feet of lawn or garden, soaking it down with water. This kills the worms the moles feed on. However, lead arsenate should not be used where strawberries are being grown or will be grown in the next 5 years

* * *

You can't chase moles away with naphthalene flakes. So don't rely on mothballs.

REV E. F. BROBERG HEADS MINISTERIAL GROUP

The Hancock County Ministerial Association met at the Methodist church in Klemme on Monday morning. Rev. Harold R. Knight, pastor of Goodell, and president of the group for the past year was the presiding officer. The Rev. George A. Sheils of Corwith gave a very informative paper on "The Program for Youth In War Time." After considerable discussion, the business meeting was held, at which time the officers for the coming year were elected. They are: President - Rev. Everad F. Broberg, Garner; Vice-President - Rev. H. C. Shrout, Britt; and Secretary-Treasurer - Rev. Mr. Kelly, of Britt. This was the last meeting of the association until next October Rev. H. E. Harvey, local pastor was host to the group.

We've Received Our Diploma Too!

Scores of satisified customers have daily given us verbal "diplomas"! They tell us our food rates "A" and that the service is strictly in the CUM LAUDE category. Won't you, too, enroll in the class of good food —served daily at Quandt's.

Congratulations to the Class of '44.

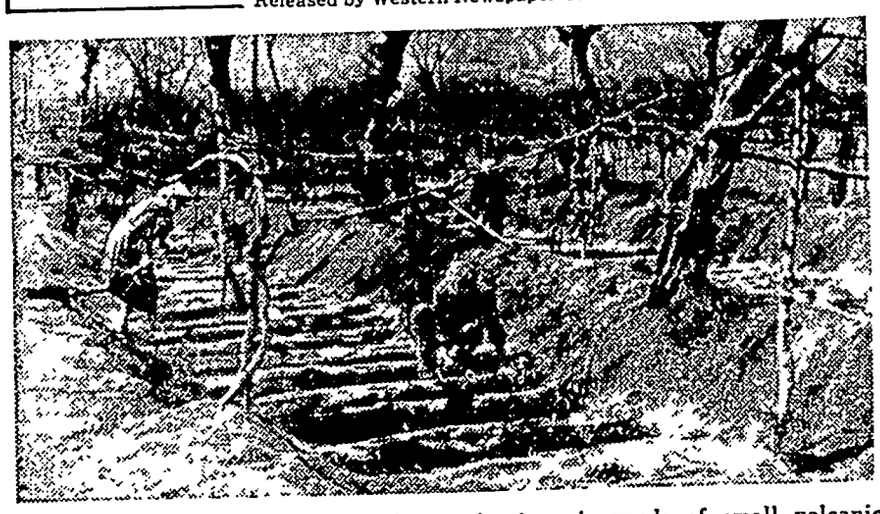
WEEKLY NEWS ANALYSIS

U. S. Forces Clean Up Hollandia Area; WFA Announces Dairy Subsidy Rates; Heavy Hog Shipments Glut Markets; Aerial Attacks Weaken Nazi Defenses

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Released by Western Newspaper Union.



Italy—Italian farmers are shown clearing vineyards of small volcanic stone fragments spewn by belching Mount Vesuvius.

EUROPE:
Invasion Awaited

With huge concentrations of shipping reportedly massed in British ports and the Allied aerial attacks continuing in unprecedented force, Nazi Europe nervously awaited the historic and heralded invasion.

While the U. S. and Britain prepared for hostilities in the west, the Russians were reportedly organizing strength for a new drive into eastern Poland, presumably to synchronize with the invasion. As the Russians gathered their new forces, the Axis armies in southeastern Rumania stiffened resistance and parried Red thrusts along the Dniester river front.

Western Europe found no rest by day or night as British and American heavy, medium and light bombers smashed at the Germans' vaunted concrete and steel Atlantic wall, French and Belgian rail lines over which the enemy could be expected to shuttle troops to meet invasion forces, and German industries supplying the wehrmacht.

AGRICULTURE:
Hog Glut

In the wake of the government's move to buy all corn in 125 midwestern counties for sorely pressed processing industries, heavy hog shipments clogged slaughtering centers, resulting in embargoes in some centers, notably St. Louis, Mo., and Peoria, Ill.

The large shipments were believed also influenced by short feed supplies after two years of extensive use of grain for fattening record numbers of stock, and the government's plan for a minimum price of $12 50 per hundredweight for this fall.

Taking note of the dwindling feed stocks, OPA announced that effective May 15, the ceiling price on hogs over 240 pounds would be cut to $14 per hundredweight, to discourage heavy finishing off.

Dairy Subsidy

To encourage conservation of grains during the pasture season to provide for heavier feed during the fall and winter months, the War Food administration announced subsidy payment rates for dairy production for the next 11 months.

Although rates during the next four months will range from 35 to 65 cents a hundred pounds for whole milk and 6 cents a pound for butterfat, beginning September 1 and ending next March 31, rates will range between 60 to 90 cents for whole milk and 10 cents for butterfat.

Estimated to cost between $300,000,000 and $400,000,000 annually, the whole program is dependent upon congressional appropriations for administrative expenses, WFA said.

RATIONING:
More Butter

Because of record stocks in warehouses and freezers, 35,000,000 pounds of country butter will be available for civilian use in May at 8 red points per pound, along with 112,000,000 pounds of creamery butter at 12 points.

At the same time, OPA announced that more and better ice cream will be produced in May and June, following permission to manufacturers to increase output to 75 per cent of 1941 figures, and to use a mix 1 to 3 per cent richer in butterfat content.

In addition, reductions in point values are scheduled for flank beefsteak, lamb and mutton, variety cuts of pork and veal, dried beef, potted and dried meats, and sausages.

FLOODS:
Field Work Halted

Floods and heavy rain sweeping the country retarded field work and rail shipments alike, in addition to causing extensive property damage and loss of life.

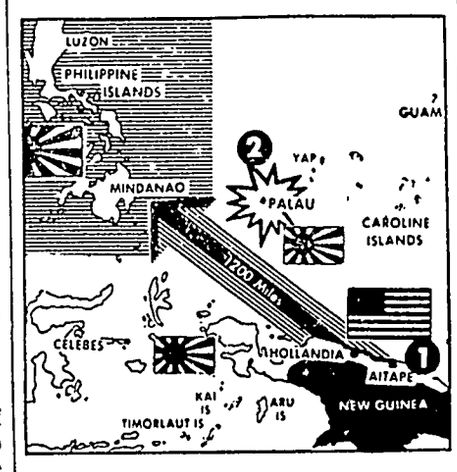
In the middlewest, farm work was as much as three weeks behind schedule, with only half the oats sown in Iowa, and much of that acreage planned to be diverted to corn and soybeans in Illinois. Warm, sunny weather was needed in the winter wheat belt in the southern great plains area. Because of blight and excessive moisture, the southeast feared for its potato crop.

Vegetable and fruit produce enroute to northern markets from the west and south was held up by flood conditions through the Mississippi river basin. A stimulus to the black market was feared through the possible diversion of crops to trucks.

PACIFIC:
Nearer Philippines

Heavy U. S. bombers were within 1,400 miles of the Philippines with the Doughboys' capture of three airfields around Hollandia in northern New Guinea following a whirlwind invasion, which Gen. Douglas MacArthur claimed sealed off 140,000 Japs.

Reinforced by additional troops, British and native units in eastern India braced for a showdown struggle with invading Japs, aiming for the Bengal-Assam railroad supply-



ing Lieut. Gen. Joseph Stilwell's Allied forces, clearing a path for a new communication line to China through northern Burma.

Encountering light resistance, U. S. forces cleaned up Hollandia in record time, extending Allied air and naval control far up the New Guinea coast and threatening the enemy's supply lines feeding bottled troops all the way down to the Solomons to the east. Hollandia's fall also placed General MacArthur one step closer to realization of his vow to return to the Philippines.

SURPLUS GOODS:
Disposal Planned

With government sale of surplus war materials already running at a rate of $12,000,000 a month, federal officials were reported to have agreed upon a plan for entrusting future large scale disposal of such goods to five agencies and 12 business experts.

Under the plan, the War Food administration would handle food; the treasury buyers, textiles; the Reconstruction Finance corporation, land and factories; the Maritime commission, ships and related materials; and the war department, munitions.

The business advisors would counsel on how the various surplus goods should be distributed, but each agency would be asked to formulate its own policy of sale through negotiation, auction or advertising.

DUCKS:
Population Up

With mallards most numerous, the duck population now approximates 125,000,000, according to figures of Frederick C. Lincoln, chief of migratory birds investigation of the U. S. Fish and Wildlife service.

Mallards now make up 35,000,000 to 40,000,000 of the duck population, Lincoln said, with pintails second with 20,000,000, and bluebills third with 15,000,000. Marked increases also were noted for red-headed ducks and coots and mudhens.

Because of the continuing decrease of woodcocks, however, it has been indicated that the season may be closed on them next fall, along with the Jacksnipes.

BUSINESS:
Oil Supply

Because a tremendous area of prospective oil territory remains to be tested and petroleum could be produced from enormous reserves of coal and shale, the U. S. need have no undue concern over future oil supplies, Edward G. Seubert, president of Standard Oil company of Indiana, told stockholders in the course of a report on the firm's business in 1943, showing profit of $50,591,371.

At the same time, President Ralph W. Gallagher of Standard Oil company of New Jersey, in announcing profits of $121,327,773 for 1943, told shareholders that although the U. S. was assured of sufficient oil in the future, two principal problems existed, namely, discovery of more oil, and insitution of sound, worldwide conservation policies to prevent wastage in production.

MAIL ORDER:
Legal Battle

Ground was laid for one of the U. S.'s most historic legal battles when the government forcibly took over Montgomery Ward and company's big Chicago plant following its refusal to accept a presidential order to obey a War Labor board's directive to extend a contract with the CIO's Mail Order, Warehouse and Retail employees Local 20 until the union's bargaining rights could be determined.

Sewell Avery

Claiming that the WLB had no supervision over Ward's because it cannot be classed as a war plant, Ward's 69-year-old President Sewell Avery stuck to his guns to the last, finally being carried from the plant by U. S. troops when refusing to recognize the government's occupancy.

W. C. Taylor

As both sides squared for a court battle Undersecretary of Commerce Wayne Chatfield Taylor took over operation of the plant, lacking cooperation from some Ward officials standing loyally beside Avery.

CIVILIAN GOODS:
Increase Opposed

While congressional leaders pressed for an increase in output of civilian goods in view of a surplus of certain materials and cancellation of some war contracts, government officials cautioned against any considerable boost in production over present levels.

War Production Czar Donald Nelson said military output must be increased in the immediate future and maintained at high peaks until actual needs for operations in western Europe are established.

Undersecretary of War Robert Patterson opposed any notable switch to civilian production on the grounds that it would create unfounded optimism and lead to a rush from war plants to obtain jobs in consumer goods industries.

QUEBEC:
Overseas Service

Paced by Nationalist Member Rene Chalout who declared that any fighting forces should be furnished by the U. S., Britain, China and Russia because only they stand to gain anything from the war, the Quebec provincial legislature cast a 55 to 4 vote expressing disapproval of any move to send Canadian conscripts overseas.

Said Chalout: "Conscription for military service in Canada was instituted because there was supposed to be danger of invasion. If federal authorities were sincere at the time, they should abolish it now since there is no more danger of an invasion of Canada."

The legislature acted after the Canadian national defense minister declared draftees could be used overseas if appropriate measures were taken by the government.

'IRON RATIONS'

American and British troops in India will eat a new and perhaps tastier meal when in tight spots. These emergency meals, packed in large cans, are informally known as "iron" rations.

The condensed food is packed in a can sufficient for eight men for one day, and consists of corned mutton, "vitamized" crackers, tea, jam, chocolate, chewing gum, salt, sugar, grapefruit juice (for Americans) and lemonade powder (for British troops). Cigarettes are included

HIGHLIGHTS . . . *in the week's news*

KNOX DIES: Secretary of Navy since 1940 during which time the fleet became the greatest in the world with a strength of over 4,000 ships and 25,000 planes, Frank Knox succumbed to a heart attack in Washington, D. C., at 70. Knox served with the 153rd artillery during last war. Noted as a newspaper publisher, Knox was the Republican vice presidential candidate in 1936.

BASEBALL VETERAN: Tony Mullane, oldest major league baseball star, died in Chicago at 85. He first played with the St. Louis Browns and later went to the Cincinnati Reds as their star pitcher. He ended his career in 1897 with the St. Paul club. Another claim to fame was that he was said to be the only pitcher who could throw with either hand.

BLOCKED ARMY PROMOTIONS

The army is pulling all sorts of wires backstage in the senate to break the log-jam against permanent wartime promotions—especially those of General Somervell and General Patton.

The senate military affairs committee some time ago proposed a policy against rushing through permanent promotions in wartime, arguing that temporary promotions were sufficient and that permanent promotions could come after the war when the senate and the public could survey all of an officer's record.

Some senators still remember the manner in which General Pershing was jumped from the rank of captain to brigadier general after he married the daughter of Sen. Francis E. Warren, then chairman of the military affairs committee; and they recall also the resentment this caused in the army.

However, the policy of blocking permanent wartime promotions is being opposed by the army's efficient lobby on Capitol Hill; and recently, a new move was made to put through promotions for Generals Patton and Somervell.

Their names had been before a subcommittee which was adamant against promotion. Patton is now only colonel though holding the temporary rank of lieutenant general. Somervell's rank is similar.

So Chairman Bob Reynolds of the military affairs committee put their names before a subcommittee including himself, Elbert Thomas of Utah, and Warren Austin of Vermont. Significantly sandwiched in between Patton's and Somervell's names is that of General Wainwright, now a prisoner in Japan, whom every senator is anxious to promote. So it will be difficult for the subcommittee to promote one without the other two.

* * *

GRILLING GENERAL HERSHEY

Draft director Lewis B. Hershey and manpower boss Paul McNutt came in for some rough handling regarding the bungled draft situation at a closed-door meeting of the house military affairs committee the other day. Members took their hair down and said a lot of things that have been rankling in their bosoms about conflicting draft orders which have promoted confusion

After the meeting adjourned, the committee announced that it had refused to approve a labor draft bill. Inside fact, however, is that formal action against the labor draft was taken only after the committee had heard a furious grenading against the Hershey-McNutt team, including a demand that both be fired and replaced by a single draft czar.

Chairman Andrew J. May of Kentucky, Rep. Walter G. Andrews of New York, ranking committee Republican, and Reps. Ewing Thomason of Texas, John M. Costello of California, Leslie Arends of Illinois and Forest Harness of Indiana all got in some forthright licks against the fumbling of the manpower and draft program.

The assault was led by Texas' two-fisted Thomason, who declared that one man should be put in complete charge of both military and industrial manpower with the nation at war.

* * *

MYSTERIOUS HOSPITAL

There is something awfully mysterious about the war department's determination to get rid of the Breakers hotel in Palm Beach as an army hospital, and the extent to which Attorney General Biddle seems anxious to cooperate.

In order to unravel the mystery, the Truman committee called upon Biddle for the Breakers hotel report prepared by his two-fisted young Assistant Attorney General Norman Littell. Littell, who is in charge of lands acquisition, had pointed to the foolishness of spending a lot of money making a hotel into a hospital and then turning it back to the Florida East Coast railroad just when we are on the verge of a second front and do not know what our casualties will be.

But when Biddle received the Truman committee's request, he got in touch with Rudolph Halley, its acting chief investigator, and asked him to withdraw the request. Halley diplomatically complied.

But next day, when members of the Truman committee heard about it, they called up the justice department and subpoenaed the Littell report.

Whereupon Biddle promptly surrendered. He asked that the subpoena be withdrawn and he finally sent the Littell report to the committee. Meanwhile, the army is holding up its plans to evacuate the Breakers.

hy did the Blue Cross move- xpand the planned hospital a in the cities but it was responsible for its "moving the country." It spread to ter cities and towns first and to the farms. It's true that are "independent thinkers" one of the pioneer workers ural field has stated, they "shrewd buyers and are take to something once its as been proved." So now are being enrolled through ith which they do business ch are willing to cooperate, their farm bureaus, their their farmers' unions, co- s, creameries, and other well-organized farmer-business associations.

In the cities, workers who are buying hospital protection pay for it by payroll deduction. Farmers, who enroll through banks, authorize those institutions to make periodic deductions from their checking or savings accounts to pay the required fees. Where they enroll through creameries or cooperatives, periodic deductions are made from their cream or grain checks and those who enroll through the grange, farm bureau or farmers' union pay their fees on a quarterly, semiannual or annual basis, mostly the latter two.

How the Plan Works.

Although there are 77 different group plans for hospital care and they differ from each other in some minor details, here is the essential method of their operation: The hospitals in a certain region—city, county or state—guarantee hospital service to Blue Cross subscribers, whether they are members of groups in factories, city offices, educational institutions, clubs, union organizations or farm groups, who have agreed to pay a certain amount for this service at regular intervals. This amount varies somewhat according to the group plan. Membership costs from $7.20 to $10 20 a year for one person and from $15 to $24 a year for the member and his family, including his wife and all unmarried children under the age of 18. In Minnesota, where the pioneering work in farm enrollment was done, there is a plan which offers a man complete coverage for himself and 50 per cent discounts for his wife and children at $12 a year, plus $3 for each adult dependent.

In return for these payments the insured, or member of his family, who has to go to a hospital gets a semi-private room, his meals, general nursing, anesthetics, special diets, dressings, laboratory tests, X-rays and operating room charges. (This does not include, however, the physician's or surgeon's fees.) He can enter any one of the country's approved, registered hospitals, that is those hospitals recognized as meeting the standards of the American Medical association or state and local agencies.

If for any reason one of these hospitals can't take him in because of lack of room, some of the plans pay back double the year's premium, but many of them provide cash payments for home care equivalent to the amount that the hospital care would have been worth. However, there have been very few instances when a Blue Cross member couldn't get into a hospital becaue the number of these institutions which participate in the plan is 2,500 with 80 per cent of the bed capacity of all the hospitals in the United States open to the public.

Reference has been made to the pioneering work done in Minnesota in rural enrollment in hospital plans. It began in 1938 under the auspices of the farm bureau in Hennepin county with 42 family contracts for a total service coverage of 90 persons. Since then farm bureau memberships in that state have increased to 6,200 contracts with 22,400 persons covered for hospital care. These, in 325 local units in 61 counties, have found the plan highly successful and satisfactory. There are 87 counties in the state and a total of 1,200 farm bureau units so that three-fourths of all the counties in Minnesota now have units enrolled in the Blue Cross and more than one-fourth of the units are already protecting themselves against sudden hospitalization costs.

From Minnesota farm bureau sponsorship of prepaid hospital care has spread to other states notably Kansas, Missouri, Nebraska, North Dakota and Oklahoma, until now there are 15 in which farm bureau federation members may take advantage of Blue Cross plans through their unit groups. In December, 1942, the American Farm bureau at its annual meeting in Chicago wrote into its nationwide program of work a strong indorsement of the nonprofit group hospital care plans and other rural health developments that lend themselves to farm family unit action.

However, the farm bureau is not the only agency through which the hospital plan is being carried to the farms of the nation. In Hillsdale county, Mich., the Farmers Mutual Fire Insurance company, a cooperative, was used as the already-established group through which to put the hospital plan into operation.

In northern Illinois, the Northern Illinois Hospital service, serving 11 counties and their small towns, ranging in population from 300 to 1,500, have worked in co-operation with Rotary, Kiwanis and Lions clubs, with women's clubs, PTAs, Veterans of Foreign Wars posts and churches, farm bureaus, home bureaus and granges. As a result in these 11 counties more than 4,500 farm families, representing 13,500 individuals are Blue Cross members.

Combined Business Groups.

In North Carolina a great many of the small groups in the small towns are enrolled as combined business groups. This type of enrollment means combining many small businesses into a group, getting 75 per cent or more of the employes in these various small concerns to become members of the Blue Cross. In some of these combined groups, as many as 800 persons join. These groups consist of drug stores, grocery stores, warehouses etc. The FSA has also been active in cooperating with the Blue Cross plans in North Carolina and other states in bringing prepaid hospital care to low income families.

Indicative of the way in which small town and rural America is enlisting under the Blue Cross banner are these facts taken at random from many examples. In one Iowa town of 592 population, 445 or 75 per cent have enrolled in a hospital care plan and in another town of 4,405, a total of 2,214 or 50 per cent have joined. In one Wisconsin community the local power company acts as collector and remitting agent and the people of the community who have enrolled pay for this insurance along with their monthly electric bills. This town has a population of 1,000 and out of a possible 450 persons employed in the town, 155 have enrolled, there being 105 family contracts and 41 individual contracts.

Such instances could be multiplied indefinitely. From all of which it is evident that rural America is indeed "shrewd buyers and quick to take to something once its value has been proved." As for proving its value, ask the Blue Cross member in New York state who was recently hospitalized for 53 days. His contract covered him for 23 days of one contract year and 28 days of the new year, a total of 51 days. His total hospital bill was $300.55. When he was ready to be discharged from the hospital, he was handed a hospital service credit of $288.30. That meant he had to pay in cash to the hospital only $12.25.

"It's a thrill that comes once in a lifetime," he said. And then, quite naturally, he added, "I think hospital service is a great idea."

mbership Grows From 500,000 to 14 Million in Seven Years

tion of Americans and their against the costs of hospital extended to more than persons in 1943, when additional participants in ed States and Canada o enroll in Blue Cross Plans. ure is exclusive of 750,000 contracts held by sub- in the armed forces, who protection upon their re- civilian life.

facts are revealed by C. Rufus Rorem, director of the Hospital Service Plan commission, which co-ordinated the activities and approves the policies of 78 Blue Cross Plans located in 38 states and seven Canadian provinces.

The proportion of family dependents enrolled has steadily increased, from 37 per cent in 1937 to the present 54 per cent, thus indicating a growing desire by commercial, agricultural and industrial employers and employees to protect their wives and children, as well as themselves. Here is the record for the seven years:

Year (January 1st)	Total Participants	Subscribers	Family Participants
1937.....	534,745	63%	37%
1938.....	1,364,975	60%	40%
1939.....	2,874,055	54%	46%
1940.....	4,431,772	55%	45%
1941.....	6,049,222	51%	49%
1942.....	8,456,265	48%	52%
1943.....10,458,899		47%	53%
1944.....13,005,493		46%	54%

Discarded Oil Drum Much Used by U. S. Marines

One of the most versatile objects marines have is the discarded oil drum, reports Sergt. Bill Allen, a marine corps combat correspondent. After the drum has served its purpose, Leathernecks find many uses for it and convert it to meet many needs.

Split in half, the can makes an excellent bath tub. Tied to the branches of a tree, it serves as a jungle shower after the bottom has been liberally sprayed with rifle and sub-machine gun fire. Pontoons for homemade canoes or makeshift stoves are also fashioned from the containers. One marine photographer is said to have used a discarded oil drum for a portable darkroom during the recent Bougainville campaign.

Mess halls, quartermaster's tents, and other buildings have been completely roofed with oil cans that have been split, hammered out, and used in lieu of sheet metal. A barrel cut in half will make two tent tables.

Other useful purposes served by the discarded oil drums are (1) GI cans, (2) mail boxes; (3) foundations for smaller type buildings; (4) movie seats (placed end to end, barrels serve as rows of seats) and (5) ring lights over a tropical boxing arena.

Cooperative State Audits Recover Sales Tax Fund

Recovery of substantial amounts in sales taxes, owed by firms doing interstate business, at a saving to the state of time, money and personnel has resulted from cooperative audits since 1942, the Federation of Tax Administrators reported.

Cooperative audits in which representatives of California, Indiana, Iowa and Michigan participated in the Chicago area, for example, resulted in recovery of $52,353 for this group of audits; in another, auditors from Alabama, California, Colorado, Iowa, Michigan, Oklahoma and Utah recovered more than $68,000 in unpaid taxes owed by interstate retailers.

Successful in computing sales taxes of nationwide retailers of relatively inexpensive items, the cooperative audit involves the pooling of auditors of various states to simplify former auditing procedures, under which an auditor from each state might find it necessary to visit the home office of the company and check records for his state. By the time several states had done this, much time and effort was wasted in dragging out the books.

Test Soil

Before spreading lime or wood ashes on the garden, have the soil tested, to make sure it needs lime. If the soil is already sweet, the additional lime or ashes may harm the growth of the vegetables. Most common garden crops grow best on land that is neutral or only slightly acid. Strawberries, watermelons, and potatoes grow well on somewhat acid soil. If the soil test shows that the soil is quite acid, wood ashes may be spread at the rate of 10 to 15 pounds for 100 square feet of space. Coal ashes do not add any fertilizer to the soil; wood ashes add both lime and potash. Coal ashes can be used to lighten heavy, stiff soil.

Salt Uses

Do you know where we get the word "salary"? It comes from the Latin salarium. Salarium means salt money, the part of a Roman soldier's wages he was paid in salt. It goes to the American soldier too, though he may not know it. Tetraethyl lead for high-octane gas is derived from the dinner-table crystals, as are the toughening chemicals for the gears in tanks and trucks with surfaces so hard a file cannot scratch them. Also from salt come ingredients of dyes for uniforms, pharmaceuticals for army and navy doctors, and sodium-filled valves that prevent airplane engines from overheating and melting.

Old History

Korea has over 4,000 years of history with a distinguished culture and a living language, and her relations with China are said to date back to 1122 B. C. when Kitzu, a Chinese sage, introduced Chinese culture to Korea. Subsequently Koreans adopted classical literary Chinese as the language of education and learning and Confucianism permeated Korean society and life. Because of the close cultural relationship Korea and China have been on friendly terms through centuries in spite of the fact that Korea became a vassal state of the Chinese Empire after the establishment of the Manchu dynasty in 1644.

Walking Good Exercise; Also Improves Posture

Walking is an excellent foot and leg conditioner. It also can strengthen your stomach muscles and help remove surplus from your waistline. It can tone up the muscles of the upper body and help you keep your chest up and your back straight. The result will be a marked improvement in your posture. And a man or woman with good posture and a peppy stride will look young and be young.

The walking must be done correctly for these benefits to accrue. The step must be steady and firm, with the toes pointed straight ahead or slightly in—never outward. The heel should be the first part of the foot to strike the ground, followed quickly by the outside edge and then the ball of the foot. The ball and the big toe will push off for the next step.

Your pace must be brisk and rhythmic. Start with a mile a day. After about a week, pace and distance may be increased gradually.

Remember that you walk with your arms as well as with your feet and legs. A good arm swing, rhythmic but not forced, will improve your gait. It will help equalize your balance and eliminate waste motion. The arm swing should be forward and backward at the side of the body, never across the front of it.

At the start of your walk, make yourself as tall as you can without straining. Then pull your stomach in. These two directions may seem hard to follow at first if you are not accustomed to them. But in a surprisingly short time they will become a part of you.

Market Best Milk To Get Better Income

Quality and quantity of market milk can be increased by dairymen if the milk produced by cows affected with mastitis is fed to chickens or other farm animals, a survey by the department of animal pathology and hygiene of the University of Illinois College of Agriculture disclosed.

Dairymen who sell milk of good quality often gross a higher income from their milk checks than dairymen who sell greater quantities of milk of low quality from mastitis-infected cows, it was pointed out. Proper management of affected cows also conserves feed and, of greater importance, approved management methods reduce the hazard of spreading the disease to healthy cows.

Animal pathologists urged prompt diagnosis of mastitis. By treating affected cows in the early stages of the disease, it is possible to prolong their production, experience has shown. Veterinarians have found that some cows in the early stages of the disease respond to treatment, and best results may be experienced by treating cows at the end of the lactation period or while the animals are dry.

New Guinea Pig

A fierce little burrowing animal called the cotton rat, which has been found susceptible to both the poliomyelitis virus and diphtheria intoxication, has stolen scientific favor from its laboratory friends the guinea pig and the white rat which refuse to become infected. The cotton rat is thus becoming increasingly important in experimental work, report biochemists at the University of Wisconsin who have made studies of the animal's nutritional requirements.

C. A. Elvehjem and research associates at the Wisconsin college of agriculture found that the cotton rat's diet is the same as the white rat, except that it requires nicotinic acid in addition. They also found that certain factors in liver extract aid the cotton rat's growth. The animal is native to the southern states, Mexico, Central and South America.

Mexican Cement

Mexico is expanding its domestic capacity for the production of cement to meet the increased needs of a great road-construction program and other building activities. According to an economic review published by the National Bank of Mexico, cement production from eight domestic plants increased in 1943 to 744,000 tons from 584,000 in 1942.

This year, the bank reports, new plants are scheduled to begin operations at Lagunas, Mazatlan, Tlalnepantla and Monterrey. Likewise, it is planned to put in operation the old one in Monterrey. The total capacity will aggregate 1,494,050 tons of cement, which will imply a 300 per cent development over and above the 1942 capacity.

Hat and Purse of Joined Medallions

JUST a few easy-to-crochet medallions joined together make this cool-as-a-breeze calot and bag set. Use any color straw yarn to highlight any costume.

* * *

Crochet for pleasure in odd moments of leisure. Pattern 7040 contains directions for hat and purse; list of materials.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Radio Network by Color

About 25 large and small radio networks in the United States are identified by an individual color by telephone technicians, even on the switchboards through which the programs are transmitted.

The system originated 20 years ago when engineers, mapping the first two networks for NBC, used red pencil for one and blue pencil for the other, and the colors became the official names of these radio chains.

KLEMME LOCALS

The hollow block laying on Fred J. Arnold's new building was finished by the Northern Lumber Co.'s workmen Friday. Mr. Arnold will have a nice place of business when the new building is completed. He hopes to move in his machinery and tools the first part of June.

Sgt. Graydon Back, of Great Bend, Kansas, arrived home last week on a fifteen day furlough which was granted him at the time that he might attend the funeral services of his grandmother. Sgt. Back is visiting with his parents, Mr. and Mrs. Herman Back near Klemme.

Dinner guests at the R. A. Jorgenson home Saturday evening were Mr. and Mrs. Henry Galberth and son Billie of Des Moines; Mr. and Mrs. Lyle Liebendorfer of Forest City; Mrs. A. H. Dulmes of Grundy Center; A. L. Kingery of Seneca; and Mr. and Mrs. C. G. Waterman and daughter Mrs. Lyle Wilcox of Klemme.

Mrs. Henry Keeper returned home Saturday morning from Reseda, California, where she had visited for a couple of months with her son-in-law and daughter, Mr. and Mrs. "Curley" Lucas and family. She was called back to Klemme by the sudden death of her nephew, Lt. Dorance S. Grange, whose funeral was held Saturday afternoon.

Mr. and Mrs. W. Henry Galbreth and son, Billie of Des Moines, came Saturday morning to attend the funeral services of Lt. Dorance Grange. The Lieutenant was a student in Klemme high school during the time Mr. Galberth was superintendent here. The Galberths were guests at the R. A. Jorgenson and Art Kudje homes over the week end.

NOTICE FOR COAL BIDS

Bids will be received at the office of the County Auditor, Hancock County, Garner, Iowa up to 1 30 o'clock, p. m. on Monday, June 12th. 1944 for approximately 100 tons of stoker coal to be delivered on track at Duncan.

One carload of this coal is to be delivered about July 1st. and the second car on January 1, 1945.

Bidders will state price per ton and fully describe specifications with Franklin County, Illinois, stoker coal, to be used as a basis for comparison.

By virtue of statutory authority preference will be given to products and coal produced within the State of Iowa.

The Board of Supervisors of Hancock County, Iowa, reserves the right to waive technicalities and to reject any or all bids.

Published by order of the Board of Supervisors this 5th. day of May 1944.

Fred C. Missal,
County Auditor

THANK OFFERING SERVICES AT KLEMME - LIBERTY

The annual Thank Offering sponsored by the Methodist Woman's Society of Christain Service will be held on Sunday morning at Klemme and Liberty in the regular worship services. The Rev. Arthur F. Schuldt, Emmetsburg pastor, will be the guest speaker. Rev. Schuldt is a forceful speaker and an efficeint pastor. Every member of the churches are urged to be in attendance at the services to hear him.

PVT. LELAND LANGLITZ KILLED ON ITALY FRONT

Mr. and Mrs. George Langlitz of Meservey received word from the war department that their son, Pvt Leland Langlitz, was killed in action in Italy April 24. It was the first war fatailty among servicemen from the Meservey area.

Pvt. Langlitz had been in service over a year. He was born in Meservey and had lived there all his life.

Besides his parents he leaves a brother, Ivan, of Latimer.

MRS. MISSMAN HOSTESS TO BRIDGE CLUB

Mrs. W. F. Missman entertained the U-Delt-Em Bridge Club at her home Thursday afternoon.

The highest scores were won in the following order: Mrs. Edna Thada, Mrs. Fred J. Arnold, and Mrs. Art Kudje.

Wheat can be substituted for corn in feeding hogs, but it should be ground.

THOSE WHO WISH TO HELP FARMERS SHOULD REGISTER

Paul Henderson, county extension director, has sent blanks to The Times office for potential farm workers for the peak season.

These folks who register will be used only in cases where the farmers demand help to do some particular job. The blanks will give Henderson a chance to know on whom to call for a particular kind of work. The registration does not mean that people who fill out these blanks will have to go out when called. They decide for themselves whether they can help out when called Perhaps they would not be called at all.

Women and girls can also sign up. They could help the farm-wife with such tasks as canning, etc.

KLEMME GIRL HONOR STUDENT AT WALDORF COLLEGE

Miss Arlene Wille, daughter of Mr. and Mrs. Carl Wille of Klemme, freshman student at Waldorf College, at Forest City, was one of the high honor students for the year.

During the last week of school at Waldorf a breakfast was given in honor of the new members of the Phi Theta Kappa, a national honorary scholastic society. The members of this group are elected on the basis of scholarship and character, and Miss Wille had the honor of being chosen as a member of the society.

BRITT MINISTER WILL SPEAK AT MEMORIAL SERVICES

Services Will Be Held In Klemme Park Tuesday Morning

Rev. F. F. Robinson, pastor of the Methodist Church has been secured by the Klemme American Legion and Auxiliary as the speaker for the Memorial Day program to be held at the Klemme Park on Tuesday morning, May 30th beginning at 10:00 o'clock.

In case of rain that day, the Legion announces that the program will be held in the Community Hall.

The complete program is published in issue of The Times.

MRS. ROTHS BUYS SPEER CAFE BUSINESS

C. E. Speer of Havelock was in Klemme and sold his cafe business here to Mrs. Tom Roths. Mrs Roths had leased this business from Mr Speer since he left here in September 1943.

Mr. Speer was in business here for a little over three years when he and Mrs. Speer went to California in September 1943 where he became employed at a ship yard at Richmond, Cal.

Annual Ladies Aid Picnic At Ell Thursday

The annual Reformed Ladies Aid picnic for Ell, Garner and Klemme will be held Thursday, June 1 at the Elltown church. Those who wish to attend will meet at the Klemme Reformed Church at 1:45 p.m. Those who drive are asked to bring their cars.

SERVICES HELD FRIDAY A.M. FOR JENS JORGENSON

Funeral services for Jens Jorgenson, 87, were held at the Bohn Funeral Home at Garner Friday morning, May 19, 1944 at 10 00 o'clock with Rev. G J Kupke Lutheran pastor in charge. His text was from John 8.31-32.

Miss Doris Hollatz and Miss Elvira Hollatz sang "Rock of Ages," and "My Faith Looks Up to Thee" Mrs Otto Kloock was the accompanist

Interment was on the family lot in the Concord Cemetery south of Garner Pallbearers were C. A. Frisbee, Wm. Quilling, Mike Jacobsen, Chas. Schissel, W. S. Pritchard and Wilbur Carr

OBITUARY

Jens Jorgenson was born December 7th, 1856 at Baelum, Denmark. He came to America with his wife and three children, John, Christine and Magnus and arrived at Spencer, Iowa, in August 1888 where the family lived until the following winter when they moved to Bayard, Iowa, residing there for three years when they moved to Garner in 1892.

Mr Jorgenson was a cabinet-maker and carpenter by trade and followed that line of work for many years, however, he also farmed for several years near Garner and three years near Clear Lake.

Except for the past two years at Rapid City, South Dakota, and for three years at Clear Lake, Mr. Jorgenson had been a resident of Garner for about a half century.

He died at the home of his son, John at Rapid City, South Dakota on Tuesday morning, May 16th and had reached the age of 87 years, 5 months and 4 days His son, Magnus died in infancy and his daughter Christine, died in 1922. Mrs. Jorgenson died in 1938.

Mr. Jorgenson is survived by his two sons, John at Rapid City, South Dakota and Ray A. at Klemme; one brother, Marinus Jorgenson at Milltown, Wisconsin; two grandsons, Lt. Ray A. Jorgenson, Jr. at Dodge City, Kansas, and John P. Jorgenson some where in the Pacific with the U.S. Army; also one great granddaughter, Maryl Judy Jorgenson, Dodge City, Kansas.

HANCOCK COUNTY SENDS MORE SOLDIERS

Men Go to Camp Dodge for Last Examinations

Hancock county selective service officials reported the following men sent to Camp Dodge for their pre-induction physical examination:

Charles A. Beer, Verlyn R. Frriedow, Clarence Schroeder, Don E. May, Richard D. Thompson, Donald E. Eiseman, Charles D. Carothers, William A Millard, Peter J. Riekeina, Donald D. Liska, Marvin R. Meints, Byrnes H. Lemke, Dean R. Gambell, Albert J. Carolus, Wayne F. Klinge, Vincent J. Kirschbaum, Clifton D. Brock, Orrin B. Torleson, William A. Schrader, Clifford J. Howlett, Earl H. Stalzer.

Harold F. Kalstorf, Frederick F. Bell, Harold J. Swalve, Jake P. Brouwer, George E. Drabek, Robert L. Mitchell, Fred A. Eenhuis, Herman C. Nannenga, Kenneth R. Sorenson, Raymond Steiff, Harold G. Hill, Joseph R. Kelly, DeLose N Drake, Howard G. Boller, and Elmer V. Buckley.

The above are all Hancock county men. Reul J. Pruyn was transferred here for pre-induction from Wellington, Kans.

MOTHER OF MRS. POLSDOFER DIED IN WASHINGTON

Mrs. Art Polsdofer of Liberty township, received the sad news of the death of her mother, Mrs. Trana, at Everett, Washington on May 16th. Because of the crowded trains, Mrs. Polsdorfer did not make the trip to Washington to attend the funeral.

1943 Was All Time Peak Year For Iowa Farmers

POPPIES

The poppies bloom again this year
In Flanders, as before;
And also in far off Bataan,
And on Corregidor.
And poppies bloom in Egypt's sand,
In Russia's ice and snow;
And by the edge of quite pools
Where sacred lotus grow.
And scarlet poppies lift their heads
Beneath old England's skies,
And turn bright faces to the sun
Where'er Old Glory flies.
For poppies blossom where the blood
Of heroes stain the sod;
And spring from footprints of the brave,
That duty's path hath trod.
And poppies bloom forevermore
Upon each patriot's breast,
To honor those who gave their all,
To die in Freedom's quest.
—Edna Bacon Morrison

ABERDEEN ANGUS SALE AT HAMPTON

Elsewhere in this issue a cattle sale is advertised This cattle sale should interest every breeder of good livestock in North Central Iowa.

The North Central Iowa Aberdeen Angus Breeder's Association invite you to attend their first consignment sale at the Hampton Sale Company, Hampton, Iowa on Monday, June 5th at 12:30 o'clock Eighty head from sixteen well established herds in North Central Iowa have been selected by the Sales Committee

50-50 Class Planned Weiner Roast, Rained Out

The 50-50 class of the Methodist Church planned a weiner roast Friday evening to be held in Rev Harvey's back yard where an outdoor fireplace is located. A heavy rain spoiled the plan, but not the enthusiasm of the young married people who then went to the Dwight Hummell home and held their party despite the rain. Games were played and lunch was served later.

The class voted to replace a fruit tree at the parsonage yard which had blown down by a heavy wind.

Recent Bride Entertained Here Saturday Afternoon

Mrs Dwight Hummell entertained a number of ladies at her home Saturday afternoon at a shower honoring Mrs. Don Carson, of Des Moines, a recent bride Mrs Carson received many nice gifts. The h stess served lunch later in the afternoon.

Those present were Mrs. John Johnson, Miss Bertha Johnson, Mrs. Stewart Hevilin, Mrs. Art Kudje.

IOWA FARM INCOME AT ALL-TIME PEAK

Was 27 Percent Over 1942, Economists Say; Urge Saying Now

Iowa farmers reaped a record cash farm income of $1,637,000,000 —an average of about $8,000 per farm—in 1943 And that income, according to Francis Kutish, farm economist at Iowa State College, was 27 percent more than that of 1942 and 2½ times greater than the $647,435,000 received in the pre-war year 1939.

Farm production and prices are both up compared with those of 1939, Kutish said. The Iowa farm price index averaged 97 percent of the 1910-14 level in 1939, and 192 percent of that level in 1943—a 98 percent rise

Cash farm income from livestock products has increased much more since 1939 than that from crops. Encouraging the livestock expansion has been the wartime government program of favorable livestock prices compared with feed prices Livestock and livestock products brought $453,538,000 in cash income in 1939, compared with $1,294,296,000 in 1943 Crop cash income of $124,453 000 in 1939 increased to $290,998,000 last year.

Crop Income Improves

Now that feed reserves are less ample, however, crops are beginning to play a more important role in determining farm profits This change showed up last year when cash income for crops increased 38 percent over 1942 Cash returns from livestock and livestock products increased only 27 percent. Government payment to Iowa farmers dropped from $69,444,000 in 1939 to $51,335,000 last year

Volume of production for all products increased about 30 percent on Iowa farms from 1939 through 1943, Kutish states For example, farmers sent about 37 percent more hogs and 26 percent more cattle to market in 1943 than in 1939.

Depreciation Going On

In appraising the size of present farm income many farmers often forget that some of this income is the result of depreciation, Kutish points out. They have more money now partly because they haven't been able to replace equipment. Buildings, especially farm homes, are many years behind on replacements and improvement. Soil is being drained of fertility rapidly.

Once the war is over, considerable expenditure will be necessary for restoration of worn-out equipment and rebuilding fertility reserves. Unless cash reserves for these purposes are accumulated now, future expenditures will place a rather heavy drain on current farm income after the war and, Kutish adds, one of the best ways to accumulate these cash reserves is to buy war bonds.

BROTHERS SERVE OVERSEAS—Sgt. Ray Keeper (left above) was a member of a Liberator bomber crew which saw action in the Pacific theatre of war, giving him nation wide recognition as the "Yank of the Week," in a radio broadcast. He has since returned to the United States and is now stationed at Alliance, Nebraska. Sgt. Alvin Keeper (right above,) is in the medical department in a general hospital overseas. The soldiers are sons of Mr. and Mrs. Henry Keeper of Klemme. They are graduates of the Klemme high school and both were employed at the Northern Lumber Company of Klemme before entering the service.

Buck Private Thought It Time for Change of Status

Accompanied by a driver, an American major in a motor vehicle was stopped by the sentry on guard at a cross-roads.

"Who goes there?"

"One American major, a one-ton truck of fertilizer, and one buck private."

They were allowed to proceed, but at every cross-roads they went through the same formula.

After a time the driver asked if they were likely to be stopped again.

"I guess so," replied the major.

"Well, major," said the private, the next time we are stopped would you mind giving me priority over the fertilizer?"

SNAPPY FACTS ABOUT RUBBER

Natural rubber is still something of a mystery, even after years of laboratory experiments. It has carbon and hydrogen, but there are other qualities which have not as yet been determined.

Before the war, 60 per cent of the tires and tubes made each year were used as replacements, and 80 per cent of the new motor vehicles sold replaced those annually scrapped.

Brazil rubber selling at $3.06 a pound in 1910 stimulated the development of the Middle East plantations to the extent that 3,000,000 acres were under cultivation in 1915, providing the bulk of the world's supplies.

THROW AWAY HARSH LAXATIVES!

Millions Have Ended Constipation with Simple Fresh Fruit Drink

Don't form the habit of depending on harsh, griping laxatives until you've tried this easy, healthful way millions now use to keep regular.

It's fresh lemon juice and water taken *first thing* in the morning—just as soon as you get up. The juice of one Sunkist Lemon in a glass of water. Taken thus, on an empty stomach, it stimulates *normal* bowel action, day after day, for most people.

And lemons are actively *good* for you. They're among the richest sources of Vitamin C, which combats fatigue, helps resist colds and infections. They supply vitamins B_1 and P, aid digestion and help alkalinize the system.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

FOR ITCHING OF MINOR SKIN RASHES

get this medicated powder. Contains ingredients often recommended by many specialists for simple rashes, diaper rash and chafing. Mexsana soothes and forms coat of protection on tender skin. Costs little. Always demand Mexsana.

Olivia de HAVILLAND

star of the Warner Bros. picture, "Strawberry Blonde," recommends Calox Tooth Powder for teeth that shine.

CALOX TOOTH POWDER

Mother says:

PAZO for Simple PILES

Relieves pain and soreness

There's good reason why PAZO ointment has been used by so many millions of sufferers from simple Piles. First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

BIG VS. LITTLE FARMERS

Forty years have elapsed between the big-business battles of Teddy Roosevelt and Cousin FDR, but one issue which plagued the former is also plaguing the latter and is now before congress. It is the question whether government irrigation, government water, and government reclamation shall benefit the big landowner or the small.

The issue is now one of the hottest fights both in California and in congress, where Secretary of the Interior Ickes has been called to testify on a rider which Congressmen Elliott and Carter of California have skilfully smuggled into the rivers and harbors bill—a rider permitting big landowners in California's central valley to benefit from government low-cost irrigation.

The question in Teddy Roosevelt's day was whether any farmer holding more than 160 acres should benefit from government irrigation. The issue arose when the land kings of the Far West wanted to develop their ranches and speculative holdings through irrigation at government expense.

The West was for it, but the East objected. Eastern states claimed they would be footing the tax bill and that Western irrigation would come out of their pockets. The West replied that the irrigation projects of that day would provide benefits for small Eastern farmers who migrated westward tomorrow.

After a terrific battle, Teddy Roosevelt won out Congress ruled that government-irrigated land tracts must be limited to 160 acres.

That law still stands. But Republican Congressman Carter of Oakland, Calif., and Democratic Congressman Elliott of Tulare, Calif., have ganged up to change it with a rider exempting the central valley irrigation project.

Their amendment, already passed by the house, would mean that big ranchers in the central valley could benefit from the new irrigation project no matter how extensive their holdings. Even more important, it would mean that a lot of new land, not extensively cultivated at present, would be subjected to cut-throat speculation.

Ickes for Small Farms.

Secretary of the Interior Ickes, who has supervised the expenditure of $150,000,000 on central valley irrigation, is determined that the benefits shall not go to land speculators and big ranchers, plus some of the big liquor companies which have bought up California wineries.

The issue, according to Secretary Ickes, is whether the U.S.A. is going to become a nation of large landowners hiring Okies and tenant farmers, or whether the nation will feature medium-sized farmers operating their own land.

NOTE—Business men in the central valley are split over the issue. Many merchants believe that medium-sized farms rather than poorer farm labor make for better business in neighboring towns. The Fresno Chamber of Commerce calls 60 to 80 acres of figs an economic unit for a family, or 80 to 120 acres of alfalfa. The Chamber has sent out booklets urging settlers to take up small land tracts.

* * *

FOUR-Fs.

Despite all the army howls for 4-Fs to get into war plants, it remains a fact that physical examination in many plants is so stiff that they can't get in. In fact, the physical in some plants is stiffer than in the army.

Many a patriotic 4-F has worn out shoeleather making the rounds of war plants, only to find that he can't get in. A punctured ear-drum, for instance, is considered just as important in a war plant as in the army.

In recent weeks, belated steps have been taken to relax some of these physical restrictions, but much still remains to be done. So you can't blame a lot of the 4-F-ers if they aren't in war plants.

Another difficulty which the War Manpower commission might well dig into is the fact that anyone can quit work in a vital war plant but, without a certificate of availability, cannot transfer to another war plant—at least, not until after a 60-day period.

In other words, you can step out of an aircraft factory or a synthetic rubber plant and go to work in a barber shop or at a bootblack stand, or just loaf at home. They are not essential industries. But if you want to switch to a munitions plant, you can't—without a certificate of availability (which you probably can't get), or without waiting the required cooling-off period of 60 days.

* * *

MERRY-GO-ROUND

Busy as he is, President Roosevelt will soon be called upon to settle the problem of whether a rail worker's vacation week is six days or seven. Railroad workers were granted a week's vacation as part of the wage compromise last year, but the railroad executives now contend that FDR meant the vacation should be six days, not seven. If the railroad workers get seven days, they can stay away Sunday, which is a holiday anyway, plus Monday, or an actual total of eight days.

Walter Winchell

(WNU Service)

Things Few New Yorkers Know About New York:

New York isn't all stone and steel. Staten Island is dotted with small towns and fertile farm lands, by cracky . . . There are about 600 Indians in our burg . . . The Stock Exchange has its own medical dept. and tailor . . . Most odorable spot in town is Front street, where the city's supply of coffee is roasted . . . You can find almost anything in Manhattan, including a lighthouse—at Fort Washington Point . . . New York's most expensive real estate is supposed to be Nassau street—as much as $825 a square foot has been shelled out for property there. . . . Meals in the city's hoosegows are planned by expert dieticians. No room service, however.

The tiny cemetery on Tenth street was the scene of our town's most macabre crime. The bones of a rich New Yorker, buried there, were once stolen and held for ransom. The remains were eventually recovered but the skeleton-nappers were never arrested . . . On Second avenue there is a 3, 9 and 19 cents store. Don't know the reason for the unusual prices . . . The stone fortifications that were used during the Revolutionary war can still be found near B'way and 190th street . . . Six different streets meet at Sheridan square . . . Oddest-named shop is the Chineseatery called Hang Far Low . . . The clock tower at the north end of Battery park sounds the signals for the watches kept on shipboard . . . Wall street is only about seven blocks long, but it's the financial heart of 48 States.

For some unknown reason, above 59th street several avenues suddenly change their names. Eighth avenue becomes Central Park West; Ninth avenue becomes Columbus avenue; Tenth avenue becomes Amsterdam avenue; and Eleventh avenue becomes West End avenue . . . No one need go hungry or homeless on the streets of New York. The Dept. of Welfare is ready to provide food and shelter for all unfortunates. Then how come there are so many panhandlers? . . . Haunted house legends have grown up around the ancient brownstone mansion that adjoins Woodlawn cemetery. No one has lived there for more than a century and it's completely furnished.

Five stories below street level subterranean vaults at the Federal Reserve Bank are barred by doors weighing as much as 90 tons. The best air raid shelter in town . . . Juvenile delinquency isn't new. According to Police Dept. statistics, 50 per cent of the city's lawbreakers have always been under 25 years of age . . . Mayor LaGuardia has a tiger skin in his home to symbolize his victory over the Tammany tiger . . . Among the Weather bureau's unusual duties is collecting pollen to aid in the study of hay fever . . . Plenty of amusement spots in our town—over 700 legit theaters and movies.

You don't have to leave New York to enjoy natural scenery. The eye-filling sights along the Hudson are as beautiful as anything you'll find in any part of the world . . . A few New Yorkers who love to go to fires have private fire alarm boxes in their homes . . . Most popular part of the public library is its record booth where you can hear recordings gratis. You must make reservations two weeks in advance . . . For its post office in the RCA building, the gov't pays Radio City $1.00 a year rent . . . There is a deserted theatre under Carnegie Hall . . . Swankiest elevators in town are at the New York Central edifice. Decorated with red Chinese lacquer and sky-blue ceiling . . . 50,000,000 pounds of food pour into New York every 24 hours.

Broadway is the city's oldest street. It was down early Broadway that a courier dashed shouting the news of the Battle of Lexington . . . More crimes have taken place on the Main Stem (between 47th and 49th streets) than in any other spot in town. No one knows exactly why. . . . There is a huge warehouse in Radio City's sub-basement . . . The opulent house at 73rd street and Riverside drive that resembles a castle was erected by Charles M. Schwab and cost two and a half million . . . A unique subway station is the one at 190th street. It's carved out of the side of a cliff . . . No trick is missed in an effort to improve radio programs. NBC's studios are coated with a special sound-insulating glue . . . Inside the Brooklyn Bridge abutments are large catacombs. A department store used to cache its liquor there.

Exotic East Indian merchants can be found on lower Fifth avenue. They sell "priceless" gems. One merchant is named Mohammed Ali . . . The Bowery Diamond market is one of the burg's picturesque sights. Diamonds worth millions are bought and sold on the sidewalk in the midst of the poverty-stricken sector . . . George Washington's love for the drama helped make New York a theatrical center. When he lived in the Big Town, Gen. Washington rarely missed a first night.

For you to make

An Old Burro

Persons traveling through Cottonwood, Ariz., often are startled by the sight of a burro standing in the middle of the street fast asleep. It's old Ned, 44 years old, believed to be the oldest burro in the United States. Ned belongs to Charlie Willard, of Cottonwood, and has the run of the place.

Westerners call a burro the "mountain canary" because of its weird bray.

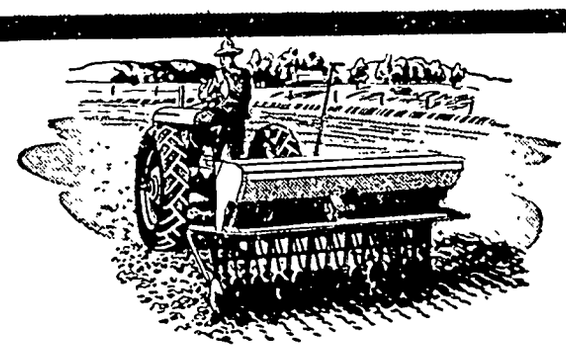
Get EXTRA TRACTION BAR LENGTH AT No Extra Cost

and YOU WILL GET EXTRA TRACTION, BETTER CLEANING and LONGER LIFE TOO!



FIRESTONE traction bars are built into the tread of a farm tractor tire to serve just one purpose. That purpose is to give traction.

Because the traction bar is the source of pulling power of tractor tires, it is obvious that *greater traction bar length gives greater traction.* By the same token, a *shortened* traction bar design, *such as the broken center, gives less traction.*

Firestone Ground Grip Tractor Tires provide up to 215 extra inches of traction bar length per tractor at no extra cost. And the bars are joined in the center to form a powerful, triple-braced, leakproof traction unit.

That's why farmers prefer tires built by Firestone, *the pioneer and pacemaker* in putting the farm on rubber.

Listen to the Voice of Firestone with Richard Crooks and the Firestone Symphony Orchestra, under the direction of Howard Barlow, Monday evenings, over N. B. C.

A VOICE FOR THE DOG

A mad dog does not rush!
A mad dog does not attack!
A mad dog does not froth at the mouth!
A mad dog will not fight back even when cornered!

The symptoms usually described as those of rabies are only those of a simple form of epilepsy or nervous disorder and not contagious.

Hydrophobia is not caused by heat; epilepsy is Hydrophobia is only communicable by a bite; epilepsy is not communicable at all. Dogs suffering from hydrophobia do not froth at the mouth; epileptics do.

Let a poor little house dog, unaccustomed to roughing it for himself, become nervously excited by the din of the street, or overheated on a hot summer day; and some fool raises the cry of mad dog and shies a brick The dog runs and that is enough. Men are but savages under restraint and anything that runs must necessarily be guilty and soon a howling mob is in pursuit and the dog is indeed lucky that escapes

Every city has a dog pound, hundreds of men are employed as dog catchers They are frequently bitten. Did any one of them ever have hydrophobia?

"Give the dog a chance"

—Britt News-Tribune

CONTROLLING THE WAIST LINE

The man who can control his waist line, a local philosopher said can control any situation Controlling the waist line reveals a strength of purpose, determination, will power and self-control that will get any job within the range of human power done. Show me a man who controls his waistline and I will show you a winner. I don't include the fellows whom nature has endowed with a trim waistline. They can eat like a horse, never denying themselves a thing and never show it. They are getting assistance from a peculiar gland condition or a tape worm. I refer to the fellows who can't eat a good their belt the next day because of added girth. When these boys control their waistline a real job of selfdiscipline is being done.

—Belmond Independent

SPEAKING OF NEWSPAPERS

A newspaper man knocked at the pearly gate,
His face was scarred and old,
He stood before the man of fate
For admittance to the fold.
"What have you done," St. Peter asked,
"To gain admittance here?"
"I've been a newspaper man, Sir," he said,
"For many and many a year."
The pearly gates swung open wide
And St. Peter touched the bell.
"Come in," he said, "and choose your harp,
You've had your taste of hell."

HOUSE CATS DESTRUCTIVE TO WILDLIFE

The ordinary house cat has long been recognized by game technicians as most destructive to wildlife. Some even go so far as to state that cats destroy more game than all other predators combined. The worst of the cats, of course, is the one that actually goes wild. These cats call home a nest under some abandoned building or in a ground hog den. There are thousands of such cats in Iowa. For every cat that takes up permanent habitation in the fields, however, there are hundreds of occasional hunters. These are the milk-lapping tabbies who part-time quietly lie in front of the fireplace. They are truly the Dr. Jekyl-Mr. Hydes of the animal world. Even the most docile, home-loving tabby with a warm bird in its mouth reverts to savagery. Try to remove a bird from a cat's mouth, and you will be greeted with an angry flashing of eyes and a deep-chested growl that you never dreamed could come from your ordinarily gentle-mannered pussy cat. Cats selected for their mouse-catching ability are useful if kept in their proper place, but they should never be allowed to run in the wild, especially in June and July, when both song and game bird young are almost helpless.

THANK YOU!

We wish to take this way to say "Thank You" to the people of Klemme and vicinity for their patronage and friendship extended to us during the time we were in business in Klemme. Mr. and Mrs. C. E. Speer, Mr and Mrs. Donavon Speer

IOWA LUMBER PRODUCTION FIVE TIMES PREWAR LEVEL

Iowa is not generally known s a lumber-producing state, but is doing its part to provide lumber for both war products and its own domestic needs. According to E. W. Fobes, Assistant Area Forester of the Timber Production War Project, Iowa has increased its lumber production from 10,000,000 board feet in 1940 to 57,000,000 board feet in 1943. Of this amount the outstanding individual item was black walnut gunstocks, of which Iowa concerns manufactured approximately 1,000,000 ranking second in the nation. In addition to this, 3,000,000 feet of walnut logs were shipped to other states for manufacture into war products. Considerable native lumber has gone into the manufacture of boxes, boats, ammunition workers' shoe soles, and other war necessities.

Beginning in 1943 the State Conservation Commission has employed farm foresters who have been partially responsible for this increase by assisting farmers and sawmill operators in the marketing of woodland products. For the most part the lumber harvested has been large, prime trees, and the timber areas still provide game food and cover while the owners are waiting for the next tree crop to mature in a few years.

Around Iowa

PLEASE ADVISE!

Madrid city officials have requested that the next time anyone takes gas from the fire truck that he leaves a note on the steering wheel advising that the truck is out of gas --- or leave enough to make one run to a fire. The fire truck recently was left without gas when approximately 18 gallons were taken unbeknownst to officials--and the truck was parked next to the city jail cells, too.

PROOF GONE

Owen Anderson of Madrid plowed more under than he intended when his billfold, containing a number of important articles, was covered by the plow. The billfold contained such things as his birth certificate, his gasoline tickets, tractor coupons, driver's license, draft card and some money.

HALF CENTURY

During the 90th anniversary celebration of the Decorah Congregational church, 8 persons who had been members for 50 years or more were honored.

NEW HIDING PLACE

A hugh tractor tire belonging to Robert A. A. Bath of Odebolt disclosed while undergoing repair a 30-inch tire tool that had been left for some time between the tube and casing. Bob says he doesn't know how it got there, but the deep impressions left in the casing and tube indicated that the tool had been there for quite awhile.

BIRTHDAY PARTY

The ninety-first birthday was the occasion for a celebration for Nicholas Larson of West Branch recently. Three guests at the party were past 90 years old and one was 87.

FIRST WOMAN

The manpower shortage has affected even the jury in Audubon county. Mrs. F. H. McFadden was selected as a member of the grand jury for the May term of court. Mrs McFadden was also named foreman of the jury. This was the first time that a woman has been named to the grand jury in Audubon county.

MORTGAGE FLAME

A five-colored flame originated by Wartburg College Chemistry Professor A. W. Swenson of Waverly is to be used for the second time by a church which is making a ceremony of burning its mortage. The first use of the special flame, made from various chemicals, was at the time the Lutheran church at Independence burned its $17,000 mortage last month. The matter came to the attention o a Geneva, New York church, which plans to burn a $17,000 mortgage this month.

MOVES

For 32 years, F. E. Grandall of Red Oak had lived at the Charles Finley residence During all of that time, Mr Crandall has been a steady patron of the hotel cafe One of these long-time records was broken recently when Mr. Crandall moved. The move, however, makes it easier for him to continue the other record.

PLACEMENT CENTER

Montgomery county farmers will be aided by men, women and children of the county this year. Five placement centers have been organized for the enrollment of anyone finding it possible to spend some time helping farmers with the work this spring and summer.

POINTS ON THE FOOD SITUATION FROM HERE AN THERE

DID YOU KNOW?

1. That American civilians ate more food per capita in 1941 and 1942 than ever recorded before?

2 That extra doses of Vitamin A and C failed to cure night blindness some airmen suffered during the siege of Malta. With the arrival of an extra supply of oranges, however, the night vision of the flyers returned to normal within a week

3. That the best potatoes wear their jackets to dinner?

4. That Iowa farm families last year canned an average of 298 quarts per family, town families 201 quarts and city families 165 This added up to the enormous figure of 143 to 160 million quarts for Iowa families.

5. That cherry trees this spring give promise of planty of cherry pies and other favorite cherry dishes? Carlot shipments of sweet cherries from the northwest are expected to start about the second week of June.

6. That the US Department of Agriculturare states whether ration points are off or on commercially canned foods. It's good common sense for millions of Americans to do home canning this summer. Present abundance does not mean that food problems are solved for seasons ahead If this war has taught Americans anything, it is that the food situation continually changes.

PASTURE PIGS EARLY AS POSSIBLE BUT AVOID MUD

Pastures are doing well, and the sooner pigs are put out on them the better, suggests Paul Henderson, county extension director Mud around the hog lots any barnyards has been a serious threat to the health of little pigs.

Pigs confined to the pen or feeding floors since birth should be hauled to the pastures rather than driven through muddy lots, points out E L. Quaife, extension swine specialist at Iowa State College

In some instances where the hog house is adjacent to the pasture, a lane bedded deep with straw or graveled, should be provide between them to keep the pigs out of the mud. A board walk would accomplish the same purpose. Such an arrangement permits use of the permanent house for shelter and may aid materially in feeding and getting water to the pigs. Sows farrowing now or later might well farrow out on the pasture it temporary shelter is provided.

Pigs shifted from dry feeds in the pen to pasture may scour for a week to 10 days. Turning the sows and pigs to pasture a short time each day until they are accustomed to the change of feed helps to alleviate this.

Don't jab around in cutting asparagus and don't walk where asparagus is planted, advises L. C. Grove of Iowa State College.

4-H GIRLS & BOYS WAR ON FLIES

4-H girls and boys of Hancock County are starting a campaign to kill flies. They belive that Harold Gunderson of Iowa State College is right when he says, killing flies early in the season is far better than waiting until they have become numerous.

Flies multiply rapidly and are known to transmit such diseases as infantile paralysis, tuberculosis, and sleeping sickness.

Leaflets giving the following suggestions have been sent to each 4-H club member.

Proper disposal or treatment of farm manure is an important step If there is not sufficient time free from other farm work to haul and spread the manure on fields at intervals of approximately 3 days, it should be stacked in compact, straight-sided piles. Treating manure with borax at the rate of 1 ounce to 8 bushels of manure will kill fly larvae.

Traps, screens, sprays, fly paper, darkening of barns, use of swatters around the home, and poisons all have their place in fly control.

BETTER IOWA GARDENS

The late, cool, wet season has insects. These include cutworms, seed corn magot and corn-seed beetle There is no control for the last two named, except replanting with high-germinating seed. Cutworms, however, can be controlled with poisoned bait. Use ¼ pound of paris green, 1 quart of molasses, and 10 pounds of wheat bran with 1 to 3 quarts of water Mix to a moist, crumbly mash and scatter it broadcast in the evening at the rate of 20 pounds wet bait per acre. This means 8 to 10 flakes of poison bran per square foot.

* * *

Flea beetles have been attacking radishes, cabbage, chard, potatoes and beets. These small, active hard-shelled bugs eat holes in the leaves —and in some cases where radishes and cabbage were the only crops up, they have completely destroyed or spray plants, using 1 part lead arsenate or calcium arsenate to 9 or 10 parts hydrated lime.

* * *

The same spray or dust will control cabbage worms as soon as they appear (and they are appearing). It's safe to use arsenicals on cabbage, chard and beets up to 3 weeks before the vegetable is to be used Use 0 5 percent rotenone after cabbage heads have set—and on chard and beet green for the last 3 weeks before the vegetables are used.

* * *

Grasshoppers are starting to hatch It's relatively easy, quick and cheap to control these insects now while they are young. Use poison bran bait (as mixed for cutworms). Spread the bait in the morning on a clear clam day. Scatter it in fence rows, at field and garden edges and in the garden — whenever hoppers are hatching. One to three poisonings may be needed—at 5-to 7-day intervals.

* * *

Potatoes insects, including Colorado potato beetles, flea beetles and leaf hoppers, are starting to work. Get out and spray or dust these spuds as soon as you see beetles. If you like to spray, use 2 tablesoons of lead arsenate or calcium arsenate and 4 tablespoons of dry bordeaux mixture per gallon of water.

* * *

Bean leaf beetles also are working in the southern half of Iowa. The 6-spotted adults chew circluar holes in the leaves and may completely destroy the bean planting. They also lay their eggs in the soil around the plant, and the larve feeding on the roots prevent good yields Control by dusting with 1 part lead arsenate to 9 to 10 parts of flour, hydrated lime or sulfer, or with 0 5 percent rotenone.

SUDAN GRASS EXCELLENT BLUEGRASS SUPPLEMENT

Planting sudan grass, which furnishes a relatively high amount of feed per acre, can help to stretch the farmer's acreage this year for other vitally needed war crops, suggests I J Johnson, Iowa State College agronomist.

Sudan grass, an excellent supplement for bluegrass pastures, makes its best growth during July and August when bluegrass pastures are likely to be dormant. To be ready for pasture by that time, sudan should be planted between May 20 and June 10. Normally, about 6 weeks are required from planting until it is ready for pasturing. Stock should not be turned on it until the crop is 12 to 18 inches high.

Seeding at the rate of 12 to 25 pounds an acre should be done on a well prepared, firmly compacted seedbed, Johnson says. Because seed supplies are somewhat lower than normal this year, farmers should get seed as much in advance of planting as possible.

The number of acres a farmer plants to provide pasture from sudan depends on the stock to be pastured. Normal carrying capacity of a good sudan grass pasture is two head cattle per acre, or the equivalent in young stock. An acre of sudan grass should carry from 10 to 15 sows with their pigs.

For safe-keeping stove pipes this summer, inside rust should be dissolved with a cleaning preparation and then removed with sandpaper or other fine scouring material. A good heat-resisting paint will prevent rusting, but all small holes and scratches in the pipes should be covered with asbestos furnace cement before paint is applied.

Hancock County Board Proceedings

4th. ADJOURNED APRIL MEETING

Garner, Iowa
May 15, 1944

The Hancock County, Iowa Board of Supervisors met in session on above date with John Chambers, F. J. Schoun and Penn Eckels, present.

The minutes of the last meeting were read and approved as read.

On motion and second Automobile Policy A.P. 584514H is approved.

On motion and second the Contractors Bond of the Empire Contractors Inc., of Omaha, Nebraska., is approved on the cleanout of Willie Helm et al on DD No. 31-36

On motion and second plans and specifications on farm to market roads are approved for the Crystal Lake to highway No. 69 and Woden to highway No. 18 farm to market projects are approved

On motion and second the Board adjourned to June 2, 1944, A.D at 9 o'clock A.M.

WEEKLY NEWS ANALYSIS

Nazi Rail Lines Hammered by Allies In Pre-Invasion Softening Process; Lend-Lease Grants Total 30 Billion; Stilwell Advances in Northern Burma

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Released by Western Newspaper Union.

Beachhead—There's more to establishing a beachhead than merely forcing a landing. At Aitape in Dutch New Guinea, Doughboys are shown bringing up supplies for continued operations.

EUROPE:
Nazi Preparations

As it was reported that the Germans were prepared to sacrifice 200,000 men along the "Atlantic Wall" to slow up the Allies' landing operations and allow the German high command opportunity to shift large reserves to the most critical battle areas, U. S. and British bombers continued their non-stop bombardment of enemy defense installations and communication lines to blast a forward path for the invasion forces.

As the zero hour approached, the Nazis sought to assure against Allied landings in Holland by preparing to flood the lowlands, part of which already have been inundated following the removal of the inhabitants.

Heavy U. S. and British aerial bombardments reportedly razed Nazi rail lines 100 miles inland from the channel coast, putting a severe crimp into the transport system over which the Nazis hoped to rush seasoned troops to encounter early Allied landings, possibly made in conjunction with a great Russian offensive in the east.

U. S. SEIZURE:
Congress Acts

Stirred by U S. troop seizure of the Chicago plant of Montgomery Ward and company after the latter's refusal to extend a CIO union contract upon order of the War Labor board, both the senate and the house moved to review the whole field of wartime executive authority.

Sen. Byrd
Rep. Dewey

In introducing a resolution for studying the Ward case which was quickly adopted, Sen. Harry Byrd (Va.) said: ". . . The measure . . . should lead to correction of legislation under which this (the Ward) seizure of a private business was made."

Previously, Rep. Charles Dewey (Ill.) called upon the house to authorize an investigation of the government's occupation of the Ward plant, a seizure nation's No. 2 mail order company contested in federal court on the ground it is no war industry, and an action the U. S. defended on the strength of its claim that the business sells productive machinery to farmers in advancement of the war effort.

MEAT:
Plenty on Hand

Reduction of government purchases of meat in the face of crowded warehouses and heavy hog receipts at markets resulted in OPA's removal of meat rationing except on beef steaks and roasts.

On April 1, warehouses held a near record of 1,246,813,000 pounds of meat compared with 780,806,000 pounds a year ago. Packing facilities were being stretched to the utmost as farmers continued heavy hog shipments, partly because of the tight feed supply recently aggravated by the government's embargo on all private corn sales in 125 midwest counties to divert stocks to industrial processors.

As a result of the government's program, virtually all wet corn millers were operating, with enough grain pledged for four months.

PACIFIC:
Stilwell Advances

Lieut. Gen. Joseph Stilwell's mixed U. S., Chinese and native Burmese troops pushed the Japs farther back in northern Burma in their drive to clear a new supply road to distressed China, while British and Indian forces continued to slow up the Japs' determined campaign to sever the Assam-Bengal rail line feeding General Stilwell's army.

In the South Pacific, U. S. troops strengthened their hold on the Hollandia area in Dutch New Guinea, while American bombers ranged up and down the island smashing at Jap bases supplying straggling enemy troops.

In addition to threatening General Stilwell's supply lines, the Jap drive in India reportedly was designed to establish India's Collaborationist Subhas Chandra Bose on native soil for an intensive propaganda drive to arouse the Hindus to revolt against the British.

LEND-LEASE:
30 Billion

Including special assistance given by other government agencies, lend-lease aid now approximates $30,362,687,362, the senate was told in considering extension of the act.

Broken down into loans, grants, investments, construction, purchases in foreign countries, current expenses and other aid and expenditures, the special assistance alone, chiefly extended by the army and navy, amounts to $8,500,000,000. Ordinary lend-lease assistance totals $21,794,237,819.

Of the $30,362,687,362 spent, Great Britain has received $19,700,297,674; Russia, $4,214,921,449; So. America, $2,327,378,789; China, $920,349,451.

SURPLUS MATERIAL:
Use Considered

With U. S. sales of surplus war goods already running between $12,000,000 and $15,000,000 monthly, the knotty problem of allowing production of civilian goods, with raw materials and scrap reverting to the government through termination of war contracts, has arisen.

Although some flatirons, alarm clocks, furniture, kitchenware, radio tubes, electric fans, stoves, kitchen ranges and bathtubs are scheduled for delivery in 1944, they are but a drop in the bucket compared with civilian requirements.

Despite the admitted surplus of many raw materials, the War Production board has opposed their appreciable use in civilian goods on the grounds that such manufacture would aggravate the manpower situation.

POLITICS:
Army Impartial

The ticklish problem of supplying U. S. soldiers with political information on the 1944 national elections was bravely approached by the war department, with emphasis firmly placed on impartiality.

Although doughboys will be permitted to read their favorite magazine or newspaper, the war department ruled that in radio broadcasts and service publications, equal time or space must be granted to both sides.

Motion pictures and entertainments also drew the attention of the war department, with no partial material to be tolerated in either source, and commanding officers to closely guard against the revision of scripts violating the regulation.

CHINA:
Japs Tighten Hold

With no less than 80,000 troops backed by large forces of reserves, the Japanese pressed their drive to clear the embattled Chinese from the Hankow-Peiping railway in northeastern China.

Japanese success would clear a considerable belt of the road for north-south traffic, strengthening the enemy's stranglehold on eastern China, which includes all of that stricken country's principal seaports.

Since overrunning eastern China, the Japs have worked hard to establish new industries in the occupied territories to capitalize on the country's material and manpower resources, and there have been reports that the Jap war machine has considered transfer of government and economic administrative offices to the Chinese mainland in the event of sustained U. S. bombardment of the home islands.

MEXICO:
Ends Snooze

As one means of saving tires by cutting down travel between business and home, and of conserving electricity by avoiding the necessity of working later at night, Pres. Manuel Avila Camacho ordered an end of Mexico's famed midday siesta for government and industry.

Beginning June 1, government offices will open at 8 a. m. and run throughout the day; stores will operate from 9 a. m. to 3 p. m., and factories will work from 6 a. m. to 2 p. m.

In putting an end to Mexico's midday snooze, President Camacho said that because of the time consumed in travelling, few people got in a real nap, anyway. Chief objection to the new order is expected to come from conductors and drivers, who receive a share of fares.

WHISKY:
No Prospects

Unless there is a sudden reduction in requirements for alcohol for synthetic rubber and other war needs, there is no immediate prospect for a resumption of whisky manufacture, War Production Chief Donald Nelson said.

Donald Nelson

"I'm opposed to the use of any facilities for production of civilian commodities if it is not feasible and might interfere with necessary war production," Nelson declared.

PROFITS:
Going Up

With some industries like petroleum showing a 46.8 per cent boost in net incomes, and others like the wholesale and retail group reporting a 16.5 per cent drop, profit of 259 leading big businesses for the first quarter of 1944 amounted to $274,032,000, 6 per cent higher than last year, but 19 per cent below 1941.

At the same time, an analysis of operations of 50 manufacturing companies for 1943 showed that costs helped to counterbalance income, and profit was held to 3.1 per cent per dollar of sales.

For instance, it was reported 1943 wages and salaries took 72.8 per cent of gross income, before taxes but after other costs, compared with 66 per cent in 1940. Taxes claimed 20.8 per cent against 15.8 in 1940.

AIR TRAVEL:
Monopoly Debated

Burning question in aviation circles today is whether various U. S. lines shall form a single company for international service or whether they shall compete for business as separate organizations.

Although only two of 19 U. S. lines favor a single company, there is strong pressure for such a setup on the grounds that its operation on a volume basis could allow it to compete against foreign air lines which undoubtedly will be financially supported by their governments.

In opposing the single company idea, no less than 17 U. S. lines feel that competition could be expected to result in improved service and promotion of air travel, without fettering free enterprise.

CASUALTIES:
Total 197,841

Latest figures put U. S. casualties in World War II at 197,841, with the army suffering 153,302 and the navy 44,539.

Of the army casualties, 26,575 were reported killed, 62,312 wounded, 33,814 missing and 30,601 prisoners. Navy losses included 18,992 killed, 11,899 wounded, 9,192 missing and 4,456 prisoners.

With 45,567 deaths already reported, the death toll already neared World War I's, when 53,000 men died in action or of wounds.

WOOL CHEAPER

To move a part of the large stockpile of wool on hand, the Commodity Credit corporation has decided to fix the price of domestic wool at a figure equal to or slightly below imported wool. At present, the imported article is 18 cents a pound cheaper than the domestic.

This procedure will mean a loss to the CCC but another federal agency, which owns the foreign wool ultimately will make a profit which will more than offset the loss on the domestic sale.

HIGHLIGHTS . . . *in the week's news*

POSTAL NOTES: A plan to provide "postal notes" for transmission of money by mail in sums under ten dollars for a flat five-cent fee is being considered by the senate postal committee. The house has already approved the proposal. These notes would not supplant the use of the regular money order for small sums but would be a convenient addition to the postal services.

DESIGNER: Paul Poiret, 64, once among the world's most famous fashion designers, died in Paris virtually a pauper.

RAYON HOSE: More thin rayon hosiery will be produced and less of the heavier grades, by permission of the War Production board. The industry has been complaining that women were not buying the better wearing heavier lines.

So. American Countries Extend Sanitation Pacts

Six of the other American republics have concluded new agreements with the United States for extension of the inter-American health and sanitation program. They are Brazil, Mexico, Colombia, Peru, the Dominican Republic and El Salvador. The agreements are the first to be made for extension of the program which grew out of the Rio de Janeiro Conference of American Foreign Ministers. Nineteen American republics, including the United States, are cooperating in this program.

The new agreements call for a total of $16,250,000 in joint funds to carry on health and sanitation projects in the six republics to the south Of this sum more than half is to be contributed by the other American republics and the balance by the United States, through the Institute of Inter-American Affairs, an agency of the Office of the Coordinator of Inter-American Affairs. The Brazilian agreement sets up a joint fund of $8,000,000 over the next five years largely for continuance of health and sanitation projects in the Amazon and Rio Doce valleys in support of economic developments under way there. Brazil is underwriting $5,000,000 in this fund and the United States the rest. The Brazilian agreement was the first for extension of the program. The arrangement with Mexico calls for equal contributions towards a $5,000,000 fund for health work to be carried on for the next five years. The cooperative work in Mexico, as projected, includes provision of additional health facilities along the route of the Inter-American highway, and participation in campaigns for prevention and control of tuberculosis and other diseases along the 1,800-mile United States-Mexican border.

Operator Has Three Choices in Seeding Stubble

If stubble is to be seeded to spring crop, the operator has three choices. He can stubble in the crop, burn and plow, or plow the stubble under Of the three methods, burning and plowing has resulted in the highest yields, except in very favorable seasons when plowing under stubble has given equally good results.

If the land is to be fallowed the operator may burn and cultivate, surface cultivate without burning, or plow under the straw and then cultivate. When stubble is heavy, as it is this spring, as much as possible should be left on the surface during the fallow season.

When crop residue is left on the surface it has two very desirable effects. Studies made by Canadian experiment stations indicate that one-half ton of straw per acre on the surface reduces soil drifting by as much as 86 per cent. The second benefit of crop residue on the surface is the reduction of water erosion and the conservation of moisture in the soil. Not only does the stubble mulch allow the water to go into the soil faster but it also reduces the rate of evaporation.

Keep Insecticides Out of Bathroom and Kitchen

Dusts and spray materials used in the control of insects and diseases in the garden should not be kept in the kitchen or in the bathroom.

Insecticides and fungicides should be kept tightly closed and be placed out of the children's reach. Store all of these materials in the same place and under lock and key, if possible.

It is particularly important to keep dusts tightly closed and away from any moisture. Rotenone and pyrethrum preparations keep better in darkness and in air-tight containers.

Since the more poisonous kinds of materials will have to be used more widely this year under war conditions, it is important that they not be left around the yard where children and pets may get into them.

Insecticides and fungicides are essential materials in the control of diseases and insects in the garden but they should carry a sign: "Handle With Care."

Pipe Line Speed

The oil in "Big Inch" pipe line moves at an average speed of 4.5 miles an hour and requires about 14 days to travel from Texas to New Jersey.

Weigh Ships' Parts To Gain Most Space

Every part, large or small, going into the construction of some naval ships is accurately weighed. Not all ships of the U. S. navy are weighed; but when a new type of ship is to be built in a new yard, weights are carefully checked. Small scales measure items that weigh only a matter of a few ounces and there's another dock scale that weighs up to 20 tons. Special crane scales are used on larger units, such as anchor chains and large plates.

The reason for keeping accurate weight of ships, particularly of naval ships, is due to the fact that the total weight of a ship, with all it contains, is exactly equal to the weight of the water displaced by it, and as ships are limited in draft, a very particular feature of all ship design is to control the weights in every way possible so as to have in the naval vessel more weight available for both offensive and defensive purposes, and in the case of a cargo vessel, more weight available for cargo.

Weighing is only the first step. When the entire job is done, the figures must be placed in a certain order and totaled—results will accurately indicate precise weight of each unit or individual compartment of the ship. After the U. S. navy has checked and rechecked the data, it is filed away for use against the day when the ship will have to be repaired or converted.

Carpathians Upheaved

The world was old when the Carpathian mountains of Europe were upheaved. Mammals were developing. Plants were rising to the highest orders. The age of man was yet to come. New mountains were the fashion. The violent convulsions that lifted the Carpathians also raised the Alps, the Pyrennees, and the Apennines.

Not so high as the Alps, the Carpathians have no peak that tops 10,000 feet; few that rise above 6,500 feet. Less showy than the Alps, as well as lower, they are short on sculptured summits, sizable snowfields or glaciers, mountain lakes, and high waterfalls.

Masses of weathered stone stand alone as lofty, bare-faced peaks in the West Beskids and Tatry ridges. Oak and beech grow up to 4,000-foot levels; spruce, fir, and pine thrive up to 6,000 feet. Long, wavy stretches of flowery highland pastures top steep, tree-clad slopes that bound narrow, terraced valleys. Loess, the wind-blown silt from many glacial grindings, coats the high valleys, gives farmers the bounty of a loamy top soil.

Early Anchors

Early anchors consisted of stones, baskets of stones, sacks of sand and hollow logs filled with sand. As ships grew in size, more effective anchors were required.

Early in the 1900s, the stockless anchor was invented and is commonly used today. The chain and shank of the modern anchor can be drawn into the hawse-pipe in the hull of the ship. This new type of anchor gives our ships the appearance of wearing a pair of bow ties.

Liberty ship anchors weigh 8,400 pounds and each ship is equipped with a pair. Attached to the port anchor is 135 fathoms, or 810 feet of heavy chain. The starboard anchor has 75 fathoms, or 450 feet of chain attached to it. The total weight of these two chains is 53,305 pounds.

Eyes Hop

In reading, the eyes of a person move forward in a series of hops, but every once in a while they turn back on the printed line. Eyes of poor readers generally make more regressive movements than eyes of good readers, but even the eyes of an expert reader make occasional back-hops.

Although there is great variation among individuals, eyes of children in early grades in school in reading a line of type move about 10 hops forward and three hops backward. In high school the forward hops are about six per line and the regressions reduced to one. In college the forward hops remain at about six but there is only about one backward hop every other line.

Gas Consumption

Eighteen thousand gallons of gasoline are consumed every hour for each mechanized division on the move.

stralians Much Like Folks Back Home, Americans Discover

icemen Mingle Aussies in Fun, ts and Worship

By ELLIOTT PINE

ed by Western Newspaper Union.

ut the time the Jamestown s were setting sail for Vir- a Spanish navigator was ing the strait bearing his that separates New Gui- om Australia. The sea n was Torres, and the year This was the beginning of e knowledge of the great known as Australia. In his strange land was "re- ered" by men stemming hose Jamestown colonists xpeditionary force of the army.

the war with Japan broke, ans knew little and probably ess about Australia. As one put it, "A vast bond of ig- e united Americans and Aus- s." But war has changed all Now many thousands of sol- rom "the States" have met ds of Australians, have eaten tables, drunk in their public danced and played in their orts" (USO to us), and wor- in their churches. The "Aus- urned out to be very much folks back home.

is not remarkable, after all, stralians are largely of Brit- ock—English, Scotch, Irish, with smaller numbers of oth- ples represented. They are lly tall, sturdy, independent —much like Americans of the n states, with much of the orthrightness and friendliness eristic of a people close to days. While most of the 0 Australians live in cities coasts, they are a rugged, sy folk. For instance, in rmy training camps there are provided for enlisted men— eep on the ground! "Roughing sort of fetish—partly making e of necessity, partly an in- ce from tougher days, when l depended on endurance.

Appear Old-Fashioned.

e Australian cities like Mel- , Sydney, Brisbane and Ade- are modern enough, smaller appear a bit old-fashioned to an eyes—the architecture be- to a generation or more ago. comforts as central heating and electric refrigerators are common as in the States. e the climate is mild, they ng without much heating, but mmers are warmer too, so the e of refrigeration is surpris- sidering that the Australians echanically minded and prac- eople. At all events, the fur- s and equipment of the homes retty crude to Americans. e Australian tells himself, and ly the nearest Yank, that can't be bothered with too comfort.

Aussies were amazed, and s a bit envious when they e army equipment that came e U. S. first contingent—all

If this is what erican army in the field takes what must the civilians at have, reflected the natives. farms "Down under" don't e up so well beside American rds either. Barns and other s have a patchy, ramshackle ance, in sorry contrast to the andsome appearance of ev- on many American farms. is explained, perhaps not vincingly, by the statement stralians have had only about long to conquer their country ve had here. Besides that, the soil and climate are harder to contend with than in most of the United States.

An Arid Country.

Most of the big island is desert and poor scrubby grazing land. Out of 3,000,000 square miles (almost exactly the size of continental United States), over a million miles is real desert—stone and sand and salt flat that is entirely out of the question for any purpose at present. Another million miles grows scanty vegetation sufficient to support the hardy sheep for which the nation is famous. The really good farm land comprises an area about the size of the three states of the Pacific coast, Oregon, Washington and California. Only one region in the south is tropical enough to grow bananas, pineapples and such exotic plants.

Early settlers found that their wheat dried out and died in the heavy reddish soil, but a new hard variety called "Federation" is resistant to drouth and rust, and is yielding well. The acreage of wheat

"Roughing it" seems to be a lark for these two American army nurses, who are stationed somewhere in Australia. Lieut. Frances Cox is getting a shampoo from a bucket of cold water, with the assistance of Lieut. Lily Fucci.

has been almost doubled by the invention of the "Stumpjump" plow, adapted to the rough bush country.

The manpower shortage is even more severe on Australian than American farms, since 913,000 men are in the armed forces, and drain on the male population equivalent to an American military mobilization of 17,000,000 (ours is actually about 11,000,000 now). Another 600,000 men are working in factories, as are many thousands of women. To make matters worse, Australian farms are not as highly mechanized as are American, so manpower does not go as far. For these reasons food is a bit scanty. Vegetables that require a lot of hand cultivation are scarce. Even potatoes are hard to get, and are largely requisitioned for troops. Oranges are another thing civilians rarely see. Jams and jellies are real luxuries, too.

Give Their Steaks to Yanks.

As part of the reciprocal lend-lease program, Australia is trying to provide food for American troops, and is doing a successful job at it, but the home folks have to pull in their belts a bit. In meat, for instance, civilians have had to reduce their consumption by two thirds. (They used to eat 124 pounds a year: U. S. consumption is 95 pounds.) Since Australia is a meat-exporting country in normal times, it can be inferred how much of a pinch the war is putting on the livestock industry. Added to their other difficulties was a "beef" from the Americans that they were getting too much mutton and not enough beef. So the Australian home folks had to forego their steaks almost entirely, and turn them over to the Yanks.

The equivalent of Victory gardens are "Austerity gardens" in Australia. These are not only small plots in vacant land, but window boxes and tubs. The need for small vegetables is real enough for many truck farms are not in production this year. Canned goods have disappeared from the markets. "Austerity" is the name for getting along without a lot of things, like spices, tea, malted milk, chocolate candy and so on. The gasoline allowance is four gallons a month. Cigarettes are limited to a pack a day (10 in a pack). Matches are very scarce. Laundry and dry cleaning services are available only once in two weeks. Traveling is restricted; horse-racing is closed down; liquor is scarce. Clothes have to be made over, repaired, and made to last. With the war right at their back doors, the Australians are taking these privations in stride without much complaint. They're a tough breed, after all.

On the social side, the Americans and Australians get along pretty well, considering the self-esteem and pugnacity on both sides. After the Yanks and Aussies had fought together a few times, the bond of battles shared united the comrades in arms. Americans were instructed beforehand in getting along and behaving nicely, and it appears that most of them are doing so. The Australians, who are grateful for the timely succor, are acting as hosts and allies should.

There is of course some grumbling among the Aussies about the Yanks snatching away their girls. The famous American "line" goes over pretty well too, and the certain awe that most foreigners feel toward Americans helps to make an impression. Then the higher pay scale of the U. S army gives our men more spending money, and they probably show the girls a better time than the native boys do. Australian girls say that Americans treat them as equals and are more courteous than their own men folks who are following traditional behavior that is "out of date" in America.

In New Zealand, where the situation parallels that in Australia pretty closely, a member of the parliament introduced a resolution asking the U. S. army to reduce the pay of our soldiers, because the local chappies were being put to shame when it came to free spending. Nothing came of it, but it shows how some of them feel.

Love Comes to U. S. Soldiers.

Many Americans have found romance in the big island. Only lately 900 Australian women, brides and finances of American soldiers, landed in San Francisco, and began to adjust themselves to their new home land. Many other brides are staying over there until the war ends. Some soldiers plan to remain in Australia. Prime Minister Curtin recently stated that he wished that as many as 200,000 Americans would settle in his country. It is not reported how the average Australian fellow feels about this proposition. Until lately Australia, like all frontier countries, had a large preponderance of males. How kindly the Aussies take to additional competition for their women and their jobs is not revealed.

Australian girls are rather bigger than American girls, our soldiers say. They are athletic and healthy and interested in sports such as swimming and tennis. Their endurance on the dance floor is a marvel to husky Americans, who are often hard put to keep up. They want to learn the latest American steps. They enjoy American slang.

On the other hand, there is considerable British conservatism in social life throughout Australia. Many forms of amusements are closed on Sunday. The churches exert more influence there than many American communities. Only a few months ago, for instance, clergymen of all denominations were protesting against hasty marriages between Americans and Australian girls. The remonstrance carried considerable weight.

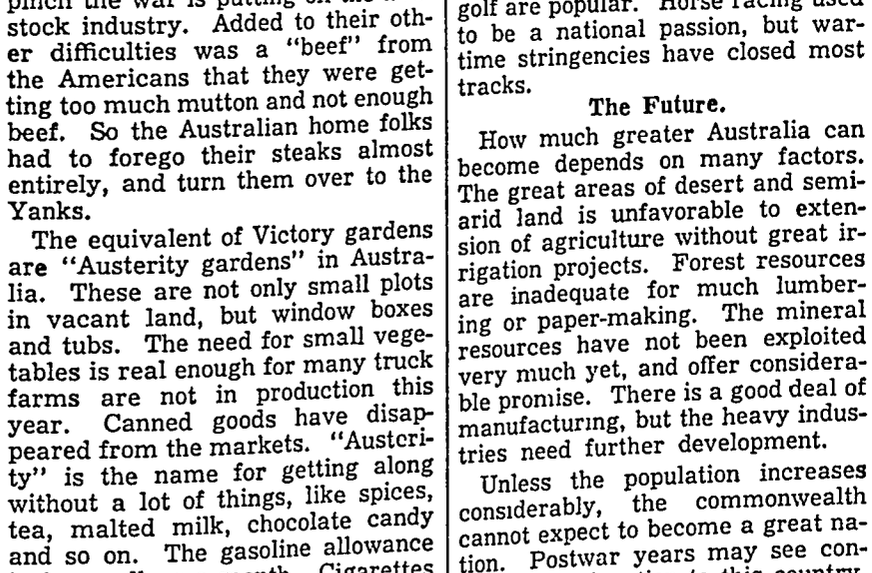
While Australians play our brand of baseball, they do so only to keep in condition for football in the off-season. And football to them is a special game of their own, unlike American football or English rugby. It is a fast game with much kicking, leaping and running. Eighteen men play on each side.

Cricket is the national game as in other British countries. Americans found it is not as slow as they had been led to believe. Tennis and golf are popular. Horse racing used to be a national passion, but wartime stringencies have closed most tracks.

The Future.

How much greater Australia can become depends on many factors. The great areas of desert and semi-arid land is unfavorable to extension of agriculture without great irrigation projects. Forest resources are inadequate for much lumbering or paper-making. The mineral resources have not been exploited very much yet, and offer considerable promise. There is a good deal of manufacturing, but the heavy industries need further development.

Unless the population increases considerably, the commonwealth cannot expect to become a great nation. Postwar years may see considerable migration to this country, still a frontier land with real opportunities. Perhaps many Europeans will try their luck there. Enough American soldiers may decide to settle there to set the pace, and to attract other Americans in years to come. On the other hand, Australia may not be much more interesting to most people after the war than it was before.



ight be expected, many n servicemen found their desire in Australia. One sol- as married two weeks after ded—to a girl he met on the

PAUL ENCOURAGES THE CORINTHIANS

LESSON TEXT—II Corinthians 4:5, 16-18; 5:1, 5-8, 14-19.

GOLDEN TEXT—Ye know the grace of our Lord Jesus Christ, that, though he was rich, yet for your sakes he became poor, that ye through his poverty might become rich.—II Corinthians 8:9.

"Nothing is certain but uncertainty," so says the modern philosopher. But man cannot be satisfied with constant change and confusion. That is why, in our day of unheard-of disruption of ordinary life patterns, men and women especially need the message of the gospel, for in Christ we find the answer to our quest for certainty and stability.

Paul writing to encourage the church at Corinth assured them that life may be steady, useful and true because they are Christians. He presents:

The Christian—a Servant of Men for Christ's Sake (II Cor. 4:5), **Having—**

I. A Vision Which Lightens Affliction (II Cor. 4:16-18).

Any honest person knows that in the temporal world round about him everything speaks of death. All things tend to run down, to wear out, to decay, including the body of man. He sees his mental as well as his physical powers coming to a certain maturity only to go into decline.

At the same time he is conscious of the deep burden of affliction and sorrow which seems to press down on all the world like an almost unbearable and crushing weight. What can he do about it? Shall he try to dissipate the clouds by artificial cheerfulness? It will not work.

Our text gives us the answer. "For this cause we faint not," says Paul. The things which press us down are only temporal—they are of this world. God's world is eternal. The weakness of the physical body only makes the strength of the spiritual life more evident. The affliction which seems so heavy is only a "light affliction" when one remembers the "eternal weight of glory."

Is this just a bit of "escapism"? Is it only some wishful thinking? No, indeed. Have not men learned anew in the war that the only possessions you can keep are those which cannot be bombed to pieces or stolen?

Obviously, that is true in the highest degree of the one who knows Christ, and whose riches are those of eternity. How triumphantly he can meet decay and sorrow! He is of the other world, and nothing here can be more than a light affliction, which seems negligible in the light of the glory of eternal things. Ah, but it's great to be a Christian in such days as these!

II. An Assurance Which Removes Fear (II Cor. 5:1, 5-8).

Of all the fears which afflict mortal man the greatest and the ultimate one is the fear of death. He knows that it is so absolute and final that it terminates everything and separates him from all that he has known and held dear in this world.

That is just the point, death does end everything (except the awful fear of judgment for a wasted wicked life!) for those who live only for this world. Man, however, was never intended for just this present life. He is a being who has eternity written in his very personality.

What if this "earthly tabernacle"—my body—does give up, says Paul. I have a "building of God," something which man did not make with his hands, an eternal home in glory.

That gives a man confidence. While he is here in the body, he lives and walks by faith, but when absent from this body, he is "present with the Lord." How altogether delightful and marvelous is the future, even beyond the grave, for the believer. Hence, we "sorrow not as others which have no hope" (read I Thess. 4:13-18).

III. A Hope Which Makes Him a Living Testimony (II Cor. 5:14-19).

Worldly people sometimes wonder what tremendous and tireless motive power keeps Christians working for the Lord in the face of impossible difficulties. We have that motive named in verse 14—"the love of Christ constraineth us."

There is no compulsion about real Christian testimony and service. There is no feeling that one must do this or that in order to please God. No, the compelling force here is the love of a dying Saviour. It is the supremely powerful and all persuasive influence of love.

Christ died for all, and those who realize that, know that they cannot "henceforth live unto themselves" (v. 15). The social standing, or family connections of our fellow men, no longer control. Christ died for them and we must bring them the word of life.

Notice in verse 17 that it is the born-again-one who has this hope. Many church members whose lives are powerless and sinful are so because they have never been born again. "Except a man be born again" (John 3:3) he is not a Christian. That is the place to begin. Take Christ by faith.

PATTERNS SEWING CIRCLE

Double Duty

A SUN-AND-AIR beauty which is top-notch in comfort for sportswear and a flattering street costume when the short and snappy little bolero is donned! Make it of pastel piques, smart ginghams, or seersuckers.

* * *

Pattern No. 8643 is in sizes 11, 12, 13 14, 15, 16 and 18. Size 12, dress, requires 3⅜ yards of 39-inch material; bolero, 1¼ yards; 4 yards ric rac trim.

Mother, Daughter Vogue

THE "mother - and - daughter" vogue of identical clothes is increasing—small wonder, too, when they both adore the same sort of pinafore play dress! Use polka dotted chambrays, flowered muslin, candy-striped cotton or gingham for this engaging fashion.

* * *

Pattern No. 8615C is in sizes 2, 3, 4, 5 and 6 years Size 3 requires 2 yards of 35-inch material, 8 yards ric rac for trim.

Pattern No 8615 is in sizes 11, 13, 15, 17 and 19. Size 13 requires 3⅜ yards of 39-inch material, 11 yards ric rac for trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Household Hints

For a light at night in the sickroom, place an electric light under the bed. The patient will be in darkness, but the light will be on the floor, where it is needed.

* * *

Garments with elastic waistbands should not be pinned to the clothesline by the waistband. Instead, drape over the line or pin at some other point.

* * *

Keep the clothesline props in place by driving a large staple in the end of the pole and threading the wire through the staple. They can be moved along the line as desired and hard winds cannot lift the line from the props.

* * *

It is easier to peel old, wrinkled potatoes if you soak them half an hour in cold water to cover. This restores some of the moisture.

Justrite Drawing Ink is obtainable at leading school and office supply dealers throughout the state of Iowa.

Klemme Farmers Purchase Purebred Bulls

Virgil A. Cook and Ben Katter, Klemme farmers, each recently acquired a registered Holstein-Friesian bull from the herds of Melvin Scholl, Rockell and J. Leonard Helgevold, Clarion, respectively.

The change of ownership of these animals was reported by the Holstein-Friesian Association of America. The Association issued 7,718 registry and transfer certificates to Iowa breeders during 1943.

NO RED CROSS TUESDAY

The Klemme Red Cross ladies will not meet next Tuesday on account of it being Memorial Day.

GIRL SCOUT NEWS

The Klemme Girl Scouts held their 14th regular meeting at Mrs. Sumner Trumbel's house. The Forget-me-not Patrol led the White Rose Patrol on a hike which ended in Mrs Trumbel's back yard where they ate their lunch. They roasted wieners and marshmellows over an open fireplace After the lunch they played "yes and no" led by Marjorie Lau and Irene Menage. They made plans for their next meeting.

DONALD TURGANSEN WINS ADVANCEMENT

15th Army Air Force— Donald O. Turgasen, 34, of Klemme, Iowa, has been promoted to the grade of Master Sergeant.

M|Sgt. Turgasen is in charge of a squardron communications section in an AAF P-47 Thunderbolt fighter group stationed in Italy. This particular group recently flew its 200th combat mission over the enemy territory and has 265 enemy planes to its credit. It also has the outstanding record of having safely escorted more than 3200 medium and heavy bombers in every major aerial operation of the Mediterranean theatre. On January 30, 1944, the group scored the greatest single fighter plane victory of the Italian campaign when 37 enemy planes were destroyed on a fighter sweep north of the Gulf of Venice.

M|Sgt. Turgasen entered the Army Air Farces at Ft. Des Moines, Iowa, on June 5, 1941, and attended the Army Signal School at Fort Monmouth, N. J. He has been on active overseas duty for fifteen months.

HERE'S A LETTER FROM A KLEMME BOY

May 14, 1944

Dear Jergie,

Received the "Times" yesterday and was sure glad to have all the news from the home town.

I read "Bodge's" letter in the "Times"; he must be having quite a time across. He's right about Jake A good kid and a darn good athletic. He made good at college, not to say anything about high school.

Camp Roberts is a nice place (not to be at) but, I can be thankful to say that I lucky enough to be transferred to radio. It's a good set up, requiring a lot of night school, besides our regular basic. Our meals are swell and we have some swell officers so, all in all, the army isn't bad.

Hope everything in Klemme is under control. Chow time so I'll close. Keep the "Times" rolling this way.

Sincerely
(Cal) or 'Bill' to you!

"Bill's" address is:
Pvt. Calvin Grosshuesch, 37695066
3Plat. Co. B, 87 Inf. Tng. Bn.,
Camp Roberts, California.

PFC CLARENCE KLUCKHOHN MOVES TO NEW CAMP

Pfc Clarence Kluckhohn, son of Mr and Mrs C. E. Kluckhohn of Klemme, who has been stationed at Fort Bliss, Texas, has been transferred to Camp Carson, Colorado.

Pfc. Kluckhohn's address is now:
Pfc Clarence G. Kluckhohn
37675081
Hqs. Batry 525th A.A.A. A.W. Bn (SP)
Camp Carson, Colorado.

PVT. WINTON ETCHEN HAS NEW ADDRESS

The Times has been notified of Pvt Winton Etchen's change of address. He is a son of Mr. and Mrs. Albert Etchen. His new address is:
Pvt Winton Etchen, 3768262
Co. A, 803 Sig. Trng. Reg.,
Fort Monmouth, New Jersey

HEAVY RAINS, WINDS, DAMAGE CROPS IN IOWA

Heavy rains, accompanied by winds and tornadoes in some sections of Iowa last Thursday and Friday, caused an estimated damage of over three million dollars to property and crops in the state.

In this part of the state the heavy rains damaged crops by flooding fields and washing out grain and corn. Many basements were full of water after the down-pour.

The heavy rains also delayed the farmers again in getting in their crops. There is still a lot of corn to plant and some plowing is still to be done. Iowa farmers are about a month behind schedule because of the unusual weather this spring.

Dwarf Essex is the most satisfactory variety of rape for Iowa.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

F. E. Beshey of Garner was a business caller in Klemme Tuesday.

QUARANTINES!

The R. G Valentine family of Rockwell City belives it has had its share of contagious diseases this past spring Three quarantine signs have been placed on the door of their house during the past five weeks First, Carole Valentine caught the chicken pox bug A few days later her brother, Marion, also suffered a siege of chicken pox Next came measles Before the quarantine signs were removed, the scarlet fever bug caught up with Kathryne Vought, a resident at the Valentine home

SIXTH TIME

Ray Clause, as president of the Grand Junction school board, has been presenting high school diplomas to his own children for a number of years The first time was in 1935, when he presented a diploma to his daughter, Marietta This year, he presented a diploma to his son, Roger Roger was the sixth child of Mr. Clause to receive a high school diploma from his father.

TWICE IN THE SAME PLACE

May. 15 is not a lucky day for the John Allen family of near Winterset. A year ago on May 15, a bolt of lightning struck the barn and destroyed the building and contents. May 15, 1944, within one and one-half hours of the same time a year ago, another bolt f lightning struck the barn that had been erected in the place of the one destroyed. The new barn was also destroyed.

THANK YOU!

I wish to thank all who sent me cards, letters and flowers, and who called on me while I was in the Hospital.—Forrest Cutshall. 1tp

FAREWELL PARTY HELD FOR ESBECKS

A number of friends and neighbors held a farewell surprise party for Leo Esbeck and family at their home Friday evening.

Bridge was played and Mrs. Esbeck won the high score for ladies and C. G Waterman took highest score for men.

Lunch was served and Mr. and Mrs. Esbeck were presented with a nice gift.

SHRAPNEL BROKE HIS KODAK AT ONZIO BEACHHEAD

PVT. OTHO KERAUS

OTHO KERAUS TRANSFERRED TO ARMY AIR FORCES

Otho Keraus, son of Mr. and Mrs W. C. Keraus of Klemme, recently rounded out three years of service with the U. S Army. During that time Otho advanced from Private up to Staff Sergeant.

Sgt. Keraus has a long record of hard fighting behind him now. From North Ireland he went with the army in Africa and went all through that campaign and seemed to be always where the fighting was the heaviest. Then he went up through Tunisia, Sicily and on into Italy.

"Oats" was in the thick of it around Cassino and later went over to the Anzio beach-head to help the boys along.

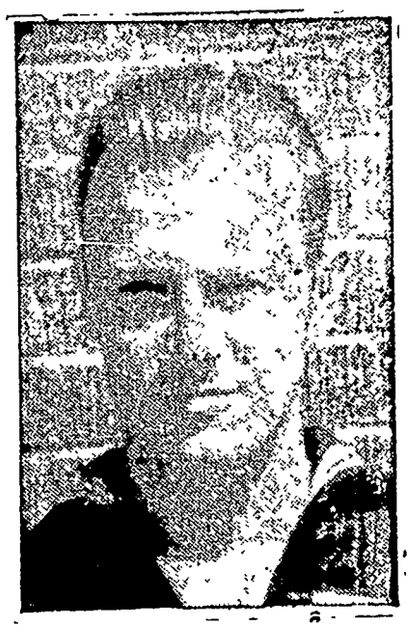
About the first part of May Sgt. Keraus was transferred to the Army Air Forces and in so doing "busted" back to Private. However, Otho says it was a great change, almost like being back home, as he is away from the noise of battle and can really take it a bit more easy now.

"Oats" is also fortunate in being with the same fighter squadron that his cousin Sgt "Dutch" Turgasen is hooked up with, and the boys get to see each other occasionally now.

Just before Keraus left the beach-head some shrapnel came over his way and broke his camera to smithereens, and he is be-moaning the fact that he cannot take pictures now. At the time he was only a half-mile from the German lines and steel was flying around rather recklessly.

"Oats" is now working in the Ordnace Department of the Air Forces. He says it really agrees with him and that he is putting on some weight.

ON AIRCRAFT CARRIERS



EVERETT EVENSON
(Picture Courtesy of Mason City Globe-Gazette)

The above is a picture of Everett Evenson, son of Mr. and Mrs. O. C. Evenson of Goodell. Seaman Evenson is a graduate of Goodell high school and attended State Teachers College and Waldorf College. He enlisted on Oct. 12, 1940 and took his boot training at the Great Lakes Naval Training Station and then was stationed on the Lexington aircraft carrier. A few months before this boat sank he was transferred to the Saratoga. On this famous ship Evenson took part in four major battles, and his good ship was twice struck by torpedoes. At one time the crew were never near land for 78 days and the men had to exist on beans and rice when food supplies ran low. While the ship was dry-docked for repairs the crew was stationed on the Fiji Islands and New Caledonia and for 21 months were out of the States. Everett came back with his squadron last September for a well deserved rest and he was stationed at Lambert Field, St. Louis. He is now going to School at Willow Run, Mich., and then will join a squadron in the P. B. Y.'s at some place not yet disclosed. Everett's rating is now Aviation Machinist Mates Second Class.

NO SERVICES AT REFORMED CHURCH NEXT SUNDAY

There will be no services at the Klemme Evangelical and Reformed Church next Sunday as Rev. Grosshuesch will preach at Newton, Iowa that day.

LOTS OF PELTS

Joseph Colland and Clarence Wichman, of Jackson Junction near New Hampton, have found a large number of fox cubs this spring. The two men dug 100 foxes from their dens The largest number found in any den was nine. Seventy of the foxes were sold to a fox farm and the remainder turned in for bounty.

WACS AS BETTER WIVES

"WACs will make better wives than women without military training," declares Lieut. Col. Walter Jaeger of the Army Industrial college. "A former member of the WACs in a household will be an invaluable asset."

—*—

"Oh yeah!" was the reaction of Private Oscar Purkey today. "It all depends on the WAC. Personally I would not marry no girl for her military experience!

—*—

"Now if she is just a private maybe it would not be so bad, although I think it does no good to a marriage to have the wife used to military routine, to driving trucks maybe and to sleeping four or six to a room. And if she is a officer, no dice!

—*—

"Once a girl has got used to being saluted it is a bad business. She will think she always rates it. Also a wife who has been a officer, even if just a corporal will be used to giving orders that she will never want to just give hints when she wants something. If there are any words which does not fit in the language of love they is 'Attention!' 'On the double!' and 'Forward march!'

—*—

"And how is a G.I. gonna get a wife all excited over what he done in the war if she was in it too? She could even have more citations than he ever got! A husband should be a hero to his wife and it won't be easy if she also has decorations.

—*—

"Yeah, there may be some advantages. I guess a wife from the WACs would be handy around the house. She could change the tire, fix the carburetor, find out what blew out the fuse and everything like that. And she would be satisfied with just a couple of hats a year.

—*—

"But I would not marry no WAC, as swell as they are. They are great gals. But they will of got the army spirit and met a lot of other WACs and all their lives they will be packing and rushing off to Chicago, Boston and San Francisco for annual conventions and reunions.

—*—

"And another thing. If a man marries a WAC who gets up and investigates noises at night?"

—*—

All-Out Arlene, the WAC of WACs, had something to say. "I don't know whether I'll make a better wife," she said, "but I will need a better husband. The army has shattered a lot of illusions about men. They no longer wow me as superior creatures.

—*—

"War has made us girls self reliant, independent, tough and practical. We will never be awed again by a man just because he is good looking, has a deep voice and is rather sweet. But I don't think I'd marry a military man anyhow. Who wants to sit up all night comparing battle experiences?"

* * *

Belated Confession to a Criminal Past

We see where some men have landed in court for selling some little pills on the claim that, dropped into a gas tank, they will increase mileage. Well, we don't know anything about this particular case, but the arrest makes us tremble a little. For back in our boyhood days we were a party to a similar project.

—*—

With old Bob Hyman, who used to be cashier on the New Haven Register, we became New England agents for a gasoline energizer. Mr. Hyman shared our burning yen to get into business. We read about a pill that would give more pep to gasoline. Gas then cost only around 12 cents a gallon, but is was thought pretty costly.

—*—

We acquired the agency by the simple process of putting up a few dollars and providing an address to which the pellets could be shipped. We received several crates of them. Several natives tried them free and announced that they not only increased mileage but gave a car wings. However, nobody seemed inclined to try them out on a cash basis. The pills must be in Bob Hyman's cellar even now.

* * *

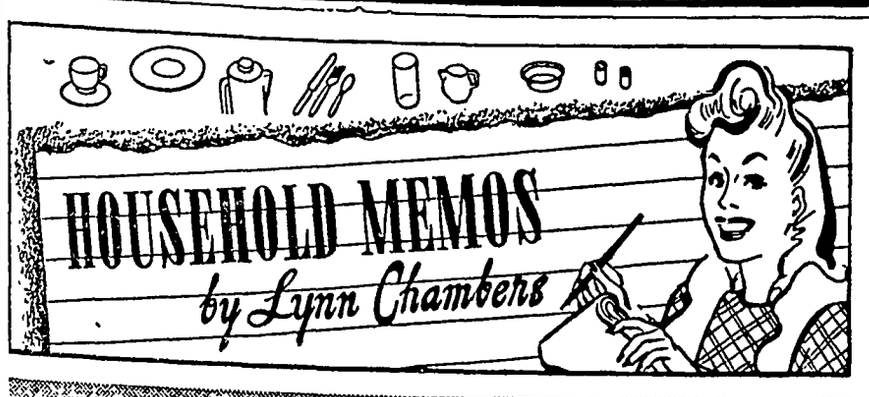
The Nazis claim they have a new secret weapon which can freeze people to death at 500 yards. Something that has as its basic element Hitler's bloodstream, we understand.

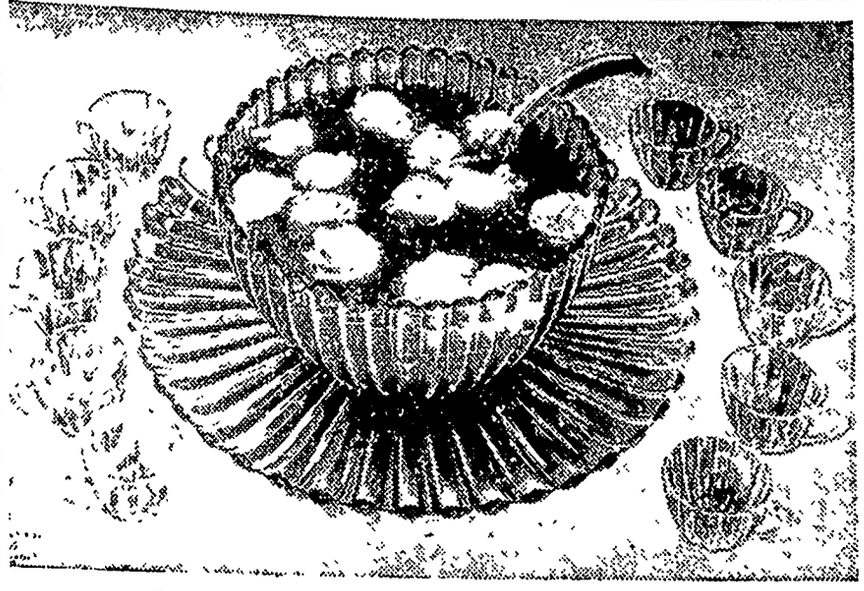
* * *

With all but the choicer cuts of beef point-free there is some chance of a hamburger becoming almost as good as a hamburger.

* * *

A druggist who has served seven years in prison has been found innocent and released. The courts have cleared him, but the man, now 54, must feel something less than satisfied. We would hate to be a druggist in a similar position and recognize the judge or prosecutor asking: "Have you something that will put me to sleep?"





Invite the Children to Cranberry Punch!
(See Recipe Below.)

Children's Parties

Do the children want to give a party? Now that schools are letting out and the youngsters find themselves with time on their hands, a celebration of their own may be just the thing to fill in their odd moments.

Even if the children are younger, they can get a lot of satisfaction maneuvering their own party. Let them do it for it helps them develop imagination, encourages thinking for themselves and teaches them sociability while they are still young.

Make it as easy as possible for them; in other words, keep them free of worries about table cloth, plates and napkins. Furnish paper ones if the occasion warrants. Older children, of course, can take care of even the better dishes.

Mother can take care of the main food and supervise the serving if necessary. Sandwiches, cooling drinks, appetite-tempting dessert are popular with the younger set.

Save Used Fats!

Hot Ham Sandwiches.
(Serves 6)

12 slices brown bread
6 slices ham
1 egg
3 tablespoons melted butter
⅔ cup milk
Prepared mustard
6 slices American or Swiss cheese
¼ teaspoon salt
⅛ teaspoon pepper

Spread thin slices of the bread with ham, then with a layer of mustard. Cover with slice of cheese. Top with another slice of bread. Beat egg, add salt, pepper and milk. Dip sandwiches quickly in this mixture, then fry in butter until delicately browned.

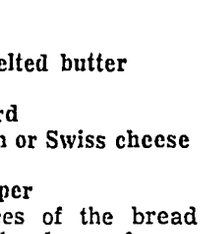
Save Used Fats!

An easily prepared casserole like this one will take care of the heartiest appetites:

***Sausages and Spaghetti.**
(Serves 6)

8 link sausages
1 small onion, sliced
1 green pepper, chopped
¼ teaspoon pepper
2 tablespoons flour
2½ cups tomatoes
1½ cups spaghetti, cooked

Cut sausages into 1-inch lengths; fry until golden brown. Add onion and green pepper; brown lightly. Add seasonings and flour; blend. Add tomatoes and spaghetti. Bake in a greased baking dish in a moderate (350-degree) oven 30 minutes.



Toastwiches.
(Serves 4)

½ pound ground beef
½ cup milk
1 tablespoon minced onion
⅛ teaspoon pepper
½ teaspoon salt
4 slices bread

Toast slices of bread on one side. Mix meat with milk, onion, salt and pepper. Spread on bread. Dot with fat and broil about 7 minutes.

Molded salads make the table pretty and are a big hit with youngsters:

Lynn Says

Spring Tonic: Cool foods should be served cool. Chill plates for salad and other cool foods before dishing them out. In making salads, chill not only the bowl or plates, but all ingredients and utensils required in the assembling of the salad.

The three "C's" in salad making are that ingredients should be clean, cool and crisp.

When buying lettuce, make sure it's crisp, tender and free from decay.

In tossed salads, mix ingredients so that each is coated with dressing before serving. In salting the salad, salt each layer of vegetables so that you get an even distribution of seasoning.

Lynn Chambers' Point-Saving Menus

*Sausages and Spaghetti
Bread and Butter Sandwiches
*Cream Cole Slaw
*Fresh Cherry Cobbler
*Cranberry Punch
*Recipes Given

Grapefruit-Carrot Mold.
(Serves 8 to 12)

2 to 3 grapefruits
2 tablespoons plain gelatin
½ cup cold water
2½ cups boiling water and grapefruit juice
½ cup honey
¼ teaspoon salt
¼ cup lemon juice
1 cup grated raw carrot

Pare grapefruit, removing outer membrane. Slip out sections saving juice; add water to make 2½ cups. Heat to boiling point. Soak gelatin in cold water 5 minutes. Dissolve in hot juice and water. Add remainder of ingredients. Cool. When mixture begins to stiffen add grapefruit sections and grated carrot. Chill until firm. Unmold on lettuce.

Save Used Fats!

***Cream Cole Slaw.**
(Serves 6)

½ medium-sized head of cabbage
½ cup sour cream
2 tablespoons vinegar
½ teaspoon salt
⅛ teaspoon pepper
2 tablespoons sugar

Wash cabbage thoroughly. Drain. Shred fine. Combine remaining ingredients; pour over cabbage. Sprinkle with paprika.

Now, for desserts. A fresh cherry cobbler is good, or the hot fudge pudding is appetizing and economical:

***Fresh Cherry Cobbler.**
(Serves 6)

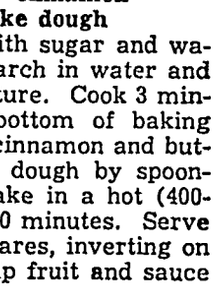
3 cups pitted cherries
1 cup sugar
1 tablespoon cornstarch in 2 tablespoons cold water
½ tablespoon butter
½ teaspoon cinnamon
Rich shortcake dough

Heat cherries with sugar and water. Blend cornstarch in water and add to cherry mixture. Cook 3 minutes. Place on bottom of baking dish and dot with cinnamon and butter. Drop biscuit dough by spoonfuls on top and bake in a hot (400-degree) oven for 30 minutes. Serve hot, cutting in squares, inverting on dessert plates. Dip fruit and sauce on top.

Hot Fudge Pudding.
(Serves 6)

1 cup sifted flour
2 teaspoons baking powder
¼ teaspoon salt
¾ cup sugar
2 tablespoons cocoa
½ cup milk
2 tablespoons shortening, melted
1 cup chopped nuts
1 cup brown sugar
4 tablespoons cocoa

Sift dry ingredients together, stir in milk and shortening, and mix until smooth. Add nuts. Spread in pan. Sprinkle with brown sugar and cocoa, mixed. Pour over this 1¾ cups hot water. Bake in a moderate (350-degree) oven 40 to 45 minutes. Invert squares on plates, dip sauce from pan over each.



Save Used Fats!

***Cranberry Punch A La Mode.**
(Serves 20)

2 quarts cranberry juice
1 cup light corn syrup
¾ cup sugar
1 quart apple juice
1½ cups orange juice
¼ cup lemon juice
2 cups ice water
2 quarts vanilla ice cream

Heat cranberry juice, stir in corn syrup and sugar. Chill thoroughly. Add chilled apple juice, orange and lemon juice and ice water. Pour into punch bowl and drop scoops of vanilla into punch.

Cakes Keep Tragic Story Of Siamese Twins Alive

Cakes distributed to everybody in Biddenden, Kent, England, at Easter in memory of two sisters, Elizabeth and Mary Chalkhurst, have for the last 800 years kept alive an old and tragic story.

Joined together at the hips, the sisters lived a happy life for 35 years, greatly devoted to one another. Then one fell ill and died.

Her sister refused all entreaties to have the connecting flesh severed, and she herself died six hours after her sister's death.

The Biddenden cakes, bearing an image of the sisters, remind the inhabitants of the little village of the tragic devotion of these early "Siamese twins."

Poet, Novelist Differ in Choice of Beautiful Words

A well-known British novelist and a representative American poet have recorded their choices of the ten most beautiful words in the English language.

The British selection was:

Carnation, Azure, Peril, Moon, Forlorn, Heart, Silence, Shadow, April, and Apricot.

The American chose:

Dawn, Hush, Lullaby, Murmuring, Tranquil, Mist, Luminous, Chimes, Golden and Melody.

HEARTBURN
Relieved in 5 minutes or double money back
When excess stomach acid causes painful, suffocating gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief—medicines like those in Bell-ans Tablets. No laxative. Bell-ans brings comfort in a jiffy or double your money back on return of bottle to us. 25c at all druggists.

FALSE TEETH AND GRAND SMILE!
LAUGH, EAT, TALK, FREE OF EMBARRASSMENT
It's so easy to enjoy all-day confidence when your plates are held in place by this "comfort cushion," a dentist's formula.

Ink Spots And Spatters

By Jergie

AND IT WASN'T FRIDAY THE THIRTEENTH!

Thursday was a bad day around the Editorial Manse. Nothing seemed to go right but the climax came about noon while the "Missus" was up to her neck in cleaning the house. She was washing the walls in the living room and was perched on a stepladder. Somehow or other she missed a step descending and in the fall landed against a window (and of course the biggest window in the house) and broke out the glass as well as cutting her arm slightly in a few places and upsetting her dignity as well.

The Editor spend the noon hour reminding her how awkward some people are, and how it would have been cheaper to have hired the work done, etc, etc., all of which didn't help humor the better half too much. But instead of throwing us out, she just took the kidding and let us rave on.

The window was sent up to Jacobs for repair and in due time the job was done. The writer then went up and paid for the window and walked on toward the Editorial Manse, gingerly carrying the window so it would not drop. Everything was running smoothly, but just as we reached the step of the house, a gust of wind caught the window and WHAM! No window! It crashed against the sidewalk and broke into 2,998,634 pieces, more or less. The writer broke out into a cold sweat and considerable profanity and we felt so low we could have crawled under the belly of a snake and not touch anything!

Considerable merry ha, ha, and haw, haw, filtered out from the house. More nasty remarks were heaped on us, when we again took the window to Jacobs for the second repair job. Our razzing the missus sure did back-fire that time, so we resolved to henceforth let the women alone during housecleaning time. It don't pay.

NEARLY A ROIT AT THE DRUG STORE

Our scouts dug up this one the other day. Pete Wilson, Klemme druggist decided to go in for some Victory gardening this year and so last week dug up a nice patch of ground back of the store. Pete had it as smooth as a billard table and was real proud of the job Having finished the work of spading he went into the drug store to guzzle a root-beer and wait on a couple of customers.

About that time Pete's wife looked out the back window, saw the marvelous handiwork and decided to plant a few flowers and bulbs in Pete's garden. (All unbeknown to Pete.)

Later: Pete gathered up a few vegetable seeds and went back to his garden, looked it over and thought somebody's chickens had messed things up. He raked around thought he found some weed roots, dug them all up and tossed them out in the alley. (Pete never suspected the "weed roots" were flower bulbs.) He got everything in ship-shape again and then planted his garden seeds, and rambled back into the store.

About that time Mrs. Wilson went out to look at the garden and saw the bulbs thrown around in the alley. Boy, was she burned up! Pete and the missus were not on speaking terms from that moment on, but we have been informed that they finally saw the joke and have made up.

REAL INDUSTRY DISPLAYED BY BROWN THRUSHES

A couple of weeks ago a pair of Brown Thrush did considerable inspecting of a honey-suckle bush growing near the window of our breakfast room.

For two days the pair of birds hopped from one branch to the other and went from top to bottom of the bush, evidently making survey for a proposed nest.

Finally the location was settled and one Wednesday morning the two birds began to build. From early morning until late evening they labored, trying their best to place a couple of sticks cross-wise between a couple of small limbs. When night came they had only been able to make three sticks stay in place, but it was the foundation for their home.

The second day of building went along smooth and stick after stick was piled on the foundation and by night the nest seemed to be about complete. However, the third day was spent in putting on the finishing touches and finding bits of paper, cloth, fine grass and other items for the lining inside.

A few more days passed without much activity, but now the mother bird is setting on her eggs, while her "old man" is out chasing around but comes and relieves her at the nest occasionally while she goes out to seek food Soon there will be a family of Brown Thurshes to watch.

But the birds gave us a real lesson in perseverance. They made thousands of trips up and down that first day with the three or four sticks, as they kept falling down to the ground and the birds were busy carrying them up again, until finally the birds won out and the sticks balanced and were caught secure to form the foundation.

If we humans would build for ourselves a stronger and better foundation, our "house" would stand the storms and hardships of life much better.

DOG PARTY HELD THURSDAY

A party was held Thursday evening at the Ira Overholt home in honor of the second birthday anniversary of "Perkie" and "Ginger" black cocker spaniel pet dogs belonging to LaNelle Harvey and Elaine Neuberger.

Mr. Overholt got in on the party because he gave the little girls the puppies a couple of years ago.

Represented at the party were a number of small girls. The girl's had ice cream and we presume the doggies had some choice bones to chew on.

PASTURE ALONE IS NOT ENOUGH FOR SOME COWS

To secure highest milk production from Iowa dairy cattle, Arthur Porter, extension dairy husbandry specialist at Iowa State College, advises farmers with limited grain most profitably supplements pasture.

Now, while pasture is abundant, lower producing cows will probably get enough feed from pasture. But supplemental feeding of grain should be made to cows producing 3 gallons or more of milk or 1 pound or more of butterfat daily. By feeding grain now only to the higher producing cows, more grain can be made available for feeding when pastures begin to get scarce.

Porter points out, however, that young calves should not have to depend on pasture for feed. He recommends that spring or late winter calves be put on pasture only for exercise and sunshine. Fall or later winter calves should be put on a small lot near the barn where hay and grain are accessible. Otherwise they don't get enough feed.

CUT HAY EARLY TO GET MOST PROTEIN

Usually Should Cut Alfalfa And Clover by June 20, Cheney Says

Every ton of good hay that Iowa farmers can possibly put up should be conserved to carry the expaned animal population through the season, advises Horace B. Cheney, extension agronomist at Iowa State College. To get hay with a maximum protein content, it's important to cut early.

Alfalfa and red clover generally should be cut before June 20 this year, Cheney says. Alfalfa cut at the 10 to 25 percent bloom stages gives the most protein per acre. Red clover is preferably cut at 50 percent bloom, while clover and timothy mixed usually are ready for cutting a week later. Timothy by itself is about 11 or 12 days later than red clover (And as like clover is ready for cutting when it is in full bloom.

Hay Outlook Brighter

Ordinarily, grasses and legumes cut for hay about the dates listed give the greatest number of pounds of protein per acre. Too, the hay is more palatable and digestible than if the plants stand until they are too mature Delaying cutting until the heavist tonnage of hay per acre can be obtained wastes protein and results in poorer hay, Cheney points out Delayed hay harvest also results in limiting the second growth of all hay crops and lessens seed yield of medium red clover.

Meadows are in much better shape than a year ago, and this also brightens the haying outlook.

BIKE RIDE

So that he might write one subject of the 8th grade examination, George Schiller, jr., rode the 16 miles round-trip to Grundy Center on his bicycle. George passed the test and will be one of the Grundy county 8th grade graduates.

HELPFUL FRIENDS!

Will Vaughan, Emmetsburg, appreciates the help his friends offer while attempting to land some big fish, but the assistance seems to backfire. Last year, Vaughan lost a big great northern pike when Bob Daley offered to help him land it. The line broke and the pike escaped. Early this fishing season, Ted Girard tried to assist Vaughan when the latter had hooked a larger northern pike. Girard seized the line and was leading the pike in close to the boat when the line snapped. Later in the week, Vaughan and Daley caught several northern pike in Lost Island.

GOOD AS NEW

While spading the garden this spring, Ralph LeMaster, Sr. of Madrid, found the wedding ring his wife lost 25 years ago as she was throwing corn to the hogs. The ring had evidently been hauled in with fertilizer taken from the feed lots. It was nearly as bright as the day Mrs. LeMaster lost it.

Last Thursday the bers family received from their son and mailed out from Nor package contained fo bers some nice pins, some pins and candl lection and for Mr. Dad's Day letter M has a large and fine candles, but is proud that Wayne sent her.

Experience, Ability and Integrity Make a Good Congressman!

CONGRESSMAN FRED C. GILCHRIST
REPUBLICAN CANDIDATE FOR REELECTION

Mr Gilchrist's achievements in the State Legislature and the National Congress are outstanding. He believes that our first duty is to win the war and to that end he has supported appropriations for the Army, Navy, Air Corps, and Lend-Lease; that we must give our boys every protection and every help Then we must win a just and lasting peace and one which will not kill and cripple the young men of every oncoming generation.

He says that farmers ask nothing more and should have nothing less than parity and equality with others He supports soil conservation, rural electrification, farm to market highways, and other farm measures. The fact that he now has rank and seniority on the powerful House Committee on Agriculture gives him added prestige and opportunity for usefulness.

In recent days Mr. Gilchrist has addressed the Congress in favor of the G I. Bill of Rights for soldiers which provides for increased hospitals and gives them guaranteed loans to buy homes or to engage in business of their own It gives them free college tuition and maintainance for themselves and their dependents while in school It also provides that returning soldiers shall be aided until permanent employment is secured. Gilchrist supported adjusted compensation and mustering out pay He helped to simplify income tax returns, and to guarantee bank deposits, and to give social security and old age assistance. He believes in free enterprise and individual opportunity and is against bureaucracy and wasteful spending of public funds.

Such service and fidelity to his constituency merits support.

To The Voters Of Hancock Cou

GREETINGS:

CANDIDATE FOR SUPERVISOR

y Emmons of the Dodnsas army flying field, njoying a twenty-one h which he spent with d daughter at the home L. Sherwood at Goodell. ns and daughter will him back to Dodge City here they will live in nt.

BETTER IOWA GARDENS

A recent poll of the Homemakers Guild shows that only 11 7 percent of the people questioned gave the saving of ration points as the prime motive in having a Victory garden, while 54 7 percent said economy was the main reason. Recent heavy rains and floods point up a more important reason for raising a Victory garden this year —to assure families of an adequate food supply. Victory gardens are needed more than ever, now that crop conditions are uncertain.

* * *

It's not too late to plant cabbage, tomatoes, egg plants, peppers and okra Another small planting of beets and carrots should be made, also a second planting of sweet corn and bush snap beans—about 3 weeks from the date of the first planting Limas, pole beans, edible soybeans and vine crops may still be planted It's also time to plant navy beans. The variety Great Northern is larger seeded and more productive than other varieties.

* * *

The best time to cultivate, of possible, is about a day after a rain The soil is much easier to work before it dries out too much The best time to pull weeds is shortly after a rain

* * *

It is necessary to thin carrots, beets, lettuce, onions, kohlrabi and the like if good quality, production and well shaped plants are to be had Seedlings should be pulled when about 2 inches tall Seedlings taller than 2 inches should be cut off at the ground level, leaving the strongest seedlings at the proper spacing Spacing distances are suggested in the Iowa Garden Guide.

* * *

It is well to give tomatoes support of some kind, and it is practical to do so in small gardens If kept off the ground, tomatoes will be less likely to rot. In addition, a mulch of straw, dried shopped cornstalks or other material should be applied around the base of each plant to retain moisture and keep down the smaller weeds.

* * *

It does not pay to prune all tomato plants in the garden There is danger of the fruits becoming scalded by the sun when the plants are pruned and trained to one stem Plants do not yield nearly as many fruits when pruned Therefore, to secure a few earlier fruits for table use. Pruning to one stem is a simple process. Just remove the young shoots that appear at the base the leaf where it joins the stem. Be careful not to remove the bloom stalks that develop along the stem because they will be fruit.

REDUCE CEILING PRICE MAY 15 ON HEAVY HOGS

A few years ago farmers were being encouraged to feed hogs to heavier weights. Now, faced with a feed shortage, exactly the opposite is true. In an effort to discourage the use of essential grains in bringing hogs up to heavy, less economical weights OPA reduced the ceiling price on hogs weighing over 240 pounds by 75 cents. This went into effect May 15.

Francis Kutish, extension farm economist at Iowa State College, explains the complete reversal in government policy.

The outbreak of World War II found the nation with huge reserves of feed supplies. The big food needs were for proteins and fats So we embarked upon a program of expanding livestock production—converting these feed stocks into meat, fats, eggs and milk Farmers responded to these favorable livestock-feed price relationships both by raising more hogs and feeding to heavier weight. The average live weight of hogs slaughtered increased from about 232 pounds in 1940 to 254 pounds in 1943.

With feed reserves now at the vanishing point, the picture is reversed. Farmers are being urged to market livestock at lighter weights.

A study on feed consumption and cost of gain, made recently by the Animal Husbandry Section of the Iowa Agricultural Experiment Station at Ames, revealed it takes about 11 percent more feed to put a pound of gain on hogs weighing 270 to 290 pounds than on hogs weighing 270 to 290 pounds than on hogs weighing 210 to 230 pounds.

The recent low prices for eggs may cut down the size of chick purchases this spring and thus result in a shortage of layers next year.

FEEDING CORN IN EAR TO HOGS BEST METHOD

Experimental work has shown repeatedly that feeding corn in the ear is the most satisfacory form in which to use it for fattening hogs. Shelled corn ranks second. E. L. Quaife, extension swine specialist at Iowa State College, points out that grinding ear corn and feeding in the form of corn and cob meal slows the gain and does not save corn.

Limiting the amoút of corn fed each day, balancing it properly with a protein supplement or pasturing are the only satisfactory methods of streaching the corn supply. Limiting the corn, however, unless it is replaced by some other feed grain, invariably results in a slower gain. And the longer feeding peroid generally requires more grain to get the desired weight than if the hog had been well fed for a shorter period

Where either light hogs carried for a July to August market, or sows bred for fall farrow, are on pasture, feeding corn and cob meal may have some advantages. Quaife asserts that there's no danger of the sows becoming too fat The amount of corn consumed can be limited by self-feeding it in this form, and some labor may be saved.

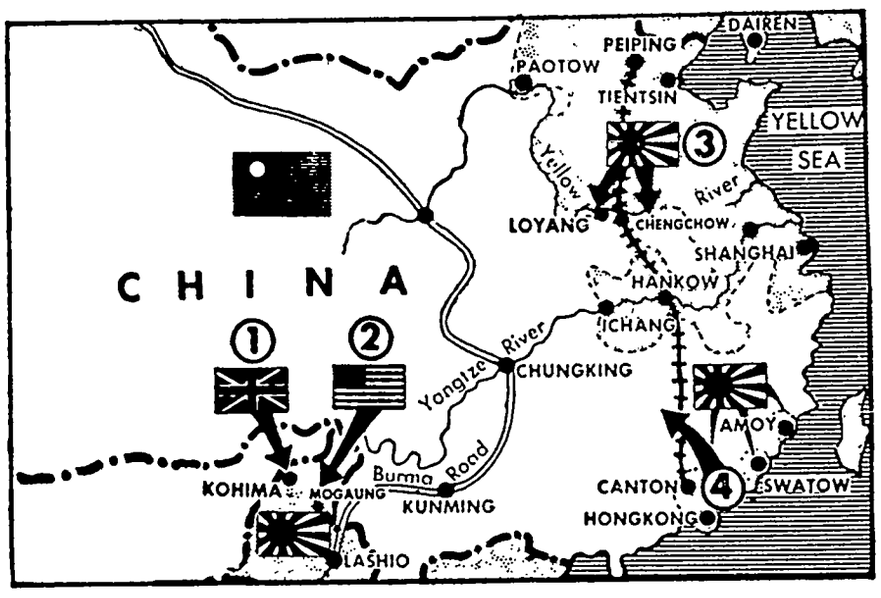
WEEKLY NEWS ANALYSIS

Allies Hammer at Gustav Line; Japs Continue Advance in China; Delay Induction of Men Over 30

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



China—Allies fight to open back door to China in southwestern part of country as depicted by 1 and 2, Japs seized control of Peiping-Hankow railroad in drives shown by 3 and 4.

ASIA:
Chinese Set Back

Gallant China's defenders took one more step back in the eastern belt of their country as 80,000 Japanese supported by strong reinforcements drove beyond the Peiping-Hankow railroad, upon which they tightened their hold.

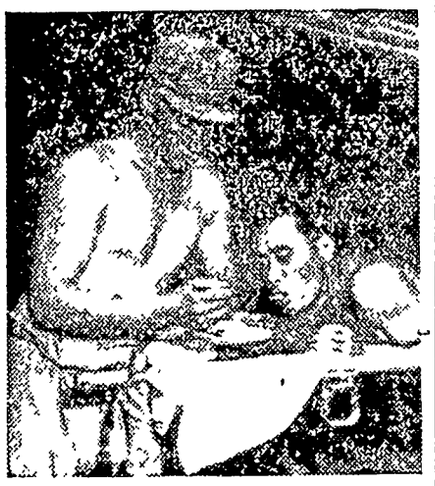
As the Chinese fell back, Lieut.-Gen. Joseph Stilwell's mixed U. S. and Chinese troops hacked their way forward in north Burma, far to the southwest of the main Chinese battleground. Purpose of General Stilwell's offensive was to clear the Ledo road, over which supplies could be trucked into sorely pressed China from the southwestern corner of the country.

By grasping the Peiping-Hankow railroad, the Japs consolidated their positions in eastern China, which extend inland from the sea coast. It is in this rich region that the cagey enemy has established heavy industry to utilize the country's abundant manpower and natural resources.

Near Inner Lines

As U S army and navy forces drew closer to the Philippines and Indies within the Japs' inner defensive ring, Yankee airmen continued to hammer at the enemy's tottering outer fortifications guarding these prized conquests.

To the west of Hollandia, army fliers pounded at Jap installations



Yank Feeds Wounded Jap.

near the tip of New Guinea, forming one side of the gate to the Indies, and drew stiff fire from some of the planes the enemy has supposedly concentrated in the region.

To the north, both army and navy fliers collaborated in blasting at Jap installations in the Caroline islands, the front door to the Philippines, with the big base of Truk being an especial target.

OIL:
Big Strike

Mississippi's little village of Heidelberg in the southeast corner of the state, became the mecca for the nation's sharpest oil men with the development of two high producing wells in the region and giddy anticipations that it might blossom into another East Texas field, which has given up almost two billion barrels in 16 years.

As oil men rushed to be in on the kill, the region's poor, struggling farmers who have eked the barest living from the stingy soil, suddenly visioned manna from heaven. Besides receiving fancy sums for leasing their land, they would get a royalty of one-eighth on production. Already, a Negro reportedly obtained $17,500 in royalties alone.

First probed by the Gulf Refining company in 1940, the Heidelberg field has two heavy producing wells, both reportedly capable of producing 15,000 barrels daily.

Diamond in the Rough

Twelve years ago a boy named William Jones was playing horseshoes with his father on a farm near Peterstown, W. Va. One pitch dug into the earth and uncovered a large bright stone. "Gee, I found a diamond!" exclaimed the youth.

Afraid of ridicule, however, he did not submit it to experts until recently. Then, R. J. Holden, professor of geology at Virginia Polytechnical institute, reported that the stone is the largest alluvial diamond ever found in the United States.

EUROPE:
First Blow

Taking the first crack at Hitler's Fortress Europe in the expected three-headed offensive from the west, south and east, the U. S. and British armies in Italy launched a powerful drive against German Gustav line below Anzio.

In the west, Allied bombers poured thousands of tons of explosives on the Nazis' rail network in France, Belgium and Germany, over which anti-invasion Comdr. Erwin Rommel must shuttle troops and supplies to meet the assault against his coastal defenses. In Russia, the Reds reportedly moved troops up in line for a big offensive to coincide with western operations.

Under command of Britain's Gen. Harold Alexander, the Allied push in Italy up the broad valleys leading to Rome got underway after a thunderous artillery bombardment, while the Nazis tried to neutralize other Allied forces massed on the Anzio beachhead in their rear to the northwest.

U. S. VS. WARD'S:
Nothing Settled

Although government troops marched in and out of Montgomery Ward & Company's Chicago plant arousing the nation to a pitch over the dramatic course of events, nothing, it seemed, had been settled.

An election had been held to determine the CIO United Mail Order, Warehouse and Retail Employees' union right to bargain collectively for the company workers, but Ward's had never objected to such an election and stood ready, as previously, to negotiate with the union.

Left unsettled, however, was Ward's objection to extension of the maintenance of membership contract with the union, which provides that its members must remain in good standing for the life of the agreement.

DRAFT:
30-37 Spared

Confident of meeting the services' demands for manpower out of the pool of younger men unless unexpectedly high battle casualties are suffered, draft officials gave a new lease on civilian life to men from 30 to 37 years of age by indefinitely deferring them if engaged in essential occupations.

At the same time, it was ruled that men in the 26 to 29 year age group were to be eligible for six-month deferments if found to be necessary and regularly employed in an essential occupation. Deferments in the 18 to 25 year age group will continue to be confined to strictly key-men.

In indefinitely deferring men in the 30 to 37 group in essential work, local boards were advised not only to go by the War Manpower commission's list of necessary jobs, but to make determinations of their own.

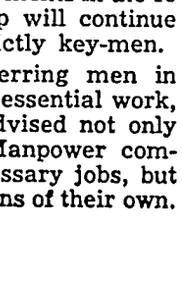
'EYE BANK':
Store Corneas

For use of attempted restoration of sight in persons blinded by explosions, burns and ulcers, an "eye bank" has been established at the New York hospital for storing corneas, the transparent part of the coat of the eyeball.

Corneas will be collected either from living persons or from those arranging for their removal after death, in which case they have to be obtained within four hours of the individual's expiration.

Cornea transplants are effective in restoring eyesight in 20 out of 100 cases of blindness, it is reported.

PERSONALITY



New secretary of the navy is 52-year-old James Forrestal, New York investment banker, who served as undersecretary to the late department chief, Frank Knox. He is a veteran of World War I.

WHEAT:
Big Crop

With frequent spring rains over much of the country resulting in good plant development and improvement in yield outlook, the U. S. department of agriculture predicted a 1944 winter wheat crop of 662,275,000 bushels as compared with an earlier estimate of 602,000,000 and a 1943 harvest of 529,606,000.

On the basis of 40,943,000 acres grown, yields are expected to average 16.2 bushels per acre, compared with 15.6 last year and the 1933-'42 average of 15.

Since January 1, the USDA reported, rainfall has replenished soil moisture supply, offsetting deficiencies at seeding time last fall in much of the Great Plains area. Failure of plants to germinate or survive because of dryness has been marked in the western portion of the Plains states, USDA said, and floods have damaged stands in the Mississippi and Missouri river basins.

High in a Tree-top

There was much ado before election officials recognized Coffing M. Arslanian's quaint little bungalow atop a 50-foot tree in Montclair, N. J., as a legal residence, entitling him to vote.

The rug merchant, who has barred visitors from his roost, has lived in the tree-tops since 1936.

SCIENCE:
Spoiled Cantaloupe

The U. S. department of agriculture's research laboratory at Peoria, Ill., continues as one of the centers of penicillin development, with the latest discovery that spoiled canteloupe produces a mold efficient in making the wonder drug.

Although it is little known, British Doctors Heatley and Florey made the Peoria lab their workshop in developing methods of increasing penicillin production after they had been bombed out of London in 1941.

The discovery of the spoiled canteloupe mold came only after the laboratory's scientists had studied growths on cheese, fruits and other foods as part of a search for a mold from which much of the penicillin would not be lost during separation of the drug from the liquid in which it develops.

New Feed

A new process of extracting oil from tung nuts may result in the use of the residue as a protein feed for livestock as well as a material for plastics, Chemist R. S. McKinney of the U. S. department of agriculture declared.

Under the old system of extraction through pressing, only about 85 per cent of the oil from the nut was obtained, McKinney said. By removing the oil with solvents, however, almost 99.9 per cent of the oil has been extracted, with probable use found for the residue or meal.

Used for all sorts of paints and varnishes and in brake-linings, tung oil has many other applications, McKinney said. The services have found it invaluable as an insulator for electric wiring and as a "dope" for waterproofing the wings of naval planes.

CIVILIAN GOODS:
More Coming

To take advantage of the increasing supply of surplus materials and relieve local employment problems, the War Production board ordered the resumption of manufacture of civilian goods wherever it would not interfere with the arms program.

One result of the order was expected to be a relaxation of restraints on production of simple farm machinery, like hay loaders and barn equipment, although WPB declared that there would be no increase in quotas for binders, tractors and mowers, etc.

Regions outside of the centers of heavy war output primarily will benefit from the WPB's new order, while companies inside these centers will only go into civilian work with the permission of the local urgency production boards.

Sign of the Times

The roof of a huge industrial building being planned for New York city will be designed as a landing field for helicopter airplanes. Commuters will be able to fly in from country estates in near-by New Jersey and Connecticut as well as Long Island and upstate New York, landing within a few blocks from the center of business.

Helicopters have passed the experimental stage but commercial development has been held up by the war.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

GETTING TOUGH WITH SWEDEN

After too many months of Allied super-patience, the Swedes are in for a tough crackdown. At long last, the State department, the Foreign Economic administration and, perhaps more important, the British, have determined to pull together in telling the Swedes they will have to fish or cut bait in sending vital war materials to Germany—especially ballbearings.

The question of ballbearings involves the world-famous SKF ballbearing company in Sweden, which operates a subsidiary company in Philadelphia. The president of the American company, William Batt, is vice-chairman of the War Production board.

Not many people realize it, but despite the loss of 600 U. S. aviators in bombing the Nazi ballbearing plant at Schweinfurt last fall, to say nothing of the loss of countless other lives, the Swedes have been nullifying these American sacrifices by shipping great quantities of ballbearings to Germany.

Hitherto secret, has been the fact that the Swedes have supplied Germany with 70 per cent of certain vital airplane ballbearings. And when you consider that one bomber alone requires up to 3,000 ballbearings, you realize that this is the most important single commodity Germany is now getting from the outside world. In fact, ballbearings are so essential that, without them, the Nazi airplane industry would be paralyzed almost overnight. No plane can be constructed without several hundred to several thousand ballbearings.

U. S. officials recently have unearthed information indicating that the Nazis deliberately planned, well before the war, to use Sweden as their source for ballbearings. A conversation reported to have taken place with Air Minister Goering has recently come to light, in which Goering explained that he was not anxious to build up the German ballbearing industry too much, since it might be advantageous to have the industry in a neutral country where it could not be bombed.

* * *

SEDITION TRIAL MONKEYSHINES

The most patient man in the world is presiding over the "mass sedition" trial in the Federal District court here. He is painstaking, square-shooting Chief Justice Edward C. Eicher, who is recognized by the legal profession as absolutely fair and who has been leaning over backward to give the 30 indicted defendants their full day in court.

However, the defendants are demanding more than that. So brazen are some of them in their tactics to delay the trial, that they boastfully refer to themselves as "monkey wrenches from heaven," because, they say, there is always one among them capable of "pulling something" to cause another delay.

Here is an example of what the patient Justice Eicher has had to put up with. Whenever a defense motion has been denied, Charles B. Hudson of Omaha, Neb., publisher of a pro-Fascist news letter, "America in Danger," has turned and chanted to reporters:

"Railroad! Railroad! Toot-toot-toot!"

Eicher has overlooked much of this by-play in order to expedite the trial. However, he has almost worn out his gavel trying to keep Mrs. Lois de Lafayette Washburn—the nose-thumbing, Fascist-saluting Chicagoan who boasts descendency from the Revolutionary hero — and some of her more demonstrative cronies in line. At one point, Mrs. Washburn leaped up and screamed: "Lafayette, we are here to defend ourselves!"

Ellis O. Jones, tall, lanky defendant from Los Angeles, also had to be gavelled down when he complained about the food in the district jail. "I've already lost ten pounds," protested Jones. "If this keeps up, you'll have to get me an undertaker."

NOTE—Eicher finally decided that these antics had continued long enough. Since he cited two defense lawyers for contempt, others are beginning to realize that Hitlerian horseplay of the type used by the Brown Shirts when they were tried after Hitler's unsuccessful Munich putsch will not get by forever in an American court. On the other hand, many of the defense attorneys, of excellent standing at the bar, are doing their best to preserve court decorum.

CAPITAL CHAFF

¶ Friends have started a quiet boomlet for OPA Administrator Chester Bowles for vice-president. It began by pushing him for the Governorship of Connecticut, which he declined. Bowles, incidentally, has made one of the most unpopular jobs in Washington, the OPA, reasonably popular.

¶ Mexican workers have now earned $12,000,000 in the United States under the emergency government program which brought them to U. S. farms and railroads

Walter Winchell

(WNU Service)

Exclusive War Story:

(Ray Brock, war correspondent, 4½ years in the Balkans for the N. Y. Times and practically en route at this moment to the European theater for International News Service, spellbound some of us with this breathless story. We asked him to jot it down.)

Dear Walter: Here's the story precisely as Bea Tolstoi gave it to me the other night. I think it's one of the great, hitherto unwritten chapters in the war. Scene: Shepheards Terrace, Cairo. Time: Late afternoon, November 15, 1941. Ken Downs, then an ace war correspondent for Int'l News Service (he's now a lt. col. on Terry Allen's staff in Europe), was finishing a Scotch and the last five pages of "For Whom The Bell Tolls." Geoffrey Keyes interrupted him. Geoffrey, a lieutenant-colonel at the age of 24 (son of Admiral Roger Keyes), had ducked a desk job in England to come out to Egypt, join the British desert commandos and raid the German and Italian rear—dynamiting airdromes, blowing bridges, playing general hell with the enemy, etc. But now Ken Downs told Geoffrey Keyes to go 'way. Ken was absorbed in the fictional last few minutes of Robert Jordan's life in the Bell, the unforgettable last few minutes when Jordan, with a smashed thigh, props himself against a tree and levels his tommygun on an approaching column of Fascist cavalry . . .

Keyes was off with Capt. Colin Campbell and his commandos on the raid to kill Rommel, the raid that missed Rommel because the Afrika Korps general was in Rome on a birthday party—but it was one of the most daring operations of the war and won Keyes his Victoria Cross—posthumously. Keyes landed his commandos two hundred miles behind the German lines, beached his landing craft by night near Sidi Rafa. They hid two days and nights in a wadi (gully), trekked twenty miles on D-night and snaked up to the Afrika Korps GHQ.

They attacked with grenades, tommyguns and machine pistols, Keyes leading. Keyes killed the first sentry, kicked down the outer door and led his raiders in, spraying the corridor with tommygun and pistol. Startled, frightened German staff officers poured from their billets. Keyes' men blasted them down. The sirens went, a general alarm being sounded.

The Germans got to their arms, began to fight back. Keyes' small force got smaller. But Geoffrey, still leading, took seventeen men through the last defenses in the inner stockade to Rommel's own quarters. Rommel's staff aide got Keyes, a machine pistol fusillade which almost tore Keyes' right leg off. Keyes fell in the doorway. Colin Campbell, behind him, dragged Keyes back from the threshold and hurled two grenades inside. Then he sprayed the room with his tommygun. Had Rommel been there he'd have caught it.

Campbell and a sergeant dragged Keyes back to the outer stockade, firing as they fell back. Then Campbell was hit. "Get out!" Keyes ordered. "Take him out. Leave me here." They had reached the door of the outer stockade. "Give me that tommygun." Keyes took the submachinegun and propped himself in the door. Well. The rest of it came from Downs' report—as he got it from the sergeant—and from Colin Campbell, who wrote from a German prison camp.

They dragged Campbell to a tree nearby. His wound was pretty bad. They gave him morphine and he began to go under. But he could still see Keyes, in the first gray streaks of daylight, propped in the doorway and blasting away at the Germans in the stockade. The sergeant ran back to Keyes, but Geoffrey refused aid. He simply demanded more clips for his tommygun. The sergeant got them.

"Listen—" Keyes fired a burst. "Not more than two or three of you will get away. Some of you—" he fired again, a long, choppy burst that drove the Germans back to cover. "Some of you must get back to report—" he fired again and rammed home a fresh clip.

"Tell them—"

"Yes, sir!" snapped the sergeant.

"Get word to Ken Downs," finished Keyes. "Tell him, if you will, that it happened this way. Goodby." The sergeant saluted and ran, zig-zagging, for a wadi and safety.

Campbell began to pass out. As he went under he could see Keyes firing, reloading, firing . . .

Memos of a Midnighter: When an ad agency told Henry Ford that Tommy Dorsey was the next Ford Hour star, Mr. Big replied: "Who's he? What's the matter with Earl Godwin?" . . . It's a girl for the Everett Sloanes at Drs. Hosp. Pop's the Crime Doctor . . . Bob Musel, the New York newspaperman (now in England), has written the song hit of London: "The Homecoming Waltz" . . . The mystery murder (of a diplomat's wife in that Chicago hotel) is the exact plot (so far) of a Universal film starring F. Tone.

buzz and bedlam, color coration, and teeming ds with their tingling en- n, America holds its olitical conventions our years.

vention delegates fuss and rough the lengthy, historic millions of Americans ut the nation follow the pro- with attention and even ce either the Republican or ocratic party embodies the s they hold most consistent r social ideals.

the period of the conven- ll might it be said that the the nation is centered in ities of the meetings, bound- the people's delegates, with er men, newsreel men and oadcasters milling to flash f the unfolding events to an citizenry, and with visitors by the great spectacles. lly, cities compete to have ventions held in their locali- ce the delegates' and visi- penditures for hotel accom- ns, food and entertainment pping in the business dis- mount to hundreds of thou- dollars. But with the coun- g the crest of a profitable m this year, with housing s taxed and heavy demands or limited stocks of mer- e, only Chicago actively bid conventions, offering each 5,000 for expenses. Ordi- t costs between $100,000 and to run a national conven-

both parties accepted Chi- ids, financial problems thus dded to other special war- fficulties confronting Republi- ller Hallanan of Charleston, , and Democrat Ambrose ll of New York in making ments for the conventions. e two men falls the responsi- setting up the smooth func- of the meetings assuring or- tivity on the floor of the con- s and establishing facilities k transmission of news to ting world outside.

Two Old-Timers.

O'Connell and Hallanan are ds at conventions, O'Connell attended his first as a mem- Al Smith's entourage in 1928, llanan his as a newspaper 1912. Although red hot parti- clined to admit nothing, both ve worked together in mak- e principal arrangements, he Republican convention of will be followed by the atic on July 19.

se of the heavy wartime on the railroads, transporta- sed one of the big problems year's conventions. But the promises to be solved by day coaches by those within rs of traveling time of Chi- and of provision of extra g and dining cars for ac- d representatives from far- stances. To assist delegates awaii to attend, the navy will plane service to the main-

to transportation, housing esented another major diffi- Although both parties were of approximately 5,000 the Republicans, for one, se another 3,000. In quest housing, Hallanan has even Chicago's outlying apart-

ment districts for accommodations, and it was reported that some good Republicans offered to come to the aid by boarding convention attendants.

As if O'Connell and Hallanan were not having trouble enough, they have been pestered for accommodations by that type of individual who feels that no business is so important as that of finding a particular room for him, even though all hotel arrangements are to be made by the head of the state delegation.

Plenty of Problems.

Preparation of Chicago's huge, streamlined Stadium for this year's conventions has not been without its problems, either. Until the Citizens committee which bid to bring the conventions to Chicago arranged to furnish the Stadium for $25,000 to each party, Hallanan estimated that the cost of readying the amphitheater alone would amount to $48,000, not including rental.

The services of over 100 men working about three weeks are demanded for preparing the Stadium.

Canopies outside the main entrances must be draped with bunting. One hundred and twenty flags must be hung from the rafters to sway impressively above the floor. Three emergency "hospitals" must be set up and equipped with medical goods, light and water. A huge platform holding 180 people must be constructed, with a special conference room underneath it. And, of course, seats enclosed within stanchions for the different state delegations must be put up.

Elaborate preparations must be made to accommodate the press, newsreel and radio, especially this year when the two conventions will attract international attention. Already, reservations have been asked by newspaper representatives from Britain, Russia, South America, China, Sweden and French Africa, and, in all, about 3,000 observers with their technicians will be on the job to describe the proceedings to the U. S. and world.

Not only will the press be seated in front of the main platform, but a special newsroom will be provided in the basement. At both places, telephone and telegraph facilities must be established to send out stories from the building. Darkrooms will be constructed for photographers to develop pictures.

Microphones Everywhere.

Important for transmitting the actual reality of the convention atmosphere to the world, all four of America's great radio networks will make elaborate arrangements for covering every detail of the conventions.

Contact will be made with delegations through microphones on the floor; portable equipment will be used to interview dignitaries throughout the entire building; special booths will be erected to accommodate the radio commentators.

and facilities will be installed to pick up the rumbling, rolling peal of the huge Stadium organ.

Approximately $6,000 will be spent by the parties to furnish newsreel men with enough lighting to take moving pictures of the proceedings. With 10,000-watt incandescent searchlight units set up, enough light to illuminate a medium-size town will be provided cameramen shooting from the high rafters. This lighting must be arranged to permit shooting from any angle of the building without causing blind spots from too much light on any one point.

In making a success of a convention, the little things are as important as the big ones, and sometimes the little things cause as much bother as the big ones

For instance, O'Connell and Hallanan have had their difficulties providing badges and tickets. Because of wartime, metals have been unavailable for badges, and it has been necessary to secure plastic material.

To convention-wise Ambrose O'Connell, there is more to badges than meets the eye. For instance, they must be so designed as to avoid catching onto clothing and ripping it, and all kinds of different types must be used to restrict the movements of the various attendants throughout the Stadium.

Tickets a Headache, Too.

Also because of wartime, there has been a scarcity of certain paper stocks, a condition of particular pique to bustling Walter Hallanan, since it is necessary to print tickets on material that cannot easily be counterfeited.

Incidentally, in the distribution of tickets to the conventions, each delegation is allotted a percentage, usually depending upon the approximate distance of its state from the meeting site. The idea, of course, being to provide more seats for those who might be able to come in by auto, etc., from neighboring regions. Civic committees which put up the finances to bring the convention to their cities also receive an allotment of ducats

Unique, in that this year's conventions will be the second in the history of this country held during wartime—the first being in 1864—the impending Republican and Democratic meetings are expected to lack some of the flourish and hoopla of bygone days. However, they are not expected to be bereft of all popular enthusiasm so easily stirred over a candidate, or over the expression of a party's outstanding principle stressing the hopes, the aspirations and the achievements of its partisans.

In their excitement over the swift stream of dramatic events often accompanying conventions, even the soberest politicians and statesmen sometimes forget their immediate environment and lapse into what afterthought must characterize as the comic.

For instance, during the 1932 Democratic convention in Chicago, O'Connell remembers the heated fight over the election of a permanent chairman, which would have demonstrated the strength of the contending factions.

As the fight developed, the Mississippi delegation caucused, only to find venerable old Senator Pat Harrison absent. Without further ado, some members hurried off to his hotel and after pressing the urgency of the situation upon him, hustled him back to the convention hall in his pajamas, carpet slippers and bathrobe, there to cast his vote.

As Hallanan said, this year's conventions will be marked by the sober restraint of a nation at war. Once events have stirred up the attendants, the enthusiasm may carry over into the typical hysteria of these great national meetings.

Dozens of workmen are preparing the huge Chicago Stadium for the conventions. Upper left is pictured Walter Hallanan, chairman of the Republican committee on arrangements, and lower right, Ambrose O'Connell, Democratic chairman.

Army Press and Radio Must Maintain Political Neutrality

war department, in instruc- sent to all commanders both United States and overseas, scribed a policy of strict im- lity in the dissemination of al information. Title V of the deral voting law, which is endment to the Hatch act, its use of federal funds or rship to influence the armed in voting in federal elections. uctions to commanders in observance of this law state: "The burden is on the army to see that the information and entertainment which it furnishes to the soldiers is either (1) nonpolitical or (2) if political, is justified by presentation in strict accordance with the allowed exceptions.

"It is not the purpose of Title V to shut off information and entertainment from the armed forces. Its purpose is to see to it that no information or entertainment which is federally financed or sponsored and which might have the political character, will be disseminated to soldiers except in conformity with the statutory provisions designed to prevent unfairness or partiality in any such dissemination."

The law permits rebroadcasts of political speeches over government controlled stations provided equal time is given each party.

PAUL IN EPHESUS

LESSON TEXT—Acts 19:8-10; Ephesians 2:4-10; 3.14-19

GOLDEN TEXT—We are his workmanship, created in Christ Jesus for good works, which God afore prepared that we should walk in them.—Ephesians 2:10.

Not peace—but a sword! With such graphic words Jesus indicated that His coming into the world would set men apart, either for or against Him (see Matt. 10:34-42). The gospel is the good news of redemption for all mankind, but the attitude of men toward the gospel divides them sharply, into the saved and the lost. Which are you?

Our lesson, telling of Paul's ministry at Ephesus and giving part of his letter to the Ephesians, shows that the gospel does divide, but that it also gives quickening grace and strength for Christian living.

I. Dividing (Acts 19:8-10).

Paul had a long ministry at Ephesus and a very successful one, but at the same time it was a stormy, trying experience. After all, do not those elements often go together?

Paul began in the synagogue. That was the proper way, and his custom. He ran into opposition, and after three months he had to seek another place to meet the people. But notice, he did not give up and leave town.

The teaching of any truth results in division, and especially is that true of the gospel. It was found before long (vv. 23-41) that winning people to Christ interfered with the heathen business interests, and then things began to stir.

One wonders why modern business set for the destruction of men's souls by rotten plays, movies, books, amusements, and by the saloon is so content to let the church alone. Is it because our testimony does not harm their business? If so, we are certainly not walking in the footsteps of Paul or of Christ.

Christ is a divider of men. Yes, but those who stand on the right side of that divide also receive

II. Quickening (Eph. 2:4-10).

Dead men, spiritually, come to life when they meet Christ and believe on Him. We were all dead in trespasses and sins, entirely unable to help ourselves, when God in mercy and grace quickened us.

He did this for us, but also for His own glory. That really is the most adequate explanation of grace. It was and is for His glory, a showing forth (v. 7) of the exceeding riches of His grace, through all the ages to come.

Being saved, then, is not (as some describe it) a foolish thing of little import, that takes place in some mission or little crossroads Sunday school. It does happen there, thank God for that, but it reaches clear up to the highest heavens, and on into all eternity. This business of bringing men and women, boys and girls to Christ is the greatest of all occupations. Let's be busy about it!

Be sure to note in verses 8-10 that it is all of grace. No works can enter into salvation. We are "his workmanship," not the result of a cooperative enterprise or creation.

But at the same time do not fail to stress that we are created "unto good works" (v. 10). The professed Christian who talks about being saved by grace, but who does not live it out in the good works which God has ordained as the proper expression of salvation by grace, should not be surprised if the testimony of his lips is not believed.

If we are quickened to newness of life in Christ, we ought to bring forth fruit. That is not possible in our own puny strength. But wait, the gospel which divides and quickens is also—

III. Strengthening (Eph. 3:14-19).

Paul prayed for the Ephesians, but somehow one feels that he prayed for the Christians of all time, for every member of "the whole family in heaven and earth" (v. 15) who bear the name of Christ. The writer is rejoicing today that he belongs to that family, but he wonders how it is with you who read these lines. Do you belong?

Paul prayed in the Spirit, that is evident as one reads these sublime words. It is a comforting and encouraging thought, too, for Paul here asks for a Christian experience for his readers, which seems quite impossible of attainment, except for one thing. It is the power of God which is to bring it about. Prayer in the Spirit is prayer that God answers, always and fully.

So we read with confidence these magnificent, enriching petitions, and we say: "O God, make me that kind of a Christian, a real Christian."

Observe that there is to be a strengthening of the inward man by the Holy Spirit. This is not something "put on" or acquired. It is God's gift.

Note also that it has a normal development, a growth in the knowledge of Christ because of an ability to "comprehend" (v. 18). Is not that our great need? We are unspeakably rich in Christ, but we do not seem to know enough to take out our inheritance.

PATTERNS SEWING CIRCLE

Wrap-Around Dress

A WRAP-AROUND is the time-honored dress for spring house cleaning where American women are concerned. This is a particularly attractive one — the long, rolling collar which tapers into the belt line is very attractive when edged with a narrow washable trimming.

* * *

Barbara Bell Pattern No. 1958 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, short sleeves, requires 4 yards 39-inch material; 3½ yards ric-rac trim.

Sun-Tanner

A SPORTS dress with a sun-tan back held in place by one big button—the short, smart bolero can be slipped on when you skip down the street to your market! Make it in ever-so-bright materials to take on vacation.

* * *

Barbara Bell Pattern No. 1801 is designed for sizes 10, 12, 14, 16, 18 and 20. Size 12, ensemble, requires 3¾ yards of 39-inch material; 5 yards trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

"THE SONG OF BURNADETTE"

Mrs. Dick Ebeling of Marion, South Dakota, came the latter part of the week to visit over memorial day with her children and their families here: Mrs. W. F. Pavey, Ben Coobs and Mrs. Verner Lewis.

Mr. and Mrs. Fredin and sons, Jimmie and Donald of Ft. Dodge visited over the week end at the Mrs. C. A. Arnold home. Jimmie will remain at the Arnold farm for the summer.

Henry Smid, who recently moved into the cottage near the County Maintenance Building, has the place all repainted and decorated and has made a nice garden. "Hank" is quite proud of his new residence.

A picnic dinner was held Sunday at Ventura in honor of Pfc. Herbert Webner and family from Madison, Wis. A large number of relatives enjoyed the picnic dinner and fishing. The Webners returned home Tuesday.

Cpl. Armour Mullin has returned to his duties at Geiger Field, Washington after enjoying a furlough which he spent visiting with his family and relatives here. A week ago Sunday a family picnic was held at the Klemme Park in honor of Cpl. Mullin.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, were visiting at Plymouth Monday afternoon.

Mr. and Mrs. J. N. Day visited at the Bert Mathews home at Clear Lake Sunday and enjoyed a picnic dinner with Mr and Mrs. Mathews at the Clear Lake Park.

Goodell had their last moving picture show last Friday evening. For several years they have been served by a company from Rockwell. Because of present conditions we understand Goodell will no longer be able to have picture shows for the duration.

Mrs. E. C. Buntenbach, accompanied by Miss Ruth Heginger, spent several days the past week at the Buntenbach cottage at Clear Lake getting it ready for the summer Mrs Harold Wicks is entertaining several of her Carlton College girl friends at the cottage this week.

Wall-eyed pike fishing has not been too good so far at Clear Lake this season, but the persistent fishermen have been getting a few nice ones. Thursday evening "Skeet" Albertson brought back two large wall-eyes; one weighing around four pounds and the other about two. Sunday forenoon he caught five nice wall-eyes.

"You're the kind of fellow the mayor would give the keys of the city to—and then change the locks.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

The Reformed Bible School will continue for two more weeks.

I. J. Overholt was at Charles City on business Monday.

Karl Kraus of Garner, was in Klemme on business Thursday.

Mrs. Sherwood of Goodell was in Klemme on business Monday morning.

Owen Neuhing and family were visiting with relatives at Dows on Sunday.

Mr. and Mrs. Kingery of Seneca were visiting in Klemme Monday evening.

Mrs. Fred Musfelt of Clarion visited with Klemme relatives on Memorial Day.

Mr. and Mrs. Wilbur Carr of Garner spent Memorial Day at the Fred J. Arnold home.

Dr. and Mrs. W. F. Missman were dinner guests Memorial Day at the P. M. Wilson home.

Fred J. Arnold moved his tools and equipment into his new building Tuesday.

Henry Lewis and family were dinner guests at the C. E. Kluckhohn home on Memorial Day.

Henry Ludeke and family of near Meservey spent Memorial Day at the Fred Schlichting home.

Mr. and Mrs. Charles Fritzel spent Memorial Day at Grundy Center and Parkersburg.

Mrs. Frank Schulz and Mrs. Verner Lewis are the hostesses for the Auxiliary meeting June 6th.

Mrs Emil Beier and Mrs. Lena Schroeder were Forest City visitors Wednesday afternoon.

E. A. Suckow of Unionville, Ia., came Saturday for a visit with Klemme relatives.

Mr. and Mrs. Ernest Helps have purchased the W. S. Lee property in the southwest part of Garner.

Mr. and Mrs. Paul Grange of Mason City spent Memorial Day in Klemme.

Mr and Mrs E. G Ell of Belmond visited with old friends here Memorial Day.

Mrs H E. Harvey, Elwood and LaNelle, were at Belmond on business Thursday morning.

J N Steil of Garner was a business caller in Klemme Saturday afternoon.

Rev. Calvin Grosshuesch was the speaker at the Deaconess Festival at Marshalltown Reformed Church Monday of this week.

Miss Harriet Gibbs of Mason City spent the week end visiting with her parents, Mr and Mrs. Harry Gibbs.

Erick and John Josten have been at the Rochester, Minnesota hospital for the past two weeks receiving treatment.

Miss Thelma Chambers of Britt spent the week end in Klemme visiting with her parents, Mr. and Mrs. John Chambers.

Mrs. Albert Carolus is caring for her aged father who is ill at her home in the country, south of Klemme.

The Barz relatives held a picnic in the Klemme Park Sunday honoring Seaman Ronald Barz, who is home on a furlough.

Fred Letzring of Royalton, Minn. came Thursday for a few days visit with his sister-in-law and husband, Mr. and Mrs. Fred Nagel.

Mr. and Mrs. J. A. Chambers and Thelma, and Mr. and Mrs. Benn Coobs and Peggy were Mason City visitors Saturday.

Wayne Lemke and family of Des Moines spent the week end and visited over Memorial Day at the parental Otto Lemke home.

Ed Thompson was absent from the Thada Store all of last week and the fore part of this week due to illness.

Mrs. Earl Schuetpelz and children, Donald and Diane, are visiting at the Wm. H. Greiman and Paul Stromer homes over Memorial day.

Cadet Nurses Gertrude Grosshuesch and La Vohn Drake of Marshalltown visited over the week end at the Rev. Grosshuesch home.

Mr. and Mrs. W. C. A. Gast and Mr. and Mrs. Kenneth Schuldt were dinner guests Sunday at the Emil Patet home.

Mr. and Mrs. Herbert Haskins and daughters Anita, Verna and Donna of Clarion, were dinner guests Sunday at the home of Rev. H E. Harvey and family.

Albert Keeper of Albion, Michigan, came Saturday evening for a visit over Memorial Day with his parents, Mr. and Mrs. Henry Keeper.

Ira Overholt and F. A. Arnold attended a dinner and bond drive meeting held at the Hanford Hotel at Mason City last Thursday. The next bond drive will get under way in June.

Mrs. Fred Wesendorf of Buffalo Center and daughter Mrs. Paul Lemke of Clear Lake came Monday afternoon for a visit at the Donald Neuberger home. Mrs. Wesendorf is Mrs. Neuberger's mother, and Mrs. Lemke is her sister.

GOODELL FARMER DIES; HOLD RITES SATURDAY

Goodell—Francis Finn 29 died Wednesday at a hospital in Mason City. He had been troubled with diabetes for several years and in January took pneumonia which developed into lung infection

Francis is a son of Mr and Mrs Jim Finn of Belmond He received his education in the Wright county schools. Since his marriage in 1937 he operated the Will Rhodes farm east of Goodell

He leaves his wife, parents, 6 brothers, Capt Howard Finn in California, Clair and Richard in the Hawaiian Islands, Merlin of Chicago, Orland, Regar and a sister, Peggy, at home Another sister, Lenore is a registered nurse in Mercy hospital at Mason City

Funeral services were in charge of the Rev. Father Ormsby in the St. Francis church at Belmond, Saturday at 9 a m Burial was in the Belmond Catholic cemetery.

IMPORTANT CHANGE MADE IN SLAUGHTERING RULES

Mr. Charles J Casey, Area Supervisor of the Office of Distribution War Food Administration, today announced that all restrictions on farm slaughter of livestock and delivery of meat have been removed.

Amendment 15 to WFO 75, effective May 25, revoked requirement that farmers must have permit to slaughter livestock and deliver meat to persons not living on farm.

On Novermber 17, 1943, restrictions on slaughter of hogs and delivery of pork were suspended for three months This period was then extended a month, and then indefinitely. The new amendment now removes restrictions on other species of livestock from farms into consumer channels.

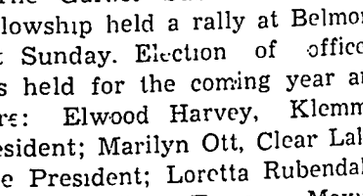
The Amendment in no way affects the regulations of the Office of Price Administration relative to the collection of ration points on meat sold or transferred to others

ELWOOD HARVEY ELECTED PRESIDENT OF THE GARNER SUB-DISTRICT YOUTH FELLOWSHIP

The Garner Sub-District Youth Fellowship held a rally at Belmond last Sunday. Election of officers was held for the coming year and were: Elwood Harvey, Klemme, President; Marilyn Ott, Clear Lake, Vice President; Loretta Rubendahl, Belmond, Secy--Treas; Maxine Stokesbary, Garner, Recreation Leader.

Those attending the rally from Klemme and Liberty were Eunice Larsen, Peggy Coobs, Dorothy Ellingson, Thelma Renner, Verda Mae Pederson, Elwood Harvey, Jim Thomas, Corrine Merkel, Roger Ridder, Junior Larsen, Thelma Chambers, Novella Bredbenner, Buddy Montgomery, Elwyn Ridder, Lola Gast, Raymond Schoenwetter, Roger Bock, Carol and Worthy Usher, H. E. Harvey, Lorraine Bredlow, Eugene Beier

HELLO, FOLKS!



Mr. and Mrs. Ned Howard are the parents of a 9 pound baby son born to them Wednesday morning, May 31st. Mr. and Mrs. Howard now have four boys in their family.

Mr. and Mrs. Howard have named their new son Raymond Douglas.

BONDS OVER AMERICA ★ ★ ★

Benjamin Franklin

Lifelike and lively as the prose of his pen stands James Fraser's statue of our "first great American," in Franklin Institute, Philadelphia His common sense, his articles on thrift, his homely savor was the cement that held together our revolutionary forefathers.

Thrift and fortitude and determination made the 13 colonies these United States. Now it is our turn to preserve the things for which our forefathers died.

Buy War Bonds and Hold Them

SUGAR STAMP 37 INVALID

Sugar stamp 37 in war ration book 4 will never be used, OPA announced Because many housewives mistakenly sent this stamp to their local boards when applying for home canning sugar, instead of the correct stamp—spare stamp 37—OPA has announced that sugar stamp 37 will not be used at all, so that no one will suffer for this mistake

IMPORTANT DATES

June 18—Father's Day
June 21—Summer begins
June 26—Republican national convention, Chicago
July 4—Independence Day
July 19—National democractic convention at Chicago
Nov 5—General election.

$5 AUTO USE TAX STAMP GOES ON SALE JUNE 10

The $5 00 automobile use tax stamps for the coming year will go on sale June 10 in postoffices and internal revenue collectors' offices These will cover the tax for the fiscal year beginning July 1, and must be displayed on windshields after that date.

GOODELL YOUTH OVERSEAS DRIVES HALF-TRACK

CPL. LEROY BERHOW

Cpl. Leroy Berhow, son of Mr. and Mrs. Alvis Berhow of Goodell, is with the armed forces somewhere in England. Cpl. Berhow drives a half-track and he says he likes army life but prefers to be home. He thinks England is a beautiful country and likes the people there. Before entering the service on March 25, 1943, Cpl. Berhow had farmed for several years and was a farm-hand for his folks until they held a sale and then worked for Henry Christenson and Arthur Chelsvig. He began army life at Fort Sheridan, Illinois and in Oct. 1943 went to Camp Campbell, Ky. Shortly thereafter he went on maneuvers at Nashville, Tenn. and in February went to Camp Davis before going overseas. Cpl. Berhow has eight sisters and one brother, and all of them think he is "tops", and are anxious to have "Bud" come home soon.

$25,000 FLOOD DAMAGE TO STATE PARKS

Recent floods have caused damage estimated at $25,000 to the state parks, with the greatest loss being in roads, bridges, and culvers Some damage was done to water supply and sewage disposal systems, as well as to fences and picnic equipment.

. Dolliver Memorial near Fort Dodge, Ledges near Boone, Walnut Woods near Des Moines, and Pammel near Winterset sustained the greatest damage. Considerable loss was also suffered at Springbrook, Union Grove Lake, Pine Lake, Backbone, Palisades-Kepler, and Lake Macbride. Damage to Walnut Woods and Ledges is so severe that these two parks have been closed to the public. Certain parts of the other damaged parks have been closed to public use. Repairs will be made as funds, personel, and materials are available.

GIRL SCOUTS HELD MEETING

The Klemme Girl Scouts held their 17th regular meeting June 5, 1944 at Mrs. Trumbell's home. We played games led by Marjorie, Irene, and LaNelle. LaNelle reported on the clarinet and on Handel, a composer of music. Jo Ann reported on Bethoven, another composer DeVera gave a short report on The First Flag of the United States. Irene reported on The Second Flag of The United States and how to display the flag. Marjorie reported on The Third Flag of the United States and also on how different services display the flag Sondra reported on the piano Afterwards we had our lunch, prepared by Mrs. Trumbell and Peggy. The Forget-me-not patrol worked on a badge. Mrs. Trumbell gave us our assignment for our next meeting.

By Irene and Marjorie.

TWO SHIFTS NOW WORKING AT BRITT HEMP MILL

The Britt hemp mill is now operating day and night, running two 10 hour shifts. The night shift began operation last Monday night. The mill is now turning out between 5 and 6 tons of finshed fibre in a ten hour run. Those employed from Klemme are now working on the night shift. About 135 people are now employed and they are making every effort to get some of the ground cleared to make room for the new crop coming up.

12,000 tons of hemp was stacked last fall and for 1944 4,500 acres have been contracted, or 500 acres more than last year, most of which is grown in the west half of the county. The 60 harvesters and binders are now being repaired and rebuilt in preparedness for the 1944 harvest. Visitors are allowed by permit only during the day.

Study Group Meets

The Study Group of the Methodist Church will meet with Mrs. Harry Gibbs, Thursday afternoon at her home. June, 8th. Meet at the Drug Store at a quarter of two.

Chambers Noses Out Grieman In Race For Supervisor

DEFEATS GILCHRIST FOR CONGRESSMAN

JAMES DOLLIVER
Of Fort Dodge

LIGHT COUNTY VOTE GIVES CHAMBERS 974 AND GREIMAN 886

Frank Schoun Racks Up 1,291 Votes Against 5$1 For Steil

Hancock county voters were principally interested in the supervisor race in Monday's republican primary election. After the final count John A. Chambers, incumbent serving his first term as Supervisor in Hancock County, had a total of 974 votes, just 88 votes more than his opponent, Ben F. Greiman who tallied up a total in the county of 886 votes.

In the only other contest existing in the county, Frank J. Schoun, incumbent, received 1,291 votes while his opponent J. N Steil of Garner was given 581 votes.

Voting was exceedingly light all over the county, and all over the state as well. Hancock county fell far short of making it fifty cent In some precincts in the state the percentage was as low as five per cent. The light vote can perhaps be attributed to the few contests existing, to the busy farm season, the shortage of labor, and the main interest centering around the war.

FORMER KLEMME COUPLE MARRIED 25 YEARS

Rev. And Mrs. Wm. Suckow Observe Anniversary Here

About 70 relatives and friends of Rev. and Mrs. Wm. Suckow of Van Meter, Iowa, attended the open house and lunch held in honor of their 25th wedding anniversary at the Liberty Methodist Church on Sunday, June 4th, between 2:00 and 5:00 p. m.

Emil Beier was master of ceremonies for the program which consisted of group singing, a solo by Rev. Harvey and a talk by Mr Ed. Suckow. The honored couple were presented with a gift of money.

Rev. and Mrs Suckow were both born and raised in Liberty township. Rev. Suckow is a son of Mrs. H. L. Suckow of Klemme, and Mrs Suckow is a daughter of Charles Bredlow of near Swaledale They were married in Oklahoma, coming back to Klemme and lived on the Suckow home farm in Liberty township for a number of years Rev Suckow has been a United Brethren minister for about ten years.

Rev. and Mrs. Suckow are the parents of four sons: Dale in the Navy, Marvin at Postville and Luther and Gordon at home.

BASS SEASON OPENS JUNE 15

For bass fishermen June 15 is the most anticipated date on the calendar. That day lifts the ban on all species of fish in Iowa. Largemouth and smallmouth bass, as well as crappies, sunfish, bluegills, and warmouth, rock, calico bass, become legal fish the 15th This group includes the nesting fish, and the season on them is delayed until this date to prevent their being fished from their nests, which are generally placed in shallow water The bass fry are now able to shift for themselves.

Conservation officials anticipate outstanding fishing in the lakes on opening day because of the high water levels, which ordinarily augur good fishing Smallmouth fishing, which in the past few years has greatly improved in the streams, is expected to continue its upward trend this year as soon as the waters are sufficiently clear to allow this fine fish to see baits and lures.

ANNUAL ALUMNI PICNIC TO BE HELD SUNDAY, JUNE 11

The annual picnic of the Klemme High School Alumni Society will be held at the Klemme Park on Sunday, June 11 beginning at 12:30 p. m. Bring two covered dishes and sandwiches and your own plates, etc.

Baby pigs easily contract mange. Clean out all old bedding before they arrive.

Blue Wins For Governor

LT. GOVERNOR BLUE

Iowa republican nominated Lt. Gov. Robert D Blue for governor, State Senator K. A. Evans, Emerson farm manager for lieutenant governor; Chet B. Akers for state auditor and J. M. Grimes for State treasurer.

Lt Gov. Blue of Eagle Grove had a lead of some over 50,000 votes to cinch the nomination. His democratic opponent in the fall election will be Richard F. Mitchell of Fort Dodge

Dolliver Unseats Gilchrist

James I Dolliver, Fort Dodge attorney, defeated Fred C. Gilchrist,, sixth district republican who was seeking his eighth term in congress in the only upset in Monday's primary election. The race between Dolliver and Gilchrist was close, according to late returns.

Dolliver is a nephew of the late Jonathan P. Dolliver, who served in the United States senate from 1900 to 1910. James Dolliver was an unsuccessful candidate for the senatorial nomination two years ago.

*Recipe given.

minutes. Pour into sterile jar and store until ready to use in refrigerator. Use 4 to 5 tablespoons to glass filled ¾ full with ice and water

Cooling salads may be either the mainstay of the meal, accompaniment to the meat or a dessert Recipes for each of the types are given here:

***Macaroni Salad.**
(Serves 8)

1 8-ounce package macaroni
3 tablespoons grated onion
¼ cup chopped green pepper
¼ cup chopped stuffed olives
1 cup chopped tart red apple
¼ cup chopped nuts
1 tablespoon lemon juice
1 teaspoon salt
¾ cup salad dressing

Cook macaroni in boiling salted water until tender. Drain. Rinse with hot water. Chill thoroughly. Add remaining ingredients and toss lightly. Serve in crisp lettuce cups.

Molded Beet Salad.
(Serves 6)

1 tablespoon unflavored gelatin
¼ cup cold water
¾ cup boiling water
⅓ cup lemon juice
1 teaspoon sugar
1 teaspoon salt
2½ cups cooked shredded beets
¾ cup diced celery
2 tablespoons grated horseradish

Soak gelatin in cold water. Add to boiling water, stir until dissolved. Add lemon juice, salt, sugar and chill until mixture thickens. Add remaining ingredients. Mix well. Pour into a mold which has been rinsed with cold water. Chill until firm. Unmold on lettuce and garnish with green pepper slices.

Save Used Fats!

Frozen Pear Salad.
(Serves 4)

¼ pound soft American cheese
½ cup top milk
¼ cup mayonnaise
1 cup cream or evaporated milk, whipped
2 tablespoons sugar
8 halves canned pears
¼ teaspoon salt
Watercress

Rub cheese through sieve and mix together all ingredients except pears and watercress. Arrange pears, core side down in flat dish and pour over them the cheese mixture. Allow to freeze until stiff, then unmold on watercress.

Desserts that are menu-perfect and point-easy are these:

***Strawberry Parfait.**
(Makes 1½ pints)

½ cup sugar
¼ cup cold water
1 egg separated
1 pint strawberries
1 cup cream or evaporated milk, whipped

Boil sugar and water until syrup forms a thread. Pour over beaten egg yolk, beating constantly. Combine stiffly beaten egg white and beat until cool. Chill, fold in berries which have been pressed through a sieve and whipped cream. Put in refrigerator tray and freeze.

THE 'OUT-DUCTION CAMP'

The army has come across with a grand idea. It will turn some of its induction camps into "out-duction" camps.

—*—

Just as he was processed to fit into the army a veteran will be processed to fit back into everyday life.

—*—

We await news of the following routine at an "out-duction" center:

Monday.

1 Injections to render a veteran immune to the "bugs" which have made pretty poor specimens of many civilian patriots.

2. Field training to harden him sufficiently to endure the picture of soft-living civilians, black market operators, chiselers, etc.

3. Lectures on how to eat off regular china.

4. Instructions on how to get into a three-piece business suit.

Tuesday.

Quiz. Sample questions:

1. What does the word "hot" mean on a bathtub fixture?

2. Give the meaning of the following words: (1) glass goblet; (2) silverware; (3) chafing dish; (4) box springs; (5) lingerie wear; (6) pewter pitcher; (7) alarm clock; (8) porch hammock.

3. What is a vest? A white collar? A pair of pajamas?

4. What is the meaning of the words "You are wanted on the telephone"?

5. Define the meaning of a sign reading "Do Not Disturb," and state in no more than ten words what you will do when you see one.

Wednesday.

1. Field exercise in how to shave with hot water.

2. Demonstrations in how to place an order for breakfast specifying a determination to achieve results.

3. Instructions in how to adjust self to a job in which no shooting is permitted or expected.

4. Lectures "Revising One's Attitude Toward the Potato"; "The Art of Leaving Dishes on the Table Instead of Taking Them Out to Wash Them in a Barrel"; "Breakfast in Bed and the Approach Thereto."

Thursday.

1. Hikes through rural country for purposes of becoming accustomed to turning a corner without awaiting word from scouts.

2 Hikes through thickly congested centers for purposes of accustoming eyes to intact buildings.

Friday.

Home Operations: These will consist wholly of preparing a discharged soldier to approach any building or home in America without first exploring for hidden mines.

Saturday.

1. Lecture on "The Silk Shirt and Its Part in Civilization."

2. Illustrated talk on "The Secret of Becoming Used to Going Around in Dry Clothes."

3. Athletic Contests: (1) Hurling the Spam; (2) Tossing the Canned Egg; (3) Casting the Baked Bean; (4) Javelin Throwing, with live sergeants as targets.

Take it from there, army!

* * *

THE FIELD MARSHAL AND SPRING

("Field Marshal Rommel, observing the spring flowers covering the fields at a point near the channel ports remarked 'How wonderful to think that beneath those flowers thousands of mines are concealed!'"—News item.)

The Nazi Marshal's face grew bright—
A twinkle came into his eyes—
His mood grew, oh so gay and light
As he observed the flowers rise;
The fields stretched out in colors gay,
The buds illumined hill and glen;
The marshal loved the fields that way—
They helped to murder many men!

The tulips and the daffodils
Waved beautifully in the sun;
They warmed the valleys and the hills
As Rommel gazed and tapped his gun;
"Exquisite are the days of spring—
How charming are the buttercups!"
He said, "They make me wish to sing
Of nature's charms . . . and those of Krupps!"

Beside the lake, beneath the trees,
He saw the flowers Wordsworth saw
And said, "It takes things such as these
The lofty moods of man to draw . . .
Continuous as each star that shines
And twinkles in the milky way
The posies hide my deadly mines
That wait to cripple and to slay!"

* * *

A two-man torpedo is now in service. Two sailors ride it to an enemy ship, attach the time-fuse "warhead" and ride home. A constant thought in the mind of any man under such a circumstance must be, "Am I sure I am on the right end of this thing?"

* * *

No Justice!

The Chinese have an awful time—
There seems to be no solace;
And, now, on top of all their woes
We send them Henry Wallace.

H. G. SMITH.

PATTERNS
SEWING CIRCLE

A BEAUTIFULLY gored and fitted frock with trim, narrow belt and flattering waist with simple V-neck to be made up in nice fabrics. Use one of the small-flower design sheer rayon crepes, an all-over print cotton, navy blue rayon crepe or a polka-dotted dimity.

* * *

Pattern No. 8646 is in sizes 32, 34, 36, 38, 40, 42, 44 and 46 Size 34, short sleeves, requires 4¼ yards of 35-inch material, 4⅛ yards of 39-inch material.

Baby Clothes

LOVELY for a tiny baby when the complete set is done in white rayon silk or fine handkerchief linen. The small coat and dress have identical yokes. For the older child, make the set with a pastel or beige or navy flannel coat and bonnet—the dress of dimity or organdie.

Pattern No. 8592 is in sizes 1, 2, 3, 4 and 5 years. Size 2, coat and bonnet, requires 2⅜ yards of 39-inch material; dress and panties require 2⅜ yards.

Whole Industrial Plants Crated, Shipped to Russia

Russia has received and reassembled two complete industrial plants shipped to her last year in crates by the United States after it was found that time and shipping space could be saved by sending the plants instead of their products, says Collier's.

One was a $1,900,000 refinery that processes 240,000 barrels of crude oil a week; the other was a $5,600,000 factory that produces 85,000 military tires a month.

The Greater Radios of Tomorrow Will Bear This Name...Watch for Them!

One of these days you'll be able to buy the new radio you want and need.

And when that day comes you will find CLARION radios on display in the stores of the nation's leading radio dealers.

There you will find a line of sets so complete, and of such mechanical excellence, keen selectivity and tonal quality, that you cannot afford to miss the opportunity of testing their values.

CLARION'S post-war offerings —in both design and engineering —will represent the refinements of CLARION'S work for the armed forces in the field of electronics.

Watch for CLARION—when its farm sets, table models, portables, consoles and radio phonographs are submitted for the civilian approval which their superior advantages warrant.

WARWICK MANUFACTURING CORPORATION

YEAR'S OUTSTANDING PICTURE TO BE SHOWN AT AVERY THIS WEEK

"The Song of Bernadette," the outstanding picture of the year, staring Jennifer Jones as "Bernadette" will be shown at the Avery Theatre at Garner this week Friday and Saturday.

On account of the length of the picture there will be but one showing each evening commencing at 8 00 o'clock A matinee, however, will be given Saturday afternoon beginning at 2 30 o'clock

One writer says, "As long as the human heart has the power to feel, to love, to suffer and to triumph, "The Song of Bernadette" will be remembered A great motion picture, wonderously conceived and enthrallingly unfolded"

When you have company or take a trip, that's news. Phone 12.

By Jergie

AN UNUSAL COINCIDENT IN LAND DEAL

On May 20th Levi A. Ridder purchased from the Lau Estate the 160 acres seven miles west of Klemme which has been known for years as the Lau Ranch.

This particular piece of land was purchased by Ridder's grandfather, August Lau in 1894.

The unusual part of this story follows: It was exactly 50 years to the very day from the time that August Lau purchased the land to the day that it was sold to his grandson, Levi Ridder. Further search of the records show that both the grandfather and his grandson were exactly of the same age when they purchased the land, namely: 42 years, 8 months and 3 days. This makes is even more of an unusual coincident.

DON'T PUBLISH MILITARY ADDRESS SAYS WAR DEPT.

The War Department has again sent out letters to all newspapers again cautioning them that they are not permitted to publish complete military addresses of men in foreign service.

Rarely a week goes by but what the publisher of the Times is asked by parents to publish the address of their son in service overseas. And then we tell them the reasons why this cannot be done.

These reasons are told in part of the following communication received from the War Dept. This should explain why we are really protecting your son in service by not publishing his address:

"As the temo of military operations step up and as more and more units are departing for combat areas, the war department is again desirous of bringing to the attention of all editors certain practices which involve the security of military information.

"It is the reference to company, regiment and division that constitutes military information. Unless it has been announced by the war department that the division concerned is in a definite location overseas, the company, regiment and division should be eliminated before publication. The same procedure should be followed in regard to ships of the navy.

"In personal news items concerning military personnel, there is no objection to general phrases such as 'serving with the air forces in the Southwest Pacific' or on the Italian front."

MANY WAR BONDS SOLD TO FARMERS

Iowa's farmers will be on the war bond investment line as well as on the food production line when the Fifth War Loan drive to "Back the Attack" opens June 12. Iowans have been asked to invest $202,000,000, $23,000,000 more than in the Fourth War Loan drive, before July 8.

Noting the start of the drive, R. K. Bliss, director of the Iowa Agricultural Extension Service, reports that Iowa farmers generally are endorsing a four point program that opens the shortest route to victory and to a sound economy in the postwar reconstruction period That program calls for maximum production, buying as little as possible, paying off debts and investing as much as possible in war bonds.

"By buying as little as he can the Iowa farmer avoids paying inflationary prices and is building up a backlog that will aid full employment of returning veterans. In deferring replacements of machinery and buildings he is making a substantial contribution toward postwar security.

"Instead of spending his income now in improvements and replacements, each farmer can schedule them and their cost in order of priority. Then he can plan a program of war bond purchases with which to finance the fruition of this schedule of replacements and improvements after the war. That constitutes a sound war program."

A sound future of Iowa agriculture rests on each farmer investing in war bonds and payments of debts the difference between his 1939 and 1943 net incomes, plus most of his annual depreciation, Bliss states.

AREAS TOO SHADED FOR GRASS MAY GROW COVER

Many gardeners find it difficult to grow grass on banks under trees and in shaded areas. L. C. Grove, extension horticulturist at Iowa State College, says certain ground covers can be established successfully as substitutes for grass in such cases.

Ground covers that do well in shade are periwinkle, Baltic English ivy, which grows best in protected areas with a north exposure. wintercreeper and pachysandra Others that may be considered are lily-of-the-valley, hypericum, and creeping butter. Banks exposed to hot sun may be planted to sedums, iris or periwinkle.

Grove say areas planted with any of the suggested ground covers should be well prepared to establish a strong growth more quickly. One inch of compost, or animal manure, should be applied over the area, if possible. This should be suppplemented with a complete fertilizer.

CANNING DISCUSSIONS, CLINICS AND DEMONSTRATIONS

Any group, club or organization in Hancock county wishing to have a discussion, clinic or demonstration on canning, freezing, drying, or brining of fruits and vegetables may contact Miss Hazel Grimes at the Farm Bureau office in Garner.

If your group desires this help, your representative should contact Miss Grimes as soon as possible in order to be sure of the date you want. The time to be used can be adjusted from one-half hour to whatever would fit the occasion.

A new bulletin on canning published by the Extension Service of Iowa State College is being mailed to each rural family in the county and distributed to families in towns by the block leaders.

We want your news. Phone 12.

VICTORY GARDENS

Most small fruits, such as strawberries, raspberries and grapes, as well as cherries, plums and apples, bear promise of a good crop. Follow approved spray schedules to obtain highest quality fruits. Consult the Iowa Home Orchard Spray Schedule for appropriate sprays. It is pamphlet No. 86, available free at the county extension director's office or by writing to the Agricultural Extenson Service at Ames, Iowa.

* * *

If the weather continues moist and cool, plant diseases may be severe. They can't be cured, so they must be prevented. Plan now to protect plants with fungicidal sprays before disease outbreaks occur.

* * *

Most potato seed this year carried a trace of blight disease. With cool, wet weather so prevalent, the disease may become serious. Don't take chances. Spray with bordeaux mixture. Use 4 tablespoonfuls of dry bordeaux mixture to 1 gallon of water. If you add 2 tablespoonfuls of lead or calcium arsenate to this mixture, you can kill the Colorado potato beetles at the same time.

* * *

Many gardens are in serious need of culivation Every weed is a "saboteur," stealing moisture, plant nutrients and living space from desirable plants Many weeds serve as "supply bases" for plant disease organisms. Spinach blight, strawberry leaf spot and Septoria blight of tomatoes are carried by such weeds as lambsquarter, cinquefoil and horse nettle, respectively.

* * *

To kill weeds most effectively, cultivate just deep encugh to cut the weeds off The weeds will be killed quicker if this is done on a warm, windy, dry day. Deep cultivation is undesirable.

* * *

Avoid working in the garden when plant foliage is wet Working on one infected plant may spread the disease to all other plants in the row It is good economy to remove and burn any abnormal, stunted, curled or yellow plants. This helps to control diseases which may be present.

* * *

Many gardens were severely damaged by washing or flooding this spring It's not too late, however, to make plantings of the staple crops. Snap and lima beans, both bush and pole, beets, carrots, cucumbers, kohlrabi, peppers, pumpkins, radishes, lettuce, acron squash, chard, tomatoes and cabbage—all still have plenty of time to mature If vegetable soybeans are planted, use Kanro, Sac or Bansei. Successsion plantings will pay big returns

LT. MISSMAN WRITES HIS FATHER FROM PACIFIC THEATRE OF WAR

Builds Dental "Office" Out Of Side Of A Hill

May 11, 1944

Dear Dad,

Just a few lines. Did I tell you I participated in the Cape Gloucester landing? What a smooth operation I can well believe some of the stories Florence told about when she was overseas They were true I guess you know I know how to give blood plasma now A good tip to your healthy patients would be to donate a pint or so of their good red blood Boy! How a man in deep shock takes it up and you can actually see his blood pressure come up I've seen any number of lives saved by plasma alone.

At present I'm surrounded by coconut trees All of them have been planted in nice neat rows Like corn, all planted by a big corporation Some of them seem to be a little busted up and it wasn't due to the weather And mud, today is the first day in exactly ten that my feet have been dry After being wet so long they get big white water-blisters all over them but they always come out okay Isn't it surprising what the human body can tolerate? The good Creator did a wonderful job, didn't he?

The bay has been "out of bounds" due to sharks and barracuda one of the boys have caught some (looks like an anergram camp

Now I might tell you about the construction of my dental office (the 5th time) On a side hill of course, and slicker than the very devil, so that required some excavation, and it was like digging in a sweet clover field of about 4 years duration Then of course, we had to block up the dirt so the rain (what happens twice a day 10 00 A M and 9 00 P M and you can almost set your watch by it) All this was accomplished by "snaking" a big coconut log out of a waist deep swamp, we lashed the log to three tent poles and when we got to the abrupt rise in front of the tent we used a winch on the front of an ambulance Finally we covered the deck (floor to you landlubbers) with coral and it gets as hard as cement and is very white What stuff that would be for highways

I'm now pushing 17 months overseas and am allowing myself to think of seeing my wife and folks in a few ?? months I have several reasons for believing that

A friend of Jessie's and mine are together and we plan to make a trip by LCT (you surely know what they are) to an island to visit a "Mob" Hospital (Mobile Hospital) and may do a little deep sea fishing on the side However 10 knots may be a bit too speedy We will give it a "fair go you know". I might add its hot as the very devil and most humid Nights are typically tropical but personally I'll take Iowa in any season

So they are drafting the boys eh Not a bad idea I'd say, after all the war is overseas. thank God, and that's where it must be fought.

I'd give a lot to see my folks for a day, especially after an absence of 2 years. The "Gravy Train" is losing some charter passengers, and its about time.

So with a little sarcasm I'll wind up this missile,

Your son,
Byrnes.

Use airmail it travel much faster

CAPT. A H DULMES MOVES TO NEW LOCATION IN ITALY

The Times is inreceipt of a letter from Mrs. A. H. Dulmes stating that her husband, Capt. A. H Dulmes has a new address in Italy

He made the trip in an open car and said the scenery was very beautiful through the country in which he traveled to his new work. He is now working in a much larger hospital and is in charge of two wards. He has already met some friends with whom he becmae acquainted while in the state of Washinton. However, he stated that he did not like to leave his old outfit.

The War Department requests newspapers not to publish foreign addresses of men in service, so we are not permitted to give you "Doc's" new address. However, friends may obtain it by calling the Times.

Around Iowa

QUICK WORK

Four hours after she lost her purse near Glenwood , an army major's wife on her way to Kentucky again had the article in her possession. The purse was picked up by two boys just as a motorist came along. The motorist took the purse to Red Oak and turned it over to Sheriff Zeph Morgan who wired the recovery to the Major Later, the woman still in Red Oak reported the loss to the sheriff, who immediately gave her the bag, with cash, travelers cheques, ration books, gasoline stamps and personal belongings

AS GOOD AS NEW

Frank Castleman of Hamburg found himself in a new business last week He tore down the filters used in making of vinegar In the large vats were many loads of cobs used in the process of making the vinegar Many Hamburg residents will have a good kindling supply this fall as Mr Casleman sold the cobs. The future kindling is about 20 years old and as good as new.

NOT BOMBED

When a large section of the wall of a building in Hamburg fell out recently residents wondered what was happening in their city. Luckily, no one was passing at the time the wall fell into the street.

"THE TRANSIENT HOUR"

The title of the first full-length play written by Gordon H Felton of Indianola is "The Transient Hour." It was the first full-length play by a student ever produced at Rollins college, Winter Park, Florida Felton, a student at Rollins, has been editor of a national magazine of poetry for two years.

RUSSIAN AUDIENCE

Lieutenant (j g) Richard Selman of Blakesburg recently received a collection of art reproductions presented by the International Setmans Club for appearing in a concert with Gregory Ginburg. Mr. Ginsburg is head of the piano department in the Conservatory of Moscow in Russia. Lieutenant Selman presented several numbers on his violin including "Meditation" from Thais, "Minuet in G," "Serende" by Schubert and "Tromerad" by Schuman.

RUNAWAY

Residents of Donnellson saw their first runaway in many a month recently when a team belonging to Otis Leffler took off down the streets. The team was hitched to a two-wheel box wagon. During the unescorted trip down the streets, the wheel and other parts became loosened and were strewn along the way. When the team was stopped and driven back to the main part of town, some of the Donnellson folks assisted Mr. Leffler in picking up the lost articles and hook them on for the trip home.

EASY FISHING

The recent floods have made it easy for those who like to fish. Carl Frier of Reinbeck reports that when the flood waters came up into the hog lot on his farm some carp also got that far. After the flood waters receded, the carp became trapped in his lot. Some carp were found to be eating the corn sprouts in one nearby field.

WEEKLY NEWS ANALYSIS

U.S. Employment Shows Decline; Nazis Continue Retreat in Italy; Japanese Tighten Grip on China

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Zero Hour—Yanks await signal to attack Jap machine gun nest in Burma.

EMPLOYMENT:
On Decline

For the first time since the war began, the nation's manpower appeared in balance with needs, with supply of labor in critical areas the only problem, the National Industrial Conference board said.

Earlier the department of agriculture noted a 4 per cent decline in farm labor, with some of the decrease attributed to the inability to get into the fields because of unfavorable weather. As a result of the delay, many farmers were expected to switch acreage from small grains to row crops, necessitating additional work.

Reflecting the continued drop in manufacturing industries, there were 41,800,000 non-farm workers in March, compared with the peak of 43,000,000 in July, 1943. Only in transportation was there an increase shown over last year.

EUROPE:
Foe Reels

With soldiers from six nations fighting shoulder to shoulder in Allied ranks, the Germans fell slowly back in Italy, their retreating columns under heavy fire of the advancing host, drawing closer to the Eternal City of Rome.

As the Allied blow fell in Italy, thousands of U. S. and British planes continued their heavy bombardment of Axis communications and industry in western Europe, their explosives twisting steel rails into fanciful forms and reducing segments of factories into smouldering pyres. Preparatory to a great offensive from the east, Russian bombers hammered at Nazi supply bases.

Mediterranean Commander Sir Henry Maitland Wilson (left) confers with Lieut. Gen. Mark Clark of 5th army (center) and Deputy Mediterranean Commander Jacob L. Devers on Italian front.

With the collapse of their Gustav line in Italy, the Germans fell back slowly toward the Anzio beachhead to the north, where their embattled troops clashed with massed Allied forces slugging for a breakthrough, which would trap the retreating army from the rear.

West Wall

The searching eyes of aerial photography have uncovered what lies ahead of Allied troops massed to storm Germany's formidable west wall.

Under command of icy, 69-year-old Field Marshal von Rundstedt, the west wall shapes up as a series of deeply entrenched steel and concrete fortifications stretching back far inland, and carefully camouflaged to prevent concentration of Allied fire on them.

Dotting the scenic French landscape are innocent-looking, little houses, sheltering the muzzles of big German field pieces whose carriages are sunk into the ground, and poking their noses from the sides of hills, are rocket guns buried in the terrain.

CRYPTOSTEGIA

The government's experimental rubber project in Haiti has been abandoned as a failure and an investment of $8,000,000 is being written off. It was explained that it was found impossible to recover any appreciable quantity of rubber from the desert vine "cryptostegia" which was grown on the 40,000 acre tract.

It had been confidently hoped that this tough plant would become a major source of rubber for this hemisphere and would provide a money crop for the natives.

PACIFIC:
1,000-Mile Advance

With his forces taking another long jump of 125 miles to the northwest in Dutch New Guinea, Gen. Douglas MacArthur advanced closer to his cherished goal of the Philippines, there to avenge Bataan.

The latest gain drew U. S. forces nearer to the thick cluster of islands lying off Dutch New Guinea which the enemy reportedly has fortified with air bases to counter any Allied thrust against the Indies to the south or the Philippines to the north.

In advancing 125 miles westward, U. S. forces were 1,000 miles away from Milne Bay, far to the southeast and from which General MacArthur launched the campaign that has gradually pushed the Japs out of their farthest South Pacific holdings.

TRANSPORTATION:
Overhauling Asked

Correction of inequalities and discriminations in present freight rate structures to reflect the cost of service, and creation of three permanent federal agencies to keep abreast of transportation problems, were among the recommendations made by a special board of investigation and research organized by congressional enactment in 1940.

At the same time, the board went into the south's protest against certain freight rate differences benefiting the northeast, declaring that figures showed that what the south really needed was a development of her own industry to utilize her abundant natural resources.

The board called for the shippers' freedom in the selection of reasonable joint routes and rates of the same or different types of transportation facilities to speed commerce.

CHINA:
Seek Unity

With the Japanese tightening their grip on China through their control of her seaports and productive industrial centers, Chiang Kai-Shek moved to gird the country for a final stand against the enemy by drawing the Communists in the north fully into the battle.

As Chiang met with Communist leader Lin Tso-han, Chinese regulars continued their drive into northern Burma, in an effort to join up with Lieut. Gen. Joseph Stilwell's troops moving eastward from India, and thus open a new supply route to China.

Upon the extent of Chiang's concession of self-rule and participation in the Chinese central government to the Communists reportedly will rest the degree of their cooperation.

BRITISH EMPIRE:
Favor League

Having concluded their long conference with Prime Minister Churchill, Britain's dominion premiers packed their bags for the trip homeward, but not before issuing a statement favoring a world peace organization and avowing a fight to the finish against the common enemy.

"We affirm that after the war a world organization . . . should be set up and endowed with the necessary power and authority to prevent aggression and violence," the premiers said.

"We rejoice in the unquenchable spirit of our comrades in every country still in the grip of the enemy," the premiers declared. "We shall not turn from the conflict till they are restored to freedom. Not one who marches with us shall be abandoned."

MISCELLANY:

LESS MEAT: There will be about ten pounds less meat per capita available during the latter half of the year, the bureau of agricultural economics estimates. This would mean that average consumption per person for the six month period would total 67.5 pounds, about the same as in the second half of 1943, when all meats were on the ration list.

REHABILITATION:
Navy Program

After six months of operation of the rehabilitation program for men and women at the U. S. naval hospital at Great Lakes, exhibits told an interesting story of the success of the project under direction of Lieut. Comdr. R. E. Kinneman.

On display were fancy scarves, purses and belts in yellows, whites and greens. There were such useful articles as ash trays and billfolds, and such chippery bric-a-bracs as clay turtles and yarn dogs. Pictures caught the charm of the outdoors and depicted naval life.

Created to stimulate the minds of patients as well as restore the mobility of injured limbs, the rehabilitation program also has served to help the convalescents to uncover many talents of which they were never aware.

OIL:
New Field

With the discovery of a promising big oil field in Mississippi which alreay has brought in two large wells, attention was focused on a whole tier of southeastern states.

According to oil authorities, approximately 155,000 miles of territory at the roots of the Appalachian mountains in North Carolina, Georgia, Florida, Alabama and Mississippi are underlain by sedimentary rocks, which might bear much petroleum.

Although a 130,000 mile territory in Texas and Louisiana has already given up 14 billion barrels of oil, authorities' enthusiasm for the prospective southeastern field has been tempered by reports that its zones for accumulation of petroleum are fewer in number and the thickness of the sedimentary rocks are less than in the Texas and Louisiana regions.

LABOR:
Foremen Back

Three thousand five hundred members of the Independent Foremen's association of America trooped back to their jobs in Detroit, Mich., plants after the chief of the army air forces, Gen. H. H. Arnold, declared their strike had already cost production of 250 long-range P-51 fighter planes and could affect invasion operations.

Gen. Arnold
R. H. Keyes

As a result of the foremen's walkout over demands for union recognition which industry opposed on its traditional grounds that foremen are a part of management, nearly 50,000 workers had been laid off because of the lack of adequate supervision of production.

Following General Arnold's testimony, the association's national president, Robert H. Keyes, issued instructions for ending the strike, charging the government with delaying settlement of the case.

REFRIGERATION:
Ease Space

With warehousemen and food handlers cooperating fully with the War Food administration's information centers, cooler occupancy was at 82 per cent in May, with much space of this type not ordinarily used at this time well filled.

At the same time, WFA announced that freezer occupancy stood at 85 per cent in May, with much room made available by the clearance of fruits, vegetables and poultry.

With demand for cooler space expected to continue, WFA revealed that it would push its program for converting cooler space at 32 degrees to 50 degrees to freezer space at 31 degrees and lower, and vice-versa.

JOINT COMMAND:
Draws Support

The touchy question of combining the different branches of the services into a single command, so strongly favored by the army, drew the support of President Woodrow Wilson's secretary of the navy, Josephus Daniels.

Mincing no words, Daniels declared that the disaster at Pearl Harbor resulted from a divided command, and asserted: "History is replete with the squabbles between the army and navy which prolong wars, showing the necessity of combination."

When he was working for unification of the services during World War I, Daniels said, Secretary of War Lindley Harrison told him: "Joe, I don't care a damn about the navy and you don't care a damn about the army. You run your machine and I will run mine."

DISEASE

The campaign against social diseases scored a victory on one front and lost ground on another last year. In the second half of 1943 there was a decline of 16 per cent in new cases of syphilis among civilians but gonorrhea cases jumped 11 per cent.

The number of new syphilis cases for the six months term was 245,000, compared with 290,000 in the second half of 1942. Gonorrhea cases were set at 158,000, compared with 137,000 in the latter part of the preceding year.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

PRESIDENT'S HEALTH

When congressional leaders called at the White House for the first legislative conference following the President's return from South Carolina, he looked fit as a fiddle. However, Senate Majority Leader Alben Barkley popped the question that has had the capital worried because of those wild rumors about the Commander-in-Chief's health.

"How do you feel?" asked the Kentuckian.

"Great," replied Roosevelt. He added that he had got in 12 hours of sleep a night and plenty of sunshine.

He was brown as a berry and buoyant as ever. However, congressional leaders noted that his face was a little thinner. Admiral Ross T. McIntire, the President's physician, accepts responsibility for this. Roosevelt has knocked off 10 pounds under McIntire's orders. He is still five pounds overweight according to his physician's standards, but McIntire figures that this can be corrected by proper dieting.

* * *

NAZI CHANNEL DEFENSES

Of all the variegated defenses Hitler has conceived to block the Second Front — from rocket-guns to flame on the Channel—the one which the Allies are worried most about is the plain, relatively old-fashioned machine-gun nest.

The Nazis have developed a new type of machine-gun nest, tried it out at Cassino, and it was one reason for our failure to advance.

This pillbox is of very heavy concrete, quite small, extends only a foot or so above the ground and is extremely difficult to see from the air. The pillbox usually houses two machine guns, hitched together so that one man can fire both.

One Nazi is in each pillbox so that if he is hit only one man is lost. But it takes almost a direct bomb hit to knock him out, so air pounding of them from overhead is not too effective. These pillboxes, buried in the mountains at Cassino, were terrifically effective, and more of them are reported lying in wait behind the shore along the coast of western Europe.

* * *

DISCHARGE BUTTONS

With more than a million men now honorably discharged from the army for wounds, health or age, the question of honorable discharge buttons becomes more and more important.

It took the army some time to design a discharge button, but now that it is designed, men and officers have a hard time getting it—unbroken. The buttons are made of plastic and when mailed to veterans, usually arrive in broken pieces.

One discharged air force captain got his discharge button all right in an envelope from Maj. Jesse C. Hicks, assistant quartermaster, Hill Field, Ogden, Utah. But there was no packing around it and it was in several pieces. When he wrote back for a new button, Major Hicks replied:

"There are no provisions for replacing broken buttons. Therefore, we are unable to comply with your request."

Note—Some of the boys think that with all the gold we have buried at Fort Knox, we could spare some for those discharged.

* * *

STATE DEPARTMENT HARANGUE

Dignified, delightful British Ambassador Lord Halifax called on Undersecretary of State Stettinius some time ago on a secret matter. While they were closeted together, Assistant Secretary of State Adolf Berle, diminutive and precocious, joined them.

Soon, high-pitched scolding voices came from Stettinius' office. Callers in his anteroom could not help overhearing the harangue as it reverberated even through the heavy mahogany doors of the state department.

Finally, Lord Halifax was ushered out. Later Stettinius came out, followed by Berle, who looked a bit agitated.

"Was I too tough with him?" asked Berle.

"No," said Stettinius, "you were just right."

"I felt," said Berle, with the air of a parent who has just delivered a good spanking, "that it simply had to be done."

What it was all about was not divulged, but Berle has been carrying on long discussions and arguments with the British regarding the future air routes of the world.

* * *

JEEP INVESTIGATION

Government bureaucrats were taken for a sleigh ride behind closed doors when they attempted to justify budget requests for "investigating" jeeps, during hearings on the supplemental national defense bill.

Engineering experts of the department of agriculture sprang the jeep scheme, claiming that they needed $15,000 to determine the value of the jeep for farm work "as a substitute for tractor power." It was noted that the current tractor shortage might get worse after the war.

Walter Winchell

(WNU Service)

Talk about different angles: Julie Haydon, the actress, is doing a book, which she illustrates as well. It's about her dog. The theme: One day in its life . . . She studied its every move and emotion for a day and night. The title: "Every Dog Has Its Day" . . . The recent tribute to Eddie Cantor (by over 1,500 admirers) was the first sincere testimonial in a long spell on Broadway . . . It commemorated his 35th ann'y in show business. Flowers to the living . . . Joan Crawford and her husband, P. Terry, are doing a Hayworth - Welles. Wearing suits made from the same material.

Bigtown Vignette: On the George Washington bridge, the other Sunday afternoon, flocks of young girls in their colorful summer dresses were decorating the scene . . . Far below was a grey war-like freighter at anchor . . . The sailors on guard by the stern gun were like little toys. They were waving to the girls . . . They shouted and called back and forth but no one could hear what they were saying . . . The wind was blowing and the distance was too much . . . Then a sailor came on deck . . . He had a trumpet . . . And pointing to the distant span he played some beautiful horn music . . . He must have been a professional in civilian life . . . One of his renditions was: "Come to Me, My Melancholy Baby" . . . He looked like a little toy on the deck of the ship . . . His trumpet looked like a toy, too . . . His music came up through the air, thin and clear, like music from a toy horn . . . And down the Hudson you could see the bay and the open sea . . . Where the freighter would sail soon for the fighting . . . The trumpeter really "sent" the girls . . . There sure was a lot of youthful yearning on the breeze.

We Hadn't Heard It Before: About the fat whale and the skinny whale. The fat whale said: "My goodness, you're thin! What's wrong with you?"

Replied the skinny whale: "I've been having bad luck, been in bad waters and no food."

"Tell you what," said the fat whale, "why not swim to the English channel? The Allies are exploding a lot of Nazis into the air there."

So the skinny whale swam and swam, and six weeks later, skinnier than ever, swam back to his fat friend.

"Well," puffed Fatso, "why didn't you do as I told you?"

"I did," said the skinny whale, "but when those Nazis came down into the water—they all had marks on their chests saying they were supermen—and I just couldn't swallow that baloney!"

Hitler was never either a housepainter or a paper-hanger. (He was a very poor artist who at one time used to put his paintings in an oven to "antique" them.) . . . He has had a longer life than Napoleon (52) and Alexander the Great (32), but Caesar died at 56 and Genghis Khan at 65 . . . Although Adolf's father was named Schicklgruber, der rat who became der fuehrer was never called that . . . Hitler's father was a ne'er-do-well, who died in the belief his son was a zero . . . The old man wed three times. At 27 he married a woman 41; at 48 he married a girl 25 . . . At the end of World War I Adolf trimmed his von Hindenburg-type mustache to the ridiculous lip-patch he wears today.

Himmler is the only one to get away with imitating der fuehrer's mustache, and even that is an unreasonable whacksimile . . . Robert Ley, creator of the German labor front, quaffs a pint of brandy before breakfast . . . Fritz von Papen became military attache to Washington on the strength of his wife's money. He twice failed the entrance exams to the War academy, yet he wore the insignia of the General Staff . . . Von Ribbentrop got rid of Koerster and von Hoesch (German ambassadors to France and England respectively) with shots in the arm which produced air embolus.

Goebbels attended six universities and entered Heidelberg on the strength of a scholarship from a Jewish professor named Gundolf . . . When Hitler spent his early days in a Viennese flophouse, the only man who befriended and helped him was a Jew named Neumann . . . Nazi street fighting tactics originated at the world premiere of "All Quiet on the Western Front," the most pacifistic of all German pictures. The Hitler gang objected to Remarque's theories.

Goering dotes on caviar, regardless of his aversion to other things Russian (such as the Red army), and gobbles it by the spoonful . . . Mussolini never liked him because his outthrust chin and affected swagger were too much like Finito's . . . When he has time for it, Goering goes hunting on his estate for animals that are delivered to his home regularly . . . Speaking of animals: His Brownshirt gorillas, in the early days, wore rings which held two sharp blades conveniently released by a spring.

ON THE HOME FRONT with RUTH WYETH SPEARS

HERE is a cookie jar that can be made at home from scraps and ends of wood stenciled with gay peasant figures and quaint lettering. But that is not all. The jar or box sits on an old fashioned brightly painted corner shelf . . .

USE ACTUAL-SIZE PATTERN TO CUT COOKIE BOX AND CORNER SHELF OF THIN WOOD
COOKIES
STENCIL PEASANT FIGURES AND LETTERING ON BOX

which may be cut out of thin wood and put together quickly with glue and brads.

Even if you do not have a coping saw or a coping saw to cut the graceful curves of the pieces, you may mark the design on a piece of plywood or other wood and have it cut at your nearest woodworking shop. As for the cookie box, it is all straight lines.

* * *

NOTE—Mrs. Spears has prepared actual size pattern for this corner shelf and cookie box; also a stencil alphabet with complete color guide for the lettering and peasant figures, all on one large sheet which will be mailed for 15 cents. This includes cost and postage. Ask for Pattern 266 and write direct to:

END LAXATIVE HABIT THIS EASY WAY

Millions Now Take Simple Fresh Fruit Drink—Find Harsh Laxatives Unnecessary

It's lemon and water. Yes!—the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning this wholesome drink stimulates bowel action in a *natural* way and assures most people of prompt *normal* elimination.

Why not change to this healthful habit? Lemon and water is good for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalize, aid appetite and digestion. Lemon and water has a fresh tang, helps clears the mouth, wakes you up.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

WOMEN IN YOUR 40's

Do You Hate HOT FLASHES?

If you suffer from hot flashes, feel weak, nervous, a bit blue at times, all due to the functional "middle age" period peculiar to women—try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.

Pinkham's Compound is made especially for women—*it helps nature* and *that's* the kind of medicine to buy! Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

FALSE TEETH HELD FIRMLY BY Comfort Cushion

NOW WEAR YOUR PLATES EVERY DAY HELD COMFORTABLY SNUG THIS WAY

It's so easy to wear your plates every day when held firmly in place by this "comfort-cushion"—a dental formula.

1. Dr. Wernet's Powder lets you enjoy solid foods—avoid embarrassment of loose plates. Helps prevent sore gums. 2. Economical—a small amount lasts longer. 3. Pure, harmless, pleasant tasting.

All druggists—30¢. Money back if not delighted.

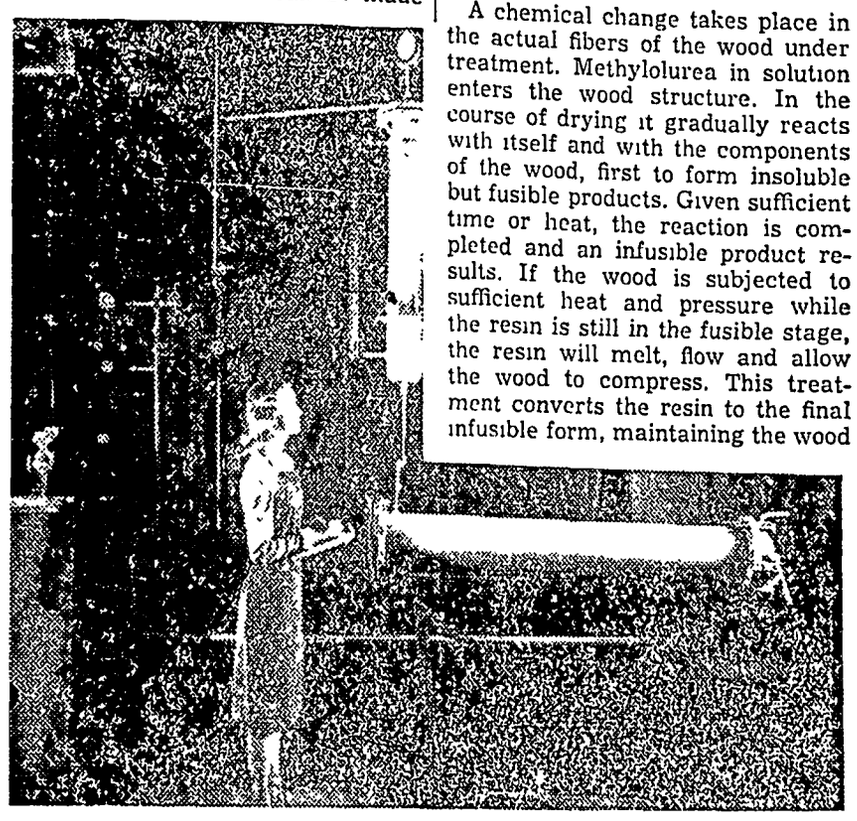
Sixty nt is in the central region Iowa and Missouri on the west, and New Jersey, Pennyslvania and New York on the east. Three and one-half million acres are considered desirable for shelter belts."

The soil conservation district program, under which the farmers themselves decide what lands are suitable for woodlands, today offers a practical opportunity for giving the Du Pont process a real tryout

By means of the process, wood can be made for the manufacture of doors, windows and drawers that will not swell and stick, or contract and become loose. Wood can be made strong enough to substitute for even steel in certain machinery parts. In a few days woods harder than ebony, which take a century to grow, can be made at small expense.

Poplar becomes harder than hard maple, which in turn can be made harder than the hardest tropical woods. The compressive strength of wood is so increased, and other properties imparted, that in fact a new material is created, which can be called "transmuted" wood. By this process, near-at-hand species of woods that grow on your own woodlot can be made as useful as the costlier, scarcer varieties, many of which are imported from distant lands.



Impregnating apparatus in the Du Pont experimental laboratories is rather simple. The wood is placed in the horizontal cylinder. The overhead tank contains the solution of methylolurea, which flows down and impregnates the fibers of the wood. A vacuum is first created in the cylinder, then pressure.

Won't Warp or Shrink.

Furniture made from the transmuted wood can be shipped throughout the world to humid tropics or dry areas with assurance that it will not warp, swell or shrink. A built-in finish is imparted so that scratches may be removed by simply smoothing and rubbing. By mixing dyes with the impregnating chemicals, light-colored pine may be given the color of cherry, mahogany or ebony; or the wood may be made green, purple or any bright color throughout.

Veneers sufficiently treated become self-bonding, requiring no adhesive to be formed into plywoods, since heat and pressure fuse the product into a hard, dense substance. Even sawdust, shavings and similar woodwastes may be moulded into articles with dyes incorporated.

Methylolurea — pronounced methil-ol-urea — is compounded by adding urea to dimethylolurea. Both materials are white and soluble in water. They are produced from ammonia, carbon dioxide and methanol, which are synthesized from coal, air and water. Urea results from the reaction of ammonia and carbon dioxide. Formaldehyde, which is derived from methanol, condenses with urea to form dimethylolurea.

These chemicals are being produced cheaply on a large scale, but are under allocation by the war production board. Small quantities for investigation and preliminary tests, however, can be obtained without formal allocation. After the war large quantities can be obtained.

The equipment required may be quite simple. In fact, most of the apparatus now used in impregnating wood with various substances, such as creosote and flameproofing chemicals, can be adapted with minor alterations.

Because of shorter treating periods, however, smaller scale equipment can be used. An ingenious mechanic who understood the principles of the new process could rig up equipment from elements on hand in most plants, the chemists declare.

Equipment Simple.

All that is required is a chamber capable of withstanding the necessary vacuum and pressure in which the wood is placed. A steam jet ejector is an effective, simple means of producing the vacuum. The chamber should be equipped with a pressure door or removable head, and with a source of vacuum and of pressure. A tank for preparing the solution, an auxiliary overflow tank, and means for drying the wood are also needed. Mild steel equipment may be used.

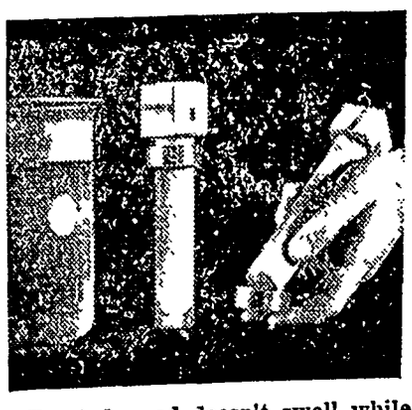
The chemicals are no more corrosive than water, and are neither flammable nor poisonous. To prevent rusting, it is desirable to apply a waterproof finish to the exposed surfaces of the equipment. This type of equipment could be set up and operated in almost any lumber handling concern throughout the country.

A chemical change takes place in the actual fibers of the wood under treatment. Methylolurea in solution enters the wood structure. In the course of drying it gradually reacts with itself and with the components of the wood, first to form insoluble but fusible products. Given sufficient time or heat, the reaction is completed and an infusible product results. If the wood is subjected to sufficient heat and pressure while the resin is still in the fusible stage, the resin will melt, flow and allow the wood to compress. This treatment converts the resin to the final infusible form, maintaining the wood in the dimension resulting from the press.

Thus, treated wood may be compressed to produce a stable, extremely hard, dense product with a consolidated closed surface requiring no filling, sanding or polishing.

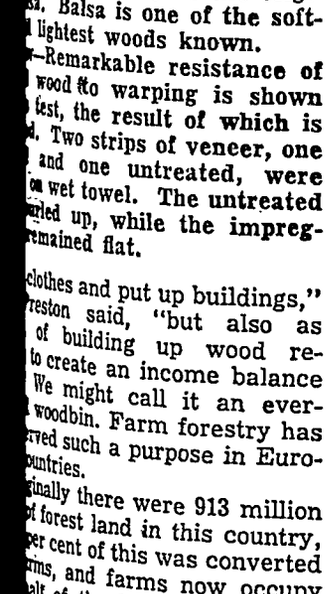
It is possible to apply moderate pressures sufficient to compress and consolidate only the surface or outer zone of the treated wood to produce a hard finish. If polished or embossed platens are used, these finishes can be reproduced on the surface of the wood. As far as is now known, the treatment does not have any adverse effect on the gluing and finishing characteristics of the wood. Flame resistance is improved, and the wood is also more resistant to fungi, rot and pest infestation.

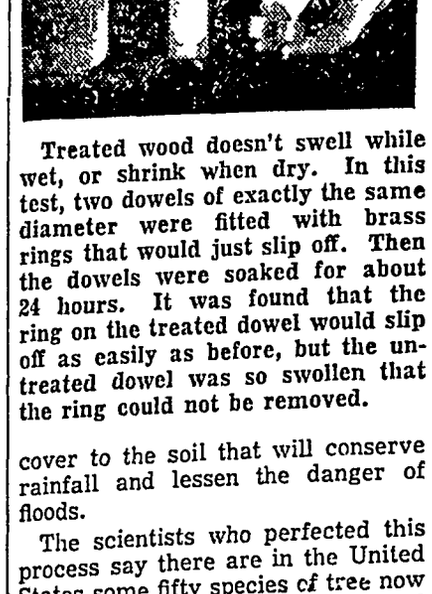
But from experiments made in Du Pont laboratories, it appears certain that a process has been developed which will give new value to the trees standing on every farm woodlot. That should give an impetus to reforestation of many marginal farms, bringing back a woodland cover to the soil that will conserve rainfall and lessen the danger of floods.



Treated wood doesn't swell while wet, or shrink when dry. In this test, two dowels of exactly the same diameter were fitted with brass rings that would just slip off. Then the dowels were soaked for about 24 hours. It was found that the ring on the treated dowel would slip off as easily as before, but the untreated dowel was so swollen that the ring could not be removed.

The scientists who perfected this process say there are in the United States some fifty species of tree now used for industrial purposes, and nearly 1,000 types for which no practical use has been found, largely because of their softness. With this new magic applied to the very soft woods, all can now be added to the resources which will help to make a victorious postwar America something like the dream which the technicians have envisaged.





Two pieces of wood, one impregnated with methylolurea and the other untreated, were exposed to the flame of an alcohol burner. The untreated wood soon took flame, while the impregnated merely chars.

At right is shown a demonstration of hardness. Two blocks of wood, one treated, the other untreated, but otherwise exactly the same, were squeezed with a "C" clamp to the same extent. Untreated wood shows a deep depression, while treated wood was scarcely dented.

IMPROVED UNIFORM INTERNATIONAL

SUNDAY SCHOOL Lesson

PAUL PLEADS FOR A RUNAWAY SLAVE

LESSON TEXT—Philemon 4-21.
GOLDEN TEXT—Be ye kind one to another, tenderhearted, forgiving each other, even as God also in Christ forgave you.—Ephesians 4:32.

Brotherhood is one of those fine qualities or impulses of the soul of which men like to speak when all is fair and prosperous, and promptly forget in times of distress and struggle. That is just where Christianity shows forth at its best, for it is in the hour of need, sorrow, or affliction that real Christian brotherhood shows its depth and durability.

Paul was in prison when he wrote to Philemon. The one of whom he wrote, Onesimus, was a slave who had deserted his master and probably defrauded him (v.18). He had been converted, and now was being sent back to his master. So we have three Christian men dealing with a very delicate matter, and providing us a picture of brotherhood in action. We learn that it is—

I. Courteous (vv. 4-9).

After a fine spiritual salutation, Paul enters upon an appeal to Philemon which is a model of tact and courtesy. One could wish that those who think that being faithful to the Lord and true to His Word means being blunt and unkind, would learn of Paul.

First he lets Philemon know of his prayerful interest in him. Paul had been praying for him, that's why he could say such a helpful word. Praying for our fellow man prepares us for genuine brotherly love.

Then he recognizes Philemon's goodness, and his effective testimony for Christ. This is an excellent approach to the making of a request, but be sure that it was not empty or hypocritical flattery. We do well to recognize the fine qualities of our Christian brother, and we could profitably speak of them more than we do.

Then Paul was ready to make his request. See how nicely he does it. He skillfully reminds Philemon that he might make some demands, and especially in view of his age and his imprisonment. But he will not do so, rather he says, "I beseech thee." There is fine Christian courtesy.

II. Considerate (vv. 10-16).

Paul, the aged prisoner, had found in his new convert, Onesimus, a real helper. He would have liked to keep him. In fact, says he to Philemon, Onesimus could do for me the things you would want to do if you were here (v. 13).

Undoubtedly Paul could have been sure of the willingness of Philemon. He could have assumed that the request would be granted. And in any case, Philemon did not even know where Onesimus was, so why not keep him?

True Christian consideration respects the personal rights and the property rights of another. We must not assume, or demand, or put pressure on anyone (v. 14) to get what they have or to draw out their service.

Another expression of consideration is found in verses 15 and 16. Philemon had lost a heathen slave, now he is receiving back a Christian brother. No worker will give less in service, and no master will demand more, because the two are both Christians. We need to recognize that fact, for all too often men presume on their relationship as brethren. But the fact that they are Christians should make a great difference in their attitude toward one another.

III. Cooperative (vv. 17-21).

Partners share the benefits and the burdens of their joint enterprise. Partners in the gospel, like Paul and Philemon, shared not only spiritual blessings, but also the responsibilities. Paul was presenting such an item to Philemon in the return of Onesimus. Something had to be done about the debt of Onesimus, his failure as a servant. Paul says, "Charge it to me, your partner."

It has been pointed out that there is here a blessed example of the important doctrine of imputation, which is the "act of God whereby He accounts righteousness to the believer in Christ," because He "has borne the believer's sins in vindication of the law." So we note that verses 17 and 18 perfectly illustrate imputation.

Paul's promise "I will repay it" (v. 19) was the legal phraseology of a promissory note in his day. It was a bonafide partnership transaction, yet it was coupled with a reminder of indebtedness. Everything Philemon had and was he owed to Paul; but, says the latter, "I will not speak of that now." Consideration again, but opening the door wide for Philemon's cooperation.

No right thinking person is content always to be on the receiving hand. The humblest recipient of favor or the smallest child who feels the love of another wants to respond. The considerate friend will, therefore, not always insist on giving, but will graciously (like Paul) open the way for cooperation, for partnership.

For you to make

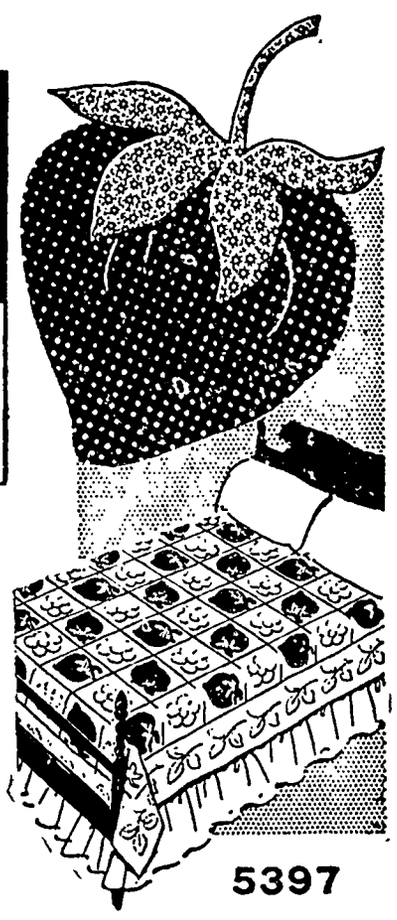
5664

Tufted Fascinator

SMALL fluffy snowballs perched all over a coral fascinator! Crochet it in a big mesh—sew the wool tufts made of a contrasting color on the finished fascinator. It's as pretty a fascinator as any you've seen!

* * *

You will obtain complete crocheting instructions for the Tufted Fascinator (Pattern No. 5664).



5397

Strawberry Patch Quilt

A "STRAWBERRY patch" quilt makes one of the loveliest quilts you've ever seen! Big, fat berries about 5½ inches across are appliqued—plain blocks have white strawberry flower designs to be quilted—leaf design around border is quilted in pale green thread.

* * *

You will obtain complete cutting pattern for Strawberry Quilt (Pattern No. 5397), quantities of materials specified, finishing directions and quilting directions.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Household Hints

If you will keep your jar of peanut butter turned upside down on the pantry shelf, the oil will stay mixed and the top of the butter will not dry out.

* * *

Adhesive tape on toe and heel of baby's shoes will keep him from taking a header on the newly waxed floor.

* * *

Make your extension electric cord last longer by wrapping it around something cylindrical when not in use.

* * *

Make your own celery salt by drying celery leaves, rolling into a fine dust and adding in an equal amount of salt.

* * *

A sewing machine should be oiled after every ten hours of use, by putting a drop of oil on each bearing, as directed in the book of instructions.

* * *

A spring clothespin painted to match kitchen equipment is a useful addition to the kitchen for removing hot kettle covers of the ring type.

* * *

To clear the room of tobacco smoke, place a dish of vinegar in the room.

* * *

Pin a turkish towel over the table part of your sewing machine to keep slick materials from sliding off when sewing.

* * *

Before putting away wallpaper after rooms have been decorated, it is a good plan to thumb-tack a few large pieces to the attic or store-room walls where they will get rays of sunlight. When paper needs to be patched, you will have paper that has faded to the same shade.

* * *

When there is sickness at home, set the alarm clock to ring at medicine-taking time.

TRY MOROLINE HAIR TONIC FOR PERFECT GROOMING 25¢

SNAPPY FACTS ABOUT RUBBER

After the war American synthetic plants should produce enough to meet our military requirements, perhaps 200,000 tons or more a year, and as much additional as can be justified through the free play of economic forces to meet then current civilian needs. This is the recommendation of John L. Collyer, president of The B. F. Goodrich Co.

At the beginning of the year our stockpile of natural rubber was less than one quarter of what it was at the time of Pearl Harbor. Unless plantations are recaptured from the Japs and immediately put into operation our imports of crude are not expected to exceed 80,000 tons in 1944.

In war or peace

KLEMME LOCALS

Mr. and Mrs. Ed. Becker have improved their home by having a large window installed in the living room on the south side, replacing a small window.

The electricity was off for nearly five hours Sunday night. During the storm a limb of a tree near the Sandry home fell across the wires, breaking them. Electric service men spent several hours looking for the break.

Pfc. LaRayne Stille returned to his camp at Liberal, Kansas, Monday after spending his furlough in Klemme with his mother, Mrs. Blanche Fredrick.

Herman Paul drove to Des Moines Sunday for a visit with his daughter, Mrs. Eddie Epps and children.

Mrs. E. J. Schneider and Mrs. P. M Wilson were Mason City visitors Friday.

The Klemme Red Cross needs a lot of more old felt hats which they use in making hospital slippers. About 100 pairs of slippers have already been made, but they want to make more.

INFANT BAPTIZED SUNDAY

John Timothy, son of Mr. and Mrs Arnett Waddingham was baptized at the Waddingham home on Sunday by Rev. Wm. Suckow of Van Meter. A six o'clock dinner was served to the guests and present were 2 grandmothers, 2 great-grandmothers and 1 grandfather.

MEMBERS OF THE ARMED MAY FISH WITHOUT LICENSES

The State Conservation Commission receives questions daily as to whether members of the armed forces need licenses to hunt and fish in the state. They do not need to secure licenses. The legislature in 1943 passed a law exempting all men and women members of the armed service from buying licenses. All other fishing laws, including seasons, catch limits, size limits, etc., however, must be observed.

Mrs. Helen Krutsinger of South Gate, California, is spending this week visiting at the home of Mr. and Mrs. Ira Overholt.

About a month ago Novella signed a contract to teach in the intermediate grades in Des Moines next year. While in Des Moines she visited with Mrs. Jennie Sampson and Irma and also with Glenna Gruetzmacher and her mother.

HENDERSON ADVISES FARMERS TO ARRANGE WITH NEIGHBORS FOR HAYING HELP

Hancock county farmers who will need help in putting up their hay should get together with their neighbors in order to have a full haying crew. Paul Henderson, County Extension Director, in charge of Farm Labor, reports that help for the heavy work of haying just isn't available.

This means planning now with your neighbor to have a full crew to do the job of getting the hay crop in the barn or stack.

LIST OF EARLY MATURING SEED CORN MAY BE OBTAINED

If you still want to plant corn, be sure to obtain early maturing varieties.

Early maturing soybean such as Habaro, Wisconsin, Manchu 606, Wisconsin Manchu No. 3, Early Minnesota Manchu and Mandarus will mature in most seasons when planted the first half of June. These varieties are earlier than Richland.

4-H GIRLS INSTALL NEW OFFICERS AT RALLY DAY

Arlene Wille, of the Avery Sunbeam Club, was installed as president of the Hancock County girls' 4-H organization following election at the annual Rally Day Wednesday, June 7. Other officers are Marjorie Fox, of the Bingham Boosters Club, vice-president; Carmen Goll, of the Liberty Busy Bee Club, secretary and treasury; Eleanor Chizek, of the Madison Live Wire Club, historian

Mrs. C. J. Wille, chairman of the county 4-H girls' club committee, reports that the annual business meeting included both information and inspiration for club members and adult leaders during the coming year.

More than 130 members and friends shared in the afternoon's activities Mrs Winifred Sinarl Jones from the 4-H state extension staff of Iowa State College gave an inspiring talk in which she emphasized ways to help 4-H girls measure their own development and answer that always interesting question. "How Do I Rate?"

The revue "Living the 4-H Pledge," which climaxed the day's activities, portrayed the full meaning of the four H's of club work A comparison of the ideals of a 4-H girl and a refugee enable 4-H girls to see and to show their guests the broad objectives toward which this youth work in progessing Lola Gast of the Liberty Busy Bee Club. Arlene Jakoubek of the Madison Live Wire Club, and Arlene Wille of the Avery Sunbeam Club were readers and representatives of each club took part in the revue

Two girls, Eunice Blank and Adala Wille, were awarded graduation certificates by Mrs. C J Wille.

A United States flag and a 4-H flag were presented to the Madison Club as winner in the flag recognition contest.

MILWAUKEE R. R. TO BUY BONDS FOR HANCOCK

Hancock county Fifth War Loan drive will be credited with $30,000 of the Milwaukee Road's purchase of Government securities

The road will invest $15,000,000 and has arranged as it did during the Third and Fourth Loan drives for every county in which it operates in 12 states to participate in its huge purchase.

Iowa is alloted $2,420,000 to be distributed among the counties which it serves.

FARMER BITTEN BY RATTLESNAKE

Charles Wernett, a farmer living near Burr Oak, was bitten by a rattlesnake recently and taken to Decorah for treatment No serious effects from the bite are anticipated, but conservation officials again remind picnickers, fishermen, and other outdoor enthusiasts of the presence of rattlesnakes in many sections. Prompt treatment by competent physicians is necessary to prevent serious consequences from rattlesnake bites.

SHALLOW CULTIVATION PROTECTS CORN ROOTS

While corn cultivation should be aimed primarily toward weed control, care should be exercised to keep from injuring corn roots and consequently decreasing yields, points out County Extension Director.

H. D. Hughes, Iowa State College agronomist, says shallow cultivation has proved best for corn fields. In the early part of the season, a harrow, rotary hoe or weeder may be used to make a quick coverage of the corn acreage.

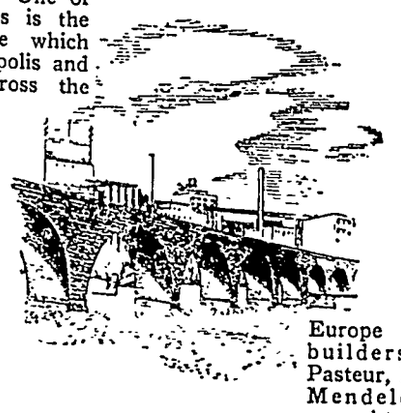
Sweeps and disk hillers are preferable to shovels under most conditions for later cultivation. Sweep cuts overlap and insure that all weeds in the space between rows will be uprooted or sheared off without the deep cultivation which injures the corn roots.

Argentina is now harvesting one of the largest corn crops for that country in recent years.

BONDS OVER AMERICA ★ ★ ★

Legendary James J. Hill looms large among America's empire builders. One of his landmarks is the Stone Bridge which links Minneapolis and St. Paul across the Mississippi.

Hill's Stone Bridge



Europe too, had its builders, its Curie, Pasteur, Nobel, Galen, Mendeleeff — who wrought for a better world but left their works to be debauched by a madman bent on world conquest.

And Harlan D. Johnson, Garner to the Marines.

GIRLS SCOUT NEWS

The Klemme Girl Scouts held their 18th regular meeting at Mrs. John Chambers house at 5:00. We learned how to set the table properly for a meal. After that we all enjoyed a lunch prepared by the White Rose Patrol. Each Girl prepared a simple dish at home and brought it to Scouts. Audra prepared, scalloped potatoes, De Vera baked an angle food cake, Marjorie made a lemon meringue pie, Sondra prepared chocolate pudding,, Maralle made carrot salad, Mrs. Chambers provided the potato salad and LaNelle made the jello. After the lunch Mrs. Chambers showed us how to make a bed properly Some of the girls showed their different ideas on bed-making The meeting was adjourned.

Marjorie Lau

SERVES IN PANAMA—Cpl. Ted W. Kaduce, son of Mr. and Mrs. John Kaduce of Klemme, me, has been in the medical department in a hospital at Panama since January this year. Before entering the service he farmed in partnership with his father. He received his basic training at Camp Roberts, Cal.

(Picture Courtesy of Mason City Globe-Gazette.)

REPAIRS TANKS—T. Sgt. Leon C. Lemke, son of Mrs. Daisy Lemke, of Klemme has been in England since January employed as a mechanic repairing tanks. He received his basic training at Camp Cooke, Cal., and later went to Camp McCoy, Wis. He was a machinist before entering the service.

Flood Damage To Hancock County Over $2,000,000

METHODIST YOUTH FELLOWSHIP CONVENTION

The Methodist Youth Fellowship District Convention was held at Corwith last Sunday with an attendance of over two hundred. The Klemme Fellowship had charge of the afternoon devotions, in which the following people took part: Eunice Larsen read the Scripture and announced the hymns; Peggy Coobs offered the prayer; and Pat Kudje played a saxaphone solo. Thelma Chambers and Novella Bredbenner assisted with the recreation at the high school gym. A one-act play, "The Greater Fellowship", was presented in the evening by the Buffalo Center group. Those attending from Klemme besides the above named were: Jim Thomas, Elwood Harvey, Roger Ridder, Roger Bock, Bud Montgomery, Shirley Stille, Corrine Merkel, and H. E. Harvey. Plans were made for the camps to be held at Lake Okoboji and Dolliver Park during the summer.

ELL TOWNSHIP MEETING IN CHARGE OF 4-H BOYS & GIRLS

The Ell Township Farm Bureau was entertained by the 4-H boys and girls with the following program: Songs by both girls and boys piano solos by Marjorie Goll and Gloria Greiman, two plays, a minstral number by the boys, vocal numbers by several of the boys and a trio of girls The program was in charge of Mr. and Mrs. Emery Weaver, Bernice Weaver and Lincoln Goll.

Charles F. Jackson, County Organization Director and Insurance Agent, gave a short talk.

Miss Hazel Grimes, County Extension Home Economist, and Paul Henderson, County Extension Director, made some announcements.

MISS PEGGY COOBS ATTENDED SISTER'S FUNERAL

Miss Peggy Coobs returned home Saturday from Flint, Michigan, where she was called by the death of her sister, Miss Clarice Poole, who was killed in an auto accident

Miss Coobs was accompanied to Flint by her aunt, Mrs. Harry Buss of Cedar Falls.

STUDY CLUB MET AT GIBBS HOME

The W. S. C. S. Study Circle of the Methodist Church met at the home of Mrs. Harry Gibbs last Thursday afternoon. 30 members were present. Mrs E. J. Arnold led the devotions and Mrs. John Chambers presented a chapter from "We who are America". Interesting letters were read from various boys in service. A delicious lunch was served by the hostess

NO CHANGE IN COUNT OF ELECTION RETURNS

Tuesday the Board of Supervisors met to canvass the votes of the recent election. All votes tallied with the reports given by the election boards.

There were 2,025 republican votes cast and 227 democratic votes cast at the recent primary election.

COURT HOUSE WILL BE CLOSED THURSDAY

The Hancock County officers will attend a School of Instruction at Des Moines, called by the State Department, on June 21, 22, and 23. The Court House will be closed all day on Thursday, June 22 so the deputies and clerks can attend the meeting.

Fred C. Missal, County Auditor, is State Secretary of Auditors. The meeting is for all officers except the Sheriff and County Attorney, who will attend their own school in the fall.

HANCOCK COUNTY HIT BY HARD DOWNPOUR

The hardest rain in the memory of old residents around Garner, Hayfield and Britt fell late Saturday night and early Sunday morning inundating thousands of acres of land and washing out road grades and bridges.

In the area hardest hit it was estimated that the rainfall was between six and seven inches. At Forest City the official weather guage measured 6.51 inches, and at Britt 6.26 inches.

The Iowa River west and south of Klemme rose rapidly and Monday evening the water was over some of the bridges and within a foot of the top of the paving on U. S. Highway 69 south of Klemme.

At Garner the Milwaukee west bound passenger was delayed three hours because of a wash-out between Garner and Britt.

Around Klemme and this part of the county the rain was not so heavy, and outside of low land pastures along the river, there were but few fields under water.

The Frank Davis family had to abandon their farm north of Britt. Mr. Davis is a son-in-law of Mr. and Mrs. Dan Greene of Klemme. The livestock was removed from the Davis farm Monday evening. The entire farm was under water and water was coming up on all the buildings.

Art Katter northwest of Klemme lost seven or eight head of cows that drowned getting back to higher ground.

At the John Eenhuis farm west of Klemme, over thirty acres of corn is under water All of the pasture lands along the river were under several feet of water.

Vegetables fields in the Hayfield and Crystal Lake areas are under one to four feet of water.

The County Triple A estimated Tuesday that the damage to crops and vegetables would amount to approximately $2,000,000.

County Engineer Merten reports the following damage to highways in the county: 16 bridges and 50 culverts washed out, as well as much damage to grades. The damage, Merten estimates, will be around $50,000.

NEW ANGUS HERDS ARE ESTABLISHED IN IOWA

A very enthusiastic group of farmers attended the North Central Iowa Aberdeen Angus Sale at Hampton Monday, June 5th, and several new herds were started with the purchases made at this sale.

The largest selection was made by Mr. C. E. Williams of Bartow, Florida. Mr. Williams brought fifteen head to improve his present herd, and you may be sure that very good cattle were offered in order to attract buyers from such a distance.

Several new herds were established in the local territory, four in Franklin County, three in Cerro Gordo and one in Floyd.

The sale began on schedule, and Roy G. Johnston, auctioneer of Belton, Missouri, kept the crowd alert from start to finish. Bidding was prompt and the packed sale pavilion was very appreciative of watching the fine offering of cattle pass through the sale ring.

MEETING SCHEDULE

June 15 — Liberty Busy Bees 4-H Club at Neva Kropp.
June 19 — Bingham 4-H Boys at John Limbergs.
June 20 — Amsterdam 4-H Boys.
June 22 — Madison 4-H Boys at John Hauglands.
June 22 — Avery Sunbeams 4-H Club at Arlene Wille.
June 22 — Major Farmerettes 4-H Club at Ardys Bailey.

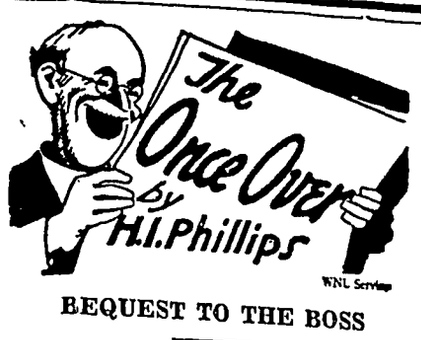
BETTER TEXTURE!
Fleischmann's new Dry Yeast turns out tenderer, more even-grained baking every time, say 8 out of 10 women who tried it in recent tests!

EXTRA SPEED!
Fleischmann's new Dry Yeast is chock-full of get-and-go. Cuts down rising time; makes fresh rolls, buns and breads easy!

ALWAYS DEPENDABLE!
Fleischmann's Dry Yeast is made by the world's most famous yeast maker. Voted the best dry yeast ever used by 82% of home bakers who tested it recently!



REQUEST TO THE BOSS

A New York man left a will leaving all his money, about $5,000, to the three members of the firm for which he had worked for 22 years "in grateful remembrance of the treatment accorded me as an employee." In these days when the boss is so widely denounced as a "Simon Legree, an exploiter of his workers, etc., this becomes almost the NEWS ITEM OF THE GENERATION.

—*—

Employers as a whole would forgo gladly the money if now and then they could get a similar expression of kind regard. Never have they needed anything more.

—*—

Can you fancy what a will of the following type might do for their morale?

I, Jarvis P. Withers, being of sound mind, do hereby declare this my last will and testament:

1. To the firm of Jones, Brown & Smith, by which I have been employed for many years, I give and bequeath a framed testimonial in which I declare that, while we had our disagreements and run-ins, I never once had the feeling that I was EXPLOITED; and in which I further testify that I at no time found them to be brutal, ruthless, money-mad hounds of hell, imps of Satan or all-around polecats.

2. To Hilary Jones, senior partner, I give and bequeath the sum of $1,000. I figure I loafed enough on his time over the years to have cost him much more money The days I got in late, left early and soldiered on the job must have meant quite a loss to the firm over the years. Mr. Jones was a little aloof, rather strict and wanted his money's worth, but after all he was not a bad egg.

3. To Prentice Brown I give and bequeath the sum of $800. I never got to know Prentice very well. (He never got to know me very well, either. Looking back, it was rather a nice arrangement, and did not prove there was anything hellishly wrong about either of us). Although Prentice was reputed to be of extreme dignity and quite a sourpuss, I once entered his office when he had announced he was in conference. I found him playing the harmonica in his shirtsleeves. I always liked him for it. Then there was the time we both got into the elevator an hour late for work and he didn't look at his watch.

4. To Chidsey Smith I give and bequeath $400. He never said a word the time we caught each other at a midweek baseball game when both were supposed to be sick. I recall many occasions when he might have fired me and didn't.

5. I order and instruct my executors to state to Messrs. Jones, Brown & Smith that it is not my conclusion that all employers are necessarily inconsiderate, money-pinching Simon Legrees. All my experience with them leads me to a conviction that they are at times human beings. The rumor that Jones has a cloven hoof is false. I once saw him with his shoes off. There has never been anything about Brown's manner to indicate he has a forked tail and spit liquid flames. I do not believe that Smith walks through fire as a hobby. It is my belief that the firm is not possessed of devils.

Signed,
Jarvis Withers.

Wedding Bells Bring Out Brides, Beauty and Gayety

Bride's Shower Cake is a delicate angel food frosted prettily with fresh strawberry icing, garnished with whole berries.

Here comes the bride! There's nothing so rare as a day in June, nothing so glamorous as a wedding. Even in these days of furlough brides, quick-as-a-wink weddings, everything is made as nice as possible for this is the happiest day of her life

Weddings should have beauty and gayety, even when purses are slim, for when the boys are doing their jobs in the far corners of the earth and the girls are left behind, they should have the one thing that keeps them going—a bundle of happy memories tied with a white satin bow.

So let the linens for the table be white and fresh smelling, the silver polished and gleaming. Take out your best china, yes, the kind that you use only for "best" because that's what a wedding is! Though the food be simple as it must necessarily be in these days of rationing and shortages, cook it well and serve it handsomely.

Save Used Fats!

Three kinds of repast are usually used for weddings. The first, a shower, precedes the wedding, and should be light and very simple:

Bride's Shower Menu.
Molded Fruit Salad.
Tiny Cream Cheese Brown Bread Sandwiches
Tiny Ham Sandwiches
Bride's Shower Cake
Coffee

Molded Fruit Salad.
(Serves 6 to 8)

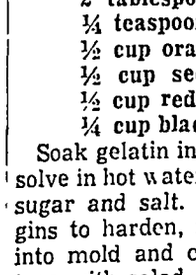
1 tablespoon gelatin
2 tablespoons cold water
½ cup boiling water
¼ cup lemon juice
2 tablespoons sugar
¼ teaspoon salt
½ cup orange segments
½ cup seedless grapes
½ cup red cherries
¼ cup black cherries

Soak gelatin in cold water and dissolve in hot water. Add lemon juice, sugar and salt. When mixture begins to harden, fold in fruit. Pour into mold and chill. Serve on lettuce with salad dressing into which whipped cream or chilled evaporated milk has been added.

Bride's Shower Cake.

1½ cups egg whites (12 whites)
¼ teaspoon salt
1 teaspoon cream of tartar
1½ cups sugar
1 cup sifted cake flour
¼ teaspoon almond extract
¼ teaspoon vanilla

Place egg whites into large bowl, sprinkle salt and cream of tartar over them and mix together with several strokes of flat wire whisk. Sift sugar. Sift flour once, measure, add ½ of sugar and sift together 4 more times. Beat egg whites with whisk, using slow, gentle motion that keeps whisk beneath surface. Continue beating until whisk leaves faint line when drawn across surface of egg whites. Add remaining sugar gradually, beating as before, until texture is fine and even and mixture begins to form slightly rounded surfaces when whisk is released. Do not overbeat. Add the flavoring. Remove whisk. Sift flour gradually over surface and fold in slowly and gently with a spoon, folding towards center of bowl and rotating both bowl and spoon. Keep spoon beneath surface of batter and fold until mixture is smooth (2 minutes). Turn into large (4 quart) ungreased tube pan. Bake in a slow (300-degree) oven 30 minutes; then increase heat slightly (325 degrees) and continue baking 40 minutes longer. Remove from oven and invert pan on rack for at least 1 hour or until cold. Remove from pan. Let stand 12 hours or longer before cutting. Ice top and sides with



Strawberry Icing.

4 cups sifted confectioners' sugar
Dash of salt
¼ cup fresh, crushed strawberries
2 teaspoons lemon juice (about)

Add sugar and salt to crushed fruit Mix well. Then add lemon juice until of consistency to spread thinly on cake.

Buffet Breakfast.

Minted Grapefruit Juice
Chicken Pot Pie
Olives Celery Curls Sweet Pickles
Finger Rolls
Wedding Cake Ice Cream
Coffee

A wedding breakfast is called breakfast no matter what time of day it is served. The simplest method of serving is from a well set buffet.

Chicken Pot Pie.
(Serves 4)

2½ tablespoons quick-cooking tapioca
¼ teaspoon salt
Dash of pepper
Dash of paprika
2 cups cooked, diced chicken
1¼ cups milk or chicken stock
2 tablespoons melted butter
6 to 8 unbaked baking powder biscuits

Combine tapioca with remaining ingredients in order given. Turn into greased casserole and bake in hot oven (425 degrees), stirring twice during first 10 minutes of baking. Place biscuits on top of chicken mixture, return to oven and bake 12 to 15 minutes longer until biscuits are browned.

Light Reception.

Chicken Sandwiches
Lettuce Sandwiches
Salted Nuts
Wedding Cake Coffee or Punch

Wedding Cake.

1½ cups butter or other shortening
3 cups sugar
6 cups cake flour
3 tablespoons baking powder
1½ teaspoons salt
2 cups milk
½ teaspoon vanilla extract
1 teaspoon almond extract
9 egg whites

Thoroughly cream sugar and shortening. Sift together flour, baking powder and salt 3 times. Add alternately with milk, vanilla and almond extract, beating after each addition. Beat egg whites stiff but not dry and fold in. Place batter in 3 round, paper-lined tins, 10½, 8½ and 6 inches in diameter. Bake in a moderate (375-degree) oven 25 to 30 minutes. Cool and put together with frosting. Frost cake at once.

A wedding breakfast or supper to satisfy the immediate family may consist of chicken pot pie served in a shining casserole.

Save Used Fats!

Ornamental Butter Frosting.

¼ cup butter
10 cups sifted confectioners' sugar
¼ cup cream
4 unbeaten egg whites
3 teaspoons vanilla extract
½ teaspoon salt

Cream butter, add 4 cups sugar gradually, blending after each addition. Add alternately remaining sugar, cream and egg whites, one at a time, beating well after each addition. Add vanilla and salt. Spread frosting over top of two lower layers; place 3 tiers together and frost entire cake. With a pastry tube, use remaining frosting for decorations and rosettes.

Get the most from your meat! Get your meat roasting chart from Miss Lynn Chambers by writing to her in care of Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Ill. Please send a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

The Bride's Day: She's the center of attraction. Let everything work toward that end.

Flowers and linens for wedding repast are white. When there is a wedding cake let it be the primary decoration—in the center of the table.

For the family sit-down breakfast, the bride and groom sit together at the head of the table.

PATTERNS
SEWING CIRCLE

For Town Wear

A GRACEFUL, dignified frock to be done in soft sheer rayon crepes and cottons. The lap-over side closing makes it an easy frock to slip into.

* * *

Barbara Bell Pattern No. 1964 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36, short sleeves, requires 4¼ yards of 39-inch material.

Shoulder Ruffles

THE vogue for pinafore "ruffles" has inspired this smart, over-the-shoulder ruffled two-piece dress. Perfect for the young and slender figure, it will look lovely done in smart rayon silk taffeta stripes, in brisk cottons, in summer percales.

* * *

Pattern No. 8619 is in sizes 11, 13, 15, 17 and 19. Size 13, ruffled version, requires 4 yards of 39-inch material; without ruffles, 3⅞ yards; ⅜ yard contrast for collar.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

ASK ME ANOTHER?
A General Quiz

The Questions

1. How does the size of Alaska compare with the size of Texas?
2. Arlington National Shrine was originally part of the estate of what prominent American?
3. What well-known character in fiction tilted at windmills?
4. Why did King Arthur's knights sit at a round table?
5. Was absentee voting ever before permitted to our soldiers?
6. Off what shores are the Grand Banks?
7. What is meant by the "doldrums"?
8. What is the difference between a patriot and a patriarch?

The Answers

1. Alaska is twice as large.
2. Gen. Robert E. Lee.
3. Don Quixote.
4. To avoid any distinction of rank.
5. Yes. Union soldiers in the field during the Civil war were permitted to vote.
6. Newfoundland.
7. Those tropical zones of the ocean where calms or baffling winds prevail, hence a becalmed state.
8. A patriot is one who loves and is devoted to his country. A patriarch is the founder or head of a family—or an aged man.

Beneficial Lightning

Around the earth in an average day there are some 44,000 lightning flashes. Collectively they release from the air each year about 100 million tons of valuable fixed nitrogen which is deposited by rain in the soil. The value of this gift from the heavens goes far in offsetting the destructive damage of lightning.

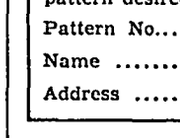
SNAPPY FACTS ABOUT RUBBER



Maintenance of our synthetic rubber plants after the war as "a rubber insurance policy" is advocated by leading rubber authorities. They hold that the U. S. cannot be adequately prepared at all times to defend its national interest unless it is free from the threat of a rubber shortage, a feeling subscribed to by most thinking Americans.

World capacities for producing natural and synthetic rubber after the war will aggregate nearly 2,800,000 tons yearly, predicts John L. Collyer, president of B. F. Goodrich. This is more than twice as much as the world has ever used in any one year.

Ink Spots And Spatters

By Jergie

FIRST HAND STORY FROM PRISONER OF WAR

This writer got a very interesting story first hand from a young man who had been a prisoner of war in Italy.

The young man is Flight Officer J L. Weaver, of Alabama, who to Klemme with Capt. Ray Jorgenson, Jr from Dodge City, Kansas to spend Saturday night at our home.

Flight Officer Weaver piloted a B-26 bomber in North Africa and had completed eight missions when he and his crew were shot down over Naples. When their plane was hit and badly damaged by anti-aircraft fire, the crew baled out and landed in the Mediterranean Sea. After floating around for thirty-three hours they were picked up by Italians and made prisoners of war, and taken to a camp beyond Rome where they became part of 80,000 Allied prisoners in a large camp.

Flight Officer Weaver was in this Italian camp for three months and then transferred to a German camp. He stated that the Germans treated him far better than did the Italians. However, food was very scarce and they had barely enough to live on. U. S. Army doctors, also prisoners of war in the camp, advised the men to take it esay, not exercise or do anything strenuous, as there were just enough calories in the food to keep them from starving to death. Occasionally the Italians would send in truck loads of grapes. The men were so hungry they devoured them eagerly, but to their sorrow, as they soon became ill and died of disintary. One hundred and thirty-eight of the men in Weaver's section thus died

For nearly a month all the food that Weaver and the others received was box from the Red Cross which contained one bar of chocolate, a small package of cookies and crackers, ½ lb. tin of canned meat, one can of fruit and one can of vegetables; in all about 7 lbs. On this they lived for an entire week. They were all grateful to the Red Cross for getting this through to them as it was all that stood between them and starvation. The incessant bombing by the Allies of transportation had made it even difficult for the Germans and Italians to get food supplies through and also made it difficult for the Red Cross to get food supplies through to the prisoners.

After Weaver had been in the German camp for about a month a train load of prisoners were taken out of the camp to be sent to a permanent camp in Germany. It was during the transfer that Weaver and some thirty other Americans managed to escape. Several of their number were shot in the effort.

Weaver and seven others walked for 34 days before they reached the Allied lines, where they were hospitalized and given proper food Weaver himself had lost 18 pounds during the internment in prison camp, but he gained that back before he was returned to the States arriving last December.

Prisoners were allowed to write letters home, but they had to say that everything was fine and lovely, that the country was beautiful and treatment and food was the very best. Those who failed to write in that manner were put in solitary confinement for seven days and given only bread and water That sort of treatment convinced them it was best to write cheerful letters next time.

Some of the men who had been prisoners for many months deliberately would make a dash for freedom in broad daylight, just so they would be shot and could die, rather than remain in the prison camps. Weaver had seen many men die in that manner.

He is now at Dodge City, Kansas as an aassistant flight instructor on the B-26.

FEW SOLDIERS CAST BALLOTS

Fifty applications for war ballots were received by the Hancock county auditor of which 41 were returned in time to be counted. Forty-five civilians made application to vote by absentee ballot and 41 of these also were returned.

With approximately 1,200 Hancock service men and women in service only about 3.4 per cent availed themselves of the opportunity to vote in the primary election.

BETTER IOWA GARDENS

June is an important month in vegetable gardening. Of course every month during the season is important, but a little extra attention and effort is needed during June to get your garden over the hump.

* * *

It doesn't pay to plant late potatoes, because warm weather is not conductive to a large set of tubers. Gardeners who did not get potatoes planted early will do better to purchase commercial stocks in the fall for winter storage and use.

* * *

During a period of frequent rains, such as this spring, more frequent spraying or dsting is necessary. A continuous coating of poison is needed on vine crops, members of the cabbage family, beans and potatoes. Simple control measures are given in the Iowa Garden Guide, pamphlet No. 80 available at the county extension office of fram the Agricultural Extension Service, Ames.

* * *

Excessive rains and floods tend to leach fertility out of garden soils wise gardeners will replenish this loss of fertility to help insure quality and yields in vegetables. Several light feedings of victory garden fertilizer should be applied during the growing period. Applications should be at the rate of about 1 pound for each 30-foot row The fertilizer may be sprinkled in little furrows alongside the rows of vegetables; in bands on the ground along the row, or beside individual plants, and worked in with the hoe. Avoid getting fertilizer on the plants, as this will cause burning if left on for any length of time. Fertilizer accidentally sprinkled on plants can be removed by sprinkling with water.

* * *

In general garden peas have taken the worst beating in terms of loss in production, in victory gardens this spring. And it is imposable to make late successive plantings, as late peas will not produce a crop in most parts of Iowa.

* * *

Drain tile pit storages continues to do an outstanding job of carrying vegetables through the winter in almost perfect condition As late as May 26, vegetables and apples were taken from pit storages in sound, firm condition. Included were parsnips, carrots, beets, turnips and potatoes. Oranges stored in a tile pit at Christmas time came through in excellent shape

A tile 18 inches in diameter and 30 inches deep will hold 3 to 3½ bushels of vegetables Drain tile makes a permanent pit storage and in the long run is far cheaper In addition, fruits and vegetables taken from the tile storage possess no soil taste or other off-flavors.

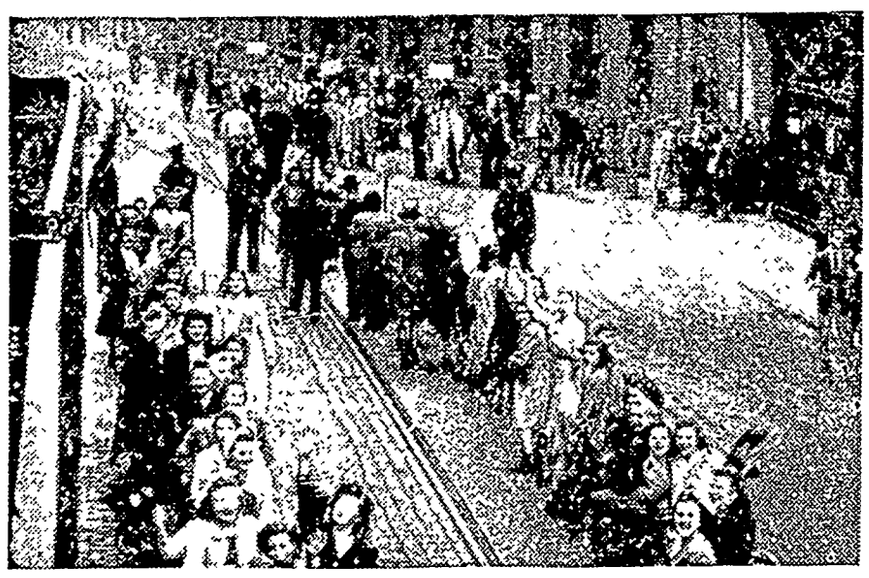
WEEKLY NEWS ANALYSIS

Allies Continue Advance in Italy; U. S. Airmen Rain Blows on Japs; Political Break Looms in South

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Walkout—Strikers mill outside of Parke, Davis & Company plant at Detroit, Mich. (See: Labor.)

PACIFIC:
Buck Air Power

Nibbling further at Jap air power based in the eastern New Guinea area as a defensive bulwark of the Indies and the Philippines, U. S. aviators continued their strikes against enemy airdromes in the region and U. S. ground forces fought over rough country to set up airfields for them.

As General MacArthur's air and ground forces struck out at eastern New Guinea, navy bombers from a strong task force of aircraft carriers hit at enemy island holdings farther to the north, dotting the roadway to the enemy homeland.

U. S. casualties in the eastern New Guinea area remained light as Doughboys expanded their holdings with support of heavy artillery, tanks and warplanes.

POSTWAR:
Churchill Speaks

Organization of the great powers emerging victorious from the war into a single force to preserve future world peace was outlined by Prime Minister Winston Churchill in a discussion of foreign policy in Britain's house of commons.

To prevent either the planning or conduct of future wars by "restless and ambitious nations," Churchill said the Allied powers intend to set up a world organization equipped with all necessary means for maintaining order.

Touching on the delicate Russian-Polish situation, Churchill declared that Poland's surrender of territory in the east might be countered by acquisition of German land.

SOLID SOUTH:
Threaten Break

Long rumored, southern rebellion against the New Deal's social reform, especially in regard to the advocacy of Negro equality, took tangible shape in Texas, where the regular Democratic organization instructed its presidential electors to cast their vote for the party's nominee in the electoral college only if the national convention·

1. Votes disapproval of efforts to nullify state laws for segregation of white and colored school children;

2. Backs up Texas' opposition to the Supreme court ruling opening Democratic primaries to Negroes;

3. Seats the delegates selected by the regular Texas Democratic party instead of delegates chosen by a rival rump organization, composed of members who broke with the regular party over its instructions to the electors.

Electoral Vote

While calmer minds sweated over working out a compromise between the two factions in Texas, speculation arose as to what might happen if the 23 Texas electors should join eight similarly dissatisfied North Carolina electors in voting against the Democratic candidate in the electoral college, whose vote determines the presidential winner.

Since the 31 Texas and North Carolina representatives in the electoral college, made up of electors chosen by the states, could form a majority for either side, they could swing the election to either a Republican or Democrat, being free to vote as they wished. Or then, again, they might vote for an independent person, in which case neither of the two regular candidates would receive a majority and the presidential election then would be referred to the house of representatives. In the house, the party in the majority would decide the election.

MISCELLANY

CITRUS RECORD: The Texas crop of grapefruit and oranges this year was the largest in history, and sold for the highest price, the general manager of the Rio Grande Valley citrus exchange said. Grapefruit yield was estimated at 17,539,081 boxes and oranges at 3,354,350 boxes. Total value of both crops was set at $53,469,000 by the exchange official.

EUROPE:
Back Nazis to Wall

With Fifth army troops on the southern front joined with their comrades on the Anzio beachhead, and with the British slugging through the Liri valley to the east, Allied forces in Italy locked hands for a knockout punch against the Germans below Rome.

Gen. Clark

As the fighting in Italy came closer to a showdown, invasion preparations continued, with thousands of Allied bombers ripping up German defenses and airfields in western Europe, and the Allied command issuing detailed instructions to the underground to report enemy troop movements to U. S. and British soldiers when they land.

Tottering under the combined pressure of Lieut.-Gen. Mark Clark's Fifth army and the British Eighth, the Germans fell slowly back to the southeast of Rome for a bitter defensive fight, while Allied aircraft hampered their movements by a steady bombardment of supply lines and motorized concentrations.

LABOR:
Local Punished

While the CIO United Automobile workers suspended officials of a local union for a strike in the Chrysler plant at Detroit, Mich., the CIO Gas, Coke and Chemical workers sanctioned the walkout of 1,900 members of a local at the Parke, Davis and company drug factory in the same city.

In suspending the local officers for the walkout which resulted from their support of a CIO chauffeurs' union fight with a rival AFL organization, the United Automobile workers said they had violated their contract with the company, the UAW constitution, and their no-strike pledge.

Accusing Parke, Davis and company of a "vicious union busting campaign," the Gas, Coke and Chemical workers supported its local's strike, which halted production of blood plasma, penicillin and smallpox vaccination for military and civilian use. Protesting that the position of the company jeopardized the standing of the union, the local's president defied a War Labor board directive to return to work before resuming negotiations.

FOOD:
Supply Good

A factor in the government's possible restoration of rationing on point-free meats may be the necessity for assuring a more equal distribution of such meats, three federal agencies reporting on the general food situation declared. Meantime, some cuts or better grades of meat may become more difficult to obtain.

Although supplies of canned fruits and juices will continue at low levels for the rest of the year, fresh apples, peaches, pears and cherries will be more plentiful. The situation in canned vegetables can be expected to grow tight. Increases in stocks of margarine, shortening and other edible oils will probably offset declines in butter and lard. Because of record spring production of eggs, need for greater consumption persists.

"Civilian diet is sufficient in calories, proteins, iron and vitamin A, but with little margin . . . in the B vitamin and C vitamin," the agencies reported.

BIG GUNS:

The army has sharply increased its demand for large caliber cannon and ammunition it is announced, giving rise to speculation that military leaders anticipate long and severe fighting after invasion beachheads have been secured.

New plant construction has been approved and factories now on a standby basis will return to full operations, official sources disclose. Ammunition schedules have been stepped up to four or five times previous levels.

AGRICULTURE:
Farm Machinery

With manufacture of harvesting and haying equipment farthest behind schedule, the War Production board's $671,000,000 farm machinery and spare parts program for the year ending June 30 was 13 per cent off on May 1.

Because of accelerated production in the final few months, however, the WPB expects the program to finish up only 10 per cent behind schedule, although manufacturers of combines will have up to September to meet their quotas.

As of May 1; production of harvesting machinery was 33.4 per cent off schedule; tractor attachments off 28 2 per cent; barn and barnyard equipment off 25.8 per cent; farm pumps and windmills off 16.4 per cent; farm wagons, gears and trucks off 16 5 per cent; harrows and rollers off 14.5 per cent; cultivators and weeders off 13.9 per cent; dairy farm machinery off 13 per cent; planting, seeding and fertilizing equipment off 11.8 per cent, and farm poultry equipment off 11.3 per cent.

Land Values

With farm land values showing a 15 per cent increase for the year ending March 15, they stood at 114 per cent of the 1912-'14 level, according to statistics of the U. S. department of agriculture.

One-third of the sales financed by credit last year involved mortgages of 75 per cent of the sales price, the USDA reported.

With the average debt per acre on newly acquired farms about one-fourth higher than two years ago, large turnover was reported in 1943, with some operators selling holdings after a few months. Many city buyers reputedly were purchasing farm property as an inflation hedge.

CONGRESS:
Investigate Ward's

Investigating the government's seizure of Montgomery Ward and company's Chicago mail order plants, a congressional subcommittee heard Attorney Gen. Francis Biddle declare that inasmuch as the concern was indirectly involved in the war program through sale of productive equipment to farmers, the President could use his judgment in taking it over during a labor dispute to restore operation.

Thus, the Attorney General concluded, if the seizure was not warranted under congressional statutes, it was legal under the President's wartime emergency powers.

Because his interpretation of the law is his own opinion, the Attorney General said, he stands correction by a court, or congress itself can intervene to make any changes in legislation which might eliminate abuses.

Strange Tail

There's no end to the versatility of the American Seabee, as shown in this picture from distant Midway island, where navy construction experts secured a length of ¾-inch manila rope to Bossy's severed tail to provide the milk cow with a switch. Carpenter's Mate J. A. Pierson, Sheffield, Pa., is the milker.

RAILROADS:
Government Rates

In exchange for the grant of land for right-of-ways to the railroads during the expansion period of 1850-1870, the government received reductions of 50 per cent on passenger and freight rates.

Amended in 1940 to apply only to military goods and personnel following railroads' complaints against the heavy burden of relief shipments especially during the depression period, total abolition of the reduced rates came before congress, with the house approving by a 236 to 16 vote.

Although termination of the reduced rates would increase railroad revenues by more than 250 million dollars annually in wartime and 20 million dollars yearly in peacetime, the house bill calls for scaling down private shipping rates to reflect the higher income from government.

Popular Novelist Dies

Harold Bell Wright, the minister who became a successful fiction writer, died at the age of 72 in La Jolla, Calif.

Mr. Wright's most famous novels are "The Shepherd of the Hills," "The Calling of Dan Matthew," "The Winning of Barbara Worth," "When a Man's a Man," "The Recreation of Bryan Kent," "Helen of the Old House," and "The Eyes of the World."

The Washington MERRY-GO-ROUND

DREW PEARSON

(WNU Service)

Washington, D. C.

STASSEN-DEWEY DOUBLE HITCH?

Very quiet moves have been launched recently by the Dewey and Stassen forces to get together in advance of the Chicago convention.

The approach was made through a close friend of Governor Stassen who came to see Governor Dewey the other day and suggested that while he couldn't speak outright for Stassen, the Stassen forces might be willing to get on the Dewey bandwagon if Stassen could be assured of the No. 2 spot on the Republican ticket.

Dewey replied that he had preferred Governor Warren of California, but he would certainly be glad to consider Stassen for vice president providing, of course, the Minnesota governor withdrew from the race for President in advance.

It was left that Stassen's friend would write to him asking him categorically whether he would withdraw from the presidential race if given the No. 2 place on the ticket, and also whether his forces would cooperate to nominate Dewey. There has not been time as yet to receive a reply.

What the Dewey forces want to prevent is any remote chance of a deadlock at Chicago which might swing the nomination to Stassen, Justice Owen D. Roberts or to Willkie. While they have so many delegates they don't believe there is much chance of this. Nevertheless, they know that Pennsylvania's Joe Pew has been hoping for a deadlock which would throw the convention to Justice Roberts.

NOTE—Friends of Roosevelt are frank in admitting they would much rather have Dewey as an opponent than Roberts. The Supreme court justice has cooperated with the President at Pearl Harbor, has an even better record than Dewey's in breaking up graft as prosecutor of the Teapot Dome scandals, is tall, handsome, a powerful, brilliant speaker. However, GOP diehards consider him too much in favor of international cooperation.

SEVEN-COME-ELEVEN

Maybe war leaders are superstitious or maybe there is something to the old seven-come-eleven system for shaking the dice Anyway, Stanley Arnold of Cleveland has worked out a calendar of the war showing that every significant event has happened on either the seventh or eleventh of the month. Here is the calendar:

Pearl Harbor	Dec. 7, 1941
Declaration of war on Germany and Italy	Dec. 11, 1941
Fall of Guam	Dec. 11, 1941
Fall of Wake	Dec. 11, 1941
Invasion of Singapore	Feb. 11, 1942
Fall of Corregidor	May 7, 1942
Invasion of Kiska	June 7, 1942
Invasion of Guadalcanal	Aug. 7, 1942
Invasion of No. Africa	Nov. 7, 1942
Invasion of unoccupied France	Nov. 11, 1942
Retaking of Tunis and Bizerte	May 7, 1943
Retaking of Attu	May 11, 1943
Fall of Pantelleria	June 11, 1943

Finally Mr. Arnold points out that the recent renewed attack on Italy started May 11 at 11 p. m.

BREWSTER AXED

The navy has decided that the controversial Brewster Aeronautical corporation will be the first to feel the axe of discontinued war production.

This is good news for the country in that it means that war losses of airplanes are less than expected and that the navy will not need so many replacements. Actually our losses in the Pacific have been about 50 per cent less than estimated.

Also, the news is extremely significant for the airplane industry, because Brewster will be the first big plane company to be turned loose on its own to manufacture commercial planes—if it can get priorities. If it can't get them, it will have to fold.

The Chance Vought company, also making Corsairs (the same type of plane as Brewster), will continue operation, largely because they were the chief pioneers of Corsairs. Also, the Goodyear company will continue, they being about to start on a big new navy plane.

But the Brewster company will now have to fight either for new war contracts or else for priorities for commercial planes. It will be an uphill fight.

NOTE—The Brewster plant near Philadelphia, built with U. S. government funds, will be taken over by the navy and will work on "modification"—in other words, planes that need minor changes. The other Brewster plants around New York will finish up what they are working on and then fold.

* * *

MERRY-GO-ROUND

¶ Mrs. Harold Burton, wife of the Ohio senator, complained that her husband's inside coat pocket bulged out with too many papers. So Burton now has his tailor put an inside pocket on both sides, to distribute the burden.

¶ It never leaked out at the time but, on December 7, 1943, the army was worried over a possible token attack on Pearl Harbor as an anniversary raid. The whole island was alerted for fear the Japs would repeat their original performance.

Walter Winchell

(WNU Service)

The Private Papers of a Cub Reporter:

It is supposed to have happened during Churchill's last visit. . . . A youthful War Dep't aide was rushed over to 1600 Pennsylvania Avenue one hot Sunday dawn with confidential news of military importance for the President. . . . Though the hour was terribly early, he was brought to FDR's bedside. . . . The President listened and then ordered the young officer rushed to the Prime Minister.

Breathlessly, he retold the news to Churchill, whose huge, round face was all he could see imbedded in four or five pillows. The celebrated cigar smouldering in the semi-darkness. . . . The officer ended his message and stood at attention, waiting tensely for Churchill's answer. . . . The Britisher kept focused on the youth and then softly growled.

"Are you the young man who took my daughter out last night?"

"Yes, sir," gulped the astonished fellow.

"I'd like you to understand," said Mr. Churchill, "that my daughter is not accustomed to staying out until 3 in the morning!"

And then, getting out of bed in his white sack-like nightgown, England's Commander-in-Chief, cigar between his teeth, strode off hurriedly down the White House corridors in his nightie.

Over at the British Embassy they enjoy telling the one about the pair of Gurkhas (noted as India's bravest tribe) who volunteered for the Indian Army's sky-troops. They asked the British officer: "From what height are we supposed to jump?"

"Five hundred feet," they were informed.

"Nothing doing," one complained, "that's too high. Cahn't we try from 300 feet, old chep?"

"No," said the officer, "from such a low height there is great danger the parachute won't open in time."

"You mean," they exclaimed, "That we get parachutes?"

In Albuquerque, this ageless gag is convulsing the citizens. About the New York go-getter, who spotted an Indian chief lazying near his tepee. . . . "Why don't you," asked the stranger, "get yourself a job in a defense plant?" . . ."Why?" grunted the Indian. . . . "Oh," said the New Yorker, "if you work hard and save your money you would soon have a bank account. Wouldn't you like that?"

The Injun intoned: "Why?"

"Oh, fergoodnessakes," said the exasperated bore. "With a big bank account you could retire. And never work any more."

"Me," said the chief waddling away, "not working now."

Sally in Our Alley: In Reuben's last night a pair of stage veterans recalled when John Barrymore was going through the soul torment of Hamlet when he thought he detected a small riot in the second row. . . . Looking down he saw Jane Cowl, the star, carrying on an animated conversation with all around her for four rows back. . . . Gritting his molars, Barrymore went through the show, but when he was called on for bows at the end, he intoned: "I would like to thank all you gracious people for your applause. And also thank Miss Jane Cowl sitting right down there — for co-starring with me!"

New Yorkers Are Talking About: The mad between Hildegarde and Jacqueline Susann, who lit a match at the Persian Room during the singer's blackout number. . . . The fastest sell-out in Harper's history. Because of the article on Gov. Dewey. . . . Socialite Rusty Hatch, who celebrated his second divorce last Friday. He's proposed to his third heart-attack. . . . Gloria King's thrushing in the Park Central Lounge. . . . Martin Dies' statement that "no man is indispensable." . . . Martin said it after he had seven terms. . . . The lovely model in the uniform of the Femarines. An Elizabeth Arden advert in windows. . . . The way F. P. A. was and prob'ly will be the only one to flaunt an FDR button in the Republican-infested sector near Westport. . . . Mary Nolan (Imogene Wilson, ex-Follies girl) being so ill and in sour luck again on the Coast. . . . The $25 round trip fare charged by many cabbies to the Belmont track. . . . The theft of night club files which are offered back for a stiff fee. The big idea is to permit beating the OPA ruling on raising prices. . . . Fred Allen's retort to a heckler: "People who keep their mouths shut never show their ignorance or false teeth!"

Beaverbrook's former editor on his London Standard is editing a one-sheet newspaper for Mountbatten. . . . His name is Frank Owen. . . . It has the best comic strip in England, and Owen writes a daily editorial called "Good Morning." . . . Naval officers here on leave tell us Owen's paper is so popular that Mountbatten issued an order not to permit anyone to read it—unless they first buy a copy of The India Times, which almost "went out of business" because of Owen's circulation.

necessary appreciation for products which are adding so to the efficiency of America result of more than a quarter century of intensive nutrition tion. At the close of the last war the nation's leading nutri- cientists realized that a short- f dairy products had contrib- o serious physical deficiencies ny parts of the world.

Council Is 25 Years Old.

their behest, the dairy indus- organized the national dairy l as its research and educa- institution. For more than 25 the dairy council has worked educational, professional and

THE AMERICAN soldier in the first World war ate and drank dairy products equivalent to 11 ounces of fluid milk a day, or about one and a half glasses. The fighting man of today consumes dairy foods amounting to 37 ounces of milk daily.

consumer groups helping to develop and disseminate the kind of information needed to build a stronger, more vital America. Personal contacts, educational movies, exhibits, publicity and more than 375 million pieces of educational material have been disseminated.

As this educational program has approached its maximum fruition during recent years, so the dairy industry itself has responded to the great need for more and more dairy products. From 1936 to 1939, inclusive, there was an average production of about 104 billion pounds of milk annually in the United States. With mounting war needs the dairy industry rapidly increased its production. In 1942, in spite of labor and equipment shortages, production was lifted to over 119 billion pounds.

More Dairy Food in Diet.

Some of the most important changes in the American diet in recent years comes out of increased consumption of dairy products. According to the national dairy council, two food nutrients most likely to be deficient in the human diet are calcium and riboflavin. The bureau of human nutrition and home economics of the U. S. department of agriculture states that both of these are prevalent in the diets in much greater quantities than a few years ago.

These increases, adds the above mentioned bureau, are due to the fact that consumption of milk, ice cream and cheese have increased about 25 per cent during that time. It is further stated that this represents one of the greatest improvements made in the human diet in recent years. Milk, ice cream and cheese furnish 75 per cent of all the calcium and 46 per cent of all the riboflavin in the national diet.

"Calcium is important to the body as a builder and maintainer of bones and teeth," continues the bureau of home nutrition and home economics. "It is also needed in many of the fluids which govern the body's involuntary activities. Riboflavin promotes growth and is essential for normal nutrition at all ages. Insufficient quantities of riboflavin for any length of time may be followed by digestive disturbances and some types of 'eyestrain' and a lowered general resistance."

Europe's Protein Deficiency.

Adequate quantities of the highest quality proteins is another factor of real importance in the food economy such as America is now experiencing. Dr. Morris Fishbein, editor of the Journal of the American Medical association, asserts that when conditions now prevailing in central Europe become known it will be found that protein starvation is much more serious than vitamin deficiency because of the breakdown in human tissues. This, in turn, opens the way to disease.

The proteins of milk and its products are of the highest quality. Also, the bureau of agricultural economics of the U. S. department of agriculture states that milk and its products now furnish 40 per cent more protein for human nutrition than at the outbreak of the last World war.

In the economy of production of these three critical food nutrients the dairy cow ranks without even a close competitor, according to the bureau of agricultural economics of the U. S. department of agriculture Not only is milk the most nearly perfect food, and a well balanced food, but it is almost impossible to get enough calcium and riboflavin without consuming adequate quantities of milk and its products.

For each 100 hours of man labor devoted to milk production, 89 pounds of edible protein is obtained, states the bureau of agricultural economics, USDA. The same amount of time devoted to egg production yields 56 pounds of protein, to pork 58 pounds, to steers 42 pounds, and to lamb production 58 pounds.

Plenty of Calcium Too.

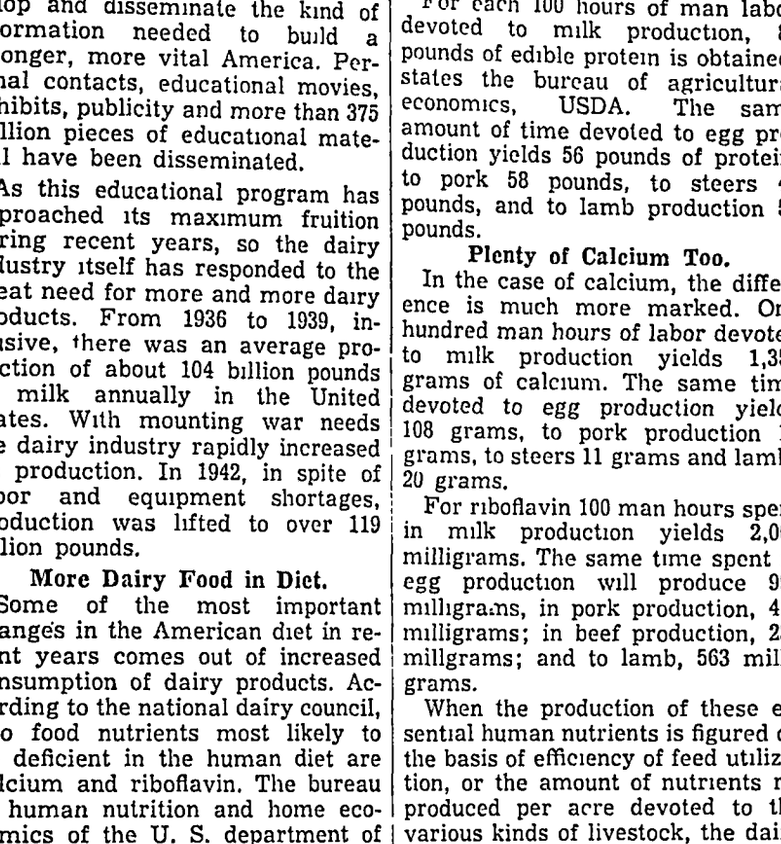
In the case of calcium, the difference is much more marked. One hundred man hours of labor devoted to milk production yields 1,354 grams of calcium. The same time devoted to egg production yields 108 grams, to pork production 17 grams, to steers 11 grams and lambs 20 grams.

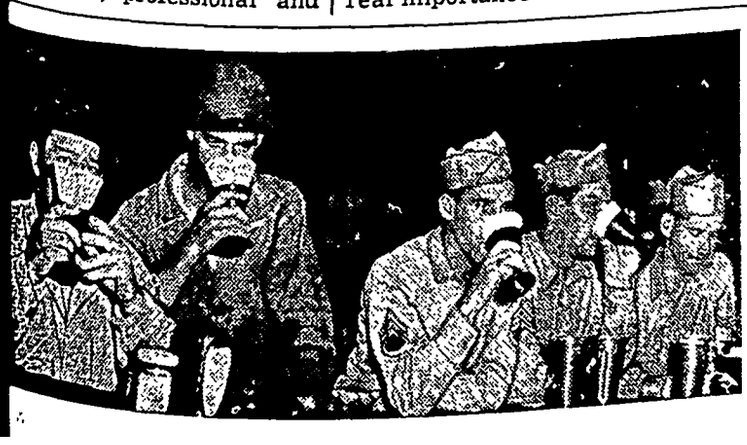
For riboflavin 100 man hours spent in milk production yields 2,008 milligrams. The same time spent in egg production will produce 996 milligrams, in pork production, 419 milligrams; in beef production, 239 millgrams; and to lamb, 563 milligrams.

When the production of these essential human nutrients is figured on the basis of efficiency of feed utilization, or the amount of nutrients reproduced per acre devoted to the various kinds of livestock, the dairy cow is equally efficient and in some cases even more so. It is, of course, true that in the case of some other human nutrients the superiority of the dairy cow is less obvious, but in any complete comparison she stands without a peer, not only in the quality of human food produced but in the economy of it as well.

In this same connection, Food Administrator Jones points out first that the total needs for milk and its products for our military, lend-lease, and civilian uses are much more urgent than for many other foods. Secondly, the dairy cow is the most efficient converter of livestock food into human food. Third, this is the time when we need that efficient utilization of livestock feeds.

Truly, "bossy" is in the war. Her product is recognized as essential in maintaining the well-being of the nation's fighters. It is equally important in maintaining production on the home front. It has contributed greatly toward improving the food habits, the health, and the productivity of the nation. At the same time, the cow is proving herself a most efficient converter of the already short livestock feeds into well-balanced human food.





THE FOUNTAIN of the post exchange is a popular place every evening as husky young men in training for war come in for their malted milks. There are generally several rows of soldiers waiting for their turn at the "bar." Men who drank little or no milk as civilians develop an appetite for it as hard-working soldiers. The idea that milk drinks are for sissies should be dispelled by one look at this row of square-shouldered, square-jawed sergeants, at Camp Beale, Calif.

Star Dust
STAGE SCREEN RADIO

By VIRGINIA VALE
Released by Western Newspaper Union.

WILLIAM BENDIX, star of the Blue network's Sunday airshow, "The Life of Riley," and the movies' "The Hairy Ape," showed that he had lost none of his sales ability when he operated a booth recently at the bazaar for the new Birmingham hospital in San Fernando Valley. Bendix's booth, which sold unrationed groceries, did more business than any other. "Nothin's strange about that," remarked William. "I sold groceries for a livin' long before I thought of becomin' an actor."

—*—

The jig-saw puzzle photos which Ann Miller sent to servicemen fans had an unexpected aftermath. "I

ANN MILLER

got your photo," one corporal wrote the star of Columbia's "Battleship Blues," "but one of your parts is missing."

—*—

The formation of Bing Crosby Productions, Inc., just had to happen; it was one of the few fields left. Bing had made his name in pictures, radio, sports, phonograph records. He organized, at his own expense, entertainment units to tour army camps. He's chosen "The Great John L.," the story of John L. Sullivan, as his first story, Frank Tuttle as his director, United Artists as releasing agent.

—*—

Like many another star, Gary Cooper has been bitten by the producer bug. He made known his yearning to produce movies while filming "Casanova Brown"; International promptly signed him up on a dual producer-actor contract.

—*—

The new issue of the March of Time brings to the screen an exclusive story, "Underground Report," which shows how the people of Germany and their conquered victims are living. It is compiled from Nazi films recently captured in Europe, as well as from film footage smuggled out by the Underground.

—*—

Some serviceman overseas will see his baby for the first time when "Three's a Family" is released. Producer Sol Lesser intends giving a featured role in the comedy to a six-months-old child, preferably one who was born after his or her father sailed. It is Lesser's custom to send a 12-millimeter film abroad for the men to see before the picture is released here.

—*—

The most exclusive theater circuit in the world is that founded in Hollywood by Laraine Day; other members are Cary Grant, Deanna Durbin, Lou Costello, Alice Faye and Tyrone Power, who's non-active while in the service, of course. Each member has a theater and exhibits 16-mm. prints of movies in which he or she has appeared. Miss Day will soon be showing "That Hunter Girl."

—*—

The tour Lily Pons and Andrew Kostelanetz are making through the Persia-Iran-Iraq area is expected to last from six to eight weeks. Miss Pons will sing the arias that we've all heard her do so often on the air, her husband will direct the soldier orchestras and will play piano duets with Carolyn Gary. Frank Versaci, the fourth member of the USO troupe, accompanies Miss Pons on the flute and also plays solos.

—*—

Anne Seymour, who stars as "Prudence Dane" in NBC's "A Woman of America," has just received her Stage Door Canteen pin for two years' service. She works in the kitchen, making coffee—and maintains a production schedule of about 400 cups an hour.

—*—

Maurice Costello; father of those two beauties, Dolores and Helen, is appearing in "Heavenly Days," the Fibber McGee and Molly picture. All other movie stars owe him a lot; screen players were anonymous till he made Vitagraph star him.

—*—

ODDS AND ENDS—Anne Shirley celebrated the completion of her 410th screen role and the start of her 22nd year in pictures by giving a big party at the RKO studio, where she started as a baby actress. . . . If the voice of "Dickie Kimble" in "When a Girl Marries" sounds familiar, it's because you've been hearing him as "Homer" in "The Aldrich Family." . . . Wallace Ford, who's been off the screen too long, gets his big break from Pat O'Brien in "Secret Command," Pat's first producing venture. . . . The first eight rows at every Allan Jones broadcast (CBS, Wednesdays) are reserved for girls in the WAVES, WAC, SPARS and marines.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for June 18

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

A GOOD SOLDIER OF CHRIST JESUS

LESSON TEXT—II Timothy 2:1-4, 8-12; 4:5-8.

GOLDEN TEXT—Suffer hardship with me, as a good soldier of Christ Jesus.—II Timothy 2:3.

"A good soldier"—what a wealth of meaning there is in that simple phrase. We think of our own hometown boys who have distinguished themselves in the service of their country, who have proved again that there is that in American life which can meet a crisis and do it well.

"A good soldier of Jesus Christ" is an even more significant phrase, speaking of that fine loyalty and devotion which Christians of all ages, yes, and of our day, are giving to the Captain of our salvation, our Commander-in-Chief in the great spiritual warfare going on in all the earth.

In our lesson we note that the soldier is—

I. Obedient (2:1, 2).

There is something to be done, and the soldier is enlisted for the purpose of doing it. In the case of the Christian soldier, it is to see that the gospel message which he has received is passed on to others.

Personal work is God's method, one man telling another, and another, and another. This is to be a continuous matter, not just now and then, and each one is in turn to become a soul-winner.

As each one wins others and the witness is multiplied by the law of arithmetical progression, the total result is tremendous.

Why, then, has the entire world not been long since completely evangelized? Because we who are Christians are not all obedient soldiers of Christ.

II. Loyal (2:3, 4).

No soldier can serve well with a divided loyalty. He cannot be running a business back home, or taking on outside interests to divert his attention. Being an efficient and useful soldier is his first and only business.

Have not the military authorities in this war asked those who are at home to keep the problems of the home and business out of the letters to men in the army? Do they not require a man to leave home and family and give his all to the service?

The soldier for Christ must please the Lord, even though it involve bearing "hardness." It is no soft and easy business to be a soldier. "Blood, sweat and tears" are the order of the day. Shall we not do as much for our Lord?

III. Prepared (2:8-12).

Training is of highest importance for a soldier. He must know what to do, and why he is doing it. He must understand the reason for obedience and the purpose of the warfare. In other words, he must be a disciplined man, prepared to serve effectively.

The soldier for the Lord is to "remember Jesus Christ," his resurrected Lord and victorious Commander. He knows for whom and under whom he fights.

He also knows (vv. 10, 11) that the message he bears is God's Word, and will succeed even though the bearer of it suffer and die. He is prepared to die, if need be, before he will deny his Leader (v. 12).

IV. Faithful (4:5-7).

Watch, endure, work, be faithful to the very end. Such is the obligation, yes, and privilege of the soldier for Christ. Paul was able to admonish young Timothy to such complete faithfulness because he had himself exemplified these virtues in his own life.

Those who are called upon to command men must themselves be good soldiers. There is an encouraging note from the battlefields of this great war. One learns that the commanding officers are at the front, not hidden away in dugouts far behind the lines. The men take courage as they see the bravery of their officers.

What that meant in Paul's case may be learned from the story of his life, which is condensed in a brief statement in II Corinthians 12: 23-33. He really endured affliction for Christ's sake.

V. Victorious (v. 8).

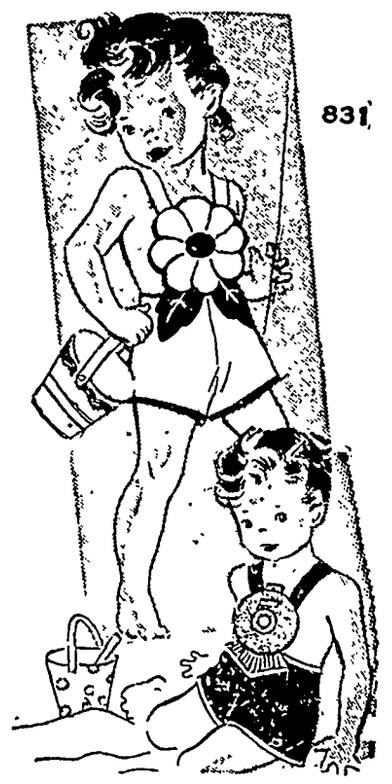
A nation at war can stand the strain and bear the agony if it can be sure of ultimate victory. The grave disappointment of losing a battle, or the deep sorrow of heavy casualties, can and will be borne for the sake of the final triumph of the righteous cause.

In the battle for Christ, we know that the result will be victory. The faithful soldier shares the fruits of victory. The Christian soldier shall one day receive from his Lord and Leader a crown of righteousness.

When will that great day come? When Jesus Christ returns (Matt. 16:27). He is coming again; first for His own, and then in glorious revelation of Himself as the judge of all the world. His victory over all His enemies will then be complete, and He shall reign forever and ever.

Things to do

831



A SUNSUIT for sister, giving the sun a chance, blossoms out into a sunflower, and brother's goes mannish with its chu-chu bib in gay color. The tots will love them!

Inebriate Soon Sized Up Situation and Lent Hand

A grave digger was hard at work. As he shoveled each spadeful of earth he became more and more absorbed in his thoughts, and before he knew it he had dug the grave so deep he couldn't get out.

Came nightfall and the evening chill, his predicament became more and more uncomfortable. He shouted for help and at last attracted the attention of a drunk.

"Get me out of here," he shouted, "I'm cold."

The drunk looked into the grave from which he heard the voice, and finally distinguished the form of the uncomfortable grave digger.

"No wonder," he said, kicking a little dirt into the grave, "ya haven't got any dirt on ya."

Millions have used—
PAZO for Simple PILES
Relieves pain and soreness
There's good reason why PAZO ointment has been used by so many millions of sufferers from simple Piles. First, PAZO ointment soothes inflamed areas—relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

KLEMME LOCALS

Rev. and Mrs. Koch of Garner spent Tuesday visiting at the Lloyd Lau home.

Ed. Josten and family were at Algona Sunday and drove around the prisoner of war camp west of Algona. Ed. said it was an interesting sight.

Mr. and Mrs. Louis Perkins spent Sunday visiting at Estherville. They brought back with them several large peonies which they cut at their home in Estherville. The flowers are about as big in circumference as a dinner plate and were on display at Thada's Store.

Mr. and Mrs. John Etchen have moved back from Des Moines and are spending this week at the Albert Swanson home until their own home is vacated by Leo Esbeck and family who will move to Ventura.

Mrs. Godfrey Greene of San Berbadino, California, arrived this morning for a visit with her father, Mr. Joe Johnson at the Art Kudje home, and with other relatives in this community. Before her marriage Mrs. Godfrey was Miss Hulda Johnson.

Calcium chloride was placed on part of Main street and a few connecting streets by the County Road Commission under the direction of Supervisor Chambers, last Wednesday. The treatment will hold down the dust during dry summer weather.

Mrs. Clara Stille, accompanied by her sister Mrs. Ralph Janssen of Iowa Falls, left for Beltrami, Minnesota for a visit with their brothers, Otto and George Gast.

Mrs. Julia Bianchi of St. Louis and Mr Bennie Liljenberg of the Veterans Hospital at Knoxville are spending this week in Klemme visiting with their sister, Blanche Frederick and their mother, Mrs. Carrie Kinden, and also at the Frank Kluckhohn and Lynford Baack home.

Ed Thompson enjoyed a surprise visit Saturday from his brother, Lowell Thompson, EM 2-c of Boston, Mass. Seaman Thompson had a couple of days leave, having just returned from sea duty and came home for the week end. He also visited with his father, Thos. H. Thompson at Kanawha.

Capt. Ray Jorgenson, Jr. and his assistant, Flight Officer J. L. Weaver, of Dodge City, Kansas, flew a bomber into Des Moines Saturday and then came up to spend Saturday night and Sunday forenoon visiting at the R. A. Jorgenson home. The men were out on a cross-country flight with some of their students.

J M. Neuberger, of Brownsville, Texas, came Saturday and visited over the week end with his parents, Mr and Mrs. John Neuberger and other relatives. Mr. Neuberger, who farmed for several years northeast of Klemme, went south for his health. He is now employed with an engineering supply company at Brownsville and flew into Chicago with one of the company officials on business. Mr. Neuberger says his health is greatly improved since living in the south.

Vacations are on the way. And The American Weekly Household Almanac keeps up with them by running interesting articles on good vaction cookery, cooling salads, and precautions on sun tanning. Read the Almanac Pages in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.— 1tc

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

---

Mr. and Mrs. Sumner Trumbull visited over the week end at the Clare West home in Des Moines.

Otto Schlawin of Garner was a business caller in Klemme Saturday.

S. G. Overholt of Sheffeld spent Sunday in Klemme visiting with his brother Ira and wife.

Ira Overholt went to Cedar Rapids Monday evening to attend a convention of the Masonic Lodge.

Mrs. H. G. Ramsay of Marble Rock, came Sunday for a visit with her son H. D. Ramsay and family.

Mr. and Mrs. Lester Stille and daughter Lois, were Mason City visitors Friday.

Arnold Tabb and family of Corwith were guests at the J. A. Chambers home Sunday.

Last week Mrs. W. L. Sherwood purchased the George Griggs property located on Main street in Goodell.

Mrs. Hulda Wiles, of Des Moines, spent a few days of the past week in Klemme visiting with old friends.

Mrs. Henry Jahnke is on the sick list and Miss Lydia Bock has been caring for her and doing housework.

Miss Connie Carr of Hardy neice of Mr. and Mrs. Ira Overholt, came Sunday for a week's visit at the Overholt home.

George Lawhorn began hauling mail for Sumner Trumbull on route one Monday, as Mr. Trumbull is on his vacation.

Mr. and Mrs Wayne Pavey and daughter of Webster City, were dinner guests Sunday at the Melvin Neuberger home.

Mr and Mrs. Carl Finders returned home Saturday from Iowa Falls where they spent a week's vacation visiting with friends.

Vernon McLaughlin and family of Belmond were dinner guests Sunday at the home of Mrs Daisy Lemke.

Mr. and Mrs. Levi Klotzbach spent Sunday at Kanawha visiting at the Leslie Smock home. Mrs Smock and children came home with them for a week's visit.

Erick and John Josten returned home Monday evening from the Rochester hospital where both men underwent major operations. They are both making a good recovery.

Conrad Quandt has made further improvements at his cafe by having the floors refinished and covering the long counter with inlaid linoleum. It is a nice improvement.

Mrs Mary Waterman came Friday morning from Winetha, Ill, where she had spent the winter with her son-in-law, Axel Hofgren and family. Mrs. Waterman will spend the summer in Klemme.

The Work Circle of the Methodist W. S. C S. will meet Thursday, June 15th at the church with Mrs. A. G. Ko[illegible]er and Mrs. W. F Pavey as hostesses. The ladies will work on a quilt.

Pvt. Melvin Coobs of Camp San Louis Obispo, California, arrived home Monday morning to spend a fifteen day furlough visiting with his parents, Mr. and Mrs. Benn Coobs and other relatives.

Mr. and Mrs. Wm. Ax had as guests for dinner Sunday, J. M. Neuberger of Brownsville, Texas; Mr. and Mrs. Lloyd Ax of Mason City, and Mrs. Leslie De Merritt and children.

Miss Jacqueline Kudje, daughter of Mr. and Mrs. Arthur Kudje, recently secured a position in the First National Bank at Los Angeles, California. Miss Kudje is at present taking a teller course and will soon be assigned a teller's window in the big bank. Miss Kudje says that she enjoys her new work very much.

Pvt. Bates Saddler of Elgin Field, Florida and wife, and Mrs. Eddie Epps an children of Des Moines came Saturday and visited over Sunday at the parental Herman Paul home.

Pvt Allen Barz and a friend from Madison, Wisconsin came home Saturday morning and visited until Saturday evening with relatives and friends. Allen is taking a radio and radar course at the Army School at Madison.

Mr. and Mrs. Wayne Pavey and daughter of Webster City are enjoying a vacation which they are spending in Klemme and Plymouth visiting with relatives. Mr. Pavey is employed at a large creamery in Webster City.

Lt. and Mrs. Taalkeus Ahrenkeil of Victorville, California, spent the past week in Klemme visiting Lt. Ahrenkeil's mother, Mrs Tony Ahrenkeil and other relatives. Lt. and Mrs. Ahrenkeil will return to California Saturday of this week.

Some months ago J. A Chambers moved a house in from the country to his lot in Klemme. Work on remodeling the house is progressing right along and when finished Mr. and Mrs. Chambers will have a very residence.

Seaman Martin Barz arrived home Saturday morning from Camp Farragut, Idaho, to spend a fifteen day furlough with his family and relatives here Seaman Barz completed his boot training and graduated last Thursday

Mrs H G. Voetberg of Garner, received a bouquet of roses Saturday from her husband, Capt H G. Voetberg who is serving overseas. Saturday was Capt and Mrs. Voetberg's seventh wedding anniversary.

Mrs Blanche Frederick and Mrs. Carrie Kinden and their guests Mrs Julia Bianchi and Bennie Liljenberg visited with the Howard Brower and Julius Kinden homes at Ventura Heights last Thursday afternoon

Mrs. Carrie Kinden and daughters, Mrs Blanche Frederick of Klemme; and Mrs Julia Bianchi of St. Louis, and son, Bennie Liljenberg of Knoxville, Iowa, visited at the Mary Lundberg home in Forest City, Tuesday

Mr. and Mrs. A. L. Kingery have taken rooms at the Art Wellemeyer residence for the summer, or until they can move into a permanent home. Mr. Kingery will be our Superintendent of Schools this coming year. He will work for George Lawhorn as a painter this summer.

Mrs. Amanda Kirkwood of Mason City, writes The Times that she received twenty-one birthday cards last week from old friends at Klemme and Mason City and some from California. She wishes to thank all for remembering her on her birthday. Mrs. Kirkwood resides at 420 South Taylor Ave., Mason City.

Fred J. Arnold moved his machinery and tools new building south of station last week, and is business in his new locati

EAGLE LAKE DAM BROKE LAST WEDNESDAY NIGHT

More Water Added to Flood Stage In West Iowa River

The dirt approaches to the concrete dam at Eagle Lake gave away last Wednesday night releasing more water into the flooded west branch of the Iowa River and then floodedflooding more land along that stream

The County Engineer and the Conservation Officer had men at work placing sand bags along the dike near the spillway, but despite this work the water broke loose

Water was still rising in the west river the early part of this week, whereas water in the Iowa River near Klemme had receded and flooded lands were being drained of water all along the river. The river at this writing is again nearly normal, after reaching the crest stage last week Monday night, from which time on the water began to lower in the stream

LIBERTY GO-GETTERS MET AT HELMKE'S HOME

The Liberty Go-Getters boys 4-H club held their regular monthly meeting at the home of Derwood and Gerald Helmke. The boys discussed projects and how to give first aid in case of accidents on the farm.

The boys also planned their annual picnic for the 25th of June Probably this picnic will be held in conjunction with the 4-H girls of Liberty Township The picnic will be at the State Park.

Paul Henderson, County Extension D rector, discussed the achievement show and suggested some emergency crops that might be planted in drowned out areas

4-H GIRLS STATE CONVENTION

A state convention for a restricted number of 4-H girls will be held this year. Mrs. Edith Barker, state girls' 4-H club leader, has announced that the convention will be held in Des Moines July 10, 11, and 12.

Arlene Wille, Hancock County president, Marjorie Fox and Carmen Goll have been chosen to represent the girls from this county One 4-H club leader and Miss Hazel Grimes will also attend.

New state officers will be elected at the convention. The program will be devoted to discussions, work shops, inspirational programs, and special social events.

Corn Freeze Order Will Expire Friday At Midnight, June 23

GEO. BORN OBSERVED HIS 84TH BIRTHDAY SUNDAY.

Mr George Born observed his 84th birthday Sunday with a big dinner and family gathering at his home in Klemme Those present to honor Mr Born on this occasion were Mrs. Clara Barz and family, Mr and Mrs Fred Neuhring and family, Mr and Mrs George Theiman, Erwin Neuhring and family; Maurice Murray and family, Earl Neuhring and family; Raymond Barz and family; Mrs. Gladys Barz and children, Miss Stella Theiman of Des Moines, and Mrs Elmer Meinders

GIRL SCOUT NEWS

The Klemme Girl Scouts held their 19th regular meeting at Mrs Sumner Trumbell's house We played "Gossip" led by Marjorie Lau and Jo Ann Carpenter After the game we began books about leaves in which we pasted different kinds of leaves and their names Jo Ann gave a report on the Saxaphone, played Silent Night, and played the scale. We got our assignment for the next meeting and then the meeting was adjourned

Marjorie Lau & Maralee Ridder

CORN FREEZE ORDER HAS BEEN LIFTED

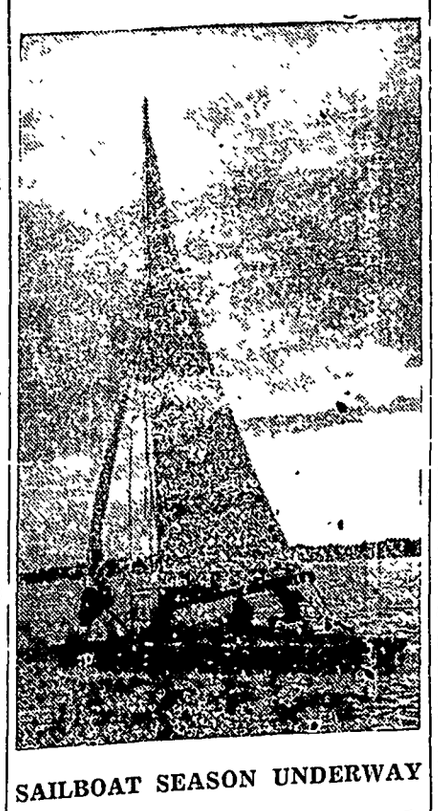
Word was received Tuesday at the Hancock Co. AAA office that the Corn Freeze Order would expire midnight Friday, June 23rd., unless extended, according to Alfred V Josten, Chairman.

Any farmers or landlords, then, who wish to contract their corn must do so before the expiration date After the Corn Freeze Order expires, the Commodity Credit Corporation will pay the shelling and delivering expense only in those cases where the corn has been contracted. Sixty days' time is allowed for delivery of contracted corn

Anyone desiring to sign a contract immediately get in touch with his township AAA Committeeman who has a supply of contracts, or with the County AAA Office at Garner

NO SERVICES FOR TWO WEEKS AT REFORMED CHURCH

There will be no services at the Klemme Reformed Church for the next two Sundays as the church is being redecorated and the pastor is away.



SAILBOAT SEASON UNDERWAY

Sailboating becomes increasingly popular each year on Iowa waters, and this year more than 300 sailboats will spread their wings on the lakes and streams. There are two sailboat yacht clubs in the state, the Okoboji and Clear Lake clubs, several Sea Scouts troops, and many unaffiliated sailors. The two yacht clubs hold races on Okoboji and Clear Lake each Saturday and Sunday throughout the season and furnish free entertainment for thousands of spectators at these two lakes

The races are between boats of the same type, and in addition to being a pleasing sight, they often furnish excitement to the spectators in the form of spills, near-spills, and close finishes. There are four classes of boats used by the sailors. Moth boats are the smallest and are very tricky to sail, although not as fast as the others X class boats are rather slow and used by beginners for training. This type sailboat furnishes a great deal of pleasure with very little danger. C class boats are the most popular, very fast, and used by advanced sailors. The E-boat is in a class by itself, only the most capable sailors, are able to handle it. A- boats have set a world's record for speed — 27 miles per hour.

More Hancock County Young Men Go Into Armed Service

Our Men In The Service

Pvt. Melvin Coobs leaves this Wednesday evening for San Luis Obispo, California, after ejoying a furlough visiting here with his parents, Mr. and Mrs. Benn Coobs and other relatives.

Larry Van Syoc enlisted in the Navy last Wednesday and left from Mason City for Des Moines to take his examination.

He returned to Klemme after passing his physical examination successfully and will leave Sunday evening for active service.

C-M Howard Schoenwetter came home Sunday morning on a fifteen day furlough which he is spending visiting with his parents, Mr. and Mrs. George Schoenwetter in Liberty township. Howard is stationed at Henderson Point, Pass Christian, Mississippi.

Lt. and Mrs Taalkeus Ahrenkeil left last Thursday for Victorville, California after enjoying a leave spent visiting with relatives here and at other Iowa points.

T-Sgt. Edmond Blanchet of Camp Livingston, La., spent the past week here visiting with his wife and other relatives and friends.

Pvt. Elmer Langlitz of Camp Swartz, Georgia, came last week for a visit with his father, Wm. Langlitz of Liberty township who recently underwent a major operation. Elmer also visited with his brother, Mayor Ira Langlitz at Goodell while he was home on a furlough.

COUNTY REPUBLICAN CONVENTION AT GARNER JUNE 30

The Hancock County Republican convention will be held at the court house in Garner on Friday, June 30th, beginning at 10:00 a. m Delegates will be chosen for the State Convention and the Judicial District Convention.

The meeting was called by County Auditor Fred C. Missal.

SPRAY BASEMENTS FOR INSECTS

Spiders and house centipedes, annoying to householders but not damaging, may be controlled by thorough applicaions of household flyspray at least twice a week. Kerosene may be used in basements where odor and stain are not objectionable, says Harold Gunderson extension entomologist at Iowa State College

CIVIC CLUB MEETING THIS THRUSDAY EVENING

A meeting of the Klemme Civic Club has been called for Thursday night of this week at the Community Hall at 8:00 o'clock. This is a special meeting and lunch will be served afterwards. Every business man is expected to be present.

It's Victory Canning Time Again!
(See Recipes Below)

Can What You Can

arkets are becoming green dot- with new vegetables like aspara- spinach and peas. There are of bright red too, a welcome t, those strawberries, raspber- and cherries.

ey're good fresh, so use them very way you can. But plan to put up some of the best produce in jars. Jams and jellies will come in mighty handy when you're point conscious about butter next winter. Jars of vegetables will put nu- ion into those winter meals when ned food points are at a pre- um.

here's one rule about canning t you'd best remember when put up those jars of fruits and etables: "Two hours from garden kettle." That means using only ds at the peak of condition, for get out of your can only what put into it.

f vegetables turn brown in their s and look unattractive as com- red with the fresh produce, it's obably because of overprocessing ercooking) or lack of fresh vege- bles when you started canning.

When you overcook those bright d berries, they can't possibly be sh looking or taste like a reason- le facsimile of the original prod- t. Follow directions and cook just g enough, and the result will be ll worth the effort.

Save Used Fats!

Now's a good time to put up con- rve like grandmother used to ake. This contains a mixture of uits popular now:

Strawberry-Rhubarb Conserve.
(Makes about 10 glasses)

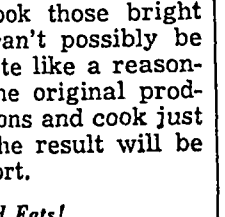
1 quart prepared strawberries
1 quart prepared rhubarb
6 cups sugar

Wash and hull strawberries. Wash ubarb and cut into ½-inch pieces. ix strawberries, rhubarb and sug- . Cook mixture slowly until it is ick and clear. Pour into hot, ster- glasses.

Three-Fruit Preserves.

2 pints raspberries
2 pints strawberries
1 to 1½ pounds cherries
Equal amount of sugar by weight, of all fruits

Combine all ingredients and boil minutes. Add ½ cup lemon juice nd boil 2 min- tes longer. Re- ove from fire nd allow to cool. hen cool, pour nto sterilized rs and seal. Al- ough the pre- rves look thin hen you finish cooking, they will icken upon standing.



Lynn Says

Popular Observations: You like certain foods, but you'll like them better if you don't let them fall into a rut. Instead of serving these favorites the same way all the time, try these variations:

When the milk sours, use it in muffins. It spells extra lightness.

Rice pudding is good with cream, but better still with chilled fruits in season—cherries, strawberries, raspberries and peaches.

Spread lamb or ham patties with mustard before frying or broiling—you'll get good results.

Orange juice and grated orange rind in place of milk in baking powder biscuits is something to cheer about.

Good accompaniment with fish: Tiny beet cubes mixed with sour cream.

Tomatoes stuffed with cucumbers, cottage cheese and sour cream is something new by way of a tomato surprise.

Lynn Chambers' Point-Saving Menu

Slice Leftover Ham
Potato Salad *Spinach
Grapefruit-Strawberry Salad
Whole Wheat Bread
Rhubarb Dessert
Beverage
*Recipe given.

Sunshine Strawberry Preserves.
8 cups strawberries
9 cups sugar
Juice of 1 lemon

Wash berries and put into preserving kettle with alternate layer of sugar. Add lemon juice and heat slowly to boiling. Boil gently 10 minutes. Pour into sterilized jars and set in sun for three days. Seal with paraffin. While in the sun, a sheet of glass should be placed over jars to keep out foreign matter.

Save Used Fats!

Raspberry-Cherry Conserve.
3 cups cherries
3 cups red raspberries
4½ cups sugar

Cook cherries in very little water until skins are tender. Add raspberries and sugar. Cook until thick and clear. Pour into sterilized jars and seal while hot.

Commercial pectin shortens the jelly-making process considerably and preserves the fresh fruit color and flavor in the finished product:

Ripe Sour Cherry and Currant Jelly.
4½ cups juice
7 cups sugar
½ bottle fruit pectin

To prepare juice, stem but do not pit and crush about 1½ quarts fully ripe cherries. Crush about 1¼ quarts fully ripe currants. Combine fruits; add ¾ cup water, bring to a boil, cover and simmer 10 minutes. Place fruit in jelly bag and squeeze out juice. Measure sugar and juice into a large saucepan and mix. Bring to a boil over the hottest fire and at once add bottled fruit pectin, stirring constantly. Then bring to a full, rolling boil and boil hard ½ minute. Remove from fire, skim and pour quickly. Paraffin while hot.

Early spring vegetables are coming out in the markets and in the gardens. They should be canned as soon as they are best, so that you will have the best possible results. Since pressure cookers are unrationed this year, every homemaker should be able to get one for herself or the use of one as they are the best method for processing non-acid vegetables:

***Spinach.**

Wash carefully and precook with just the water clinging to the leaves until wilted. Pack into clean, sterile jars, being careful not to press too tightly. Add 1 teaspoon salt to each quart. Fill to within ½ inch of top with boiling water. Put on cap, using manufacturers' directions and process 60 minutes at 10 pounds pressure or 3 hours in boiling water bath.

Asparagus.

Wash thoroughly, removing scales from stalk. Cut in jar lengths. Tie in bundles, place tips up in boiling water to cover lower tough portions. Cover vessel tightly. Precook 3 minutes. Drain, pack into clean, sterile jars, tips up. Add ½ teaspoon salt to each pint jar and fill with water to within ½ inch of top. Process 40 minutes at 10 pounds pressure, or 3 hours in hot water bath.

Green Peas.

Shell and grade peas, using only young, tender ones. Precook three to five minutes. Pack loosely in clean sterile jars to within 1 inch of top, adding ½ teaspoon salt to each pint jar. Fill with water in which peas were precooked to within 1 inch of top. Process 60 minutes at 10 pounds pressure or 3 hours in boiling water bath.

THE IDEAL AMERICAN

He don't go much for microphones—
He ain't the type to spout;
He sometimes talks in undertones
And knows what he's about.
He ain't no man for tossin' hats—
He shuns the blazin' light;
He's got but one ambition: that's
To get the job done right!

He don't go yellin' for the press
To keep him in the news,
In fact it fills him with distress
When publishers so choose;
He never rushes into print—
He takes no "public pulse";
To ballyhoo boys he's the flint . . .
He's got one aim: RESULTS!

He don't pop off most every day
With notions far from ripe;
No critics drive his poise away . . .
He ain't no newsreel type!
While shouting is the gen'ral rule
And oratory's loose.
He does a turn at keeping cool
And knows one word: PRODUCE!

When Washington is in a mess
And rows bust out anew
It don't annoy him much, I guess,
If he ain't yellin', too;
He hasn't got an ax to grind—
At no man is he sore . . .
Bill only has one thing in mind,
And that's to WIN A WAR!

* * *

FAIR WARNING

I know a lady who speaks of "snaps";
She says her "mums" are always splendid;
The day she calls petunias "pets"
Our garden chats are ended!

Sailors Submerged 210 Feet Made Record Escape

The greatest ocean depth at which men equipped only with a breathing device have escaped from a submarine is 210 feet, a record held by two crew members of the British P-32, sunk in the Mediterranean on September 17, 1941, says Collier's. At the lowest depth, their bodies were subjected to a pressure of 133 tons, or nearly seven times as much as at the surface.

By "JERGIE"

LATE SHOPPERS KEEP OUR GROCERYMEN ON THE JUMP

The writer was conversing with one of our grocerymen the other day, after he had put in a busy Wednesday night waiting on shoppers.

There are always "late" shoppers who put off until about time for the store to close and then dash madly in and want to be waited on. He said it was always the same group of offenders. The late last-minute shoppers are divided into two classes: those who live in town have all day to shop and then dash into the store at about 6:00 o'clock to get their groceries before the store closes. Then there are the other group of last-minuter shoppers, most of whom are farmers, who make a last-minute raid before the store closes an Wednesday and Saturday night. This class of last-minuters will sit in their cars and visit, or sit on the benches along the street, talking it all over with the neighbors, and at about the time they see the lights being turned off in the stores, they grab their case of eggs and high-tail it for the grocery store to get their eggs counted and their order filled!

Now both classes of "last-minute" shopers have probably never given it a thought that they are making it very inconvenient for a a tired grocery clerk to wait on them just before closing time.

The writer then checked with the other business places and found that each place had their own list of last-minuters and wished they could be educated to do their shopping earlier. So we said we would tell the people about it and maybe the last-minuters will see the light.

One grocer suggested it would be a great help if the farmers would bring their eggs and their shopping list in as soon as they came to town, and then they could have the whole evening to visit and the merchant could take care of the eggs and fill the grocery order and have everything ready when Mr. Farmer got ready to go home.

The Klemme businessmen and clerks want to do all they can to help the trade, and they would appreciate very much if the trade would co-operate with them in the matter of getting away from late last-minute shopping. Let's give it a try out folks. Let's All Co-operate.

BETTER IOWA GARDENS

If gardeners value their asparagus and rhubarb plantings, they will stop harvesting such crops immediately. The plants need the remainder of the season to store energy in their roots for next year's production. Cut the bloom stalks from all rhubarb plants and place them on the compost heap where they'll do some good. If they are left to go to seed, they will rob the plant roots of food. Action now will help increase production in later years.

* * *

Weeds are always a problem in asparagus beds. A wheel hoe may be used on very small beds, but beds of any size should be diced and harrowed at the time of the last harvest. It is well to fertilize the plants at this time. Continue to cultivate between the rows during the remainder of the season.

It is well to fertilize the plants at this time. Continue to cultivate between the rows during the remainder of the season.

Before growth starts early next spring, fertilize the patch and cultivate. The patch may be cultivated once during the harvest season to help keep down weeds. Salt may kill some weeds but not all. It does not pay to buy salt to apply because good asparagus can be grown without it.

* * *

Many gardeners will do well to check their plants for spacing at this time. Vegetable plants usually grow too crowded. See if cutting out every other bean plant, for example, would not give spacing more in line with the recommendation in your planting table.

* * *

In some areas the soil has been saturated with water that rains must run off. Many gardens are washed in the run-off. It may be possible to avoid considerable washing through gardens in some cases by digging small ditches to divert the water around the garden.

* * *

Check your black and purple raspberry plants now. As soon as the young shoots developing from the base are 2 feet high, pinch out about 4 inches of each tip to stop their skyscraper tenednoy and to throw their energies into side branches. Perform a similar operation on the purple kinds, after they reach a height of 2½ to 3 feet. These are important steps in preparing for next year's crop of fruit. The 1945 fruit will be produced on the shoots that are developed now.

* * *

In general you can expect more garden trouble from diseases during a wet season, such as we have been having, than from insects.

* * *

Gardeners who have more vegetables then they need should see that some relative or friend uses that surplus.

WORRIED ABOUT THE HEAT? THIS TIP IS FOR YOU

Nutritionist Gives Advise On Eating Proper Food To Keep Cool

If you're worried about the heat this summer, you ought to give a little more thought to the food you eat.

That's the advise of Mrs. Louise A. Scott, state health department nutritionist, who said today that eating the right diet will help you keep cool this summer.

"Eating," she said, "is like heating a house. In the wintertime you need more fuel, but when the warm weather comes, you should cut down on the heat-producing foods, such as rich, sugary, and starchy foods and desserts and fats."

She pointed out that the trick in eating is to get all the basic food you require to meet your energy needs and not to have "a great excess which will be stored in the form of extra fat."

"You are the best judge of your energy needs," she commented. "If you're a farmer working hard in the fields, it should be obvious that you need more food including meat and other proteins than the city person who sits at a desk, goes home, eats, and then flops into a hammock.

"The city person who includes a round of golf, a game of tennis, or some other good exercise in his day, however, can use more food than one who lives a sedentary life."

Being careful to point out that the basic diet which satisfies energy needs is non-fattening, the nutritionist said this diet includes the following items daily: one quart of milk for children and a pint for adults, two or more servings of vegetables besides potatoes, two or more servings of fruit, at least one egg, one or more serving of meat, chesse, fish or fowl, two or more servings of cereal and bread, and two or more tablespoons of butter of fortified margarine.

BEST PROFIT FROM FALL PIGS AT 240

That's Conclusion Based on Studies Made at Iowa State College

Conclusions based on feeding studies at the Iowa State College Experiment Station indicate that 240 pounds may be the best weight to which to carry last year's fall pigs, if current floor prices prevail. Carrying them to between 260 and 270 pounds gives a little more profit if all goes well, but not very much more at best.

In view of the risk of death loss during hot weather, the growing shortage of feed and the possibility of alternative uses of feed which may be more profitable, farmers therefore may find the extra profits too small to warrant feeding the pigs from 240 pounds on up to 270 pounds.

Discount Begins at 270

When hog prices are at ceiling levels, profits will be the greatest if the fall pigs are sold just before they reach 240 pounds.

These conclusions have been reported at Iowa State College by I. W Arthur, marketing specilaist, and C C Culbertson, of the Animal Husbandry Section of the Experiment Station.

They point out that when market prices are at floor levels, hogs raisers can afford to feed hogs to slightly heavier weights than when ceiling prices are being paid. Hogs are not discounted until they weigh more than 270 pounds, when prices are at floor levels, but a discount goes into effect at 240 pounds when ceiling prices are being paid.

PROPER WIRING IS AID IN ELECTRICITY COSTS

Three important considerations for proper wiring of farmsteads are listed by Harold Beaty, extension agricultural engineer at Iowa State College.

First, there should be enough wire of the right size to carry the power that the farm family will need. A sufficient number of switches and outlets in convenient places also is essential. Second, the monthly cost of electricity may be lower if the farmstead is properly wired. And a good wiring job reduces fire and shock hazards.

Beaty says that more than 16,000 farm families could qualify for power line connections in 1944. Whether they will get them depends on availabiltiy of materials and labor.

Because Iowa laws do not require inspection of electric wiring, farm families must assume the responsibility for proper wiring. Precautions that will help to provide proper wiring include using good materials, approved by the Fire Underwriters Laboratory.

A capable electrician should be hired to do the wiring, and it should be inspected by a competent inspector. It would also be a good idea, both from the standpoint of good wiring and wise use of electricity, if the farmer attempted to learn something about electricity and wiring.

Mr. and Mrs. Kenneth Schlawin and Bobby were visitors at the Dan Webner home Monday evening.

W. H. Greiman, living north of town, was laid up all of the past week with lumbago, but was able to be around on his own power again Saturday. "Bill" is an old timer on the election board and it could have been that the democrats really got under "Bill's" hide and he got the lumbago.

13 CHILDREN OF JOHN GOLL FAMILY LIVING IN THIS VICINITY

G. A. Goll, of Klemme, who is going on his 70th year of age, is one of 13 chidren living of the family of Mr. and Mrs John Goll. The children all live in this vicinity and they are as follows, in the order of their ages, beginning with the eldest:

G. A. Goll, Mrs W. J. Barz, Mrs Geo. Greiman, Charles Goll, Mrs Bill Haberkamp, John Goll, Geo. Goll, Jake Goll, Mrs Art Haes, Mrs. Art Upmeyer, Mrs. Chas Haes, Mrs. Lillie Quintus, Ben Goll. Their ages are all within 20 years of each other. The parents are dead.

The first five listed were born in Germany and came with their parents to this country in 1882, the family settling in this country and living here ever since. Mr and Mrs. Leo Jass live on the old home place. Mrs. Jass is the daughter of Mr. and Mrs. Chas. Goll.

—Garner Leader

It does not pay from the standpoint of yield to plow ground for oats in Iowa, but it may become necessary as a means of combating European corn borer.

BOARD PROCEEDINGS

1ST ADJOURNED JUNE MEETING

Garner, Iowa, June 13, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with Penn Eckels, F. J. Schoun and John A. Chambers present.

The minutes of the last meeting were read and approved as read

This being the 13th day of June, 1944, the second Tuesday following the Primary Election held on June 5, 1944, the Board of Supervisors of Hancock County, Iowa, did proceed to organize as a Board of Canvassers and did proceed to canvass the result of the Primary Election held on June 5, 1944, as commanded in Section 577, Code of Iowa, 1939, and Laws amendatory thereto. The result of said canvass follows.

On motion and second the application and bond for a cigarette permit of Donald Butz is approved and permit is hereby ordered granted.

On motion and second the application and bond for a class "B" Beer permit is hereby approved for the Garner Gun club and permit is hereby ordered granted

Supervisor Schoun is hereby appointed a committee to investigate and cause repairs to be made in DD No. 13, ateral 7 Supervisor Eckels is appointed a committee to investigate and cause repairs to be made in D D No. 15, D. D. Nos. 1 and [illegible]teral [illegible]23, D. D. No. 38 and D. [illegible]ant[illegible]West Main.

This being t[illegible]12th[illegible]f June, 1944 a date heretofore set [illegible]etting on coal to be delivered F O B[illegible]ck at Duncan, Iowa, for use at the [illegible]County Home, the hour for said le[illegible]having arrived the chairman of the [illegible]proceeded to open all bids on file a[illegible]r duly considering all bids on file[illegible]he bid of the Farmers Co-op. Soci[illegible]Garner to be the lowest and best bid therefore.

Be and it is therefore resolved by the board of Supervisors of Hancock county, Iowa, that the bid of the Farmers Co-op. Society of Garner, Iowa, be accepted as the lowest and best bid for the delivery of 100 tons of stoker coal for use at the Hancock County Home. Said coal to be delivered F. O. B. Track at Duncan, Iowa all other bids are hereby rejected. Chairman F. J. Schoun is hereby authorized to execute a contract with the Farmers Co-op. Society of Garner for the delivery of said coal as specified in the letting.

This being the 12th day of June, 1944, a date fixed by law for the annual County Board of Review to convene to review assessments of the various township and towns of Hancock County, Iowa, the Board of Supervisors did organize as a County Board of Review as commanded in section 7137, Code of Iowa, 1939, and laws amendatory thereto and did review the assessments as turned in by the various township and town assessors, and upon reviewing valuations as reported by the several assessors in Hancock County, Iowa, do find these valuations to be equitable and just and no changes are necessary.

BE IT RESOLVED, by the County Board of Review that all valuations be carried on the tax books of Hancock County, Iowa, as reported by the several assessors in Hancock County, Iowa.

The foregoing resolution was offered and read by Supervisor Penn Eckels who moved its adoption, was seconded by Supervisor John Chambers, whereupon the chairman placed the motion of its adoption, and upon roll call the vote thereon is F. J. Schoun, Penn Eckels and John Chambers, Aye. Nays, none.

On motion and second the Hancock County, Iowa, Board of Review adjourned.

On motion and second the Board adjourned to June 13, 1944, at 9 o'clock A M.

F. J. SCHOUN,
Chairman.

Attest:
FRED C. MISSAL, County Auditor.

SEED EMERGENCY CROPS THROUGHOUT SUMMER MONTHS

By seeding emergency crops Hancock farmers can get fields which were too wet to plant earlier into production yet this year County Extension Director Paul Henderson states.

Soybeans, which may be planted for hay as late as July 15, top the list of emergency crops which Iowa State College agronomists recommend for late planting. Any of the varieties normally seeded for grain will be satisfactory for hay Mixed lots of soybean seed also are suitable for hay. Inoculated should be used with at least 2 bushels per acre recommended when broadcast or drilled with a grain drill. When grow in cultivated rows, at least 1 bushel of seed per acre should be used.

For either pasture or hay, sudan grass may be seeded until Aug. 1 Average yield at Iowa State College from seedlings made June 21 was 3 tons. A good seedbed, the same as for corn, should be prepared and the crop broadcast at the rate of 15 to 20 pounds per acre.

A soybean-sudan grass combination may be seeded up to July 15 A recommended mixture of 2 bushels of soybeans and 5 pounds of sudan per acre may be broadcast or drilled.

Early varieties of sorghum, such as Early Sumac or Hegari, can be planted until Aug. 1. Rape, which grows rapidly, may be seeded at the rate of 5 to 7 pounds per acre While it may be planted as late as Aug. 1, it should be put in as early as conditions permit Buckwheat may be seeded up to July 10 at a rate of from 35 to 45 pounds.

The possibility of establishing alfalfa or sweet clover in the late summer should not be overlocked Nearly all sweet clover seedlings made in central Iowa as late as the first of September have been successful, but it is better to seed near mid-August.

When it is too late to seed anything else, winter rye may be sowed for fall pasture, the crop carrying over for early spring pasture In the exceptional condition where this might be planted, 5 pecks should be seeded to the acre.

WHITE PINE BLISTER RUST SERIOUS IN IOWA

Protection of all white pines in woodlots and windbreaks against the ravages of the white pine blister rust is urged by E. L. Wilson, state leader, blister rust control.

Value of the white pines as producers of wood, shelter against wind, and an improvement in the appearance of Iowa farms is well known, yet a stand may be wiped out entirely within a few years if not protected against the rust

Destruction of wild and cultivated currant and gooseberry bushes growing within 900 feet of the white pine planting is the control measure that is needed. The cultivated European black currant should be removed wherever found. The bushes are alternate host of the fungus disease, and the spores spread from the bushes to the trees during the spring before they can infest the trees. To keep the area free of currant and gooseberry bushes, it should be checked every few years.

The white pine blister rust is especially serious in the northeastern part of Iowa, says Wilson. The disease has spread into 33 counties from 1929 to 1943. Eleven new counties were infested in 1942. It is estimated that there are 15,000 stands of white pine in the state. Loss of these stands would be a serious blow.

KLEMME LOCALS

Mr. and Mrs. Dan Webner and Ettalou; Mr. and Mrs Mike Kinsella, Pat and Junior; and Mrs. Willard Plamer and Dorothy were dinner guests Sunday at the Donald Webner home near Corwith.

Lew Griffen, who fell from a horse last winter and sufered a fractured leg, and who had to walk with crutches for several months, was in town last Wednesday night and was able to walk without the aid of the crutches Lew's friends were glad to see him getting around so good again.

Mrs Godfrey Greene of San Bernadine, California, arrived here Thursday afternoon for a visit with her father, Joe Johnson, brothers and sisters and other relatives in this community Mrs Godfrey was delayed in arriving nearly two days because of floods and washouts along the rail lines

Postmaster and Mrs John Day were all puffed up last week when they received a letter from their grandson, Gary Day of Los Angeles, California It was the first letter the little boy had written by himself. He also displayed his artistic talent by drawing two rather good models of airplanes on the letter.

Callers at the home of Mr. and Mrs. Edward Schaefer Sunday afternoon were Mr and Mrs. Lawrence Schaefer of Milwaukee, Wis; Mr. and Mrs. Floyd Wilson of Rockford; Mr. and Mrs. Frank Schuldt and daughter of Garner; and Mr. and Mrs. C. C. Schaefer of Marble Rock.

Leonard, son of Mr and Mrs. Ewalt Jahnke of Mason City, formerly of Klemme, attended the Bible School at the Reformed Church, which closed last Friday with a picnic. During the school Leonard stayed with his grandparents, Mr. and Mrs. Henry Jahnke and Mr. and Mrs. Ben Mullin.

Ira Overholt returned Thursday evening from Cedar Rapids where he had been for a few days attending the 10th anniversary celebration of the Grand Lodge of Masons Mr Overholt reported that nearly 1,000 Masons from all parts of the United States, Canada and Mexico attended.

WEEKLY NEWS ANALYSIS

Allied Gains Mark Italy Battle; Plan Four-Power Peace Meeting; 5,000,000 U. S. Men Overseas

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

EUROPE:
Allied Progress

Allied troops cracked the last German defense line on the western end of the front below Rome as enemy forces completed their withdrawal to the east, and the glittering dome of St. Peter's came first into view of fighting U. S. doughboys, wading through hails of Nazi fire.

As Allied forces closed on the Eternal City and the enemy fell back, U. S. and British bombers continued their invasion bombardment

Rome—With water supply blasted, Italian women do their washing in streets.

of western Europe, and Russian troops in the east withstood a strong Nazi assault designed to upset their alignment for their scheduled big push.

By pulling back the bulk of his 10th army which opposed the Allied onslaught in the Cassino area, Nazi Marshal Kesselring managed to save them from complete annihilation, but U. S and British forces exacted a heavy toll in the desperate, rearguard fighting, and their battle-planes ranged along the whole line of enemy retreat, shooting up marching columns and vehicles.

As the battle-clouds rumbled over Rome, Pope Pius XII appealed against the principle of total victory, declaring: total victory or complete annihilation ". . . works as a stimulant for prolongation of the war, even with those who . . . would be inclined to a reasonable peace."

Over There

With 3,657,000 U. S. army men overseas, Secretary of War Henry Stimson declared that they are ". . . poised to strike victory winning blows against Germany and Japan by land, sea and air."

At the same time, the navy revealed that it had 1,566,000 men afloat or on foreign duty, with 900,000 more in transit or in training for combat service.

The army's 3,657,000 men overseas represented 47 per cent of total strength, and this would be boosted to 5,000,000 men, or two-thirds of total strength, by the end of 1944, Secretary Stimson said.

Declaring that disposition of troops overseas was in conformance with plans of the high command, Secretary Stimson said early transport of forces was to plug holes in the Allies' tottering lines, and later shipments were to crack the Axis' outer defenses for the grand assault, for which preparations long have been under way.

GOVERNORS:
State Program

Meeting in Hershey, Pa., the nation's governors called upon the federal government to formulate a postwar policy on public works which might possibly fit into their own extensive plans for such projects.

In addition, the governors declared for:

1. The individual states continued administration of unemployment insurance in the estimation of their probable postwar unemployment and the solvency of their insurance funds, the provision for adequate reserves, and development of plans for quick payments;

2. Future convocation of a federal-state tax parley to overhaul the nation's entire tax structure and provide each governmental division with sufficient funds for operation;

3. Postponement in the formulation of a postwar military policy and army until the war's end offers an opportunity to judge the extent of our responsibilities. Retention of the national guards as provided in the act of 1916.

MISCELLANY

WHEEL TRACTORS: During the week ending May 27, production of farm-type wheel tractors reached the highest point yet attained. In that week 6,098 units were made, the War Production board reports. Average for the preceding five weeks had been 5,906 tractors. Total made in 11 months since the start of the farm year on July 1, 1943, is about 200,000 machines.

FOREIGN POLICY:
F. D. R.'s Stand

Closely paralleling the Republican party's celebrated Mackinac Island declaration on foreign policy, President Roosevelt declared for maintenance of U. S. sovereignty or self-determination in the activities of any postwar organization to secure peace.

Said Arch-Nationalist Gerald Nye (N. D.): "It is only too apparent in the light of his statement, that the door has been opened for Roosevelt to become the No. 1 nationalist or isolationist in the campaign next fall if the Republicans adopt a platform tying them to internationalism. . . ."

President Roosevelt's declaration came during the course of a press conference, in which he envisaged an international organization of nations cooperating freely and closely in the preservation of peace to prevent future aggression.

New Procedure

President Roosevelt made his statement shortly after Secretary of State Cordell Hull had issued invitations to Great Britain, Russia and China to participate in discussions of forming a postwar peace organization following consultations with members of the senate's foreign relations committee.

By conferring with the senators, the administration sought to eliminate partisanship from the formulation of postwar foreign policy, and, also, avoid Pres. Woodrow Wilson's mistake of seeking senatorial sanction for the World War I Peace Treaty without previously consulting the chamber on its provisions during its composition.

In Secretary Hull's talks with the senators, it was revealed that some of them objected to formal commitment to any organization of enforcing postwar peace until the U. S. was apprized of the nature of the final settlement.

PACIFIC:
Bloody Episode

Bloody as any of the fighting in the South Pacific was the U. S. thrust against the enemy airfield on Biak island off Dutch New Guinea, with reinforcements called in to aid in the suppression of the stubborn foe.

With access to the airfield along a roadway below a commanding ridge doughboys found themselves under sight of entrenched enemy snipers in the brush above, and when they climbed to the level of the airdrome, they encountered formations of Japanese tanks.

Under cover of the big guns of the 7th naval fleet, however, reinforcements were landed, and doughboys again pressed on the airfield, capture of which would assure the U. S. of another link in the chain of air bases being established in the northwestern New Guinea area for cover for the grand assault on the Philippines or Indies.

PRICE CONTROL:
Parity Problem

Extension of the OPA for 18 months appeared certain only after a bitter fight over Sen. John Bankhead's amendment, calling for readjustment of textile prices to reflect parity returns on cotton to farmers.

Headed by Sen. Robert Wagner (N. Y.), opponents of the Bankhead amendment claimed that it would lead to similar demands by other segments of industry, thus increas-

Senators Bankhead (left) and Wagner.

ing the general price level, giving rise to pressure for higher wages, and, in all, destroying the economic stabilization of the last few years.

In advocating approval of the amendment, its supporters pointed out that the original stabilization act directed that ceilings were to reflect parity prices for farm commodities. Supporters also contended that readjustment of prices of cheap textiles would lead to the greater production of such goods, thus directly benefitting low income groups now compelled to purchase higher quality material.

War-Planes

American aircraft factories are now turning out far more war planes than both Germany and Japan combined, latest reports show. The United States is now producing at the rate of 100,000 planes a year, as compared with 21,600 for Germany and 14,000 for Japan.

The British empire and the United States together have made about 300,000 planes since Great Britain entered the war, while the Axis reportedly produced 151,000 in the same period.

LABOR:
Pressure Effective

As a result of strong union pressure exerted by 8,000 members of the CIO's United Automobile Workers, government agencies announced plans for the resumption of operations at two plants of the Brewster Aeronautical Corp. in New York and Pennsylvania.

Brought to a head when 5,500 UAW members of Brewster's New York plant refused to leave the premises for two days after being discharged due to the navy's cancellation of contracts with the company for Corsair airplanes, the War Production board determined to reopen the plant for the manufacture of spare parts if other concerns making Corsairs can use them.

Earlier, the navy announced it would take over Brewster's Pennsylvania plant and keep its 2,500 employees working.

PEARL HARBOR:
Trial Delay

Efforts of Sen. Homer Ferguson (Mich.) to direct the secretaries of war and navy to institute court martial proceedings against Adm. Husband E. Kimmel and Maj. Gen. Walter C. Short for the Pearl Harbor debacle were frustrated by the senate's judiciary committee.

Instead the committee approved a resolution calling upon the secretaries to immediately begin an investigation into the catastrophe, with a view toward ordering court martial proceedings if justified by the facts uncovered.

During the course of the committee's deliberations, it was revealed that Kimmel was anxious to be tried in open court whenever a trial might be held without impairing the war effort. Declaring that any delays might be personally disadvantageous to him because of difficulties of later assembling evidence and witnesses, Kimmel said that the whole story of Pearl Harbor has not been told.

Fifteen Husbands

When the government discovered that it was sending four dependency allotment checks to one woman who claimed to be the legal wife of four soldiers, the FBI undertook an investigation.

Upon probing the case, the FBI learned that not only had red-haired, 35-year-old Marion Horn been married to the four servicemen without bothering to divorce any of them, but she also had been wedded to 11 other men without a legal separation in any case.

Charged with fraudulently receiving benefits under the servicemen's dependents' allowance act, Mrs. Horn remarked about her marriage activities by declaring: "I didn't mean to do anything wrong. I just didn't bother with divorces."

Said her 15th husband, serving in the marine corps: "She is a fine woman, but a little absent-minded . . ."

SUPREME COURT:
Forced Testimony

Although the federal government itself cannot accept evidence against an individual which it obtains against his will, it can use such evidence if supplied by state officials and turned over to it for a trial, the Supreme court ruled in a divided opinion.

In a seven to one decision, the court upheld Wisconsin's 3 per cent tax on dividends paid out of earnings within the state on the grounds that: ". . . It (Wisconsin) has afforded protection and benefits to . . . corporate activities and transactions within the state . . . giving rise to the income of stockholders. . . ."

In dissenting against the majority's opinion in the first case admitting an individual's forced testimony in federal courts if obtained by state officials, the minority declared: " . . . The use of testimony obtained by compulsory discovery to convict an accused must be considered 'shocking to the universal sense of justice' and offensive to the common and fundamental ideas of fairness and right."

CHINA:
New Drive

As the Chinese pressed their drive in the southwest to join up with Lieut. Gen. Joseph Stilwell's forces in Burma and open a supply road to the embattled country, no less than 180,000 Japanese opened a big offensive farther to the east in an apparent effort to counteract any projected Allied operations resulting from new communication lines.

The Jap offensive got under way shortly after the loss of momentum of their previous drive farther to the north.

Already firmly in control of the northeastern section of China where the rich resources and abundant manpower have been put to work in the Japanese industrial machine, the enemy's new drive appears designed to thwart any Allied push to open up the coastal country in the region and use it as base for general operations on the mainland.

OLD AGE

The average monthly check to persons receiving old age assistance from state bureaus was $26.99 in February. The southwestern states disbursed the most, with California paying $47.14 and Colorado $41.17. Arizona doled out $38.29.

The southern states were at the other end of the scale. Mississippi paid the lowest sum, $9.72, and Kentucky came next with $10.64. Louisiana topped this section with $21.29. Middlewestern states ranged from $22 to $30 in payments.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

ROOSEVELT-CHURCHILL AGAIN

Churchill's recent "powerhouse" speech before Commons didn't click with persons high up in the administration. Actually, it brought out the growing differences between him and the President, also his spats with Foreign Minister Anthony Eden, also the importance of overhauling U. S.-British political relations. (Administration permanent peace ideas are much nearer those announced by Eden the day after Churchill, when he went out of his way to emphasize the cooperation of smaller countries with the Big Four.)

Here are some of the differences which realistic advisers inside the administration have been wanting to have straightened out with Churchill for some time:

1. American boys will never fight to protect India in the future, so it is foolish to let Churchill think that Britain and the U S.A., through alliances with Russia, can help guarantee the Empire. The only protection to India must be a healthy India willing to protect herself. When FDR talked to Churchill about India two years ago, the P. M. was almost insulting.

2. The United States will insist on giving Hongkong and other former Chinese possessions back to China. When this was proposed by the President at Cairo, Churchill flatly refused.

3. An alliance of big powers as proposed by Churchill cannot keep permanent peace in the world any more than the congress of Vienna, which divided up Napoleon's empire in 1815 among Russia, Austria, England and Germany.

4. President Roosevelt, so far as he has thought things out, favors a peace machinery based on cooperation with small powers as well as big. He doesn't go for Churchill's Metternich idea of balancing the world among heavily armed big powers.

5. The old British Empire for which Churchill fought 50 years ago in the Indian northwest border wars, and in the Sudan and the Boer wars, will never come back despite his youthful memories. And the United States can never assume the drag anchor of helping to protect that kind of an empire in the future.

Finally, every time the British have been pulled into a war in the last half century, we have helped pull them out. Therefore we should have a large vote in the set-up which may make or prevent wars in the future.

Some of these general ideas were hinted to Churchill during the Cairo-Teheran conferences—with no very favorable reaction. It may be that in the near future they will be taken up again.

FULL PAY FOR RETIRED OFFICERS

Higher-ranking army and navy officers have recently discovered a neat way of retiring on full pay instead of ordinary retirement pay, which is only two-thirds as much. They go to the hospital a month or so before they are slated to retire for age, and then are sometimes able to retire with disability, which gives them full pay the rest of their lives.

This system is based upon the fact that congress recently changed the army-navy retirement set-up in order to aid wounded men. It was provided that a veteran might retire on full pay if disabled.

However, it was the intent of congress to aid young lieutenants and lower-ranking officers who usually suffer the highest casualties in wartime due to the fact that they have to be in the front lines.

Apparently, congress did not realize that, when a colonel or a general reaches the retirement age of 64, it is not uncommon for him to have arthritis, gall stones or some other disability which can be discovered at any army hospital a few months before he retires. This gives him full pay for life.

Another interesting angle to retirement pay is that an officer getting retired pay cannot take another job from the government and get paid for it, but he can take a job with a company under a cost-plus government contract. In this case, the government pays him two salaries, except that under the cost-plus contract a third party hands over the money.

(WNU Service)

New Candid Camera Shots of the Quints:
(Following Their Tenth Birthday)

In spite of the invasion of their realm by the five in Argentina, the Dionnes are still the only identical Quints in the world. And they ARE identical; outside their own immediate family there is practically no one who can tell them apart. Right to the day he died, Dr. Allan Roy Dafoe, the physician who brought them into the world, couldn't pick them. He could recognize Marie, but the other four all looked alike to him. They have always dressed in different colors to make identification easier, but they knew the doctor didn't recognize them otherwise, and they loved to switch dresses and fool him.

Even though they have been living normally with their family for the past two years, the Quints still act as a unit as against everyone else. They are normal, in that they quarrel, but these quarrels are very seldom among themselves.

Marie has the biggest fan mail. She is also the charmer when visitors come. It's unconscious with her, and this annoys Cecile, who thinks herself the personality kid. She tries too hard.

Emilie is the comedienne and a great mimic. The others look to her to give impersonations of visitors as soon as they've left, and it's uncanny to see how she picks up gestures and peculiarities for her performance. Cecile is very observant of visitors' clothes and criticizes them with all the confidence in the world. She is the one of the five that tends to be a bit "catty."

Yvonne has most influence with the others, and if there is a difference of opinion, they do as she says. Annette is the competitive one, gets upset if the others beat her. She is not a good loser. Marie, who has always been the slowest and weakest, makes up for these deficiencies by being the daredevil of the bunch.

Many think the "Sixth Quint" is best looking of the group—she is Pauline—eleven months older than they, but just about the same size. She is in sharp contrast to their dark beauty, for she is a blonde with fair hair, fair skin and dark eyes. Of all the family she is closest to them and because she is such an unusually lovely child, sometimes takes the spotlight away from them. They have all but adopted her into the lodge.

Of their brothers and sisters, only the three oldest show any signs of regarding the Quints as "different." This is because they, Ernest, Rose and Therese, were old enough to be affected by the early quarrels among the pressure groups that surrounded the Quints until the last couple of years. Mr. and Mrs. Dionne do their level best to keep the five from being treated as different.

At the age of ten, not one of them has a cavity in a tooth. Dentists say this is due to scientific diet plus the fact they have always brushed their teeth. A couple of them may need orthodontic treatment—Cecile in particular. She is very conscious that her front teeth protrude a bit, and it bothers her no end.

The Quints' great ambition is to see New York. They have already traveled to Toronto and to Superior, Wis. New York is their next goal. Travel bothers them not at all; they are great troupers. But Mr. and Mrs. Dionne hate it. They get upset by excitement and the crowds and meeting strangers, and come back exhausted, so they refuse to take the Quints away from home unless it is for some patriotic reason like a Victory Bond rally.

Doctors for a time were a bit worried because the five were persistently overweight. Then they decided this was because their bony structure is heavier than normal. This, the medics think, is the result of the heavy doses of cod-liver oil they were given to combat the rickets they had at birth—they have taken cod-liver oil every day of their ten years.

Besides giving the Quints religious teaching, Bishop Leo Nelligan, their Chaplain, is head Roman Catholic Chaplain of the Canadian armed forces. His outstanding work has brought promotions until today he holds a unique rank in Canada—he is an Admiral of the Navy, a General in the Army, and a Marshal of the Air Force.

The Quints DO speak English and with a delightful accent. They know over 400 words. Their conversational English has been retarded purely because their mother still doesn't understand it, and so it is spoken but seldom in the home.

No, the Quintuplets haven't lost their looks or charm, as you often hear tell. It just appears that way in photographs because they all developed a self-conscious shyness so that when photos are taken, they just "freeze up."

The remaining 10 cent are caused by lightning. less smokers and campers are nsible for starting 30 per cent l our forest fires. Other forest are INTENTIONALLY set for purposes as clearing plow-land, g off weed patches, logging , brush or debris, and although of these fires are started law- great numbers of them get out nd because of carelessness and rance on the part of the burner ecause of his willingness to "take ance." Forest fires in this cate- constitute 40 PER CENT OF TOTAL.

its wartime activities for 1942 United States used more wood steel. According to R. W. Pat- on, undersecretary of war, 120,- 000 tons of wood were used as inst 100 million tons of steel.

s a further indication of its im- ance in our wartime activities, have the statement of Rear Adm. L. Cochrane in the International dworker, 9-22-43 that "Every al vessel, from the log battle- of the North Carolina class to small mine sweeper, depends on l."

is a problem then of national cern when the production of lum- (estimated in 1943 to be four on board feet below require-

ments of that year) is slowed down every time woods and mill crews fight fires.

Forest fires are real and potential threats to war plants and cantonments, many of which are located in and near forest, woodland or brush-covered areas. They are potential threats too, to the efficient operation of defensive air and sea patrols, training pilots, etc. They threaten the nation's war program by diverting manpower from war industries, training camps and farms to the fighting of fires.

Every patriotic citizen should regard helping prevent forest fires as an essential wartime duty. Lieut. Gen. John L. DeWitt, while head of the Western defense command, listed reasons why the forest fires endanger our national security:

(1) Smoke-palls from forest fires along coastal areas limit visibility of air and sea patrols. (2) Smoke haze reduces visibility from aircraft warning stations and fire lookouts. (3) Many defense plants and military establishments are located in or adjacent to forest areas and might be damaged or destroyed by major conflagrations. (4) Forest fires serve as beacons for the enemy.

The Government's Part.

There are 160 national forests with about 178,000,000 federally owned acres in 42 states and two territories. All are under 10 regional foresters (one in Alaska) and their staffs. National forests are protected from fire by a decentralized organization that is in close and constant touch with local conditions, problems and people.

Normally, this organization includes about 4,000 year-long forest supervisors, forest rangers, forest guards, etc., and another 4,000 short-term smokechasers, lookouts, etc. But the manpower situation has been so acute during the war that the Office of Civilian Defense established the "Forest Fire Fighters Service" to help the established forest fire protection agencies. It is reported that more than 185,000 recruits have joined the FFFS to date.

There are 281,000,000 acres of state and privately owned forest land. Federal aid, through the Forest Service, goes to 41 states to help state foresters and private owners give organized cooperative forest fire protection. Funds from state and private sources are greater than those from the federal government. However, there are over 146,000,000 acres that need, but still lack, organized forest fire protection.

In their efforts to prevent forest fires, the federal government and state governments have operated on a regional and state-wide basis. Their educational efforts on a local level have been carried through the media of newspapers, radio stations, motion picture theaters, civic organizations, etc. And in additon, they have used exhibits, lectures, pamphlets, admonition signs and posters.

The Public's Part.

Above all else there is need to impress upon the public that every individual has a patriotic stake in this EMERGENCY—that the problem can only be solved through individual action.

Specifically, the need is:

1. For the public to be careful with matches, smokes — including cigarettes, cigars and pipe ashes—and campfires.

2. For victory gardeners as well as farmers, ranchers, stockmen and forest industries to ask about a permit—and the law—before burning grass, brush, fence rows, ferns, trash, or before starting any fires in forests.

3. For everybody to put out small fires and to report all others quickly to the nearest ranger or fire warden.

Geographical Aspects.

With an eye to the tremendous value of timber in our all-out war production activities, the United States has been divided into three broad zones, each of which has been weighed and its relative importance indicated on the map—which also shows the Forest Service administrative regions. Before the broad zones and administrative regions were determined, war industrial activity and national defense considerations were studiously reviewed.

Zone 1, with a relative importance of 60, includes:

1. Three Pacific coast states plus western Montana and northwestern Idaho.

2. Most of the three Great Lakes states.

3. All or parts of 26 states from Missouri, Arkansas, east Texas and Louisiana to Maine.

Zone II, with a relative importance of 30, includes:

1. The area lying east of the Pacific coast portion of Zone I and west of the Great Plains states.

2. The area lying between the Lakes states and the Atlantic coast —Gulf of Mexico portion of Zone I.

Zone III, with a relative importance of 10, includes parts of Montana and Minnesota, and all or parts of the Great Plains states of North and South Dakota, Nebraska, Iowa, Missouri, Kansas, Texas and Oklahoma.

These zones have been subdivided into regions as follows, with the particular fire hazards briefly listed:

Region I: (Montana and Northern Idaho) Ninety per cent of all fires here are caused by lightning, with the greatest damage done to white pine timber. The resident problem is more important than the visitor problem.

Region 2: (Colorado, Wyoming, South Dakota, Nebraska, Kansas): Thirty four per cent of all fires in this region are man-caused. The visitor problem is more important than the resident one, with carelessness more of a factor than intentional fire setting.

Region 3: (Arizona, New Mexico): There is less of a fire problem here than in anv other region.

Region 4: (Utah, Nevada, most of Idaho): In this region man-caused fires run from 17 to 57 per cent, varying with the locality. Careless smokers, logging operators, campers, land-clearing farmers and ranchers, are the causes. Serious erosion is often caused by fires in many localities. Grass fires are a great hazard.

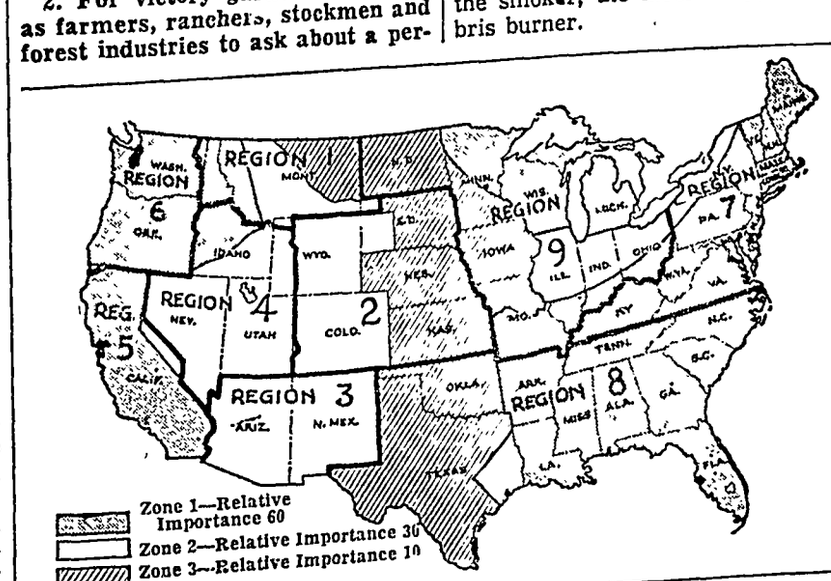
Region 5: (California): Three-fourths of all fires are man-caused. Part of this is due to the great influx of war workers, but the majority of fires are caused by residents rather than newcomers.

Region 6: (Oregon, Washington): Most forest fires here are due to careless smokers, but forest industries and incendiaries cause the largest area burned and the greatest damage.

Region 7: (New England and Middle Atlantic states plus Maryland, West Virginia and Virginia): Again the local resident and the smoker are mainly to blame—also the farmer who burns to clear land.

Region 8: (The South, from North Carolina south and west to and including Texas): The intentional burner—who has believed in burning for years—is the greatest problem. He is the local resident, not the visitor—the white man rather than the Negro.

Region 9: (the Great Lakes states, North Dakota, Iowa, Missouri, Illinois, Indiana, Ohio): Diverse conditions exist in this region with large numbers of fires and tremendous acreage burned. Ninety-seven per cent of all fires are man-caused in the following order of importance—the smoker, the incendiary, the debris burner.



Observing These Precautions Would Greatly Reduce Fire Losses

Campers:

efore building a campfire— Observe the state laws. If a per- is necessary, get it from a ger or state fire warden. crape away around the fire all ammable material in a circle at st five feet in diameter. ig a hole in the center, build r fire in it, and keep your fire all.

efore leaving campfire, stir the ls and soak them with water.

Forest Industry Workers:

Build and maintain safe fire lines around mills, logging camps, etc.

Keep efficient spark arresters on locomotives, tractors, etc.

Comply fully with state laws.

Keep fire patrols on the fire job—especially during dangerous fire weather, and make frequent inspections for fire hazards.

Be extremely careful to put out all matches and cigarettes before throwing them away.

Farmers and Ranchers:

Never burn to clear crop land:

Without getting a permit from a ranger or fire warden, if state laws require it.

Without scraping a trail or plowing around for safety.

Without having plenty of help on the job.

During unusually hot or dry or windy weather.

Without beating out all smouldering grass after buring is finished.

THE POWER IN SIMPLE LIVING

LESSON TEXT—Daniel 1.8-16, 19, 20.
GOLDEN TEXT—But Daniel purposed in his heart that he would not defile himself with the king's dainties, nor with the wine which he drank.—Daniel 1:8.

"Dare to be a Daniel,
Dare to stand alone
Dare to have a purpose firm,
Dare to make it known."

Remember how we used to sing it in our Sunday Schools? Possibly some of us still do. The thought of the song assuredly needs to be emphasized anew.

The "times are out of joint." Millions of men and women are meeting new problems and temptations. The standards of life they learned in home and church or Sunday school are not too easy to maintain.

Many are hearing that old excuse for laxity. "Man, you're in the army now," or "Don't forget you're not at home with Mother; you're in the navy." Civilians have similar tempting excuses for careless living, drinking, etc.

Our lesson is a timely one. It presents Daniel as having—

I. A Courageous Purpose (v. 8).

Daniel and his three Hebrew companions were among those carried captive to Babylon. As promising young men, they were selected to receive an education in the wisdom of the land, at the king's expense and in preparation for his service.

The king provided for them the delicacies of his household, thinking thus to keep them strong and in good health. Daniel recognized that many of these things were unclean according to the laws of his people. He also knew that to eat such food and to drink the intoxicants provided for them would be to injure his health and cut down his ability to learn.

It was no easy thing to ask to be excused from what the king had commanded, not to do what everybody else was doing; but Daniel had a courageous purpose "in his heart."

But Daniel had the wisdom to be tactful about his convictions. He went to the king's steward with—

II. A Considered Plan (vv. 9-13).

He had something thoughtfully worked out, a fair proposal which would not endanger the life or standing of the prince who was over them. He proposed a test, and agreed, if it failed, to be subject to further orders. He knew it would not fail.

How often those who have it in their heart to stand true to God against evils, such as beverage alcohol, have no plan in mind, and are only loud and tactless in their condemnation. They make no contribution to the cause. Let us be intelligent and properly prepared.

Daniel's plan put a planned diet and water over against rich foods and wine. It was a case of simple living against "high" living, and the result was a foregone conclusion. Those high in positions of authority in the field of diet tell us again and again that we need simple, well-balanced meals. And science is definite and clear in its condemnation of alcoholic beverages.

Daniel's test period resulted in—

III. A Convincing Proof (vv. 14-16).

Ten days proved the point. Daniel and his friends were fairer and fatter than the others. They were vindicated in their courageous stand for what they believed to be right. Simple living demonstrated its value.

Think what a fine testimony the experience of Daniel must have been in that great group of young princes who were at the king's table. So we also may give good witness for our Lord by our loyalty to right standards. Often it is true that those who outwardly scoff at them are secretly moved to respect those who consistently stand for what they believe.

We need to cultivate in our young people the high courage which will enable them to stand against the constant temptation to partake of alcoholic beverages and to face with intelligent courage the clever propaganda of the liquor sellers.

Note that Daniel and his friends did not lose by their decision—they gained. They reached—

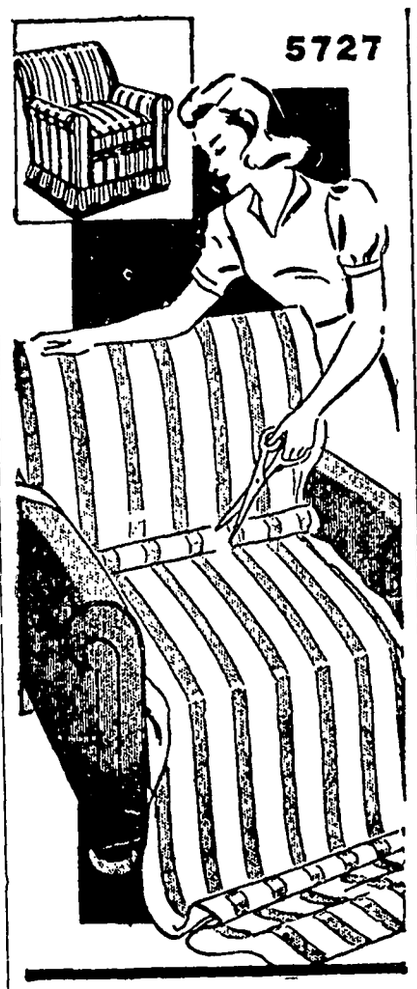
IV. A Commendable Position (vv. 19, 20).

At the end of the training period the king gave these young men examinations. Note that in technical knowledge, "I.Q." and in personal characteristics, Daniel and his comrades were superior to all the rest. That is in accord with the findings of modern science in the matter of the use of liquor.

Is it not almost unbelievable then that the advertising of the liquor interests, suggesting that liquor is a desirable thing from a personal, social, and business viewpoint, is permitted? The facts are all on the other side.

Strange too is the tolerant attitude of our nation and especially of many in the church toward that which is known to be destructive and detrimental. It is an appalling commentary on the extent to which our standards have been lowered or forgotten.

THINGS for You TO MAKE



5727

Making Slipcovers

ONCE you know how to go about it, it's really no trick at all to make your own slip covers! Thousands of American women are becoming expert home-decorators and upholsterers—the slipcover instructions in this design will show you how to cut, fit and finish covers for your chairs and sofa.

* * *

To obtain complete instructions on "How To Make Slipcovers" (Pattern No. 5727) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Household Hints

Test a sample of printed rayon to make sure color will not run. Use clear water. If color is fast in water, it will be fast in soapsuds.

* * *

When children's dresses are to be lengthened, always rip the hem, wash and iron before adjusting the new hem. This helps get rid of the old crease, and assures a smooth job on the new hem.

* * *

When light bulbs begin to darken, move them to a spot where they will not receive constant use and they will give service for a long time.

* * *

Stubborn particles of dirt that settle in mouldings, cracks and other hard-to-get-at corners can be dislodged by whisking with a paint brush that has been dipped in soapy water.

* * *

Hydrogen of peroxide will often remove perfume stains from a dresser scarf that has been given up as hopeless.

* * *

When sewing on buttons, wax the thread on beeswax or paraffin. Lay a darning needle over the top of the button and bring each stitch over the needle to make a thread shank when the needle is removed. This makes the pull come on the thread rather than on the material.

It Seems the Preacher Got Off on Wrong Note

"Never mind your subject—keep your eye on your audience," was the somewhat cynical advice once given to a young orator by an old hand. But we owe some of the best stories of public speaking to those who forget to heed this prudent counsel.

The latest addition to their number occurred just the other day. A prominent clergyman was addressing some hundreds of middle-aged spinsters at a meeting of the National Spinsters' Pensions association. Exhorting them to fight for economic independence, he declaimed "You must fight and win and pass it on to your children."

WHY BE A SLAVE TO HARSH LAXATIVES?

Simple Fresh Fruit Drink Has Restored Millions to Normal Regularity!

Here's a way to overcome constipation *without* harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need—stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B, and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

SNAPPY FACTS ABOUT RUBBER

Synthetic Inner tubes need lubrication before being inserted in a casing. Partially inflate the tube and use ordinary pure soapsuds as a lubricant in the absence of a special tube lubrication preparation. Dry synthetic tubes do not "slide" in the tire and unless lubricated may not adjust themselves properly.

Proponents of the continuance of our synthetic rubber insurance policy after the war hold that jungle growth on the rubber plantations and the probability of the Japs wrecking the plantation equipment may mean a loss of two years before normal levels of rubber production can be realized.

KLEMME LOCALS

Mr. and Mrs. John Day were supper guests at the home of Mr. and Mrs. Earl Mathews at Clear Lake Sunday evening, the occasion being a dinner in honor of Mrs. Day's birthday, which was on Monday.

A number of the Barz families and relatives of Seaman Martin Barz, who was home on a furlough, held a family gathering and picnic dinner in his honor at the Klemme Park Sunday.

Mr. and Mrs. "Ole" Ramsey and daughter took the former's mother, Mrs. H. G. Ramsey back to her home at Maple Rock Sunday after she had visited at the Ramsey home here for a week.

Mr. and Mrs. Henry Lewis are having their home remodeled this week by the Northern Lumber Co. Composition shingles are being used and should last a lifetime.

Mr. and Mrs. Lawrence Schaefer and children of Milwaukee, Wisconsin came Saturday for a weeks visit at the home of Mr. and Mrs. Herman Paul and other relatives in the community.

LaNelle, daughter of Rev. and Mrs. H. E. Harvey, had her tonsils removed at the Hampton hospital Tuesday morning. Her parents brought her home Friday and she is making a good recovery.

Don't throw away or burn your old magazines and newspapers. The government needs waste paper. Save them for the Boy Scouts or leave your bundles of papers at the Klemme depot.

Miss Ruth Stille, of Des Moines visited over the week end with her parents, Mr. and Mrs. Lester Stille. Miss Audrey Mau, another Klemme girl, is now a room-mate of Miss Stille at Des Moines.

Mrs. Ruth Melcher of Charles City, and Mr. and Mrs. Ed Melcher of Cedar Rapids were visitors at the Art Wellemeyer home Tuesday. Mrs. Melcher is Art's sister, and Ed is his nephew.

Mr. and Mrs. Keith Albertson and son, Jimmie, were at Mason City on business Friday afternoon.

Mr. and Mrs. Lyle Liebendorfer of Forest City visited at the R. A. Jorgenson home Friday evening.

Mr. and Mrs. Art Wellemeyer and Mr. and Mrs. Herman Priebe drove to Rochester, Minn., Thursday, where the men made arrangements to return in about a week to enter the Clinic. They returned home the same evening.

Word has been received in Klemme that Billy, little son of Mr. and Mrs. W. Henry Galbreth of Des Moines, had an operation Saturday morning at a Des Moines Hospital. Billy is reported to be making a good recovery.

Mrs. Robert Risser and son, Bobbie, of Des Moines, came Friday afternoon on the Rocket to Mason City for a visit at the parental, P. M. Wilson, home. Mrs. Wilson drove to Mason City to meet them.

Mrs. Herman Paul accompanied by her brother-in-law and sister, Mr. and Mrs. Lawrence Schaefer of Milwaukee, drove to Van Meter today, Wednesday, for a visit with Rev. Wm. Suckow and family. Rev. Suckow is a brother of the ladies.

Levi Klotzbach was off duty a couple of days last week end at the Jacobs Hardware, due to an accident. Mr. Klotzbach was putting up some spouting when he slipped from a ladder and fell against a porch railing, badly bruising one arm in the fall.

Miss Constance Carr of Hardy concluded a week's visit at the home of her uncle and aunt, Mr. and Mrs. Ira Overholt and returned to her home at Hardy Sunday. Mr. and Mrs. Overholt took her home and spent the day visiting with relatives.

A number of relatives enjoyed a picnic dinner Sunday at the Verner Lewis home. Present were Benn Cooks and family, Mr. and Mrs. Henry Buseman, Mr. and Mrs. Wallace Pavey, Mrs. John Clements and son, Jimmie Fredin and Bobbie Rudder.

Rural folks who have old magazines, newspapers and books to dispose of, can bundle them up and leave at the Rock Island Depot in Klemme. You thus get rid of something you do not use and at the same time you are helping the Klemme Boy Scouts and also helping Uncle Sam. The government needs your old magazines and newspapers to help lick the Japs and the Nazis.

KLEMME BUSINESS PLACES WILL CLOSE TUESDAY, JULY 4

At a meeting of business men held at the Community Hall Thursday evening, it was agreed to close all business places in Klemme on next week Tuesday, July 4th.

Other closing dates for the balance of the year were agreed upon and will be announced the week before.

MR. AND MRS. R. A. JORGENSON HAD WEDDING DINNER SUNDAY EVE

Sunday, June 25th was the 25th wedding anniversary of Mr. and Mrs. R. A. Jorgenson of Klemme To celebrate the event they entertained a few old friends, neighbors and relatives at a 5:30 o'clock dinner at the Lake Shore Hotel at Clear Lake. Guests present were Mr. and Mrs. Lyle Liebendorfer of Forest City; Mr. and Mrs. Joe Liebendorfer and Bessie Starboard of Hampton; Mr. and Mrs. John N. Day; Mr. and Mrs. C. G. Waterman; Mrs Lyle Wilcox; Mrs. Mary Waterman; Rev. and Mrs. Herschel Harvey, Elwood and LaNelle; and Miss Marie Blank.

The table was appropriately decorated for the occasion with flowers, silver candles and a large decorated wedding cake baked by Mrs. J. N. Day. After dinner the party enjoyed the cool breezes off the lake and spent the evening in visiting.

WAR PRISONERS FOR FARM LABOR USED IN ELL TOWNSHIP

Prisoners of War were demanded for use in cleaning out tile outlets in Sec 16 in Ell township on a farm managed by J. Howard Corzine of Britt, Iowa. They were transported from the prison camp in Algona on Wednesday afternoon, June 15,

The cost of the prisoners for this work was proving higher than Mr Corzine had anticipated so they only worked one-half day partially completing the job. The cost of the prisoner of war labor is the same as prevailing wage rates in the community for the job they are doing according to Paul Henderson, County Extension Director The government is the one receiving the wages then they pay the prisoners, which is approximately 80 cents per day.

The wage rate is set so that the cost of prisoner help will not be less than the cost of local help They are to be used only when every other source of help has been exhausted or in emergency cases.

LUDEKE PICNIC HELD AT GEO. SCHOENWETTER HOME

The Ludeke family reunion and picnic was held Sunday at the George Schoenwetter home in Liberty township. Those present were:

Mr. and Mrs. George Schoenwetter and son Howard; Mr. and Mrs Henry Ludeke and Paul of Meservey; Wm. Ax and family; Mrs Lesley De Merrit and children; Mrs Fred Schlichting; Mr. and Mrs Ralph Ludeke and Stanley of Clear Lake; Mr. and Mrs. Elmer Weisbrod of Fenton; Mr. and Mrs. Ralph Wiesbrod and baby son of Fenton; Mr. and Mrs. Albers and baby son and Mrs. Dominic and baby girl.

KLEMME FARMER INJURED WHEN KICKED BY HORSE

August Josten, Klemme farmer received painful injuries when he was kicked by a horse at his farm last Thursday.

Josten was kicked in the face and received a fractured nose and bruises around his eyes and face and across his chest. At this writing he is making a good recovery from his painful injuries.

YOUR STAKE IN THE FUTURE

Franklin Alexander—*Philadelphia Bulletin*

Lau Clan Now Numbers Over 400, Annual Reunion Held

SEVENTH ANNUAL REUNION HELD HERE SUNDAY, JUNE 25

Twenty-three Boys In Family Are Now In the Service

The seventh annual Christian Lau reunion was held in the Klemme Park Sunday, June 25, 1944 with 64 people present. Representatives from the August Lau, Henry Lau, Will Lau, and Mrs. Dora Greiman families attended.

Since traveling a great distance is now impossible, the majority of those present were from the vicinity of Klemme and Garner. Relatives from a distance who attended the reunion were Mr. and Mrs William Schubert and family of Rockford, Iowa, August H. Ollerman of Botkins, Ohio, and Walter F Lau of Minnesota.

After the picnic dinner a short program was presented. A group of the youngsters sang the Lau reunion song which was written by Dolores Ridder; Berleen Bridges recited a poem; and letters were read from Mrs Henry Reusch of South Haven, Mich., Mrs. Martin Lau, of Cannon Falls, Minn., and Mrs. Dora Greiman of Garner all of whom were unable to attend the reunion this year, but sent their written greetings. A report was presented of the names and locations of the 23 boys in the Lau family who are now in the armed forces Fifteen of these boys in service are direct descendants of Mr. Christian Lau.

Pfc. Roy Arnold, army, Aleutian Islands
Pvt. Winton Etchen, army, New Jersey
Sgt. Kermit Koerner, army, Italy
Alfred T. Lau, Navy, at sea.
Eldon Lau
Harry Lau, Army, England
Pvt Kenneth Lau, Army, Eng.
Norman Lau, Navy, California
Robert Lau
Leon Lemke, Army, England
Pfc Marvin Lemke, Army, Texas
Thomas Mitchell, Army, Alabama
Wayne Schlawin, Army, England
Herbert Schubert, Army, Arizona
Walter Schubert, Navy, Idaho

Eight of the boys in service have married into the family.

David Brown, Army, Nebraska
Cpl. Paul Ditch, Army, Aleutian Islands
Cpl. Lawrence Fagerland, Army Alabama
Rudolph Heft, Army, Texas
Eugene Kluckhohn, Coast Guard, New Jersey
Roche Murray, Navy, at sea
Dan O'Brien, Marines, Cal.
James Tippy, In Pacific

Another of the boys, Luther Schmidt, has received an honorable discharge from the Army.

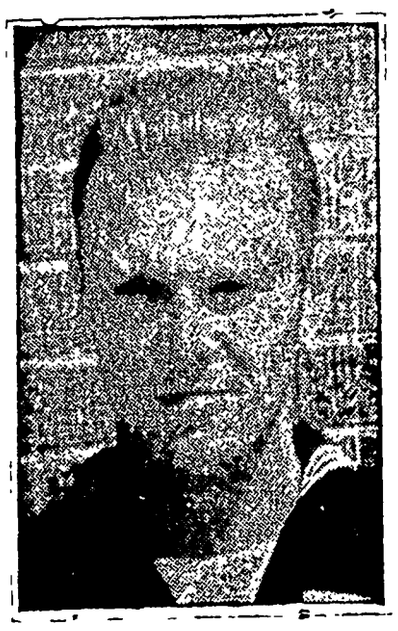
During the afternoon group letters were written to the 23 boys in service. Most of the people at the reunion added a note to each of the letters.

The Christian Lau clan now numbers about 400 with only five living members of the second generation — Mrs. Dora Greiman, Mrs. Henry Reusch, Mrs. Henry Lau, Mrs. Chris Lau, and Mrs Martin Lau. Michael James Murray, son of the former Enid Harvey, is the first child of the sixth generation and is one of the ten babies born in the Lau family this past year.

The Lau reunion is held each year on the Sunday nearest June 27th, which is the date that commemorates Christian Lau's return from the Civil War.

When you have company or take a trip, that's news. Phone 12.

Citation For Evenson



EVERETT EVENSON, A. M. M.

Everett Evenson, Aviation Machinist's Mate, son of Mr. and Mrs. O. C. Evenson of Goodell, a short time ago had the honor of being presented the Presidential Citation ribbon in behalf of his squadron for the action in which they were engaged in the Southwest Pacific battle area. Evenson is now in Detroit where he is taking a special course at the Ford plant.

Funeral Services Held Monday For F. W. Langlitz, Farmer

RED CROSS CLUBMOBILE

Mrs. Harold Oxley, Hancock County Chairman of the Women's Home Project work states that the Farm Bureau women are helping to sponor the state wide special war project of collecting funds to purchase at least one Red Cross Clubmobile.

During the week of July 3-8, bottles for your Red Cross Clubmobile contributions will be placed in business houses in every town and trading center in Hancock County.

The Red Cross Clubmobile brings a service to boys on the front that they really appreciate.

These vehicles are outfitted with a doughnut machine, a coffee urn, newspapers, magazines, a small library, writing materials, and in some cases a victrola outfit. They are operated by three American Red Cross girls and a local trained mechanic.

These Clubmobiles are driven to isloated spots where service men are on duty far from the club centers in the larger cities. They also go to many air fields where they serve doughnuts to returning bombing crews. Officers have said that this service has been a great feature in helping the men to relax after such an experience.

IOWA CORN HELPS MAKE VITAL WAR SUPPLIES

The Corn Freeze Order was lifted on midnight, June 23rd, as scheduled according to Alfred V. Josten, Chairman of the Hancock County AAA Committee.

However, the time for contracting pledged corn was extended to July 8th. In other words, corn can still be contracted for the next week and a half provided that it had been pledged previously, and the 5 cent shelling and delivery service will be paid for corn delivered under these contracts.

According to Mr. Josten, 392,148 bushels of Hancock County corn was delivered during the sixty-day period during which the Freeze Order was in effect. In addition, over 180,000 bushels have been contracted to be delivered within the next sixty days.

This corn is delivered for the account of the Commodity Credit Corporation and goes to processors and thence to war industries where it is used in production of war materials.

Corn is used in all foundry work the casting and molding of steel, aluminum and other metals for making airplane engines, tanks, and other implements; for the production of bombs and shells for the construction of special V-board containers used to ship food overseas; for use in textile production making clothing for uniformed men for paper production; for making sulfa drugs and pencillin, K-rations for soldiers, adhesives, drugs. chemicals, and numberous other vital war uses.

WADDINGHAM FAMILY HELD PICNIC IN PARK SUNDAY

Mr. and Mrs. Wm. Waddingham of Klemme and their children and families held a family gathering and a picnic dinner in the Klemme Park Sunday. Others who attended were:

Mr. and Mrs. Tony Tebbins and five sons of Corwith; Mr. and Mrs. John Waddingham, two sons and daughter of Klemme; Mr. and Mrs. Virgil Waddingham and son of Meservey; Mr. and Mrs. Harm Dirks, son and daughter of Garner; Mr. and Mrs. Martin Karsjens, two sons and daughters of Klemme; Mr. and Mrs. John Neuberger, Faye and Ruth of Klemme.

A number of June birthdays were celebrated at the picnic. Mr. and Mrs. John Waddingham have seventeen grandchildren.

DIED FRIDAY AT MASON CITY FOLLOWING AN OPERATION

Services Held Monday Afternoon At Goodell U. B. Church

Frederick William Langlitz, 62, farmer who resided about five miles west of Klemme, died Friday afternoon, June 23, at 3:00 o'clock at a Mason City hospital where he had been a patient for about two weeks following a major operation.

Mr. Langlitz was united in marriage thirty-five years ago to Miss Ann Rust, of Goodell, who with their three sons survive. The sons are Ira Langlitz, mayor at Goodell; Elmer who is in the army stationed at Camp Stewart, Georgia, and Forrest who is at home and was farming with his father. He is also survived by two sisters; two brothers and three grand children.

Funeral services were held Monday afternoon, with a prayer service at the home followed by services at the United Brethren Church at Goodell, with Rev. Harold Knight officiating.

Burial was in the Amsterdam Cemetery east of Goodell and the casket bearers were neighbors of Mr. Langlitz in Liberty township: Art Schoenwetter, Vic Schoenwetter, George Schoenwetter, Elmer Beier, Wm. H. Lemke and Lew Abele.

The Wellmeyer Funeral Service of Klemme was in charge of arrangements.

HOME PROJECT COMMITTEE

Women representing eleven townships in Hancock County met t Britt on Tuesday, June 20.

Plans for Achievement Day, August 22, were made and committees appointed.

It was decided to collect funds for the Red Cross Clubmobile project. This will be done during the week of July 3-8 Bottles for your contributions will be placed in business houses in every town and trading center in the county. This worthy project is being sponsored state-wide by the Farm Bureau women in order to raise funds to purchase Clubmobiles to be used behind the front lines of our fighting forces These are operated by the Red Cross and provide such services as doughnuts, sandwiches, coffee and magazines for the servicemen who are far from the regular recreation and eating places. Contributions may be made to Mrs. Harold Oxley, Corwith, or any township chairman or Miss Hazel Grimes at Garner.

Plans were also made to help advertise the sale of bonds to parents, relatives and friends who wish to make a gift of a bond to a child under six years of age. A Walt Disney certificate may accompany these bonds.

The next Home Project Committee Meeting will be held Friday, July 14, at the home of Miss Hazel Grimes in Garner.

THREE GOLDEN WEDDINGS

Mr. and Mrs. Henry Rossbach of Akron celebrated their golden wedding anniversary on June 18. Mr. Rossbach has two sisters also celebrating their golden weddings this year. Mr. and Mrs. Noah Schoonover of Boise, Idaho, on June 12th; Mr. and Mrs. Alley Hamilton of Alcaster on August 4.

JANSSEN REUNION HELD AT BELMOND

The following Klemme people attended the annual Janssen reunion held at the Belmond Park, Sunday: C. J. Wille and family; Carl Wille and family; Mrs. Gretchen Schlawin; Verner Schlawin and family; Mitchell Bock and family; Mrs. Naska Bock; Mr. and Mrs. Raymond Wille and Mrs. Ruby Blanchard.

WEEKLY NEWS ANALYSIS

First Phase of Invasion Ended As Initial Foothold is Secured; French Hail "Liberation Troops"

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

This first picture made from French soil shows American doughboys, rifles ready, wading through the surf onto the French beachhead. The photographer who made the picture was in the first group to hit the beach. Note the invasion craft in the background. Soundphoto.

THE INVASION:
First Phase Ended

The first phase of the Allied invasion of Europe was completed.

To a tense world, supreme headquarters of the allied expeditionary forces announced this phase as the "securing of a foothold and the defeating of local German reserves."

Against fierce, last-ditch resistance of 10 hastily massed Nazi divisions, totaling nearly 150,000 men, allied forces were plunging inland on a 100-mile front of curving shoreline from the Seine Estuary near Le Havre to the Cherbourg area.

Allied forces are now in the second phase, which is one of defeating the German "tactical reserves," said headquarters. The third phase, which must be won before the Allied position is completely secure, is that of defeating the German "strategic reserves."

(Tactical reserves are those in or near the combat area; strategic reserves are those held in readiness at a distance.)

The Air Umbrella

Headquarters announced that 27,000 individual air missions were carried out in the two and one-half days following the dawn of D-day. Great air fleets, probably greater than those of D-day, hammered Nazi strong points, transport and troop concentrations within a 150-mile radius of the beachheads. Nazi fighter opposition was weak. The German high command had not yet thrown its long-hoarded fighter reserves into the battle for Normandy.

The battle was joined around Bayeux, first city of France to be freed from Germans, and Caen. A fierce tank battle raged in several wooded areas near Bayeux, where the Nazis were strengthened by parachute troops.

The navy supported foot troops with a gigantic bombardment of Caen. Nazi forces were attempting to hold the city as a pivot for counterattacks. But on the second day of invasion, the Germans were forced to admit street fighting already was being waged inside Caen.

Single Front

It became increasingly obvious that Allied positions were fast being welded together into a single front, stretching from Caen through Bayeux to just outside Carentan and some distance up the Cherbourg peninsula toward Valognes.

It was disclosed that the first forces ashore on D-day might have pushed ahead more rapidly than they did, but General Eisenhower's supreme command decided it was wiser to slow the advance somewhat while awaiting more adequate strength rather than make a risk having the spearheads choked off.

OBJECTIVE PARIS:
By Bastille Day?

Bastille day, French national holiday, falls on July 14 and in the first days of the invasion of western Europe, veterans of the 1940 battle of France forecast that the Allies would be in Paris by that date to help the natives celebrate.

In New York the French language weekly, "France-Amerique" carried a column by Ernest R. Bauer, which indicated that French military veterans familiar with the terrain over which the battles are now being fought predict rapid progress from the beachheads to Paris—120 miles away.

Meanwhile in London Winston Churchill urged the house of commons to guard against "the idea that things are going to be settled in a rush."

LIBERATED BAYEUX:
First of Many

Eyewitness accounts described great joy in the streets of Bayeux, France, first city to be liberated by Allied troops in the invasion of western Europe. On the main rail line linking the big port of Cherbourg to Paris, Bayeux is five miles inland from Seine Bay.

"God save the King. We've waited for this day. On to Paris. Vive Tommy. Vive Amerique." These were some of the rejoicing cries that greeted the first detachments to march through the narrow streets of the Normandy town. Cheering men and women danced through the same streets as the troops came in. Cafe owners began throwing open their doors with pianists striking up patriotic tunes to add to the festivity of that first day.

Europe is to have many towns cleared of the enemy in the weeks to come but Bayeux got its niche in the history books when the French Tricolor was hoisted above it again on the second day of the Allied landings in France.

SHUTTLE-BOMBING:
Russian Bases Used

News dispatches began carrying a new dateline that read "From a U. S. Air Base Somewhere in Russia" and this spelled historic military significance in cooperation between the United States and the Soviet Union. For the first time, U. S. planes had taken off from bases in Italy, bombed German targets, and continued flying eastward to land at secret U. S. air bases set up on Russian soil.

This new program opened the farthest corners of German territory to bombing attack by Allied planes based in Britain, Italy, North Africa and Russia. American military leaders had long wanted these Russian bases but it took diplomatic skill of the first caliber to get the Russians to agree to the strategy. They were finally convinced when it became obvious that the U. S. and England had the necessary planes and the Russians did not.

First target was a Rumanian freight yard in which the Nazi had concentrated supplies for troops fighting the Russians. American Flying Fortresses were accompanied by Russian fighter planes on part of the mission.

ITALY:
'Major Break' in Lines

The German high command in Italy was forced to admit a "major break" through their lines north and west of Rome as the Fifth army smashed toward Lake Bracchiano and Civitavecchia, key port of the Tyrrhenian sea.

German resistance was described by the allied command as "only light." It amounted to little more than disorganized activities by delaying infantry units and self-propelled guns.

The Fifth army had taken more than 18,000 prisoners and many more thousands were captured by the British Eighth army, which was meeting heavier resistance northwest of Rome, where the hardest fighting is being encountered.

The Vatican

"Whoever may be the military authorities actually having control of the city of Rome," the Vatican has announced its determination to maintain a policy of neutrality. Observers took this to mean that the holy see gave the Germans credit for correct behaviour with regard to Rome in its final hours.

AIR FIELD:
Near Philippines

A base within bombing range of the Philippines fell to General MacArthur's forces when the Mokmer airdrome on Biak Island was stormed and captured on the 13th day of the invasion of the Schoutens.

The beachhead on Biak was established late in May. A frontal stab was repulsed, following which American forces got in behind enemy positions and swept to the air field from the rear.

The Mokmer field is within 880 miles of the Philippines to the northwest and is within good fighter range of Palau, Japanese western Carolines naval base guarding the approaches of the Philippines.

The island also has two other airfields desired by the Sixth army invaders. The Americans immediately began a push toward the Borokoe airdrome a few hundred yards to the west.

INDUSTRY:
Must Take Initiative

Warning that industry must find its own work when war contracts are no longer available, Donald Nelson, chairman of the War Production board, told the house postwar committee, that:

". . . it won't be the government's job to find work for each company in its present expanded position. It's impossible to find a postwar market for the 8,900 airplanes we now produce monthly."

Stating that he was 100 per cent in favoring government's assistance in postwar planning for industry, he said that he was against government "running" small business. He urged that companies now engaged in war production use their own ingenuity and initiative in planning their postwar programs.

He forecast a postwar "expansionist" period in which private enterprise rather than the government would provide the necessary "spark." Government pump priming would be at a minimum under such conditions.

Lookout

A German sentry pictured as he scanned the skies over Boulogne, France—looking for trouble that came unexpectedly. Boulogne was one of the cities hit by sea and air bombings, paving the way for landing of Allied forces.

FOOT SOLDIERS:
Pay Increase

In reply to a request by War Secretary Stimson, Chairman May of the house military affairs committee introduced a bill to increase pay of skilled infantry men $5 to $10 a month.

Soldiers holding the expert infantry man's badge would get a $5 increase and those having the combat infantry man's badge, $10. Cost of the increase would amount to between 55 and 71 million dollars yearly.

In asking for the legislation, Stimson said infantry casualties are the highest of any branch of service. In the North African campaign, including Italy, the infantry suffered 70 per cent of the casualties, although comprising only 19.6 per cent of the total forces.

FARM MACHINERY:
Restrictions Removed

Small manufacturers (employing less than 100 workers) can now engage in the unlimited production of farm machinery, equipment, and repair parts made entirely from surplus materials or materials with an AA-4 preference rating.

This new arrangement, announced by the War Production board, is limited to firms employing not more than 50 workers in group 1 labor areas, or on the West coast. Elsewhere plants employing fewer than 100 workers may participate.

Manufacturers meeting these regulations can use surplus materials and component parts from inventories together with AA-4 preference rating materials in such production.

TRAVEL BAN:

Because of the increased loads placed on the nation's transportation system by the invasion, Director of Defense Transportation J. M. Johnson has asked immediate cancellation of all nonwar conventions, trade meetings and all nonessential civilian travel.

An ODT spokesman said there were no plans to ration train and bus travel through priorities, but that reserved space may be commandeered by orders of the army surgeon generol for casualty cases.

HIGHLIGHTS . . . in the week's news

TYPHUS: American medical corps have conquered the dreaded scourge of all armies—typhus. The disease has been brought under control by a new vaccine, and by a poison called DDT that kills the lice that transmit the germs. Brig. Gen. Leon Fox told news correspondents:

"Typhus has been removed from the death list of the U. S. soldier."

MORE FRUIT: The peach crop shows an increase of nearly 150 per cent over last year, according to reports from growers, William Graffitt, vice president of the United Fresh Fruit and Vegetable association, told dealers. The apple crop is expected to be at least 50 per cent larger than last year, and citrus prospects are much better, Graffitt said.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

UNPROMOTED COMBAT FLIERS

One thing that gripes the boys at the front is the way a lot of the desk officers in the war department and others here at home seem to get promotions more rapidly than the boys who are up on the firing line. Some of them feel so badly about it that they aren't anxious to come home, though given opportunities of furlough, because they are outranked by their old friends at home.

For instance, most of the new pilots just arriving in England are second lieutenants. They haven't been on any missions at all. Meanwhile, men who have been in England for two years, and have been flying over Europe constantly, still remain second lieutenants.

"How many do you have?" asks some newly arrived pilot who has flown twice across the channel, each flight being a mission.

* * *

TIRE-RATION PROBE

The Office of Price Administration is quietly probing several cases of tire ration violations which promise to be sensational. They go right into some of the biggest tire companies of the country.

One of the big tire companies is being probed on a charge of having failed to void the tire ration certificates turned in to them by retailers. In other words, when a retail tire store or garage sells a tire, it has to send back to the tire manufacturer the certificate issued by the OPA ration board. However, the OPA is tracking down reports that these tire certificates, instead of being stamped as used, are going back to the dealers, or else remaining with them in the first place. Thus, they are able to sell more tires without requiring more certificates in exchange.

Another big company is being investigated by the OPA for buying up new tires of various makes from dealers and later reselling them through the company's own stores at considerable loss. Even though not the tires made by this company, the loss was considered a good investment because it got motorists into the habit of trading with this company's retail stores.

There may be some startling news breaking on this soon.

GERMANY'S SMART CHOICES

U. S. experts who have studied the Nazi military setup to resist invasion figure that Hitler—or whoever did the picking for him—was smart in his selection of German military leaders. Three of the best men in the German army have been given the job of combating what the Nazis know is the death thrust at Germany.

No. 1 is Field Marshal Karl von Rundstedt, considered the best strategist and over-all commander in Germany. Field Marshal Erwin Rommel, immediately under him, is the best man for lightning moves and panzer tactics.

Finally, Colonel General Heinz Guderian is considered the best tank commander in the German army.

U. S. experts, who believe in looking facts in the face, classify these three as among the top military brains of Europe.

DAYLIGHT SAVING TO END?

It looks as if daylight-saving time were going to be abolished without giving the President a chance to block the repeal.

Several resolutions have been introduced to abolish war time, as a result of protests from farmers in agricultural areas. These are now before Representative Clarence Lea of California and his Interstate Commerce committee, and it looks as if one of them would be reported out and passed.

If so, it cannot be vetoed by the President, for the original bill establishing war time provided that it was to end six months after the war, or upon a concurrent resolution by both houses of congress.

This latter provision precludes a veto, since resolutions are not subject to being overruled by the White House. In fact, Congressman Lea wrote his original daylight-saving bill in this form for the specific purpose of heading off the White House in case Congress wanted to abolish war time.

* * *

CAPITAL CHAFF

¶ Congratulations to Lieut. Harry B. Paul Barnhart for bringing laughs to the boys in the South Pacific with his army show "Stars and Gripes."

Every day the state department condenses foreign news developments for its officials both at home and abroad. It is one of the fairest news summaries in Washington.

¶ The navy is starting a school of government, similar to the army's at Charlottesville, Va., to train men to govern occupied territories. Some navy men are wisecracking that they don't need to train governors of occupation because the British take over all Pacific possessions as soon as we capture them. (The Solomons and New Guinea were largely British before the war.)

Walter Winchell

(WNU Service)

America Through a Train Window:

The train clears its mechanical throat, rolls out of the depot, and the moving picture of passing scenery is framed in Pullman windows. . . . Fragments of smoke cruising over sprawling war plants that dot the outskirts of the city. A peaceful industrial scene where weapons are born that wind up in the hell of war. . . . Neat suburban homes on their best architectural behavior. . . . Church steeples pointing at the sky like hands in prayer. . . . Telephone poles whizzing by in Indian file. Birds perched on their wires—like notes on a musical scale. . . . The countryside knee-deep in Spring. A tapestry of greenery stretching toward the horizon. . . . Long lines of trees planted with Rockette precision—bejeweled with ripening fruits. . . . Attractive lady train conductors. . . . Weary travelers slumped in their seats marooned on an island of their thoughts.

Tree-lined small town streets, each house ornamented with manicured hedges. . . . Ribbons of roads wrapped around the landscape. They used to be covered with traffic, but now you can see miles of nude highways. . . . The eager anticipation in the orbs of servicemen on their way home to enjoy a furloaf. . . . The train gobbling up miles of space as it roars through State lines. No passports are needed to cross them. One of the miracles too many Americans take for granted. . . . The haze that floats over the grass at sunrise when Nature is still drowzy with morning. . . . Old, unpainted houses on the wrong side of the tracks making their poverty public. . . . Miles of undeveloped land blanketed with forests between big cities. Places where Nature has room to stretch.

The train whizzing by small, dusty stations surrounded by loneliness. You go by so fast you can't even read the station's name. . . . Cows grazing in Ohio's pastures—their tails continually swinging like a baton. . . . A feather of a breeze tickling a lake—causing it to dimple with a million ripples. . . . Piercing train whistles punctuating the night with exclamation points of sound. . . . Cross country trucks moving across the roads with the slow dignity of glaciers. . . . The increased tempo of traffic that heralds the approach to a city.

A stretch of flat land broken by the wide open mouth of a valley. . . . The lights of a lonely farmhouse twinkling in the dark night. . . . The train pulling into a station with the dignity of a dowager entering a tea party. . . . The eternal peacefulness of forests filled with a million leafy fingers reaching for the warmth of the sun. . . . Fields of wildflowers curtsying to the balmy winds. . . . Large signs announcing that you're about to enter this-or-that town. A sight as American as a home run.

Tremendous ranches monopolizing giant slices of territory. Some are almost as large as a small European nation. . . . Skeletons of ghost towns slowly being turned into dust by wind and rain, remnants of the wild West. . . . Modern cowboys who now spend more time riding in station wagons than on hosses. . . . The brilliance of a Western night—a dark-faced sky freckled with stars. Much poetry and many songs have been written in tribute to its overpowering beauty. But nothing can match the first-hand view of this shimmering phenomenon. . . . The many peaceful sights that make you think the war is very far away. But a plane drilling its way through the sky reminds you nothing is beyond the war's reach. . . . Peaceful Indians now selling souvenirs at railroad stations. . . . Cattle herds in the sunset making a picture postcard to be filed in your memory.

Desert nights filled with romantic mysteries. . . . When you see the gigantic natural obstacles that still exist in the West you are filled with renewed respect and pride for the pioneers who built a civilization on the foundation of blood, sweat and tears. . . . Tiny villages with less population than in a Big Town apartment house. . . . Headwaiter smiles of train porters. . . . The Deisel engine entering a tunnel with a loud cry, dragging the serpent of cars behind it. . . . The sage brush country, with an occasional motorist providing the only sign of life. . . . Tired tourists chewing the fingernails of their patience, eager to arrive at their destination. . . . Hot dog stands planted in the middle of nowhere.

The billboard advising motorists: "This is God's Country. Don't Drive Like Hell" . . . The Chicago skyline resembling an unfinished jigsaw puzzle. . . . Train-sitters trying to whittle away time by playing cards, gabbing, reading, or just staring at a pretty gal across the aisle. . . . The mid-West's gigantic fertile fields—America's breadbasket. . . . A bonfire of sunlight slowly raising its head over roundshouldered hills. . . . Traveling salesmen in club cars nibbling on bits of conversation about tiresome matters.

Sgt. Robert Bank's pulse and respiration went up several points when this band of entertainers dropped into this hospital tent in the Aleutians. Players left to right are Naomi Stevens, Mary Lee, Grace and Harry Masters, and George Cerutti.

Una Merkel, George Raft, Phyllis Brooks, Frederic March, Louise Allbritton, Andy Arcari, Jean Clyde, Bob Hope, Keenan Wynn, Al Jolson and John Garfield.

Although the screen luminaries volunteer for a minimum of 12 weeks, some of them trouped the various circuits for as long as 30 weeks, enduring all kinds of inconveniences and hardships, but taking them in stride and actually enjoying the experience. Many of the lesser-known paid entertainers on "sleeper-jumping" tours of 50,000 and 100,000 miles have been out for as long as 11 months, visiting little outposts in remote regions, isolated camps in Central and East Africa, army transport command stops in the Arabian wilderness, or lonely road camps in the snow-covered mountains of Iran.

The business of obtaining the talent and putting together a show unit is the function of USO-Camp shows, a function usually conducted on specific orders from the army special services division which requisitions entertainment by much the same method as GI supplies are ordered. In typical army terseness, a directive will be issued to camp shows for a certain type of entertainment to be provided by a specified number of performers for a designated area and time. USO-Camp shows follows instructions.

At the designated time and place, the show is turned over to the army, and thereafter it is practically as much a part of the army as the GI Joes. Where the show goes, when it goes, how long it stays and when it "does its stuff" are all prescribed by the army. Transportation, food, sleeping quarters are furnished by the army. Many performers give their service; others are paid nominal salaries.

Troupers Endure Heat, Cold.

Although details of the tours are handled by the army with characteristic military precision, putting on the show many times isn't exactly a cinch. In fact, it is often attended by difficulties, hazards or interruptions. Even the army isn't able to provide transportable theatres, stage "props" and equipment. "Tramping the boards," a familiar expression of the trouper, is exactly that with Camp show entertainers, for the show is usually given from a crude, improvised stage of boards thrown up wherever the audience is stationed.

The locale of a show may be in a jungle where the temperature climbs to as high as 130 degrees; it may be at a lonely mountain side outpost, or in the midst of desert wastes. One USO-Camp show unit, landing unexpectedly between bombings on the Island of Pantelleria, gave a performance in an underground airplane hangar. Another camp show troupe actually gave a show in a submarine.

Returning from an 11-month tour, members of one camp show unit announced that they had become authorities on the sands of the world. They had played in yellow sandstorms in Egypt; in red sandstorms in Tunisia that had dyed their hair, face and clothes a bright red; and in white sandstorms in Iran that made brunettes look like platinum blondes. While up in snow-covered mountains, they suffered sub-zero cold; down in the valleys, they had to wrap themselves in wet sheets in order to sleep in the 145-degree heat.

Travel Through Mine Fields.

Another troupe that spent months with fliers at advanced air-fields never took a trip to a nearby encampment when they didn't have to pick their way through mine fields. Once they parked their trailer truck two feet from a live land mine. It was the heartbreaking experience of this troupe of getting to know some of the boys who were destined not to return from their missions. Once the troupe went miles in their truck to give an unscheduled show when they learned that a certain squadron's commanding officer had been shot down that day.

Another camp show unit that started a North African show with an audience of 1,500 soldiers, had the disconcerting experience of seeing ten men leave, then ten more, then another ten, until finally they were playing to a mere handful of restless soldiers. Afterward, they learned that a landing by enemy commandoes had been reported and their audience had been called out to track them down.

Camp show performances are often attended by hazards and perils as well as discomforts and inconveniences. One troupe played seven weeks at road camps in the Iran mountains that were maintained to keep open the route over which supplies and arms were going to Russia. Bandits were in the neighborhood, and the troupers couldn't leave the camps without armed guards.

Air Raid Halts Show.

Sometimes sudden enemy action makes it necessary to halt a performance in the middle of its most dramatic or interesting moment. In Italy where the players are frequently close behind the front lines, such interruptions are not infrequent. In one instance when enemy planes roared over during a performance, the audience and the troupers sat in darkness for hours until the alarm passed and the show could continue.

One troupe touring the Iran valley outposts had to travel 140 miles, through mountains, in a caboose. There were 136 tunnels, and every time the train went through a tunnel it was like going into an oven.

At a mountain stop in Iran, the players learned that the boys stationed there hadn't had fresh meat in weeks. They organized a hunting expedition and, armed with army pistols, shot 11 wild boars. Their show was a great hit that night. "We gave them ham, and fed them ham, too," they said.

Thus, day in and day out, the show goes on—making every stop on the "Icicle Circuit" along the Alcan highway in Alaska; the "Foxhole Circuit" in the South Pacific; the "Desert Circuit" in Egypt, Africa, Iran, Lybia and Arabia. And as rapidly as our fighters advance, USO-camp shows are ordered up to entertain the battle-weary combat troops and provide an antidote for operational fatigue.

Comedian Joe E. Brown toured the south Pacific area for many months, pushing into remote jungle islands. Here he is shown entertaining soldiers at an open air theater in Australia.

me Talent' Skits Prepared by Army Special Services Give Soldiers a Chance to Entertain Themselves

ere aren't enough U. S. O. cs to get around, so Brigadier ral Byron of the army special ces division decided to help oys entertain themselves. He some playlets written under the tion of George Kaufman and playwrights that men could ce themselves anywhere, with equipment and costuming. are grouped into a sort of review called "About Face" a broad farce on military life, draft boards, sergeants, WACs and similar subjects. It was presented first in Camp Shanks, N. Y., where it made a hit with the G. I. audience. Soldiers and WACs played all parts.

"About Face" is full of army jargon and wisecracks. It consists of a series of short skits which General Byron said can be selected, improvised upon and adapted to various local situations in the different combat areas. The show can be staged with props and costumes made from scrap materials.

"The show has to afford the maximum possibility for versatility," General Byron explained, "and appeal to the average soldier, who, if he had more time, could work out the details himself. They not only like to entertain themselves, but also want to do something in this line for themselves."

Star Dust STAGE SCREEN RADIO

By VIRGINIA VALE

Released by Western Newspaper Union.

TWO full years have passed since actor Douglas Walton, called up for army service, worked all one night to finish a picture assignment at RKO. Early the next morning, with no time in which to change from his costume, he reported for duty in white tie and tails. Now he's back—Lieut. Douglas Walton, medically discharged—and reporting at RKO to play the man who gets his in the Dick Powell-Anne Shirley thriller, "Farewell, My Lovely." And on his first day before the camera, his costume was—white tie and tails!

—*—

After giving Linda Darnell the biggest break of her career in "Summer Storm," then realizing, while critics raved, that they had no further claim on her services, Angelus Pictures is taking no more chances. They've signed up Dona Drake with a contract calling for a starring role a year for four years. Dona's been around the Paramount lot for some

LINDA DARNELL

time without ever getting a good break, so finally she won cancellation of her contract so that she could take advantage of the Angelus offer. Douglas Sirk, director of "Summer Storm," made a special test of Dona, and it was on his recommendation, because he thinks she's potentially a dramatic star, that she got the contract.

—*—

Norman Price, tenor of the "Mother and Dad" quartet, chose music as a career not too many years ago, but it was a toss-up whether he'd sing or earn a living as a professional swimmer or a baseball player. Norman was a star athlete in his home state of Arkansas; he hails from Berryville. Polly Robertson, organist and arranger for the quartet, is another Southerner, from Kentucky.

—*—

Claude Rains, currently featured in Warner Bros.' "Mr. Skeffington," starring Bette Davis, is expected back from England by mid-July for his next assignment under a long-term contract. He went to play opposite Vivien Leigh in "Caesar and Cleopatra."

—*—

As part of its twentieth anniversary celebration Metro has dug into the files and come out with some bits of interesting information. For instance—Glenn Martin, the plane manufacturer, once was a movie actor. He played opposite Frances Marion, the ace film writer and executive. He was given the job because no other leading man could be found, in 1916, who owned an airplane!

—*—

In a poll of enlisted men embracing the entire Southwest Pacific area, conducted by the Overseas Motion Picture Service, Humphrey Bogart was voted the year's No. 1 actor, as a result of his performance in "Casablanca." An "Oscar," a facsimile of the Fuzzy Wuzzy Angel of New Guinea, is being forwarded to him, as an expression of the gratitude the men feel for all that he has done for them.

—*—

The well-worn theory that mystery stories are too exciting fare for children receives another knockout blow in results from interviews with youngsters having roles on "Mystery Theater." All report that never in their lives have they slept better than on the nights after they have been in on a few choice murders in the NBC mystery thriller—the more murders, the better.

—*—

Sounds difficult, but it worked—when writing "The Little Bit of Heaven," musical to be produced by Metro, Capt. Luther Davis, with the army air corps in India, and Marine Capt. John Cleveland, stationed at Quantico, Va., collaborated by mail with Robert Andrews in Hollywood.

—*—

ODDS AND ENDS—Victor Borge has been signed for an additional 13 weeks on the Basin Street program, beginning in September. . . . With "Practically Yours," her last picture under her Paramount contract, in the bag, Claudette Colbert intends to free lance. . . . They had to change the script of "Murder, He Says," and make the heroine an ash-blonde instead of platinum; Helen Walker wouldn't bleach her hair. . . . In his Beverly Hills office Edgar Bergen has an ash tray modeled after Charlie McCarthy; it was sent him by a fan. . . . Guy Lombardo's will be the only dance band used in the current series of 15-minute recordings for WAVE enlistments.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for July 2

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

ENTERING THE PROMISED LAND

LESSON TEXT—Joshua 1:1-9; 23:1-5.

GOLDEN TEXT—Be strong and of a good courage; be not afraid, neither be thou dismayed: for the Lord thy God is with thee whithersoever thou goest.—Joshua 1:9.

The forward look is typical of God's people. They are always to go on. They are to be like Israel, to whom came the word, "Moses is dead," but "now therefore arise and go"—under a new leader.

Our lessons for this quarter center around the experiences of Israel from Joshua to David, a period rich in historical data, much of it with most helpful spiritual application. It affords a real opportunity for effective teaching.

Moses was now dead, but that only brought forth

I. God's Provision of a New Leader (1:1, 2).

God buries His workmen at the end of their day of labor, but God's work goes on. The people had become attached to Moses and had learned to trust his leadership (even though they often murmured). With his death we might have assumed that there would be a letdown, but that was not in God's plan.

The Lord works through men. He gives them abilities and uses them for His glory—often in a way which astonishes them and others. But let them not become proud, for God has someone to take their place when they are gone. They are not indispensable.

Sometimes people talk as though all the great leaders of the church had died, or were dying. Yet God has some obedient men who are ready to step into the gap.

Joshua was ready, when God was ready, and he stepped into leadership.

II. God's Promise of Victory (1:3-5).

The promise given to Moses was still good. God's promises are always good. They are the only really stable thing in a trembling universe. The question is, Are we ready to accept Him at His word?

If our love were but more simple,
We should take Him at His word;
And our lives would be all sunshine
In the sweetness of our Lord.
—Faber.

They were to step out by faith. The land was promised to them only as the sole of their foot should tread upon it. Israel never took out the full promise of verse 4. They lacked faith. Do we?

God honors those who believe Him and who move forward by faith to plant the foot of spiritual conquest in new territory. Some are doing it now. Are we?

The enemies of God's people were many and mighty, but they were not able to stand in the way of God's people when they were moving forward for Him. Here again, Israel failed. They did not drive them out, because they did not take God at His word. The application of that truth to us is obvious.

III. God's Plea for Obedience and Courage (1:6-9).

"Be strong and of good courage." There is a side to the believer's character which calls for submission, for turning everything over to God, for being sweet and spiritual. All that is good and very desirable, but it can never be substituted for that other side which shows virile courage and fearless abandon to the cause of our God.

Joshua was made to realize—as we must too—that serving God (and especially in a place of leadership) calls for a measure of high courage unsurpassed in any other pursuit of man. It takes all there is of a man to be a real follower of Christ—be sure of that!

This courage, however, is not to be confused with a foolhardy bravery which is reckless and unintelligent. No indeed, for it is based on the observance of God's law (v. 7).

Note (v. 8) the importance of meditating upon God's Word. This (which is really a lost art in our day) means so absorbing the principles of the Word that our very lives are conditioned by them, and we are made ready to meet every problem in the light of its teaching.

IV. God's Purpose for the Future (23:1-5).

Passing all the great and stirring experiences of Joshua, we have now a glimpse of his closing days. He was counseling the people regarding the future.

It is the mark of a great man that he looks beyond the end of his own short existence and plans for the future. Many there are who are not concerned about what happens once they are gone. They have no vision, no concern about the continuity of life, in fact they come and go almost like the beasts of the field.

What about the future? Joshua reminded them that every blessing they had received, every victory they had won, everything, had come from the hand of God. There and there alone was their hope for the future. And it was enough!

A Flattering Pinafore With Colorful Zinnias

DON'T be colorless at your household chores. Embroider colorful zinnias on this flattering pinafore. They are a needlework magic, they're done so quickly.

SNAPPY FACTS ABOUT RUBBER

Alcohol base butadiene is expected to provide an important portion of the synthetic rubber used in the U. S. in 1944. One instance where alcohol and the automobile go well together!

Passenger car tire shortage is expected to continue well into the summer months, at which time synthetic tires may make their appearance in growing numbers. That's why extreme tire care is important now.

In 1910 crude rubber sold for an average of $2.06 a pound in New York. Since September 12, 1941, it has been fixed by a government agency at 22½ cents a pound. In 1932 the average price was 3.4 cents.

TAKE A TIP FROM A DOG

After he's through running and playing, have you noticed how your dog completely relaxes and falls asleep on the rug at your feet? He lets go, rests every nerve and muscle, builds up his strength for the next run.

You, too, need to relax. Take a tip from your dog and let go! In these high tension days it is vitally important to learn to relax. A prominent efficiency expert taught that we should use our "moments of unavoidable delay" to relax and store up energy for work.

Watch your dog when he wakes up. He stands up and stretches his entire body. That's tip No. 2. Stretching and deep breathing are the finest exercises. To the Hindu Yogi, breath is life and his entire philosophy of mental and physical poise is built around breathing exercises. Throw open the window. Reach for the ceiling! Try to reach the floor with the tips of your fingers, without bending your knees. Breathe! Stretch! Live—The Forest Log, Salem, Oregon.

"MY RIFLE," A MARINE'S CREED

I have received a copy of "My Rifle", which is the creed of the United States Marine Corps. It was written by Maj. Gen. William H. Rupertus, U. S. M. C. We think you would enjoy it:

"My Rifle"

This is my rifle. There are many like it, but this one is mine. My rifle is my best friend. It is my life. I must master it as I must master my life. My rifle, without me, is useless. Without my rifle I am useless. I must fire my rifle true. I must shoot straighter than my enemy who is trying to kill me. I must shoot him before he shoots me. I will . . . My rifle and myself know what counts in this war is not the rounds we fire, the noise of our burst, nor the smoke we make. We know that it is the hits that count. We will hit . . . My rifle is human, even as I, because it is my life. Thus I will learn it as a brother. I will learn its weaknesses, its strength, its parts, its accessories, its sight, and its barrel: I will ever guard it against the ravages of weather and damage as I will ever guard my legs, my arms, my eyes, and my heart against damage. I will keep my rifle clean and ready. We will become a part of each other. We . . . Before God I swear this creed. My rife and myself are the defenders of my country. We are the masters of our enemy. We are the saviors of my life. So be it until victory is America's and there is no enemy, but peace!

BETTER IOWA GARDENS

Extra vegetable seeds should not be left carelessly in either damp or hot places. A little care in storing seeds will give them longer life. Cool and dry conditions are ideal. Cans or glass jars may be used for storage containers. Lids should be placed on lossely, or several holes be made in the lids for vents.

* * *

Tomatoes have not been making too much growth in wet areas. There is still time to give tomato plants support to keep the foliage and fruits up in the air. This gives them a better chance to dry off and helps to "brush off diseases."

* * *

Every gardener should make a special effort to store vegetables this fall. Lettuce, radishes, peas and other early maturing vegetables leave vacant rows, which should be replanted to late maturing vegetables for storage this fall. By making summer plantings, the entire graden area can be kept producing.

* * *

In general, the first summer plantings should be made in the northern part of Iowa the last week of June, and in southern Iowa the fore part of July. Late varieties of cabbage should be transplanted at this time to insure a supply for use in salads next winter. A late planting of cucumbers and the last planting of bush beans should be made. More important from the storage standpoint is to make a good planting of carrots and beets. The average family that is fond of carrots should store 2 or 3 bushels with more vegetables stored, fewer remain to be canned.

* * *

In normal seasons, it pays to plant seed deeper in summer gardens than for spring planting If frequent rains continue, however, it probably will be safe to plant seeds about the same depth or just slightly deeper. If the weather should turn hot and dry after planting, the seeding should be shaded with dried pea vines or other available mulch.

* * *

Hilling of potatoes ordinarily is not recommended. However, a slight hilling to insure localized drainage or run-off of water would be in order this season. Potatoes cannot tolerate wet feet.

Hancock County Board Proceedings

2nd. ADJOURNED JUNE MEETING

Garner, Iowa
June 19, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J Schoun, Penn Eckels and John Chambers, present.

TOT DOES HER BIT

Even the very young girls are doing what they can to help the war effort in Iowa Falls. Viola Ford, 3, became quite proficient in threading red, white and blue ribbon through the tags for sale on tag day for the Iowa Falls unit of the United Service Women. Viola accompanied her aunt and grandmother to the meeting place where the work was done Rosalee Kay, 5, also joined the group. The tag day receipts are to be used in supporting various projects which aid, comfort and cheer service men and women.

GONE AND BACK AGAIN

A letter containing a bank draft to a relative, Helen M. Boosalis, living in Niota, Leconia, Greece, dated February 8, 1941, was returned to Nick Boosalis, of Denison, recently Stamps on the envelope indicated that the letter had been scheduled for part of the trip by Atlantic Clipper but lettering stated that"Service Suspended Return to Sender" The 30 months the letter had been on its travels did little damage to it.

EXTENSION DIRECTOR REVIEWS CONSERVATION PRACTICES, BENEFITS

Tons of topsoil were saved by improved soil practices this spring of heavy flood rains. In observance of Soil Conservation Week, June 23 to July 1, County Extension Director Henderson reviews the soil conserving practices carried on by farmers in Hancock county last year.

Contouring was done on 2 farms. Such practices not only helped to keep soil from washing but also will improve crop yields.

Application of 4000 tons of lime not only increased crop yields but also made it possible to include 1800 acres of legumes in a crop rotation plan.

Henderson points out that soil-conseving practices demonstrated their worth this spring as evidenced by a comparison of contoured fields—which showed much less soil washing— with fields farmed in the up-and-down hill style, in the country after the heavy rains two farmers were working in adjoining fields. One was cultivating corn on the contour and the other was filling gullies on a field planted up and down the hill.

In many areas in Iowa farmers will have to replant crops which have been lost through flood waters. In some instances there may be shortages of good seed and farmers may have to resort to the use of seed which is more than a year old. Older seed is likely to be lower in germination and produce weaker seedlings. To insure as good a stand as possible farmers should make a quick germination test to determine the viability of the seed in order that the seeding rate can be adjusted accordingly. Also, old seed should be treated. Seed treatment at a cost of one to five cents per acre reflects its value in better stands and consequently better yields.

NOTICE OF DISSOLUTION OF PARTNERSHIP

TO WHOM IT MAY CONCERN:

Notice is hereby given that the co-partnership of Senneff and Berge consisting of Frank W Senneff and B. C. Berge, engaged in the practice of law at Garner, Iowa, is to be dissolved as of the date of July 1, 1944 by mutual consent. All business now pending will be completed by the partnership the same as in the past. B. C. Berge will maintain an office in the front corner rooms over Stones Variety Store and the Garner Cafe, and the old office of Senneff and Berge will be conducted by Miss Louise Q Beyer, a young lady lawyer now in the office of Mr. Senneff at Britt, Iowa. Mr. Senneff will continue spending Wednesday of each week in the office at Garner formerly occupied by Senneff & Berge.

Dated this 23rd. day of June, A. D, 1944.

B C. BERGE
FRANK W. SENNEFF

HISTORY OF RAY AND MARY JANE JORGENSON

(By C. G. Waterman)

It is a relief to the committee to see Mr. and Mrs. Jorgenson here, among this group of friends who have gathered to help them celebrate their 25th wedding anniversary. I well remember our experience when we tried to surprise them on their 10th Wedding Anniversary. When we went to their home early in the morning we found a note on the door reading, "The Early Bird Gets The Worm." So we retired to the home of Mr. and Mrs. C. F. Keraus and waited for them all day and they did not show up until after supper. Knowing that Jergie is full of tricks the committee was afraid they might repeat this stunt tonight. Where ever Ray goes Mary is sure to follow.

I believe that I have known this couple longer than anyone else here exepting their relatives. I first met Jergie in the fall of 1914 when I entered Garner High School as a Junior and Jergie was a Senior The Senior Class of 1915 edited the High School Annual called "The Mirror" in which I found many reflections on Jergie's High School Days. I did not find as many as there should have been because Jergie was the Managing Editor and did not allow to put everything in print about himself (which he still adheres to today when writing the "Ink Spots") However I did find some references to him as follows: Nickname. "Jergie", Managing Editor of the Mirror 1915, Orchestra 1913, and 1914, Band 1915, Class President 1915, Glee Club 1915, (Some one should ask him to sing in our choir.) Under Kewpie's Directory for 1915 I found Ray Jorgenson (better known as "Jergie") Characteristics - Proposing; Favorite Study - Modern History; Dress - A Red Jersey with white stripe. Ambition - A Mad Democrat Under Dramatics - The Season's Offering was "The Red Kiddo-Ray Jorgenson starring. An uninteresting play concerning the troubles of a poor printer Under Debate, Resolved: That Ray Jorgenson was hit in the face with an ice snowball, February 10th, 1915? Affirmative. Ray Jorgenson and Earl Nelson; Negative, Ray Barnes and Miss Livestad. And here is the Editor's Comment—"We feel that it is unnecessary to say that those who were concerned can remember the fact." Then I was told that Jergie had a part in the class pennant fight when Supt Cecil attempted to rescue the pennant from the top of the flag pole on the high school building Supt. Cecil's step ladder slipped and he was forced to slide down the pole which had been covered with axle grease thereby ruining a new pair of trousers. Another notation in the annual stated that the Canning season started on Feb. 10, 1915 and a cartoon showing three boys on their way home with cans tied to them and the following initials on their backs R. J., V. S., and L B. From the above you can see that Jergie enjoyed his high school days and also learned the printing business.

When I returned to Garner High School in the fall of 1915 we had a new Domestic Science teacher on the faculty by the name of Miss Mary Jane Davis. I did not take this course but was invited a number of times to sample the candy and cookies placed on the window sill in the domestic science room and can testify that they were good and now with 25 years of experience they are still better. It is too bad that Jergie wasn't in school at that time but I have been told that cakes and pies were baked for him personally and it appears that Mary Jane won Ray's heart thru his stomach. However I took history under Miss Davis and found her to be an efficient teacher. I would like to have had more about Mary Jane's early history but on account of the gasoline and tire shortage my scouts were unable to make the trip to the place of her birth to get this information for me.

Raymond A. Jorgenson was born on March 24th many years ago on the north shore of Clear Lake Iowa. His parents were living on the farm just across the highway from Larson stand. That is why you see Jergie going back to his old haunts in the summer time with his hat full of feathers and wading around in the water looking for something he might have lost in his boyhood days. And then in the winter time he goes over and chops a hole in the ice and he is still looking for something he lost. After a few years Jergie moved to Garner with his parents and finished high school in 1915 and started to work for The Democrat, one of the weekly newspapers in Garner About 1918 people along main street of Klemme noticed a young man wearing a red jersey sweater with a white stripe come into town every morning on a motor cycle and go out again at night. It wasn't long before the announcement was made that Jergie had purchased the Klemme Times and we had a new printer and he has been with us ever since.

Mrs. Mary Jane Jorgenson was born on October 29, several years ago in Kansas just across the line from Pawnee City, Nebr. She graduated from the Pawnee City high in 1911 and attended Normal at Peru, Nebraska one year, graduating from the University of Nebraska at Lincoln, in the spring of 1915. She then taught in the Garner high school for three years, and at Ottumwa, Iowa for one year.

About that time Ray got tired of boarding out and asked Mary Jane to come to Klemme to cook for him. Ray had been eating at the Kirkwood boarding house that was famous for its honey and Ray was fond of it He had it at every meal. So when the bride and groom arrived in Klemme Ray took his bride to the Kirkwood boarding house and at the very first meal there was no honey at the table. Ray called the waiter, and asked:

"Where's my honey today?"

"Oh, she doesn't work here any more," said the waiter.

The following write up of their wedding appeared in the Garner Signal in its issue of July 2, 1919.

"Raymond A. Jorgenson, editor of the Klemme Times was united in marriage last Wednesday afternoon to Miss Mary Jane Davis The ceremony taking place at the bride's home in Lincoln, Nebr Mrs Jorgenson is well known in Garner, being one of the teachers in high school a year ago She is an accomplished young lady.

Mrs. Jorgenson's many friends here welcome her back to our vicinity. Ray has always made his home in Garner until a few years ago when he took over the ownership of the paper at Klemme and has made a success of his work He is popular among his friends and starts wedded life with a host of good wishes. The happy couple arrived in Garner Saturday to spend a few days with the groom's parents. They will be at home in Klemme after Sept. 1st"

Mr. and Mrs. Jorgenson have one son, Capt. Raymond A. Jorgenson, Jr, in the Army Air Corps, an instructor on the B-26 bomber. He is stationed at Dodge City, Kansas. They also have one grand-daughter named Maryl Judy. We congratulate Ray and Mary Jane Jorgenson on reaching their 25th Wedding Anniversary.

As you're looking back today,
On twenty-five short years,
May you find this glad event
Brimful of all that cheers!
And, looking forward, may you see
A world of joy in store
To bless another happy bunch
Of twenty-five and more!

FARMERS!

The Business People
Of Klemme

. . . believe it is their patriotic duty to keep their places of business open every day, except Sunday, to serve the Farmers during the busy Summer months. Farmers often need food supplies; repairs and service when machinery breaks down; or other emergencies that arise needing attention. Business places of Klemme are open to assist anyone in an emergency of this kind, or any other.

No Half Holidays
In Klemme

It seems to be the trend of some Iowa towns to close up all places of business one afternoon each week. However, Klemme business men and their helpers feel that it is better to keep the business places open to render better service.

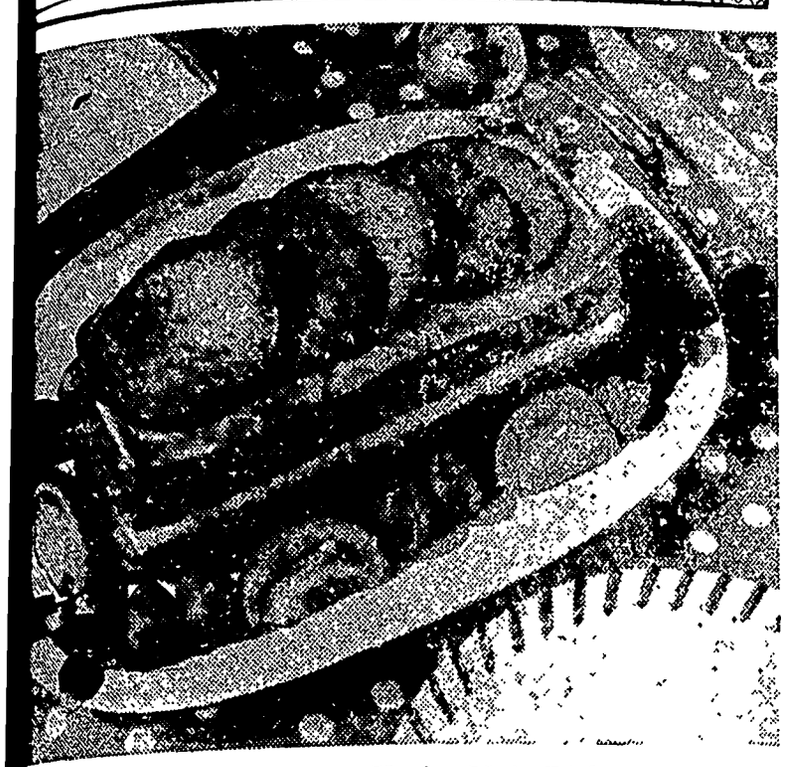
HOUSEHOLD MEMOS
by Lynn Chambers



Cold Meat Warms Up for Main Dish
(See Recipes Below)

Meat Varieties

One of the most difficult tasks that confronts the housewife is that of getting variety into the meat dish. Meat, in itself, is delicious, but if served in the same way, with the same vegetables or without condiments, occasionally, it smacks of sameness. There are many who will always have ham without varying the way, to add interesting flavor to the meal. There are others who don't realize that a bit of natural, home-grown herbs will pep up the good, old-fashioned pot roast. Some also serve luncheon meats cold on a slice of bread or with potato salad, and so on. For once, let's try things different and interesting:

Liverwurst Loaf.
(Serves 6)

1 pound bologna
2 tablespoons chili sauce
2 tablespoons mayonnaise
1 teaspoon lemon juice
1 pound liver sausage
2 tablespoons finely chopped pickle
2 tablespoons chopped celery
1 teaspoon onion juice
6 slices unsliced white bread
2 tablespoons creamed butter

Put bologna through food chopper; add chili sauce, 2 tablespoons mayonnaise and lemon juice. Mix to a smooth paste. Mash liver sausage, add chopped pickle, celery, onion, Worcestershire sauce, remaining mayonnaise and mix to a smooth paste. Cut crust from bread, slice one inch lengthwise slices. Place one slice on baking sheet and spread with bologna paste. Top with remaining slice of bread. Spread entire loaf with creamed butter. Bake in a moderate (350-degree) oven 30 minutes. Place on platter and garnish with stuffed olives and tomato wedges. Serve with:

Creamy Mustard Sauce.

¼ cup sugar
½ teaspoon salt
2 egg yolks
1 cup scalded milk
¼ cup prepared mustard
2 tablespoons vinegar
1 small sprig chopped thyme
⅛ teaspoon allspice
⅛ teaspoon celery salt
¼ teaspoon paprika
Dash of tabasco
6 slices ripe olives

Mix sugar, salt and egg yolks together, beating well. Add to scalded milk in top of double boiler. Mix together mustard, vinegar, thyme, allspice, celery salt, paprika and tabasco. Add slowly to milk and egg mixture. Cook over hot water, stirring constantly until mixture thickens. Just before serving garnish top of sauce with olives.

Save Used Fats!

Kidneys and liver are both delectable if prepared with the proper seasonings:

***Roast Kidney Loaf.**
(Serves 6)

1 pound beef, veal, pork or lamb kidney
1 cup milk
8 slices bread
¼ cup bacon drippings or butter
2 eggs
1 green pepper minced
1½ teaspoons salt
¼ teaspoon pepper
3 tablespoons grated onion
½ teaspoon powdered sage

Wash kidney in cold water. Drain well and grind, including the internal fat. Pour milk over bread and soak. Combine all ingredients and mix thoroughly. Pack firmly in a loaf pan. Bake in a moderate oven (350 degrees) for 1½ hours.

Liver Deluxe.
(Serves 6)

6 tablespoons bacon drippings
1 large onion, thinly sliced
6 cups shredded cabbage
1 teaspoon salt
¼ teaspoon pepper
1 pound cubed liver
½ cup water
1 tablespoon soy sauce.

Brown onion in 4 tablespoons drippings. Add cabbage and seasonings. Cover and cook over low heat for 15 minutes. Remove from pan. Roll liver in seasoned flour and brown in remaining drippings. Add water and simmer 5 minutes. Add soy sauce and cabbage.

Bacon makes a tasty, light supper dish with garden-fresh green beans:

Bacon and Beans.
(Serves 4)

½ pound bacon
1 pound fresh green beans
2 tablespoons bacon drippings
1 teaspoon salt
½ cup chopped green onions
2 tablespoons chopped pimiento

Wash green beans and cut lengthwise. Cook in a small amount of water. Add bacon drippings and salt. Ten minutes before green beans are cooked, add green onions and pimiento. Serve with strips of crisp bacon.

The outdoor flavor of the barbecue is captured with this barbecue ham. The sauce is seasoned just right, tangy but not too hot:

Barbecued Ham.
(Serves 6)

1 slice ham (2 pounds, 1 inch thick)
½ large onion
½ clove garlic
¼ cup catsup
¼ cup Worcestershire sauce
1 small can tomato soup
⅓ cup vinegar
½ tablespoon butter
½ tablespoon sugar
⅛ teaspoon pepper

Simmer ham ½ hour before baking. Chop onions and garlic very fine. Add remaining ingredients and pour over ham; bake uncovered for 30 to 40 minutes in a moderate oven.

If you wish more detailed instructions on vegetable canning, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Please don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

Extra Attractions: Potato chips make nice snacks when there's a rosette of cream cheese on each one of them. Simply soften cheese and force through a pastry tube.

Try a green salad with tender green scallions from the garden, and toss together with a sour cream dressing. It's delicious!

Dredge bacon pieces in corn meal; fry until crisp. Then add onion and flour for thickening and milk for the gravy. Umm . . .

Roll cooked pitted prunes in orange-sugar or lemon-sugar to use as roll filling.

Make bacon biscuits (adding ½ cup chopped bacon to standard biscuit recipe). Top baked biscuits with creamed asparagus or carrots for an inviting luncheon dish.

Top chocolate ice cream with chopped toasted almonds for a good tasting dessert.

Chopped green peppers and pitted ripe olives introduce flavor and texture contrast to fish salad.

The Once Over

THE OPA AND BEAUTY

Federal control of beauty is at hand! We are to "administrate" pulchritude.

—*—

The OPA is about to include lips, eyebrows and cheeks in the same general category with broccoli, escarole, chuck pot-roasts and citrus fruits.

—*—

At the request of the senate banking committee, Chester Bowles is drawing up an amendment to the price control act to give OPA power to control prices in beauty parlors. "I think the public is entitled to this protection," announces the OPA chief.

—*—

Woman, lovely woman, is more important to war morale than fresh vegetables, pork products, canned fruit juices and recapped tires. What man will oppose a ceiling on anything that contributes to her beauty?

—*—

Those eyes, those lips, those cheeks are essential to victory. Never let it be said that America lost a battle because of snapshots showing the fighting men that their wives, sisters and sweethearts have found facials too prohibitive.

—*—

America's beauty resources are second to none. We lead the world in mascara reserves. We have a bumper crop of rouge and rinses every year. There is enough beauty to go around, if the prices are controlled.

We look for OPA beauty ceilings any day now:

Facials (round and chubby)	**$0.60**
Facials (long and thin)	**.65**
Facials (extra dry)	**.75**
Rinses (dressed)	**.50**
Permanents (feathers off)	**.80**

—*—

To trifle with the famous poets;
My Daphne's hair is twisted gold,
Bright stars apiece her eyes do hold;
My Daphne's brow enthrones the Graces—
Thanks to a ceiling on such faces!

On Daphne's cheeks grow rose and cherry,
On Daphne's lips a sweeter berry;
My Daphne is a thing of beauty—
For OPA has done its duty!

—*—

There is a garden in her face,
Where roses and white lilies grow;
A heavenly Paradise is that place
Wherein all pleasant fruits do flow;
There cherries grow which none can try—
If Chester Bowles decrees "Too high!"

* * *

THE FIREMAN AND THE EXTRA JOB

A member of a big city fire department, found to be working in a factory on the side, has been dismissed from the department. He thinks it unfair, insisting that there is nothing wrong in a fireman working somewhere else when not on his shift at the firehouse.

—*—

He thinks it strictly proper for a fireman to change quickly from uniform to shop clothes and—presto! —appear in a factory with his thoughts completely detached from things burning.

—*—

There would be times when, high on an extension ladder during a big fire he would quit for lunch sharply at noon.

—*—

And other times when busily at work on a production line he would drop everything and start yelling for his rubber boots, at the sound of a firebell.

—*—

The fireman says he took a side job in a factory to help win the war. And he says he has a letter from Washington praising him for such patriotism. Whether Washington favors the idea of all firemen bustling from their shifts at the hose companies to join the night force at the war factory has not been stated. But if so we hope the administration won't encourage the police to be similarly patriotic.

—*—

It's nice to know that when you want a cop you won't be told he will come over when the shop closes.

—*—

The fireman says that he has had numerous offers for his services from factories at much higher pay than fire departments pay. We trust this will not be carried too far. Even a war plant owner may find his house on fire sometime. And it will annoy him to discover that the fire department has closed down because of the trouble keeping the help.

* * *

Vanishing Americanisms

1.—I can get you anything you want.
2.—Let's have the car completely overhauled.
3.—Waiter, a planked steak for four!
4.—Do you think the Democrats will ever get in office?
5.—The boss is a swell guy; I wanna see him get along.
6.—Get in early, work hard, never mind the clock and you'll succeed in life.

Serving Both Sides of Main Street

One of CLARION'S major plans after the war will be to serve towns, smaller cities and farms with radios best suited to the real America through which runs Main Street—the world's greatest thoroughfare.

In every locality there will be CLARION dealers displaying the red-coated figure which since 1922 has been the symbol of good radios.

Whether battery sets for those who have no power line facilities, or combinations of modern design, or in between, CLARION will be completely prepared to meet your peace-time needs.

CLARION'S work for the armed forces has developed its engineering and designing facilities to the highest point in its history. We are in an ideal position to serve you radio buyers more efficiently and with finer products than ever before.

Watch for the CLARION sign when radios are again available.

KLEMME LOCALS

Mrs. Blau and child moved into the Schwichtenberg house in East Klemme last Wednesday where they expect to reside for the duration. Mr. Blau was home on a furlough last week.

Elaine Neuberger and La Nelle Harvey spent last Thursday night in the country with Mr. and Mrs. Clarence Lemke. The little girls learned a lot about farm life during their short stay in the country.

"Bill" Johnson is doing a lot of remodeling on the house on East Main street which he purchased from Quentin Stille. Interior improvement are being made and the outside will be covered with asbestos shingles.

Mrs. A. J. Kudje, Mrs. Godfrey Greene and Mrs. Stuart Heivilin visited with their sister Mrs. O. D. Potter at Mason City, Monday. Mr. Potters father of Chicago Illinois, passed away and was buried at Mason City Thursday.

Dr. T. S. Bassett, of Sioux City, Iowa, spoke and illustrated his talk with colored pictures at the Methodist Church last Sunday evening. Dr. Bassett is visiting a few days at the parsonage home of Rev. and Mrs. H. E. Harvey.

Mr. and Mrs. Clair West and son Peter, of Des Moines came Saturday evening for a week end visit at the Sumner Trumbell home. Rosemary and Peter are now staying with Grandpa and Grandma Trumbell.

Mrs. Lena Schroeder left last Thursday for Waukesha, Wisconsin for a visit at the home of her son-in-law and daughter, Mr. and Mrs. Cleo Ingle and family. She returned to Klemme Monday and was accompanied home by her grandson, Billy Ingle.

Thursday evening, Mr. and Mrs. A. J. Kudje and family, and her sister, Mrs. Godfrey Greene of San Bernardino, Joe Johnson, Mr. and Mrs. Stuart Heivilin and family and Mr. and Mrs. Dwight Hummel, Jo Ann and Janice took well filled baskets to Art Johnsons for supper.

Rev. and Mrs. Cal. Grosshuesch left last week Thursday for Plymouth, Wisconsin for their vacation while the church is being decorated. Rev. Grosshuesch's parents will return to Klemme with them and will make their home at the parsonage, which was remodeled some time ago.

Mrs. Robt Risser and son, Bobbie, returned to Klemme from Clear Lake Friday evening, where they had spent since last week Tuesday vacationing at the Lake Shore Hotel. Bobbie hooked and landed a nice pike while fishing off the dock one day and so now he is a qualified Nimrod.

Sunday dinner guests at the home of Mr. and Mrs. Clarence Johnson at Renwick were: Mrs. Godfrey Greene of San Bernardino, Calif, Joe Johnson, Arthur Johnson, Mr. and Mrs. A. J. Kudje and family, Mr. and Mrs. Stuart Heivilin and family, Mr. and Mrs. Dwight Hummel, JoAnn and Janice..

Farmers are advised that the closing date for making application for the March and April Dairy Feed Adjustment Payment is June 30th. Applications may be made by mail and should be accompanied by the cream check stubs showing the butterfat sales for those months as evidence. They should be mailed to the Hancock County AAA Office at Garner.

Mrs Godfrey and son Brian, and Terry Koerner left last Thursday for Dow City for a visit with relatives. On Saturday Terry fell off a swing and fractured his arm above the wrist. His parents, Mr. and Mrs. Gerald Koerner, drove down Saturday evening and brought him home Sunday. Terry seems to be getting along fine since his accident.

The Misses Novella Bredbenner and Thelma Chambers left Tuesday night to attend the national Kappa Phi convention at Baldwin City, Kansas. Kappa Phi is a college organization for Methodist girls. Novella was a member of Kappa Phi at Iowa State Teachers College at Cedar Falls, and Thelma belonged to Kappa Phi at Iowa State College at Ames. This is the second national Kappa Phi convention that the two girls have attended together. Several years ago they were at East Northfield, Massachusetts.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Several rooms at the Methodist parsonage were re-papered Monday.

Iowa had 100 degree temperatures Sunday and Monday, so hot summer weather is really here.

Miss Gladys Schlicting went to Mason City Monday where she will be employed.

Mrs. Clifford Montgomery and children were Mason City visitors Friday.

Miss Wilma Swalve of Omaha, Nebraska came Monday afternoon for a visit with her parents, Mr. and Mrs. John Swalve and family.

Mrs. Frances Swalve had her house repainted the past week. J. E. Stille completed the work Tuesday.

Mrs. Frances Swalve and Mrs. Frank Sandry spent Monday evening visiting with Mrs. Bertha Schlei.

The Red Cross will not meet next week, Tuesday July 4th to sew, but will meet as usual at the school house the following week.

Gilbert Kropp and Mr. and Mrs. Wm. Schlichting spent Sunday afternoon visiting at the Fred Schlichting home.

Mr. and Mrs. John Ward and two sons of Elliot, Iowa, came last Wednesday and visited until Thursday at the Frank Ward home.

Mr. and Mrs. A. L. Kingery went to Greene, Iowa, Saturday to attend a family re-union which was held there Sunday.

Mrs. John Terhufen is now comfortably settled in her home to which she moved to, in the southeast part of town.

Janice Carpenter returned home from Des Moines last week where she visited at the home of Rev and Mrs. Herlein.

Mr. and Mrs. Henry Ludeke and son, Paul are visiting with relatives in Wisconsin this week, as Paul expects to leave soon for the Navy.

Glen Nagel of Berkeley, Cal, came Sunday to spend several weeks in Klemme at the Fred Nagel and Henry Jost homes. He is a grandson of Mr. Nagel.

Mr. and Mrs. Henry Lewis drove to Grundy Center Sunday. Mrs. Ernest Lewis who had been there visiting with her mother, Mrs. Franz, returned home with them.

Mrs. John Rapp returned home Wednesday from the Park Hospital at Mason City where she had been for three weeks receiving treatment.

Mrs. Herman Beek and son Donald of Davenport, were dinner guests Friday at the W. F. Pavey home. They are now visiting with relatives around Ventura.

Martha, daughter of Mr. and Mrs. C. E. Elder of Ames, came last week for a visit with her grandparents, Mr. and Mrs. Ralph W. Elder.

Crops around Klemme have made rapid growth the past week and a lot of corn fields have reached the "knee-high" stage. Many fields of oats are well headed out and are looking good.

Mrs. Edna Thada, Mrs. Frank Sandry, Mrs. Wm. Greiman, Mrs. Herman Bridges and Mrs. Frances Swalve spent from last Thursday until Saturday noon at a cottage at Clear Lake enjoying an outing.

Mrs. August Ridder and son, Walter of near Forest City were dinner guests Sunday at the home of Mr. and Mrs. Frank Ward. Mr. and Mrs. Ben Ridder were visitors at the Ward home in the afternoon.

Mrs. W. E. Winterode of South Gate, Cal.; Mrs. Chas. L. Mason of Bakersfield, Cal., and Miss Wanda Mace of Springfield, Mo., came Monday and visited until Wednesday at the home of their sister-in-law, Mrs. Max Mace of near Klemme.

Major Francis Byrnes and wife of Dayton, Ohio, came Monday and visited until this Wednesday at the parental Ira Overholt home.

Mrs. Henry Yahnke of Garden City, Minnesota, visited Monday in Klemme at the Henry Lewis home. She is a sister of Henry, Verner and Ernest Lewis, all of Klemme.

Mrs. Clarence Bredlow and six children of Glen Flora, Wisconsin, visited at the Benn Coobs home Saturday and Sunday. They went from here to Hayfield for a visit with relatives.

Pvt. Melvin Coobs left last week Wednesday evening for Des Moines for a short visit with his cousin, Cadet Nurse Luella Lewis. From there he returned to his camp at San Luis Obispo, Cal.

The Reformed Church is being redecorated and there will be no services there this week. All of the interior including auditorium, sideroom, halls and basement are being re-finished.

Francis Pearson, of Brigham City, Utah, is enjoying a short furlough visiting with home folks. He accompanied some patients from Brigham City to Michigan. Mrs. Pearson is also here with her husband visiting relatives.

Mr and Mrs. Dwight Hummel Jo Ann and Janice, Mr. and Mrs. A. J Kudje, Mrs Godfrey Greene, Joe Johnson, Mr and Mrs Stuart Heivilin and family, and Arthur Johnson were dinner guests Tuesday evening in the John Johnson home

Mr. and Mrs. P. M. Wilson and Mrs. Robt. Risser and Bobbie were dinner guests Sunday evening at the E J. Schneider home.

Mrs. Frank Gruetzmacher and daughter, Miss Glenna, moved to Klemme last Wednesday and are living in their apartment in the Gruetzmacher building on Main Street.

Billy, little son of Mr. and Mrs. W. Henry Galbreth of Des Moines, underwent a serious operation at a Des Moines hospital last Wednesday. Reports we received Saturday was that Billy was getting along fine now.

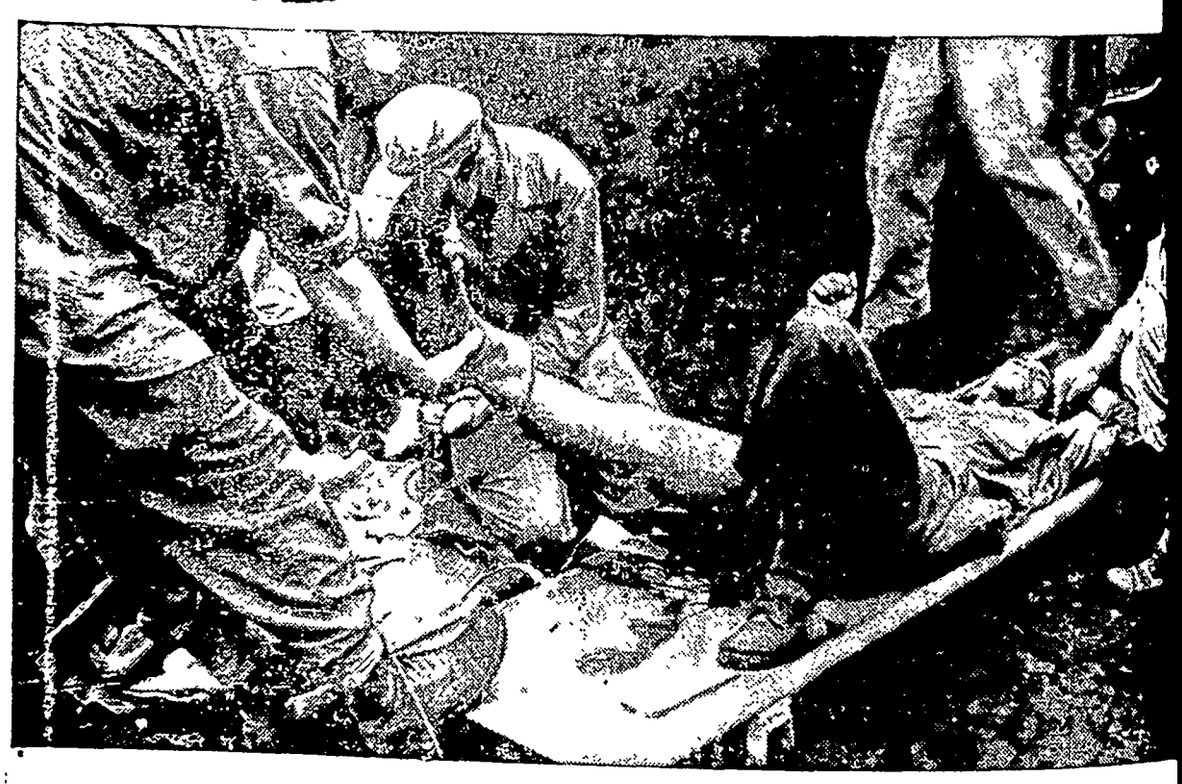
His patriotism is written in

BLOOD—



Yours is written on *every* Bond you buy in the 5TH WAR LOAN!

THE stepping stones to victory are red with blood of American heroes. Tarawa . . . Salerno . . . Cassino. Their patriotism is written in blood.

Your patriotism is written on every Bond you buy in this vital 5th War Loan. Your name on a War Bond means you're behind our invasion troops.

Help hasten the day of Victory by investing in *extra* War Bonds now. Invest in *more* than you've ever purchased before. Invest $100, $200, $300, $400. Those who can, must invest *thousands* of dollars.

For this is the biggest job we've ever had to do. We *can't* fail our fighting men as they plunge into the biggest and bloodiest struggle of all.

WELCOME THE VICTORY VOLUNTEERS when they call to tell you about War Bonds

BONDS FOR BABIES AND CHILDREN UNDER SIX

Approximately 800 babies have been born in Hancock County during the past five years. Each of these children under six years of age is eligable to have his or her name on the United States Cradle Roll of Honor. In addition he will be presented with an attractive United States Treasury Certificate, designed by Walt Disney, if someone will buy a War Bond in the child's name.

Many mothers, fathers, grandmothers, grandfathers, aunts, uncles, and friends are buying Bonds in the names of children.

Through the efforts of the Hancock County Home Project Committee letters with information in regard to these Bonds are being mailed to as many parents as possible in Hancock County.

Anyone interested in obtaining this information should contact Miss Hazel Grimes at Garner.

CALENDAR OF EVENTS

HANCOCK FARMS CHANGE OWNERS

The Equitable Life Assurance Society recently deeded a 120-acre farm in Orthel township to Fred Seefeld. Consideration was listed at $20,300.

Julius Kutz, administrator of the Anna Dysart estate recently deeded the north half of Sec. 28 in Orthel township to Frank W Senneff and Malah N. Koons, consideration listed at $27,200, and a 200-acre tract in Sec. 29 to B. J. Johansen with consideration listed at $25,000.

HALF SECTION HANCOCK FARM SELLS AT $40,000

Virgil J. Haggard recently purchased a 320 acre farm from the Central Life Assurance Society. The farm in sec 33 in Magor township is well improved. Purchase price was reported at $40,000.

KINGERY CLAN HONORS

Greene—at the annual reunion of the Kingery family at the Dick Ray home at Greene, 112 persons were present. Eighteen members of the family in the armed forces were remembered. A tribute was paid to Merle Kingery, who died in service. Officers elected include: President, Mrs. Wiliam Lovell; vice president, Mrs. Paul Flora; and sec treasurer, Mrs. Merle Stevenson.

Mr. and Mrs. A. L. Kingery of Klemme attended the above reunion.

Pvt. Alen Barz of Madison, Wisconsin, came Saturday to spend a short furlough visiting with his mother, Mrs. Clara Barz and family.

CARD OF THANKS

We wish to take this means of thanking our neighbors, friends relatives for their help given us during the illness of our husband and father, and for the flowers and other expressions of sympathy contributed in his memory.

Mrs. F. W. Langlitz and family.

WE DID IT AGAIN!

KLEMME OVER THE TOP IN PURCHASE OF WAR BONDS

An incomplete check-up Monday indicated that the town of Klemme had gone over the top in the purchase of 5th War Loan Bonds. Klemme's quota was $25,000 and this amount had already been exceeded by several thousand dollars.

THEY DIED TO MAKE THEM FREE

Army Signal Corps Photo

This poignant picture made by an Army Signal Corps photographer shows a kneeling Roman mother and her child gently and reverently placing flowers over the still forms of two American boys who paid the supreme price to liberate them from the Nazi and Fascist grip. Look at their faces and you will see that both mother and child realize that these Americans died for them. Remember this picture when you are asked to buy an extra War Bond during the Fifth War Loan.

U. S. Treasury Department

Mr. And Mrs. Ernest Helps Observed Wedding Anniversary

MR. AND MRS. ERNEST HELPS SURPRISED ON ANNIVERSARY

some fifty neighbors and friends

On Tuesday evening, June 27th, gathered at the home of Mr and Mrs Ernest Helps to surprise them on their twentieth wedding anniversary, which was on the following day.

A social evening was enjoyed after which a nice lunch was served by the self-invited guests.

Mr. and Mrs Helps were presented with a gift of money in remembrance of the occasion.

Relatives present were Mrs. Helps' brother-in-law and sister, Mr and Mrs. Ted Dutheridge.

Klemme People Attend Dinner At Mason City Sunday

Dr and Mrs. C. B Tice of Mason City, entertained a number of relatives at a picnic dinner Sunday in honor of their son, Lt. (j.g) George Tice and family who are leaving for San Diego, California.

Those present from Klemme were Mr and Mrs. E. J. Arnold and Evelyn; Miss Eloise Etchen; Mrs C A Arnold; Mr and Mrs. F A Arnold; Mr and Mrs. Fred J Arnold and Bobbie; Mrs Ella Schneider of Centerville; Dr and Mrs. Arnold Tice and daughter of Rochester, Minn.

LEGION AND AUXILIARY POSTPONE MEETING TO JULY 11

As the regular meeting of the Klemme American Legion and Auxiliary came on the Fourth, the meeting has been postponed to July 11th

Mr and Mrs Jake Hess and Mr. and Mrs Albert Etchen are on the serving committee

WILL AID WOUNDED—Cpl. Morris J. Ahrenkiel, who just completed a special medical course at Louisville, Ky., will leave for overseas to care for wounded taken by planes to hospitals. He recently visited his grandmother, Mrs. John Ahrenkiel, at Goodell. His furlough was cancelled and he was ordered to return to Louisville immediately.

HOME NEAR KANAWHA SCENE OF MARRIAGE

Miss Dorothy Pauline Hartwig, daughter of Mr. and Mrs. Oscar Hartwig of Kanawha, and Walter G Greiman son of Mr. and Mrs. Ben F. Greiman of Garner, were married in the home of her parents west of Kanawha June 28, by the Rev. J. F. Moore, pastor of the Kanawha Methodist church. The Lohengrin wedding march was played by Mrs. H. C. Struck.

Attendants were Miss Rachel Kingland of Forest City and Harold Swalve of Klemme. Immediately following the ceremony a buffet luncheon was served.

The bride was graduated from the Corwith high school and attended the Hamilton School of Commerce at Mason City. She has been employed at the Hardware Mutual Company at Minneapolis.

The bridegroom was graduated from the Klemme high school with the class of 1941, and is now awaiting his call to the navy.

FIRE DEPARTMENT CALLED TO KARSJENS HOME SUNDAY

The fire department answered a call to the Martin Karsjens home in the north part of town late Sunday afternoon when a bolt of lightning struck and burned out the light meter.

Evidence showed that the lightning had hit a cross arm on a nearby electric line and followed the wires into the house. No other damage was done at the Karsjens home, however, several radios in north part of town were damaged and fuses blown out in nearby houses. The north part of town was out of electric service following the lightning bolt.

STUDIES ANTI-AIRCRAFT—T. Sgt. Edmond J. Blanchet, son of Mr. and Mrs. Eugene Blanchet of Klemme, has been stationed in the anti-aircraft division at Camp Hulen, Texas. A brother, Joe, was killed in action in Italy May 23.

County Conventions Held At Garner By Both Parties

REPUBLICAN CONVENTION HELD FRIDAY AT GARNER

The following resolutions were adopted at the county Republican Convention held at the Garner high school Friday morning:

We the delegates of the Republican Party of Hancock County, in Convention assembled on this 30th day of June, 1944 in Garner, Hancock County, Iowa, do hereby resolve that we pledge our united support to the National Government and to the State Government and especially pledge our united support to the war effort to the end, that allied arms may win an early victory and may make a just and lasting peace.

We deprecate the unauthorized and arbitrary assumption of authority by persons, boards and Bureaus in high Federal positions and hold he belief and opinion that the rank and file of the people of this state and Nation should have a voice in the form and manner of our Government. We protest against Dictatorships either at home or abroad.

We hold the belief, founded on years of observation, that the Republican Party is the party of common people and is best qualified to conduct the affairs of the State and National in the interest of all people. Leadership of the Republican Party is at the highest order of statesmanship and patriotism and has our unqualified support.

The committee unanimously endorse the action of the Chicago Convention in all of its action and pledge our united support to the end that a true Democracy shall survive.

We further resolve that as a committee we shall further any action possible to elect as this year's election Thos. E. Dewey and John W. Bricker President and Vice President of these United States.

We further endorse a sound Agricultural program to the end that Agriculture shall never be subsidized and shall be rewarded in proportion to its true contribution to our American way of life.

The delegates to the State Convention at Des Moines, Iowa on July 14, 1944 are:

Alfred Boman, Elmer Hass, Chris Gillstrap, Geo Th. Gordes, Penn Eckels, Ole Peterson, Mrs. R. E. Disselhorst, Frank Schoun, Fred Missal, Mrs. Luella Boehnke, John Chambers, Mrs. R. A. Jorgenson, Emil Blumer, C. J. Smith, Christyne Callison, Lewis Larson, Geo. Oxley, Omar Maland, Mrs Clara Fosen, A. G. Ruka, Virgil Cook, Mrs. Mildred Robbins, Mrs. Chris Gillstrap.

County Central Committee officers elected were:

Fred C. Missal, Chairman, Mrs. Ray Jorgenson, vice chairman, Fern Peck Katter, Secretary, Roy L. McMillin, Treasurer.

Delegates to State Judicial Convention at Des Moines, Iowa July 26, 1944 are:

Pete Juhl, Frank Senneff, Henry Meyer, Henry Bode, L. C. Beaumont, Louise Beyer, Mrs. John Hammill, H. T. Rose, Fred Arnold, Elmer Hanson, Tillie Gelner, Owen Conwell, Emil Elling, Zora Merten, Mrs W. S. Pritchard, W. S. Pritchard, Charlie Murr, Mrs. R. R. Roberts, Mrs. C. A. Arnold, Mrs. Oma Jacobs, Ira Overholt, Mrs. Orpha Burnquist Dr. E. M. Christensen.

Delegates to 16th Judicial Convention at Mason City, Iowa, July 13, 1944 are:

Henry Bode, Frank W. Senneff, Henry Meyer, L. C. Beaumont, Miss Louise Beyer, Fred C. Missal, R. A. Jorgenson, Ray Roberts, Mrs. W. G. Williams, Frank Schoun, Mrs. Henry Myhr, Mrs. S. B. Durant, Dr. C. O. Brewster, Ira Overholt.

EASY CHOICE

At a gathering one evening J. B. Priestly, the English novelist, was introduced to a young writer who announced proudly that the newspapers had just voted him the handsomest poet in London.

"I voted for you, too" replied Priestley.

"But you never saw me before tonight!"

"That's right," said Priestley, "but I'd seen all the others."

E. J. THOMPSON, KLEMME IS DEMOCRATIC CHAIRMAN

Minutes of the meeting of the County Central Committee of the Democratic Party in the Court Room at Garner, Iowa, Fri. June 30, 1944.

Meeting called to order by E. J. Thompson, Chairman. A committee to nominate delegates to the state conventions was appointed by the Chairman, who selected A. C. Taylor, C. E. Proctor and E. J. Thompson.

The committee reported the following names which were duly elected by the members present.

To State Convention:

E. J. Thompson; Ben V. Greiman; J. M. Townsend; Mrs. Beula Ruka; F. C. Beshe; Mrs. Lucy Schleusner; Ed Green; Mrs. Irma Tindall; Herman Paul; Alfred Josten; Mrs Thelma Stille; and O. E. Johnson.

To State Judicial Convention:

B. C. Berge; Tillie Evans; Don Roe; Elle Mae Foster; Bill Habercamp; A. C. Taylor; W E Puffer; Maud Brugmann; A. E. Ludeke; Ray Bonstetter and Jack Dethmers.

A Committee of F. E. Beshey; C. E. Proctor and B. C. Berge were appointed on the resolutions committee by the Chairman

The Committee reported the following resolutions.

1st - Resolved that we sincerely and ernestly recommend the nomination of Franklin D. Roosevelt for a fourth term as President of the United States.

2nd - That we believe a Presidents term of office should be measured by his accomplishments, and like senators and congressmen, be re-elected by the people for whom they serve, regardless of precedent.

3rd - That we have the utmost confidence in President Roosevelt's leadership in the present world war.

Be it further resolved - That we are proud of native son, Henry Wallace, as Vice President of the United States. We are proud of him as the best Secretary of Agriculture our country has ever known. We are proud of him as a statesman, we are proud of him as a scholar and student of world affairs, and we endorse him for a second term.

Be it further resolved - That we endorse the candidacy of Senior United States Senators, Guy M. Gillette, and feel that his experience and qualifications demand that he be retained in the United States Senate, where we know he will continue much to the drafting of a sound peace as a member of the Foreign Relation's Committee, and we pledge our every effort to secure his reelection.

Be it further resolved - That whereas the Democratic voters of the State of Iowa, have selected our distinguished citizen Senator Oscar E. Johnson of Kanawha as their candidate for Lieutenant Governor of the State of Iowa, that we pledge to him our full and undivided support in the coming election.

Officers of th Hancock County Democratic Central Committee, elected for a two year's term are as follows:

E. J. Thompson, Klemme, Iowa; Chairman; Mrs. Ella Mae Foster, Britt; Vice Chairman; Mr. Herman Paul, Klemme; Secretary; Mr. Fred Knutson, Kanawha; Treasurer.

Mrs. Eddy Medaus returned last week from the University hospital at Iowa City where she went for treatment.

HELLO, FOLKS!

Mr. and Mrs. Ed. Christians who reside on their farm 3½ miles east of Klemme, are the parents of a 9½ pound baby boy born to them on Tuesday morning, July 4th.

Instead of pasing out cigars, Ed. should give out fire-crackers and Roman candles. The little fellow should have no trouble in remembering his birthday.

Vegetable Preparation and Processing
(See Directions Below)

-grown vegetables are be- to push their way out of the soil in your own Victory gardens. Perhaps, at first, you will be so delighted that you will want them all for the table, but soon will come the realiza-

t you can "put up" most of oints for next winter if you m now.

use pressure cookers are un- d this year, most homemak- ll use them for processing bles. That is all to the good, use of the pressure cooker- wn processing time, and in- more success in canning if y used.

Non-Acid Vegetables.

re getting into the fundamen- canning, we must understand ference between acid and non- egetables. Tomatoes are in d group, but the others, green corn, peas, etc., are all non- nd require processing under re so that they will keep.

Fresh Vegetables.

tion of the vegetable for can- one of the important steps. ill be much more careful of egetables you put up, if you ber these two points:

ou get out of your can only ou put into it, i. e., if you can , withered ear of corn, then what you'll have when you he jar.

anning, at best, does not im- your food; it only preserves

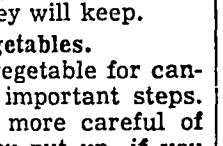
Save Used Fats!

Short Route to Jar.

her old maxim that comes in during canning time is the hich goes, "two hours from to can." That means that ick the vegetables from your and start canning immedi-

ou buy vegetables, get to the t early, and select those that in fresh in the morning. Take home and get them started on way to the jar as fast as pos-

dentally, if you are using your Victory garden as a supply for canning tables, be o pick them e morning the morn- ew is still em. Picking later in the after the sun has dried out of their natural moisture, will ive nearly as good results.



Preparation Required.

t's a good idea to wash jars in hot soapy suds and check for nicks and cracks. All ng equipment may be prepared ahead to have everything in ness when canning actually be-

Prepare vegetable as directed art above. In many cases pre- ng is recommended to shrink egetable and set the color.

Lynn Says:

re you perplexed as to how ny jars you should have for ning? How much will the etable make when "put up?" e are some guides:

sparagus—12 pounds yields 6 s "stalk," or 2 pints "cut."

eets—1 bushel makes 40 pint s, cut in thin slices.

orn—100 ears of Golden Ban- yields about 14 pints.

reens — 1 bushel spinach lds 13 pint jars.

andelion greens — 1 bushel lds 15 pint jars.

tring beans—1 bushel yields 17 0 quarts.

omatoes—1 bushel yields 16 to quarts.

3. As soon as vegetable is prepared, get into the jar as soon as possible, otherwise flat sour may develop.

Packing Vegetable.

4. Most vegetables are packed to within one-half inch of the top of the jar. Exceptions to this rule are corn, peas and lima beans.

5. Liquid in which vegetable was precooked may be added to the jar except in the case of strong liquids such as spinach and greens.

Before Processing.

6. Wipe top of jar before placing on lid. Use manufacturers' direction in this case, as all lids differ and your manufacturer knows what kind of tightening is necessary.

Save Used Fats!

Processing.

7. Process vegetable, using time table given above. In using the

pressure cooker, allow steam to escape for 7 to 10 minutes before closing petcock. Allow pressure gauge to come up to desired temperature before starting to count processing time. When processing time is over, remove cooker from range, then let pressure gauge come back to zero before opening.

Storage Tips.

8. Remove jars from cooker and lay on several thicknesses of cloth or paper. Do not tighten lid unless so directed by the manufacturer of the jar. Some jars should not be inverted. Here again, consult your individual directions.

9. Store in a cool, dark place. Make sure the jars are not in a draft.

Use of Vegetables.

Before tasting or using any home-canned vegetables, boil them in an open vessel for 10 minutes. This will kill any of the toxins which may have formed in the jars.

Non-dieting friends will like this:

Chocolate Chip Pie.

1 baked pie shell
1 tablespoon unflavored gelatin
¼ cup cold water
1½ cups milk
3 egg yolks
½ cup sugar
⅛ teaspoon salt
¼ teaspoon nutmeg
½ teaspoon vanilla
3 egg whites
3 tablespoons sugar

Soak gelatin in cold water. Scald milk. Add slowly to beaten egg yolks. Add ½ cup sugar, salt and nutmeg. Cook in double boiler over hot water, stirring constantly until mixture coats a spoon. Add soaked gelatin and vanilla. Chill until slightly thickened. Beat egg whites until stiff. Beat in remaining 3 tablespoons sugar. Fold in gelatin mixture. Pour into baked pie shell. Chill until firm. Sprinkle with chipped semi-sweet chocolate.

Lemon Meat Loaf.
(Serves 5 to 6)

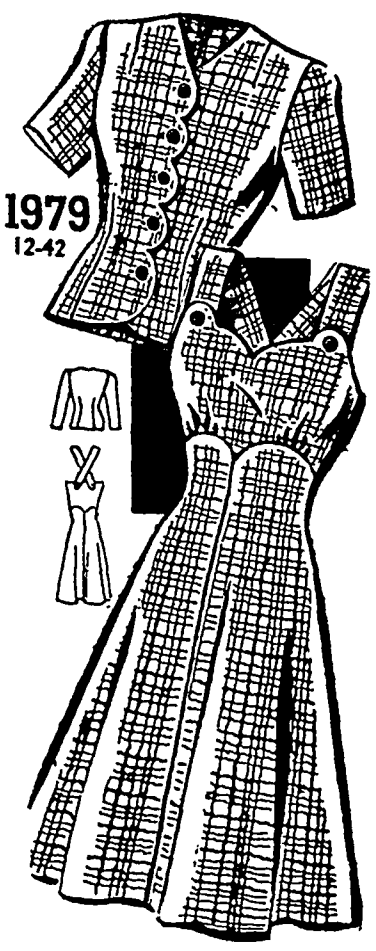
1½ pounds lean pork, ground
2 eggs, beaten
½ cup cracker crumbs
2 strips bacon
Juice and rind of 1 lemon
1 cup canned tomatoes
Salt and pepper to taste
½ cup milk

Combine the meat, eggs, cracker crumbs, seasonings and lemon juice and rind. Place in loaf pan and cover with tomatoes and strips of bacon. Bake covered in a slow (250-degree) oven for 2 hours. Remove cover and add milk and continue baking uncovered for ½ hour more.

If you wish more detailed instructions on vegetable canning, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Please don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

PATTERNS
SEWING CIRCLE



FOR being pretty while you work and completely comfortable try this buttoned-down-the-front dress with attractive yoke collar and bright bias-binding trim.

* * *

Barbara Bell Pattern No. 1974 is designed for sizes 14, 16, 18, 20; 40, 42, 44 and 46. Size 16 requires 3⅞ yards of 35 or 39-inch material.

Most Popular!

TOPS in popularity these days is the delightfully wearable and comfortable sun-back jumper dress with wonderfully molded waist and hip lines. To make as neat a suit as you've ever seen, just add the jacket!

* * *

Barbara Bell Pattern No. 1979 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14 requires 4⅛ yards of 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

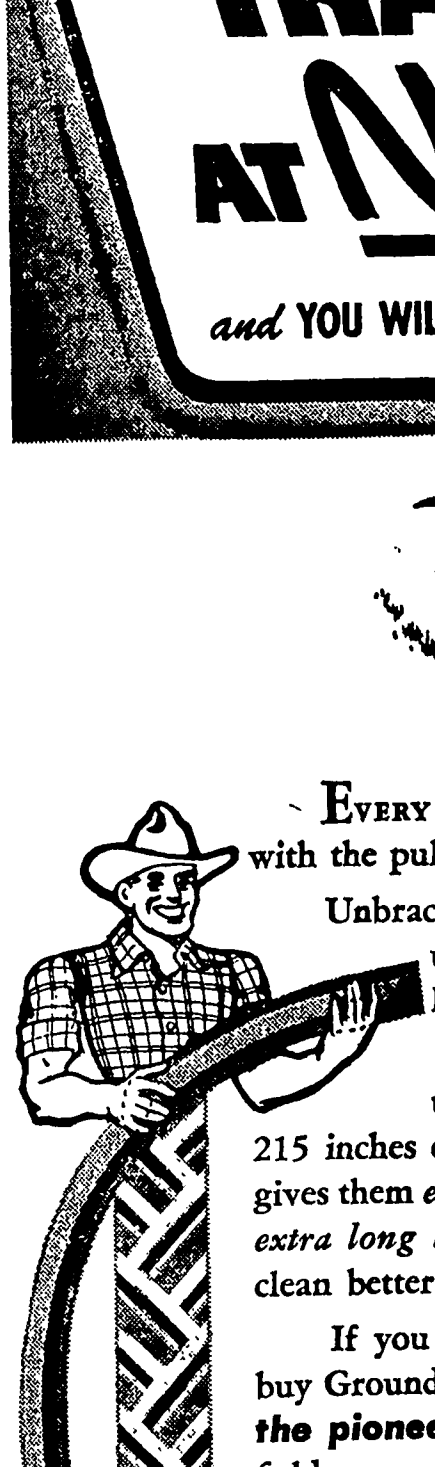
WAR-TIME BAKING MUST BE GOOD
Your choice of ingredients is now doubly important . . . Choose the best . . . Then, guard against waste and be sure of results with Clabber Girl Baking Powder—*Ask Mother, She Knows:* It's economical, too, this baking powder that has been a favorite in millions of homes for years and years.

Get TRIPLE BRACED TRACTION BARS AT No Extra Cost
and YOU WILL GET EXTRA TRACTION, BETTER CLEANING *and* LONGER LIFE, TOO!



EVERY FARMER KNOWS an unbraced corner fence post leans with the pull of the wire, weakening the entire fence.

Unbraced tread bars on tractor tires, likewise bend and weaken under heavy loads. They slip, lose traction, lose time and wear rapidly.

Traction bars on Firestone Ground Grip tires are triple-braced and have up to 215 inches of extra bar length per tractor. That gives them *extra strength, extra pulling power* and *extra long life.* And triple-braced traction bars clean better, too.

If you want tires that ***pull better longer*** buy Ground Grips — the tires made by Firestone, ***the pioneer and pacemaker*** in the farm tire field.

Listen to the Voice of Firestone with Richard Crooks and the Firestone Symphony Orchestra, under the direction of Howard Barlow, Monday evenings, over N. B. C.

A GREAT AMERICAN TICKET

(Editorial in Chicago Herald-American)

The Republican party has nominated a truly GREAT national ticket.

It has given the country the great hope and inspiration which naturally and inevitably attend such a ticket.

Governor Thomas E. Dewey of New York is a statesman of the widest experience and highest attainments.

He will rank with the great Americans of his time, on the strength of his past accomplishments.

He will rank with the great American Presidents of all time, if he is elected—as he surely should be, and as he WILL be if the free and enlightened expression of public opinion is registered at the November polls.

Governor John William Bricker of Ohio is an American civil servant and public administrator of unsurpassed experience and attainments.

He is already a great American in the esteemed recognition of his countrymen.

He will give prestige and authority to the office of Vice President which it has seldom had in the history of the nation.

The nominations of these two fine American statesmen, long held in the deepest affection and highest trust by the American people and now candidates for the gift of the American people refect superb credit upon the Republican party and its alert and loyal national convention.

They surely and completely reflect the clear wishes and the vital interests of the American people.

Governor Dewey and Governor Bricker unquestionably consitute the strongest ticket the Republican party or any representative American group, could select.

They are strong in experience.

They are strong in personal integrity.

They are strong in the enthusiasm they inspire.

They are strong in the confidence they create.

They are strong in their own sublime faith in the democratic institutions of America, in the wholesome and unerring history and traditions of America, in the glorious heritage of American freedom and opportunity.

They will bring back government REPRESENTATIVE of the people.

They wil restore government responsive and RESPONSIBLE to the people.

They will establish government that respects and honors and ADHERES to the Constitution of the United States.

They will reject and abhor bureaucratic tyranny.

They will despise and abstain from dictatorial and totalitarian aspiration to and usurpation of oppressive powers.

The American democratic system has been tried and PROVED in the nominations of Governor Dewey and Governor Bricker for President and Vise President.

The Republican party has given the nation more than a Rebublican ticket, more than a presidential ticket.

It has produced an AMERICAN TICKET to which all the American people can rally without considerations of politics or partisanship.

It offers America the quickest, safest way out of the dark and tragic ordeal of war.

It offers America the blessing of peace in which the sanctity of free home and family will be safeguarded.

It offers America a government under democratic American law, and not under the despotic edicts of willful and ambitious and power-grasping men.

The AMERICAN ticket of Dewey and Bricker can and must and Will be elected.

This is America's timely and glowing OPPORTUNITY to throw off the shackles of bureaucratic tyranny, the festering sores of which are already spreading infectious poisons throughout the whole governmental structure of the land

The American people will not miss providential chance—potentially and probably their very LAST chance—to be free again, and to assure freedom to those entitled to inherit the ree lands of their fathers.

HE GOT COLD TOO!

Near the end of the fortieth day Noah's Ark hit against the top of an electric light pole, which poked a hole in the bow Noah sent his pet dog down, and the dog, to stop the leak, poked his nose in the hole which is the reason that dogs' noses are always cold. But the dog soon became tired, so Mrs. Noah went down and put her foot in the hole, which is the reason women always have cold feet.

Finally, however, as the water kept coming in a little, Noah himself went down and sat on the hole which is the reason that men always stand with their backs to the fire.

I'LL GO

Four marines were playing bridge in a hut on Wake Island Suddenly another leatherneck burst into the room and shouted:

"The japs are landing a force of about 200 men down on the beach!"

The four bridge-playing marines looked at one another. Finally, one said, "I'll go, I'm dummy this hand."

AN ERROR

A negro visited a friend in jail.

"What they got you in heah for?"

"Dey's got me charged with indecent exposure."

"What in the debbil is dat?"

"Well, dis am de way it happened. Ah went to a house to answer a ad what say day want a butler De lady comes to de doah and Ah tells her who Ah is an what Ah wants. Denshe axe me do Ah keeps my se'f clean all de time, an Ah told her Ah shore did. Nen she axed to see mah shirt cuffs an mah hands. Ah showed 'em to her Nex she axed to see mah ears an' Ah showed her. Nen she ast to see mah credentials an' right there is where Ah made mah big mistake."

BETTER IOWA GARDENS

Strawberry season is over Where plants have borne two or more crops and a new bed was planted in 1943 or 1944, plow up the old bed.

* * *

Any strawberry patch that produced this year for the first time should be renovater. If the foliage is badly covered with leaf spot and the leaf roller is folding many of othe leaves, mow the foliage, rake it off the patch and burn it. Mowing should be high so as not to injure the crowns of the plants.

* * *

If ifolage is fairly healthy, however, do not mow the patch, but cut down the width of the rows to 1 foot. In a small patch this can be done with a sharp hoe. In a larger patch, use a plow. Immediately after plowing pull the dirt back. filling the furrow. Thin the plants in the row with a hoe. Strawberries produce best when the plants are about 6 inches apart. Keep the rows well cultivated for the rest of the season. Don't ever let them make a solid patch.

* * *

The old bed should be renovated immediately after berry picking is finished if it is to produce a good crop next year. A month's delay will greatly retard development of new plants and reduces next year's crop. Don't start a new strawberry bed now. Wait until next spring.

* * *

Raspberries are starting to ripen. It is to late to do any further spraying this season, especially for anthracnose control. But you can remove all the old fruiting canes and burn them as soon as the picking season is over. Leave the new shoots. They will produce next year's crop.

* * *

The winter apple crop is mostly light again this year. The crop of summer and fall apples is better, however. It now looks as if it would pay to can more summer and fall apples to take the place of high priced winter apples.

* * *

Many gardeners spray calendars mention a bordeaux spray and a formula such as 2-3-50 or 4-6-50. Many people do not know what such a formula means. Here's the answer. The "2" stands for 2 lbs., of copper sulfate or blue stone, the "3" refers to pounds of hydrated lime, and the 50 applies to gallons of water Bordeaux is mixed more quickly if powered rather than the crystal form of copper sulfate is used. It dissolves more rapidly in water. Always dissolve the copper sulfate in a glass, wooden or earthenware container, as iron will corrode quickly.

IDEAL SEASON TO SPRAY BAD WEEDS

Excessive Growth Is Making Chance of Killing Them Very Good

Growth of extensive leaf surfaces of such noxious weeds as Canada thistle, bindweed or creeping jenny and leafy spurage as a result of Iowa's cool, wet spring weather places those weeds in ideal condition for spraying with chemicals

E. P Sylwester, extension botanist at Iowa State College, advises spraying for small patches of weeds only. Spraying should be done as the plants are coming into bloom, and preferably in the evening during cool, humid weather. Never spray just before or during a rain or during hot, dry periods.

Cover Thoroughly

Dissolve the chemical at the rate of 1 pound to a gallon of water, and apply with a pressure sprayer until the plants are dripping wet From 2 to 3 gallons per square rod customarily does the job, depending upon foliage density Second and third applications, usually necessary to kill out a weed patch, are made when the regrowth is from 4 to 6 inches high.

The operator should have his back to the wind while spraying and work away from sprayed areas the botanist advises. All livestock should be fenced out and the area left undisturbed until after at least one heavy rain. To elimate a fire hazard, clothes worn during spraying, including rubber boots, should be thoroughly rinsed in clean water before wearing them again. All equipment likewise should be thoroughly rinsed in clean water, dried and flushed with kerosene or wiped with an oily rag to prevent corrosion. "Open head" sprayers are easy to clean out. Clean sprayers thoroughly of oils and chlorates before using on other plants.

Order Chemicals

The entire season's supply of weed-killing chemicals should be ordered at one time. To do a good eradication job, from 4 to 5 pounds per square rod is the estimated requirement for the season. When measuring to determine the amount needed, the farmer should go at least 3 feet beyond the edges of the visible patch. Iowa's allotment of more than a million pounds should be sufficient to meet the need, Sylwester says.

We want your news. Phone 12.

FARMING PROVE VALUE

Farmers in Iowa's 43 soil conservation districts report that terraces demonstrated their worth duiding the recent rains and floods. Lime, fertilizer, seed and topsoil were held on sloping fields, in contrast with heavy washing on uprotected hillsides farmed in the up-and-down-hill style.

Frank H. Mendell, state head of the Soil Conservation Service, says that the farmers who terraced and contour-farmed their land had all of their topsoil after the deluges, while many of their neighbors lost as much as 2 inches from sloping fields.

Reports from soil conservation districts showing the value of terraces follow:

E. S Lloyd, Mahaska County, said that his newly terraced land that he planted to corn showed practically no erosion and no silting in the terrace channels.

Earl Hall, Jefferson County, reported that his terraced and contoured fields showed little evidence of erosion. In contrast with his fields were those of a neighbor and have been worked up and down hill. As a result much silt from the neighbor's unprotected field piled up in a lane leading to Hall's place.

In Wappello County terraced fields on the Johnson Brothers, the A. C Rose farm and many others showed no sign of erosion between or below the terraces. Land having similar slopes farmed up and down hill lost considerable topsoil. County extension directors and soil conservation district technicians assist farmers in planning terracing systems and in checking their construction.

Formerly an operation that called for heavy or special equipment, terrace construction now is done mainly by farmers themselves with ordinary farm equipment, tractors and plows.

Montgomery County led the state in terrace contruction, farmers in that county built a total of 103 miles of terraces.

Farmers in the state built a total of 488 miles of protective terraces in 1944, most of them with a moldboard plow.

KOLUMN KOMMENTS

Wheat should be ground or cracked when it is hand-fed to hogs or used in mixtures. When it is self-fed alone, less will be gained by grinding. But even for self-feeding, if the cost of grinding is not more than 5 percent of the cost of the wheat, it is advisable to crack and grind wheat rather than feed it whole.

To produce high quality eggs, provide plenty of clean nests: remove male birds from flock; gather eggs frequently; cool to 50 degrees as soon as possible. And sell eggs twice a week, if it can be arranged, to a buyer who is careful to maintain quality.

The importance of the job should be impressed on an inexperienced worker. To show him how a certain thing is done, get the worker in the correct position to see the job done as he will do it. Every means at hand should be used to bring out the important steps and points of the job. Tell, show, illustrate and give reasons for doing; make each step and each point stand out clearly. Do the job slowly, and put it over in small doses one step at a time. It may be necessary on some jobs to repeat the entire operation. Make the new worker feel at ease.

Sudan grass is an excellent emergency pasture and hay crop. It may be seeded now or later, even in July if there is enough moisture. But remberer, it takes between 6 weeks and 2 months from the time of seeding until it is ready for pasture. It should be seeded at the rate of 15 to 25 pounds per acre on a seedbed prepared as for corn.

In deciding how many sows to breed for fall farrow, it would seem advisable for the efficient hog producer to go ahead and breed enough. The number we actually keep can be culled down to what we want in July or August if the feed situation isn't favorable. It is better to have a few extras bred than to be short.

Buy another War Bond today.

Mr. and Mrs. Kenneth Schuldt, Mr. and Mrs. E. H. Patet joined other relatives for a picnic dinner at Clear Lake July 4th.

COUNCIL PROCEEDINGS

REGULAR MEETING, MAY 8th, 1944

Meeting called to order by Mayor Stille, with Thomas, Thompson, Priebe, and Kluckhohn members of the Council present.

Minutes of the previous meeting were read and approved.

On motion the following bills were allowed

First Nat'l Bank-Klemme	Int water bonds	$113.75
Geo. Buseman	April salary	100.00
Klemme Times	Publications	32 29
Central States Elec Co.	Light and power	72.30
P. M Wilson	Supplies	2.66
Hancock Co Oil	Gas & oil	20 26
Drafts	Impr Bond Int	29.75

As there was no furter business on motion this meeting was adjourned

A. J. Kudje, Clerk

NOTICE OF DISSOLUTION OF PARTNERSHIP

TO WHOM IT MAY CONCERN:

Notice is hereby given that the co-partnership of Senneff and Berge consisting of Frank W. Senneff and B C Berge, engaged in the practice of law at Garner, Iowa, is to be dissolved as of the date of July 1, 1944 by mutual consent. All business now pending will be completed by the partnership the same as in the past. B. C Berge will maintain an office in the front corner rooms over Stones Variety Store and the Garner Cafe, and the old office of Senneff and Berge will be conducted by Miss Louise Q Beyer, a young lady lawyer now in the office of Mr. Senneff at Britt, Iowa. Mr. Senneff will continue spending Wednesday of each week in the office at Garner formerly occupied by Senneff & Berge.

Dated this 23rd. day of June, A. D., 1944.

B. C. BERGE
FRANK W. SENNEFF

WEEKLY NEWS ANALYSIS

Yanks Advance on Two Fronts As German Resistance Stiffens; B-29s Blast Steel Mills in Japan

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Top American military leaders are pictured during their visit to the Normandy beachhead. Left to right: facing camera, Adm. Ernest J. King, commander in chief of the United States fleet; Gen. George C. Marshall, chief of staff of the army; Gen. Dwight D. Eisenhower, supreme Allied commander, and Rear Adm. Alan G. Kirk.

THE INVASION:
Steady Progress

Supported by the greatest air fleets in battle history, Allied forces continued to expand their beachhead area in Normandy in the face of stiffening resistance on many fronts.

U. S. forces to the northeast of Cherbourg surged past Montebourg, which was still being contested, and captured Quineville on the east coast of the Cherbourg peninsula. Hammering to the west across the peninsula on a 10-mile front, the Yanks met stiff resistance from crack grenadiers of the fifth German tank division thrown into the Normandy fighting.

A communique from General Eisenhower's headquarters said that steady progress had been made west of Carentan across the base of the Cherbourg peninsula and between the Elle and Vire rivers toward St. Lo, key junction 15 miles southeast of Carentan.

Battle Westward

All along a 10-mile front, units of the American Fourth division and the 29th Air-Borne division were battling westward against strong resistance in a drive to pinch off the peninsula, and with it the prize port of Cherbourg.

Nazi Field Marshal Erwin Rommel had thrown approximately 700 tanks into the fighting on the eastern sector and appeared to be using far more infantry than the German command intended to use for the defense of one comparatively small section of the invasion coast.

Despite early successes on the invasion front, a word of warning came from Secretary of War Stimson who said that Allied troops in Normandy soon must face fiercer counter-blows "than any we have ever met." At the same time he predicted they would smash ahead until France is liberated and Germany crushed.

While the troops on the Normandy coast were fighting off the German counter-attacks on land, residents of England itself were dealt a serious "anti-invasion blow" when a fantastic stream of pilotless Nazi bombers rained fire and explosives across the island. This was Hitler's long-awaited "secret weapon" and no attempt was made by the British authorities to minimize the effectiveness of these robot, radio-controlled bombing plane attacks.

CONVENTIONS:
In Chicago

As the advance guard of the Republican party convention delegates began arriving in Chicago, political dopesters had all but awarded the Presidential nomination to Gov. Thomas E. Dewey of New York, but friends of Gov. John W. Bricker of Ohio would not let their candidate be counted out without a battle. They said that the contest for the nomination would go to the convention floor.

Bricker sources could not see a first-ballot victory for Dewey. However, the New York governor entered the convention with more delegates actually pledged to him than any other candidate, including Governor Bricker.

Officials in charge of arrangements for the Chicago meeting revealed that the candidate selected would probably make his acceptance speech from the convention floor on the day after his nomination.

Meanwhile the Democrats announced that Gov. Robert S. Kerr of Oklahoma would keynote their convention scheduled for July 19, also in Chicago.

PACIFIC:
Action Here, Too

U. S. citizens got a breath-taking indication of the mighty striking power of their vast armed forces when within ten days of the European D-Day, terrific blows were dealt the Japanese on the opposite side of the globe.

Day before the new Super-Flying Fortresses bombed Japan proper, a powerful navy sea and air force blasted the outer defenses of the island off Saipan in the Marianas to prepare the way for the landing of American troops on that strategic Jap base only 1,500 miles southeast of Tokyo.

To wrest Saipan from the Japanese, Americans had a job which combined the worst factors of Tarawa and Guadalcanal. For like at Tarawa they had to land over a well-defended coral reef and like on Guadalcanal, the Jap had himself well entrenched in good fortified positions which extended all the way across that jungle island. When the beachhead on Saipan was established there was still a long way to go but word from Adm. Chester W. Nimitz' headquarters indicated that the Yanks were advancing.

Initial reports listed moderate casualties while the official bulletin revealed that: "Virtually all heavy coastal and anti-aircraft batteries on the island were knocked out by naval gun fire and bombing."

While these no longer worried the Americans, they knew their test would come in the inner jungles as they faced the Jap artillery, mortar and machine gun fire.

Super Raid

From secret bases in China, not from an aircraft carrier this time, American planes dealt Japan proper a smashing air blow, when a squadron of the new Super Flying Fortresses bombed Japan's homeland. Tokyo radio said industrial areas of Moji and Shimonoseki were hit.

Only a dribble of official news came from American sources on the raid but announcement of aerial task force attack of the giant B-29's indicated that they flew from the China-Burma-India theater land bases.

This raid also revealed the formation of a new air force, the 20th, which would serve the United Nations cause as a roving, globe-circling task force much like a naval fleet. This air arm will not confine itself to attacks on Japan but is "able to participate in combined operations, or to be assigned to strike wherever the need is greatest."

Before any official announcment of the targets was made by the army, a report in congressional circles hinted that Tokyo itself was one of the main objectives.

ITALY:
Allied Drive Continues

German defenses on a broad front 50 to 80 miles above Rome were shattered when Allied Fifth and Eighth army troops drove north in a plunge which netted them hundreds of prisoners.

German resistance had cracked all the way from the Tyrrhenian seacoast around the northern end of Lake Bolsena and down to Terni, 70 miles east of the Allied advance coastal columns.

The enemy was in full retreat from the entire Adriatic sector. Their retreat was so fast that speedy Eighth army flying columns were unable to contact Nazi rear guards. Even fresh German reinforcements, hastened from the north to halt the Allied advance, were routed after joining the Nazi 14th army in a furious three-day battle.

PRICE CONTROL:
Parity for Farmers

Under terms of the bill extending the price control machinery of OPA as passed by the House, processors who fail to pay a parity price for any farm commodity would be allowed to charge only 90 per cent of the OPA ceiling for the finished article.

(Parity is a price calculated to make farm purchasing power equal to that prevailing from 1909 to 1914).

Farm leaders had the support of the administration in putting through the measure in this form after the controversial cotton ceiling adjustment provision had been knocked out of the bill as passed by the senate.

This cotton provision and the parity issue were the main problems between the house and senate conferences.

Once in the President's hands the bill still faced the threat of a veto because of amendment to it which would throw all OPA regulations open for legal tests in the regular federal district courts.

WOUNDED YANKS:
Death Rate Cut

Of every 100 American soldiers wounded in battle, 97 are saved, according to Maj. Gen. Norman Kirk, surgeon-general of the U. S. army. The navy has an equally impressive record. In World War I the death rate of the wounded was 8 per cent. Now it is less than 3 per cent.

Abdominal injuries are among those most often fatal, resulting in death in 25 per cent of the cases. This, however, is a great improvement over 25 years ago, when 50 per cent died. Penetrating chest wounds are now fatal in less than 25 per cent of cases, while in the first World war more than half the men so wounded succumbed. A still greater advance has been made in treatment of head wounds. Now only 4 per cent die, as compared with 14 per cent in the last war.

Umberto of Italy

Closeup of Crown Prince Umberto of Italy taken after all Italian powers had been vested in him by his father, King Victor Emmanuel, who abdicated after the Allies had taken Rome.

PROGRESS:
In Bond Drive

Treasury officials announced that in the first two days of the Fifth War Loan drive, individual buyers purchased almost a half-billion dollars worth of bonds. Goal for individual buying in this drive is six billion dollars.

At the same time the treasury translated bond purchases into equipment various sums would purchase for the army and navy. Bonds bought now will pay for more and better equipment than a year ago.

For example:

A heavy bomber, listed at $500,000 last year, is now available for $250,000.

A fighter plane costs $50,000 as compared to $150,000 a year ago.

SECOND SCANDAL:
At Pearl Harbor

A second Pearl Harbor scandal, revealing neglect and delay in the army's defense preparations prior to the Japanese attack on December 7, 1941, has been reported to congress by a house subcommittee on military affairs.

Responsibility was pinned directly upon Col. Theodore Wyman Jr., district army engineer at Honolulu. Hans Wilhelm Rohl, California contractor, who sought naturalization in 1941, 28 years after coming to the U. S. from Germany, was named as Colonel Wyman's collaborator. The report stated that Wyman constantly discriminated in awarding $125,000,000 in contracts to Rohl's firm. Rohl was to have built a permanent aircraft warning system. The contract was let on December 7, 1940. Rohl was to complete the job in six months. One year later the job was only partially completed. The subcommittee reported that the approach of Japanese planes would have been detected if the system had been operating.

Colonel Wyman and Rohl were frequently companions on wild drinking parties, the report stated.

HOUSEHOLD GOODS:

More than 12,000,000 families would like to buy alarm clocks, a survey conducted by the census bureau for the War Production board during April indicates. The study was made among 4,500 representative families to guide the WPB.

The survey covered demand for 56 household articles. It showed that the percentage of "satisfied buyer demand" ranged from 98 per cent for sewing thread down to 5 per cent for wash boilers and lawn mowers.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

CREDIT WHERE DUE

Across the Potomac, in the sprawling Pentagon building, Gen. George C. Marshall, U. S. chief of staff, gives all credit for U. S. invasion success to the boys over there, their officers and to General Eisenhower. However, those who have watched lean, graying General Marshall close-up during the tense months of the war, know how he too has worked, planned, dreamed almost every detail of the invasion.

Three years ago, before we entered the war but when everyone knew it was a certainty that we would, this columnist asked General Marshall what chance there was of a British cross-channel invasion.

"Do you realize what it takes to land an army in France?" he replied. "It takes not merely ships and men—and naval vessels to protect those ships. It also means docks, warehouses, railroad terminals, and freight cars by the thousand. But especially it means docks—some place to land. In the last war, we didn't have to worry about any of these things. The French supplied them. But in this war"—he shook his head ruefully—"it is different."

As he talked, Marshall thought back to 1917-18, when he was only 36 and a captain. At that time, he performed a modern miracle of maneuvering—second only to that of the present second front. He worked out for Pershing the plan whereby one million men were transferred from the St. Mihiel to the Meuse-Argonne front.

Nineteen railroads, 34 hospitals, 40,000 tons of ammunition, 93,000 horses, 164 miles of railway, 87 supply depots and 4,000 cannon all were moved up just beyond the German lines—and the enemy didn't even know it.

* * *

COOPERATION WITH EISENHOWER

A general in modern warfare does not ride into battle waving a sword. He sits behind a desk. And this time General Marshall, instead of being close to the battle-front, has done his planning from behind.

And unlike the situation in the last war, Marshall and his European commander cooperate beautifully. They are close friends. In the last war, General Pershing was in bitter conflict with Gen. Tasker Bliss, the U. S. chief of staff; later with Gen. Peyton March, who succeeded Bliss.

Today, Marshall and Eisenhower are considered Pershing's boys. He is strong for both of them. And every Sunday before the war got too tense, General Marshall went out to Walter Reed hospital to chat with his former chief. Pershing still believes he can win wars, and gives Marshall his opinion on various strategic problems. After each interview, Marshall rises and salutes.

"Thank you, General," he says.

"Thank you, General," is the reply.

NOTE—General Marshall is one of the few chiefs of staff we have had who did not go to West Point. Due to the fact that his father was about the only Democrat in Uniontown, Pa., during the McKinley administration, he could get no West Point appointment, went to Virginia Military institute instead.

* * *

THEY DIDN'T KNOW EITHER

War department officials are laughing behind their hands at the fact that military intelligence, supposed to know all about everything going on behind enemies' lines and inside our own lines, chose D-day to move their offices. In the Pentagon building, where military intelligence, or G-2, is housed, moving day was called "G-2's D-day." They "invaded" their new offices.

But never could they have chosen a worse day to move than the Allied D-day. Other war department officers kept calling up G-2, asking for information.

"Sorry," said the operator, "but the telephones are all torn out. G-2 is moving."

Furniture was being moved down corridors, files of secret information were being shunted from one place to another. Everything was confusion on the one day which meant most to the war.

Apparently, military intelligence, supposed to know everything, didn't know when the big day we were to cross the English channel was scheduled.

* * *

REASON FOR CRACKDOWN

Now it can be revealed why President Roosevelt was so tough in his crackdown on the Irish regarding the removal of Axis diplomats.

It long had been planned, though a strict secret, to land on the Cherbourg peninsula. To reach it, many U. S. troops had to steam through the Irish sea.

Naturally, the President wanted no scrap of information regarding the early passage of landing barges through the Irish sea to leak out in any manner, shape or form.

Walter Winchell

(WNU Service)

Behind-the-Scenes Stuff: Newspapermen's shop-talk includes the alleged reasons for the unpopularity of De Gaulle in certain high political places. One statesman said: "He is arrogant, hard to get along with, stuffy." . . . Another revealed that De Gaulle "likes to make an entrance" (especially in swanky hotel dining rooms; when a trumpeter too-tootles his approach with some ta-da, dee-da, dah, dee, da, dahing). This got on the nerves of Allied bigshots. It is said Mr. Willkie will certify to the last item. . . . De Gaulle is called "the bride" when Roosevelt discusses him with Churchill via trans-Atlantic phone . . . Once FDR asked the Prime Minister: "How's the bride?" . . . "All right," Mr. C. is said to have answered, "but I am having trouble with the groom!" . . . Meaning Giraud. . . . Americans and others should not forget De Gaulle was the first to yell: "We Will Fight!"

The Squelch Proper: Radie Harris relays the one about the feud between Jane Cowl and Philip Merivale when they appeared in "The Road to Rome" hit. Their quarreling finally aroused director Lester Lonergan, who succinctly said: "I just want to remind you, Miss Cowl, that the billing on this play is Jane Cowl and Philip Merivale, not Jane Cowl vs. Philip Merivale."

Oop: Recently a Nazi prisoner of war escaped from the stockade at Camp Crowder. He learned the location of the camp's supply warehouse and got there without being detected. He broke in, shed his PW uniform, put on an American uniform that draped him perfectly. But then he made the boner resulting in his capture.

Hunting through a stack of hats he put one on that fit him. Then he stepped out across the camp grounds and was seized almost at once.

He had on the hat of a WAC.

Ouch: It happened before Supreme Court Justice Aaron J. Levy. The man before him said: "I would like to change my name. It's been a source of great embarrassment to me."

"What is your name?" asked Hizzoner.

"Levy," said the fellow.

"Rarely in the life of any jurist," was the caustic retort, "comes there a motion which he can grant with such pleasure."

Shawt-shawt: Returned bomber pilots have a favorite story not new to some of us on the papers. It deals with the U. S. bomber crew flying over Switzerland, which was hailed via radio by the ground crew of a Swiss anti-aircraft battery. "This is neutral territory. Get away or we'll open fire."

"Yes, we know," replied the Yanks, to which the guns ack-acked.

"Hey," radioed the Americans, "your shells are exploding 1,000 yards below us."

"Yes," was the reply, "we know."

Newspaperman Stuff: Editor and Publisher reports that Lowell Mellett (who recently quit his post as ass't to the President to do a syndicated column) has just been granted a $5 raise by the St. Louis Post-Dispatch—a raise he requested 40 years ago.

At that time, Mellett asked his managing editor for the pay-hike and when turned down he quit. The P-D was among the first to buy his colyum. It pays him the wage he got when a reporter.

As a matter of principle, Mellett asked the present editor to pay $5 extra. He got this reply: "Okay. Sorry you had to wait so long for it."

Merciless Truth: John Erskine recalls a college dean who used to say you couldn't teach a man mathematics if there was a girl in the room, or if you could, he wouldn't be worth teaching.

Heheheh: The editor of This Week convulsed the column with the one about the sentry who heard a noise and called out: "Who goes there?" A voice from the darkness answered: "Lieut. Jones. Let me through."

"I can't let you proceed, sir, without the password," said the sentry.

"Oh, for goodness sakes," said the officer, "you know me well enough. Let me through."

"No can do," was the retort, "gotta have the password, sir."

Just then a bored-with-it-all soldier in the nearby guardhouse yelled: "Oh, don't stand there arguing all night—shoot him."

Quotation Marksmanship: Ted Robinson: A pessimist feels bad when he feels good for fear he'll feel worse when he feels better. . . . Dorothy F. Grant: How many times are we guilty of Hatriotism? . . . Mary Innis: The frozen milk bottles wore crooked white top-hats. . . . M. Cousins: The lonely night sounds of the prairie clawed at the windows. . . . Irving Hoffman: "Gentleman": What women call any man they don't know well. . . . J. Drinkwater: Poets make everlasting monuments of moments.

HIGHLIGHTS . . . in the week's news

PAIN DETECTOR: An electrical device, said to be able to detect diseased organs of which the patient is unconscious, was demonstrated at the convention of the Gastro-enterological association meeting in Chicago. Dr. Lester Morrison of Philadelphia read a paper on the machine, and explained that it operated by the "viserogalvanic reaction" of the patient.

FACTORY WAGES: In April earnings of factory workers on an hourly basis reached a new high at $1.057 per hour, the National Industrial conference reports. Because of a shorter work week however, total earnings were somewhat lower, being $48.08 on the national average, down .7 per cent from March. Average work week was 45.2 hours in April.

n in Farm Prices and Rapid Turnover ompts Fears Collapse Will Follow Peace

revious war has brought nd boom that left a wreck- eflation behind. The col- he speculative era follow- War I is painfully fresh mory of many a farmer.

considered fairly representative, it is estimated that farm land prices have risen about 17 per cent between April, 1943, and April, 1944. From the beginning of the year until April 1, the advance has been about 2 per cent. The increases have been largest in Indiana, Illinois and Iowa, in which states the per cent of purchases by city investors was largest, being 30 to 37 per cent of all sales.

It is true that farmers have been using much of their larger incomes to buy bonds and to pay off debts. The steadily decreasing volume of farm mortgage debt is evidence of this trend. But now reports indicate that heavier debts are frequently being assumed when farms are bought. This is especially true of tenants who are buying on contract or with relatively small down payments.

All Sorts of Buyers.

Surveys by county banks indicate that all types of farm buyers are now in the market. Tenants are acquiring their own farms. Owners are expanding their present units or are taking on additional acreage, perhaps for sons now in the service. Even large commercial farms in some instances are changing hands at increasing prices. Local business and professional people and city investors bent on hedging against inflation or higher income taxes are buying land. War plant workers, too, are making purchases, expecting to turn to farming when their munitions jobs are ended.

All these conditions are reminiscent of what occurred in World War I, for that too, was a story of agricultural upsurge. Farm income rose from 6 billions in 1914 to 14½ billions in 1919. High prices and a ready market for agricultural products, plus easy credit facilities, encouraged farmers to bid up land prices.

Farms were bought on speculation with the expectation of a quick sale at a profit. Land values were inflated from an average of $40 an acre in 1914 to $70 in 1920. Within those six years farm real estate rose in total value from 39½ billion dollars to 66 billions.

The sequel was a history-making crash. Land prices fell from an average of $70 an acre to $28. More than a third of the nation's six million farms were foreclosed by the end of the depression. All farm land and buildings declined in value from 66 billion to 31 billion.

It is natural that people today fear that the same thing will happen all over again. As a result some agricultural leaders already are urging legislative controls. Some of these are drastic, some milder. Proposals range all the way from restriction of land-owning privileges in some cases to credit control and heavy federal capital gains taxes.

Dangerous Remedies.

Lest the remedies be as fatal as the disease they are designed to cure, however, farmers were recently urged by Ray Yarnell, editor of Capper's Farmer, to look carefully into these proposals, their implications and what else may be proposed in the future before endorsing them.

"The land boom of the first World war and its awful consequences throughout 20 years have been credited by some to unwise land ownership policies," he declared. "Upswings of prices with the second World war have engendered the fear that another boom was in the making and that its consequences would be the same as the first.

"Buyers have been warned repeatedly. Still, reports of advancing prices multiply. Some belief holds that voluntary action would be ineffective. So legislated remedies are proposed."

Most drastic proposal is the permit system advocated by William G. Murray of Iowa and others. It would require a prospective purchaser to appear before a board and show reason why he should be allowed to buy a farm.

If the board found him an unfit person to own land, or didn't like his attitude, it apparently could turn him down. No permit would be awarded before the land had been appraised.

Limited Loans.

Another proposal is credit control. First provision is that no loans should exceed 50 per cent of the value of the land. Presumably value would be established by appraisal. Such a regulation might be legislated, and it might stick. Presumably, also, lending agencies would establish a policy of refusing to lend to men who paid long prices. An approach to this is already in effect. The land banks, mortgage, trust and insurance companies have been discouraging borrowers both from paying too much and from borrowing too much of the purchase price. But they don't have any control over folks who are prepared to pay cash, or the private money lender who is willing to take a long chance for a high interest rate, or the owner who can finance his own sale.

Mildest of these proposals is to impose a stiff federal capital gains tax. Such a bill was placed before congress by Senator Gillette of Iowa. It is directed at speculators by providing a tax amounting to 90 per cent of the profits if the land is resold before the end of two years. Each year thereafter the tax would be decreased until the end of six years, when none would be levied. There is no doubt as to the class of transactions which the legislation is intended to curb. But would a farmer who was obliged to sell within the limits specified be subject to the tax?

All the schemes thus far advanced seem to be pointed toward keeping the buyer from making a fool of himself, but of course every sale must have two parties. So the man who wants to quit farming; the man who wants to retire on proceeds from sale of his land; the fellow who wants to sell and move elsewhere; the widow who has been hanging on until she can get the family equity out intact; the non-operator who is sick of wrangling with tenants and who has been longing for the time when he can get out and save his shirt—all these welcome the upturn of prices.

Now lots of farmers who have no desire to sell, who think their troubles are caused by folks they don't believe should be allowed to own land, applaud these proposals. And they may be right, but it will be well to look into them, their implications, what else may be proposed in the future before endorsing them.

This country can have control of land sales and purchase in two ways. First by doing nothing; second by whooping it up for the proposals. Farmers will be more vitally affected than any other group. If they want a Federal agency empowered to say who may own land, they can have it. If they don't care, they can have it anyway. Forces sponsoring the change in land policy will see to that. But if farmers don't want it, they may be able to forestall it by protest.

erans, War Workers Who Plan to Go Back to Land Hen Peace Comes, Should Be Cautious, Board Warns

timates show that about 900,000 York state residents will be obilized from the armed forces, another 500,000 from war in- ries. If the proportion of these interested in farming runs t the same as it does in our state population, about 75,000 ns from the Empire state will king for a place on the land. rchase of submarginal land unfit for the farming of today is only one pitfall which veterans and war workers will need help to avoid, says the New York State Rural Policy committee. Others are purchase of farms, at perhaps inflated values, with a large debt; location in an area which carries on a type of farming different from their past experience; and too hasty purchase of land that will tie them down before they get adjusted to "staying put."

Actually, only 30 per cent of the land in up-state New York is well adapted to farming today, and much of this land is in established farms that will not be for sale. Another 38 per cent is fair farm land.

County agricultural defense committees, or other groups, should be charged with the responsibility of helping men who wish to return to the land, in order that they make good investments and become productive and self-sustaining citizens, the state policy group advised.

CRADLE OF HEROES

The town you glimpsed from the speeding train—
The ones you passed so fast. . . .
The little burgs with the streets called "Main,"
That seemed in one mold cast;
The towns you thought of as such "small fry"
And saw as through a haze. . . .
You know 'em now, for their names are high
In the war communiques.

The towns that pass in a blurry scene
And seem a postcard view. . . .
The huddled stores and the village green. . . .
The steepled church or two. . . .
The little places we all ignored—
The ones we couldn't find—
They're big-time now as the fights are scored—
And credit is assigned!

The town you said was a one-horse place
And "only fit for hicks" . . .
The burg that lacked, so you said, all pace,
And scoffed at as "the sticks" . . .
The "whistle stop" and the "milk train run" . . .
"The turkey in the hay" . . .
They now stand out when the dying's done
To save the U. S. A.

The Robert Johnsons, the Richard Bongs,
And thousands of that breed,
Who do their stuff to right bitter wrongs
Knew not the city's speed;
From Lawton and Piqua and towns like that
They make their valiant bid. . . .
And despots know what it means to bat
Against the small-town kids.

The "bus-stop" town doesn't seem so much—
It looks a little slow;
It lacks what's known as the "big town touch"—
And isn't in the dough;
But read the papers and get the dope,
From land and sea and skies. . . .
The buckoes killing the tyrants' hope
Are mainly the small-town guys!

TROUBLE IN THE HOME

"Kaiser" trouble is sweeping America. Husbands are in revolt everywhere. Something's gotta be done.

—*—

No matter what a man is asked to do around the house, if he says that it is beyond his abilities his wife says: "It's a good thing Henry Kaiser isn't like you!"

—*—

The wife wants you to put up the storm windows; you find them swollen, and after dislocating your spinal cord, barking your knuckles and falling off a ladder you say it's a job for a carpenter. "If Henry Kaiser dropped things as quickly as you do the country would be in a bad way," sneers the missus.

—*—

She finds something wrong with the kitchen sink and wants you to do something right away. You fumble around a little and then admit that you are no good as a plumber. "Suppose Mr. Kaiser gave up on anything that seemed difficult?" chirps the Little Woman.

—*—

"I'm sick of it," declared Elmer Twitchell today. "I've left the house and am staying at a hotel. Nothing but Kaiser, Kaiser, Kaiser one day after another! I wish they'd shut up about that guy.

—*—

Wedding Strains
I plunk down fifty dollars—
They tack on twenty per cent;
Bridal bells in June
Have a doleful tune
As I say, "I'll have it sent."

* * *

Mergs B. Russels thinks some of those radio programs should be advertised as "boast-to-boast" programs.

* * *

New York is swamped with eggs. There are not enough storage places to hold them. And the worst of it is that the hens won't take them back.

* * *

H. G. Wells wants Hitler put into an insane asylum after the war and not executed. If the other inmates aren't crazy this will do the trick.

* * *

Reaction
The radio commercials—
They drive me out of mind;
I hear the firm's trade label—
And buy some other kind!

* * *

Do You Remember—

Away back when no matter where you might expect grandpa to be you would never think of looking for him down at the golf course caddying?

—*—

And when you could appease your hunger by going into a restaurant?

—*—

When you could go in for a spare part and get it?

—*—

When no employee exactly relished the idea of the government taking the business from his boss?

TAKING POSSESSION OF CANAAN

LESSON TEXT—Joshua 14:6-14; Judges 1:20, 21.

GOLDEN TEXT—Thou hast wholly followed the Lord.—Joshua 14:9.

Companions in battle usually means friends and comrades for life. Joshua, of whom we studied last week, had such a friend in Caleb. Together they had faced the crises of life.

Caleb is one of the characters about whom the Bible does not say much, but in every case the word is one revealing high and noble character. Consider such passages as Numbers 13:6, 30, 14:7-9, 24, 30; 26:65, as well as our lesson for today.

The background for our study is the story of Caleb's courageous stand with Joshua when the spies returned from their visit to Canaan, which is related in Numbers 13.

Note first of all Caleb's

I. Perfect Obedience (Josh. 14: 6-8).

"I wholly followed the Lord my God." Such a testimony from a man like Caleb is no idle boast, no effort to parade his faith and piety before others. In saying it he was repeating what God and Moses had both said about him. In his heart he knew it to be true.

It is God's will for each of His children that they should come to such a place of simple trust and complete obedience that in every circumstance of life they need to know only one thing—God's will, and then in faith to go and do it. It is a life beautiful in its transparent simplicity and powerful in the strength of God Himself.

II. Promised Inheritance (v. 9).

"Surely the land whereon thy feet have trodden shall be thine inheritance." Such was the promise of God through Moses. Forty-five long years had elapsed, but down through this period of wilderness wanderings and the conflict in subduing Canaan the promise had lived in Caleb's heart. He knew it would be fulfilled, and he waited serenely for God's time.

Such also are the promises of God which keep the heart singing in our hours of trial and sorrow, which light up the dark ways, which strengthen the heart of His children. Learn God's promises, cherish them in your heart, expect God to fulfill them.

III. Preserved Strength (vv. 10, 11).

"The Lord hath kept me alive . . . and I am . . . strong." Here was a man kept of God, in full vigor in his eighty-fifth year, "like a rock in a changeful sea, like a snow-capped peak in a change of cloud and storm and sun" (Meyer). No doubt there was here what our forefathers liked to call "the longevity of the antediluvians"; but even apart from that, let us recognize that life and strength come from God, and that those who walk with God in holy living may count on Him for the renewed strength of Psalm 103:5.

An incidental but extremely important lesson we should learn is that God has no age deadline. The church has frequently sinned against Him and against His faithful servants by "shelving them" for younger men, when they would have brought blessing if the church had encouraged and used them. The writer of these lines is a young man, but he would speak here a word of loving admonition regarding his honored brethren who have gone on before to bear the brunt of the battle.

IV. Powerful Assurance (vv. 12-15; Judg. 1:20-21).

"If . . . the Lord will be with me, then I shall be able." Caleb asked for no easy task. He was ready to go up against the giants of Hebron. Read Deuteronomy 3:11, and you will find that there were men in those days who needed thirteen-foot beds. But Caleb was not afraid. He counted not on his own strength, but on the power of God.

It is significant that, while the other sections of Canaan were only partially conquered, Caleb brought his formidable adversaries entirely under control, so that "the land had rest from war" (v. 15). The verses in Judges 1 indicate that Caleb was as good as his word. He was a doughty, God-fearing 85-year-old. His faith is here contrasted with the shameful unbelief and failure of Israel.

The spiritual application to our day is evident and appropriate. There are giants in the land. Corruption — social and individual — raises its brazen head. Drunkenness and vice leer at us with the impudent suggestion that we cannot control them.

There are giants "within us — greed, selfishness, love of ease, lust, passion, cruelty" (Blaikie).

Are we to do nothing about them? If we are to meet them in the strength of the flesh, we might almost as well do nothing. But in the power of God, we are like Caleb—able. In His name we may do something about it! For His glory.

SNAPPY FACTS ABOUT RUBBER

Up to the beginning of last year, B. F. Goodrich produced more butadiene-type general purpose synthetic rubber than all other plants in America, including those owned by the government. The first U. S. commercial butadiene-type synthetic plant was set up by B. F. Goodrich in 1939.

Black derbies, frequently called "iron hats," are said to be the most popular exchange medium for rubber among the Indians of the San Blas region of Panama. No mention has been made of premiums for brown derbies!

WHY TAKE HARSH LAXATIVES?

Simple Fresh Fruit Drink Makes Purgatives Unnecessary for Most People

Here's a way to overcome constipation without harsh laxatives. Drink juice of 1 Sunkist Lemon in a glass of water first thing on arising.

Most people find this all they need—stimulates *normal* bowel action day after day!

Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps resist colds and infections. They supply valuable amounts of vitamins B_1 and P. They pep up appetite. They *alkalinize*, aid digestion. Lemon and water has a fresh tang too—clears the mouth, wakes you up, starts you going.

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

The battle for the World is on!

NOW THAT the chips are down . . . now that our men are writing decisive history with their blood . . .

There can be no halfway measures for *us*.

The greatest battle in the history of the world *must* be matched by the greatest war loan in the history of the world.

That's what Uncle Sam says . . . the same Uncle Sam for whom your brothers and sweethearts and husbands are fighting and dying this very minute.

They, in the front lines, are throwing in everything they have.

We, behind the lines, must do the same.

Remember, this is the battle for the WORLD. *Our* world. And we've *got* to win it. That's why Uncle Sam expects every dollar, like every soldier, to do its duty.

REPORT "SUMMER COMPLAINT" HAS HIGH DEATH TOLL

Since 1930 more than 2,700 persons have died of diarrhea and entertis, the common warm weather diseases which many persons "inadvisedly refer to as a touch of summer complaint," the state health department said today.

Although the trend of mortality is downward with deaths dropping from 350 in 1930 to 97 last year, the percentage of deaths remains "too high to justify any indifference to these diseases," according to the department.

Reporting on a recently completed survey of diarrhea and entertis in this state, the department found that of a total of 2,768 deaths from these causes during the last 14 years, 1,505 were of children under two years of age with the remained, 1,263 spread out over the older age groups.

The department said, however, "it is probable that a high percentage of deaths, although recorded as diarrhea and enteritis, were caused by bacillary dysentery."

The sulfa drugs, it was brought out, have played "a considerable part" in the reduction which has been obtained, but the department stressed that "common sense preventive measures can help even more in saving loss of life from these causes."

Telling that the chief danger is from carriers within the household or in other groups of persons living together, the department suggested that the main lines of prevention include careful attention; personal hygiene, sanitary handling of food and dairy products, thorough cooking of food, and safegurading against breeding of flies.

The department explained that the hazard from these diseases increases during the summer because warm weather favors the growth and multiplication of bacteria.

FEDERAL TAXES MAJOR PROBLEM

Plans Under Consideration For Special Meetings To Study Relations Of National, State and Government Functions

There is a growing realization throughtout the United States that not only during the war but for many years hereafter, our greatest governmental problems will be directly due to and related with Federal spending.

The war has piled up an immense public debt, the peak of which is as yet quite unforeseeable, which in itself places a heavy burden of taxation on all of us for at least a generation, but that appears to be only one of many demands upon us that may come from Federal activities.

There is a universal determination that this war shall not be followed as was the last one by a period of speculative inflation and then by a cold plunge into depressive depths but there is not now, nor is there likly to be at any time anything like a general agreement as to what can and should be done to prevent some sort of debacle when peace returns.

One thing is absolutely and irrevocably certain—governmental activities, spending and taxes will either go UP or go DOWN. They will go up if we continue to look to Washington for subsidies, bonuses, graduities and grants of all sorts on the general theory that this saves us from having to pay for them ourselves.

They will go down only if and when there is generated and intelligently directed public sentiment of sufficient volume and power to make it politically expedient to eliminate many Federal functions, drastically reduce many other activities and reestablish in America the self-respecting sufficiency of state, county, and local government which existed prior to the current period of dependence upon and subservience to a paternalistic central or Federal authority.

It has been suggested that a special one or two days' conference be held in each state, or in two or more centers of population in each state to hear first hand from those who have been studying the Washington situation and discuss what should be done and how to do it.

Would you want to attend such a conference, and would you think one, two or three should be scheduled in Iowa? Write us younr suggestions.

ATTENDED KAPPI PHI NATIONAL CONVENTION

Miss Novella Bredbenner returned home Friday from the national Kappa Phi convention held at Baker University in Baldwin City, Kansas June 29 to July 6. Miss Thelma Chambers, who also attend the convention, is visiting a friend at Shellsburg, Iowa before returning home There were about 175 Methodist girls from all parts of the United States attending the convention. Kappa Phi is an organization of Methodist College girls and has as its aim "Every Methodist woman in the university world of today, a leader in the church of tomorrow."

Some of the outstanding speakers at the convention were Dr. Mary Shannon, former president of Isabella Thoburn College at Lucknow, India, Miss Zillah Soule, a native Indian graduate of Isabella Thoburn College, Rev Heil Bollinger, National Director of Wesley Foundations, Mrs. Lenore Porter, National Student Secretary of the W. S. C. S, Mrs. Katherine Mc Afee Parker, lecturer and sister of the Director of the Waves, and Dr. Nelson Horn, president of Baker University.

It was a thrill for the Kippa Phi girls to have present at the convention Mrs Gordon Thompson, the founder of Kappa Phi who started the organization in 1916 at Kansas University in Laurence, Kansas. Kappa Phi now has 29 chapters scattered on College campuses throughout the United States, with 1500 active members and over 20,00 alumnae.

ELL 4-H BOYS AND GIRLS PICNIC

The annual Ell 4-H boys and girls picnic was held at the home of Harvey Goll on the evening of July 6.

The girls discussed plans for the two county 4-H camp which will be held at the Methodist Camp, Clear Lake, August 7, 8, and 9.

Games were enjoyed by the group and refreshments served by Mrs. Goll, Roberta, Marjorie and Calvin.

HELLO, FOLKS!

Capt. and Mrs. Richard Hughes are the parents of a baby girl born to them on June 28th. Capt. Hughes now overseas as a pilot on the new B-29 bombers, is a former Klemme boy, the son of R. J. Hughes now living at Livermore. He is also a nephew of Paul Grange. The new daughter has been named Kathleen Dianne.

Mr. and Mrs. Cleo N. Ingle of Waukesha, Wis., are the parents of a 7lb. 12 oz. baby son born to them on Sunday, July 9th.

Mrs. Ingle is the daughter of Mrs. Lena Schroeder of Klemme.

PATROLMEN NAB LIQUOR CARRIER

Charge Minnesota Man With Transportation

Leon Barrington of Des Moines was arrested by highway patrolmen on highway No. 69 a short distance south of Klemme late Saturday evening, charged with illegal transportation of intoxicating liquor. He was driving a 1940 Buick coupe. Riding with Barrington was Margaret Nelson of Minneapolis.

Barrington was arraigned in Justice court and bound over to the grand jury. He was released on bond. Officials confiscated 2 cases of liquor.

MUSIC RECITAL TODAY AT THE HARVEY RESIDENCE

The piano pupils of Mrs. Leland Lieuwen gave a piano recital this Wednesday afternoon at the Rev. Harvey home to which mothers of the pupils were invited.

The following piano pupils appeared on the program: Janice Swanson, Neva Ann Anderson, Lois Stille, Ruth Lacey, Elaine Neuberger, Sondra Bridges, Rose Schaefer, Maxine Barz, LaNelle Harvey and Peggy Coobs. Eunice Larsen gave two soprano solos.

CHURCHS GIVE CALL TO PASTOR

Zion, Peace Reformed Are On Full Schedule

The Rev. R. D. Stuebbe, of Manitowoc, Wis., has been called as pastor of the Zion and Peace Reformed churches, effective July 1. This it his first charge. He has been serving the local congregations here on a part time schedule since last October.

The new pastor is a graduate of Mission House college, Plymouth, Wis., completing his course there in 1941 and at the Mission House Seminary in 1944. He is married.

CALENDAR OF EVENTS

July 13 — Bingham Boosters 4-H at home of Clarice Nelson.

July 14 — Home Project Committee at home of Miss Hazel Grimes.

July 14 — Progam Committee Meeting at Farm Bureau Office at 8:30 P. M.

C. O. Gorton and Emma Gorton, husband and wife, to Burton E. Poundstone and Elizabeth. Wty Deed 6-27-44 $5000.00 lot 1 and N½ of lot 2 and N 37 ft of lots 7, 8, 9, 10, and 11 in Block 22 Call's First Addition to Kanawha.

FARM LABOR BOARD MEMBERS LISTED

Farmers of Hancock County are reminded that the following men are the Farm Labor Representatives in the County:

H. H. Mullin	Britt
Walter Kirchgatter	Corwith
A. R. Janssen	Crystal Lake
Paul Henderson	Garner
Ira Langlitz	Goodell
Oliver H. Schnebly	Hayfield
Emmett Sheets	Hotchins
L. E. Faber	Kanawha
Ed Thompson	Klemme
Ray Valley	Woden

Requests for help should be made to these men or to the office of the County Extension Director. In some of the towns, business men have expressed a willingness to spend short periods on the farms where there is a definite need for help. It is suggested, however, that the best solution to the farm labor problem is neighborhood cooperation among the farmers. Experience in Hancock County and other Iowa Counties shows that a surprising amount of work can be done by farmers of a neighborhood teaming up with each other, helping each other overcome their emergencies.

ULTIMATE TARGET.

Twenty-two out of 91 spring pigs on the Lloyd Shaull farm near Van Horne died as the result of eating the debris of clay pigeons in a pasture that was used as a trap shooting ground fifteen years ago. The clay contains pitch apparently liked by the pigs because of its bitter taste.

MARGARET OTT WED TO ARMY CORPORAL

(Greene Recorder)

Margaret Ott, daughter of Paul Ott of Greene, and Corporal Bernard O. Onerheim, son of the Rev. and Mrs. L. O. Onerheim of Nunda, South Dakota, were married at 4:30 o'clock last Wednesday afternoon at the Howes Memorial chapel in Evanston, Illinois.

The double ring ceremony was read by the Rev. Mr. Onerheim, the bridegroom's father, and the attendants were Mrs. Harry Mehlan of Greene, and Tim O'Connor of Chicago Heights, Illinois.

Soft organ music was played during the ceremony by Genevieve Lucas of Greene Dorothy Schultz of Postville, sang "I Love Thee" and "The Lord's Prayer.".

The bride was attired in a pink semi-sheer afternoon gown with matching accessories. Her corsage was of gardenias and she wore a strand of pearls which were a gift from the bridegroom.

Following the ceremony a wedding dinner was served at Cooleys in Evanston.

Mrs. Onerheim is a graduate of the Greene high school and of Cornell college at Mount Vernon. She taught in the schools at Klemme and for the last year had taught in the schools at Chicago Heights.

Corporal Onerheim is a graduate of Saint Olaf college at Northfield, Minnesota, and also taught in the schools at Klemme. He is now stationed at Camp Pickett, Virginia. During the time that Corporal Onerheim is stationed at Camp Pickett, he and his bride will make their home at 1701 Fourth avenue, Richmond, Virginia.

Those from Greene attending the wedding, besides Mrs Mehlan and Miss Lucas, were Mr. and Mrs. Paul Ott.

ALL MOTORISTS MUST SHOW STAMP

Auto Use Tax Stickers Still Available Here

E. H Birmingham, collector of internal revenue for the district of Iowa, states that many car owners have failed to purchase $5.00 use tax stamp, which is to be placed on the windshield of all cars.

Mr. Birmingham directs attention to the fact that failure to display this stamp after July 1, 1944, may subject the car owner to a penalty. Stamps may be purchased at any postoffice or from the Collector of Internal Revenue.

Postmaster J. N. Day stated this week that the new auto use tax stamps are still available at the post office and urged that motorists who have neglected to obtain their revenue stickers do so immediately.

AVERY 4-H SUNBEAMS

Fourteen girls with their leaders met on July 6 at the home of the assistant leader, Mrs. Raymond Wille.

Plans were made for an outdoor party at which the 4-H boys would be entertained. This was held at the home of Arlene Wille on July 7.

The club program was as follows:

Talk -- "How I managed when Mother was away" - Betty Ann Kramer.

Demonstration--"Setting a table" - Darlene Etchen.

Talk -- "Writing Thank You notes" - Isabelle Gibbs.

"Discussion on the 4-H Pledge" - Arlene Wille.

Refreshments were served by Mrs. Raymond Wille, after which the girls enjoyed several outdoor games.

SECRET WEAPON!

Ever hear of a "buffalo fly"? W. A. Harper of Postville captured one near the Rock Island depot and reported it "packs a wallop more powerful than a thousand mosquitoes regardless of size". He says that if our armies could train a regiment of these flies to work on the enemy the project would shorten the war.

WNU—N

That Nagging Backache
May Warn of Disordered Kidney Action
Modern life with its hurry and worry, irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the kidneys. They are apt to become over-taxed and fail to filter excess acids and other impurities from the life-giving blood.
You may suffer nagging backache, headache, dizziness, getting up nights, leg pains, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.
Try Doan's Pills. Doan's help the kidneys to pass off harmful excess waste. They have had more than a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!
DOAN'S PILLS

THE HOME FRONT

RUTH WYETH SPEARS

THE center table in most Victorian parlors there was a kaleidoscope. Guests gazed into it after they tired of looking at the family album. Bits of colored glass were reflected in an endless variety of intricate patterns in this ingenious device. Very much the same effect was obtained by the

method of putting together the five six-inch quilt block shown here and that is why the pattern was called the kaleidoscope.

This quilt has just the right flair for today's decorating trends. It will make a stunning spread for your bed either in the colors suggested here or in any other combination that suits your room. The blocks are so easy to piece and are such a convenient size to carry around that they make ideal summer pick-up work.

* * *

NOTE—Mrs. Spears has prepared a pattern sheet with actual size quilt piece patterns for three of her favorite quilts. The Kaleidoscope, the Ann Rutledge and the Whirl Wind are included. This is Pattern No. 200 and the price is 15 cents. Address:

HOUSEHOLD MEMOS by Lynn Chambers

Keep Cool With Frosty Ice Box Pudding
(See Recipes Below)

Summer Favorites

If appetites are dawdling, a real job confronts the cook. Summer or winter, the body needs nourishment, and the basic seven foods must be included in the diet.

What, then, must be done? Well, for one thing, the appetite must be coaxed with new and different combinations of food. Even in summer there should be one hot food in the meal, but the cold ones should be very cool and tempting.

Attractive serving can help consumption, too. If there are cool, crisp looking tablecloths, napkins and dishes, the appetite will naturally perk up. Add to this, green, crisp garnishes, pleasing color combinations and well prepared foods, and there need be no difficulty in having the food eaten even on the warmest day.

Save Used Fats!

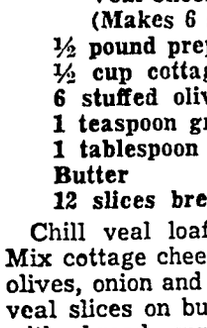
Today's round-up of recipes will help in planning palate-pleasing menus for hot summer days:

***Veal-Cheese Sandwich.**
(Makes 6 sandwiches)
½ pound prepared veal loaf
½ cup cottage cheese
6 stuffed olives
1 teaspoon grated onion
1 tablespoon mayonnaise
Butter
12 slices bread

Chill veal loaf and slice thinly. Mix cottage cheese, chopped stuffed olives, onion and mayonnaise. Place veal slices on buttered bread. Top with bread spread with cottage cheese mixture. A leaf of lettuce may be placed in between. Serve with pickles and potato chips for lunch.

Jellied Chicken and Vegetables.
(Serves 6)
1 tablespoon unflavored gelatin
¼ cup cold water or stock
1½ cups hot chicken stock
½ teaspoon salt
1 cup chicken, chopped
1 cup cooked vegetables (peas, string beans, beets, asparagus, carrots)
½ pimiento or green pepper

Soften gelatin in cold water. Add to hot stock and stir until dissolved.



Rinse a square mold in cold water, pour a thin layer of liquid jelly. Let stiffen slightly and decorate with pepper and other vegetables. Arrange the thickening jelly, chicken and vegetables in layers and chill. Unmold on lettuce.

Lynn Chambers' Point-Saving Menus

*Veal-Cheese Sandwich
Pan-Fried Potatoes Carrot Salad
Pan Rolls Marmalade
*Fig Ice Box Pudding
Beverage
*Recipes Given

Barbecued Frankfurters.
(Serves 6)
1 medium-sized onion, sliced
3 tablespoons salad oil
1 tablespoon sugar
1 teaspoon dry mustard
Salt and pepper
½ cup catsup
½ cup vinegar
1 tablespoon Worcestershire sauce
Drop of tabasco sauce
12 frankfurters

Lightly brown onion in salad oil. Add combined remaining ingredients, except frankfurters. Simmer 15 minutes. Split frankfurters and place in shallow baking dish. Pour over barbecue sauce and bake in moderate oven (375 degrees) 30 minutes, basting several times.

From main dishes and salads we go to desserts. These are designed to be perfect foil, light endings to meals. You'll find them flavor-perfect and easy to make:

Red Currant and Raspberry Ice Cream. (Makes 2½ cups)
2 pounds red currants, stemmed
1 pint red raspberries
1 cup granulated sugar
1 pint cream or evaporated milk, whipped
¼ teaspoon salt
½ teaspoon vanilla

Stem currants, wash and drain. Wash, pick over, hull raspberries. Combine both fruits, crushing coarsely. Sprinkle sugar on fruit, then let stand 1 hour. Then turn, mix in enamel saucepan, cover and cook over low flame 10 minutes, stirring occasionally to prevent scorching. Remove, squeeze through double cheesecloth. To this add the following syrup:

½ cup granulated sugar
¼ cup cold water

Stir sugar and water, bring to boiling point and boil 5 minutes.

Remove, stir into first mixture, then strain again through cheesecloth. Chill, fold in whipped cream, salt and vanilla and freeze in hand freezer. Use three parts ice to one part rock salt. Freeze until solid, then pack in four parts ice and one part rock salt and let mellow for two hours.

***Fig Ice Box Pudding.**
(Serves 10)
2 cups dried white figs
1½ cups water
1 cup granulated sugar
1 teaspoon cinnamon
Few grains salt
1 tablespoon plain gelatin
¼ cup cold water
1 tablespoon lemon juice
1½ cups cream or evaporated milk, whipped
Lady fingers
Cornstarch custard

Cover figs with boiling water, let stand about 10 minutes. Drain, clip stems and grind or chop figs fine. Add 1½ cups cold water, bring to a boil and cook about 5 minutes or until water is evaporated. Remove from heat, add gelatin moistened in ¼ cup cold water. Stir to dissolve. Cool, add lemon juice and blend. Whip cream and beat into fig mixture. Line sides of a 1¼ quart ring mold with lady fingers. Pour fig-cream mixture into mold. Chill until firm. Unmold onto serving plate and fill center with cornstarch custard or serve plain.

If you wish more detailed instructions on vegetable canning, write to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chicago 6, Illinois. Please don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

The Score Card: Potatoes and onions are coming into the markets. They are very much usable in summertime menus.

Plan to use plenty of peaches, apricots and melons this year. Crop supplies look plentiful.

Ice cream consumption has increased from eight pounds per person in 1924 to sixteen pounds in 1942.

Homemakers are urged to can as many fruits and vegetables this season to give themselves point-insurance for the winter.

Last year, more lard was produced than at any time during the nation's history.

Egg supplies are still plentiful. Use at least one a day to fortify your diet.

Sugar stamps 30 and 31 (book 4) are each good for 5 pounds of sugar. Sugar stamp, number 40, will give you 5 pounds of sugar for canning. An extra 20 pounds of canning sugar is available with stamp 37, upon application to your local board. This will give you 10 pounds now and 10 pounds later.

OUR BARBER AND OPA CEILINGS

("Ceiling prices are proposed for barber shops."—News item.)

"I'm a quit da biz," declared Raviola, the barber, today. "Sheeza feenish."

"What's the trouble?" we asked.

"No cutta da hair weeth da ceiling. I no freeza da shave," he said, with feeling.

We didn't quite follow him.

"I'm a quit da biz," he repeated. "You wanna shave and haircut? You see Chesta da Bowley."

"Where is Chester's shop?" we asked.

"You aska me! Sheeza here, sheeza dere, sheeza everywhere. Whatta he know about hair cut? He's da advertise man."

"Oh you mean Chester Bowles!" we said.

"Chesta da Bowley of APA," he replied.

"OPA," we corrected.

"OPA, IPA, UPA, whatza da deeference? I'm a quit da biz. APA freeza da haircut and shave. Pretty soon sheeza ration da bayrum an weetch haze."

—•—

"I missed reading about it. What's it all about?" we said.

"APA wanna freez da barber. Washington's sheeza control da razor. Roosevelt is roll back da face massage. I'm a quit da biz."

"Well," we said, "you fellows have certainly been jacking up the prices. Look at me. Bald as a bat and you sock me 75 cents for a haircut."

"Da shave and da haircut sheeza no the same theeng like da lamb shop, da cheeze and da hamburger."

"I have seen shaves that had much in common with the hamburger," we remarked.

"I vote for da Roosevelt, I no shave for heem," snapped Raviola. "Da barber has to live."

"Why?" we asked.

—•—

"I'm a quit da biz," insisted Raviola, ignoring our query. "I no maka da ceiling. I no giva da haircut on points."

"You are evidently not aware that the shave and haircut are essential to winning the war," we suggested.

"Da boys wheech winna da war shave demselves," countered the barber. "General Eisenhower he no say da 75 cent haircut hold uppa da invashun."

"A haircut and shave are helpful to morale if properly priced," we argued.

"I no sella da morale. I sella da haircut. I am a quit da biz. You wanna haircut next time? You call up da Washington and ask OWI."

'Local Boy Makes Good'

("Our military leaders are delighted with the way the first all-draft units made good in the latest smashing Italian drive." — News item.)

The kids we saw in induction lines,
And wondered how they'd do—
The green hands drawn from their peaceful lives
To ways of war so new—
The lads from office, store and shop—
From farm and school and mill—
They didn't look so hot at first,
But how they fill the bill!

The tall and gangling, awkward kid—
And "Shorty" with the grin—
The youngster with the baffled look—
The kid with freckled skin—
The East Side hard-eyed sort—
"Not much like warriors," we mused—
They've answered now, "SEZ YOU!"

The lad that seemed so numbed and sad—
The one who clowned so much—
The other one called "Butch"—
All brought up in the peaceful ways,
We wondered how they'd cope
With fighters trained and in the pink . . .
Well, Hitler's got the dope!

The nervous boy who looked so tense
That morn the train pulled out . . .
The pudgy, bandy-legged one
Who seemed a mere Boy Scout . . .
"How will they do D-day?"
We asked ourselves, and now we know—
The answer is "O.K!"

The student type, the scholar sort,
The sloppy looking guys . . .
The kids who took it as a joke—
The ones with tear-filled eyes . . .
"They're no go-get-'em bunch,"
Some whispered, but behold 'em now—
Say, how those kids can punch!

* * *

The senate has cut the cabaret tax down from 30 per cent on each bill to 20 per cent and exempted all servicemen. We now expect thousands of men to claim they are soldiers and sailors who never thought of it before.

* * *

General De Gaulle strikes us as the type of man who would have to be dipped in boiling water to unbend.

Maternity Wear

A MATERNITY frock to be worn during the hot weather months must be cool, comfortable and as pretty as possible so that you do not grow weary of it. This young-looking dress and jacket will please you.

* * *

Barbara Bell Pattern No. 1995 is designed for sizes 12, 14, 16, 18, 20 and 40. Size 14 dress requires 4½ yards of 39-inch material, sleeveless jacket takes 1⅜ yards.

Household Hints

If a paper towel is used to line the bottom of the vegetable hydrator in the refrigerator it will absorb excess moisture and prevent spoilage.

* * *

Waxing curtain rods not only protects them from rust but makes it easier to slide curtains back and forth.

* * *

A splendid safeguard in the medicine cabinet is to place pins crosswise through the corks of any bottles which contain poison. A pricked finger will be noticed even in the dark!

* * *

If you are baking a number of pies and the last one won't quite fit into the oven, place a small deep lid or tin cup in the available space and put your pie on it. This raises the pie above the others, thus all may be baked at one time, saving considerable fuel.

* * *

When painting around light switch plates or similar metal surfaces, coat such surfaces with vaseline before beginning and it will be easy to wipe off surplus splashes.

* * *

Voile, lawn or organdy curtains will wash more easily if the dust is first shaken loose, then the curtains dipped in cold water before using warm water. Warm water sets the dirt, cold loosens it.

* * *

Damp clothes well hung are half ironed, and a clean line keeps clothes clean.

Ink Spots

By "JERGIE"

WE LACK A LOT OF IDEAS

This is one of those weeks when it seems like there is nothing particular to write about but there are a few things floating around that can stand airing.

To begin with Marie Blank got a lot of advertising and the Editor got a lot of ribbing for the way Marie's ad was jumbled up last week. Anyway it proves to us that people DO read the ads. If they didn't nobody would ever have noticed the mistake in the date. For you birds who act so dumb we will state that Marie's Beauty Shop is closed all of this week, except Saturday, July 15th:. (This time we looked at the calendar twice to be sure that was the correct date.) Yep, that time we got the buggy ahead of the horse.

Even the Methodist preacher had to tell us about the above mistake, so we will tell one on him. Rev. Harvey is more or less of a master gardener. (However, we still think Fred Nagel tells him how to garden.) Anyway, friend Harvey was bragging about picking ripe tomatoes off his vines Thursday, after we had told him that our garden had yielded nine pints of peas . . now canned and on the shelf He admitted his peas were nothing to write home about. So we asked him how about his beans? The Reverend gentleman got a far-away look in his face and a sheepish grin and then admitted, "Shucks, I forgot to plant beans this spring."

And him with nothing to do six days of the week!

And getting back to gardens again reminds us of the time a couple of years ago Dr. Missman and the Editor's wife had a sort of feud on as to whom could raise the biggest and best tomatoes that season.

Both participants in the argument soon were away out in front of the crowd and had some nice looking tomato plants. The Editor's wife bought some fancy plant fertilizer that was guaranteed to grow tomatoes as big as footballs (more or less,) and it began to look like she was going to win the race for having the first ripe tomatoes.

About that time "Doc" called her on the phone one day and told her he had RIPE tomatoes on his vines. She had to admit her tomatoes were still very green and much to brag about.

Not wanting the "Doc" to gloat over his triumph in her presence, she climbed into the family car that evening and very slowly and stealthily drove past the Missman garden. Sure enough, there were gorgeous, large, red-ripe tomatoes on the Doctor's vines; not one but several! And she had to admit her defeat . . . "Doc" was really a champion gardener.

But as time went on and a couple of years rolled by she heard the truth of Doctor Missman's ripe tomatoes. "Doc" had simply gone up town and purchased some nice red tomatoes that had been shipped in and tied them to his vines!

In the basement of the Northern Lumber Co. office there is a nice shower bath. The water is heated with a kerosene burner.

The boys in that neighborhood like to take showers there and quite often do so after a hard day's work.

A couple of weeks ago "Hank" Smidt, one of the boys at the elevator had wrestled with a car load of coal all day and looked very much like a Southern gentleman. "Hank" craved a shower so went to the Northern and was told by Manager Albertson to go ahead, but first he would have to fill the heater with kerosene and that there was a can of kerosene in a gallon can near the heater.

"Hank" went to the basement, procured the can and proceeded to fill the heater. He lit the burner and got ready for a nice shower. The burner sputtered and went out. "Hank" lit it again, and again and again. Gave up and took a COLD shower.

Next day Manager Albertson noticed "Hank" had filled the heater with PRESTONE, which was also in a can in the same room.

Next time "Hank" will probably clean out his ears first and listen to directions.

Anyway, "Hank" said he liked cold showers better . . . . we will take his word for it.

Our deluxe fisherman, Echard Adolph Zeidler, got his name on the front page of Garner Leader last week . . . but it cost him $5.50 to get the publicity.

It seems that Eck was fishing near the river bridge south of town and had his car parked nearby. An unsympathetic patrolman came along and charged our townsman of improper parking on highway without lights!

And that we say is a heck of a way to treat any fisherman.

MY HOBO PHILOSOPHY
(By Hobo Benson)

Official King of the Hoboes and Road Editor Of The Hobo News

The Hobo Philosophy is as old as mother earth itself. It is philosophy of independence of leisure, observation and life to its journey's end. I could enumerate for hours, names from B. C., up to now of crusaders, individuals and groups that followed the hobo philosophy. A few names like the following should convince the reader that I am not the only hobo philosopher:

Moses, Jesus, the Jesuits and missionaries were the most persistent followers of the open road. Jack London, Mark Twain, Walt Whitman, Thoreau, Roger Payne, and countless others of our time have been ON THE HOBO occasionally.

My philosophy is the Brotherhood of Man. Only in wandering as I have for the best part of two decades, could I absorb without the benefit of a college education, life in the raw. Soap-boxing as I have in nearly every big city in this country expounding and differentiating between the intelligent hobo (the migratory worker,) and the riff raff that I call tramps or bums. The only difference between a hobo and a non-hobo is that a hobo, most of whom are single men, refuse to work too hard or freight-train brakeman with proves he is a philosopher, for in the final analysis human beings "DO NOT LIVE TO WORK, but work TO LIVE". If this philosophy was practiced universally, it would reduce unemployment, improve health, and an opportunity to enjoy life. In other words, to "take it easy", as us modernists preach, but never practice.

For the duration Hobo travel has been almost eliminated. In the post-war period I can visualize a resumption of hobo travel, and I feel sorry for the railroad "Bull", or freight-train brakeman with nerve enough to mistreat the wanderers, many of whom will be veterans of this global war. These veterans all having had a taste of travel life will demand the privileges of travel life when broke and many will become hobos (migratory workers). In the final analysis I have never glorified hobo life, but natural desires must be realized. "Go West" shouted Horace Greeley. Hoboes are the back-bone of the nation.

—Britt News-Tribune.

SOMETHING TO KNOW

A good many people unacquanted with the situation wonder why thousands of men like to work in coal mines.

For one thing, coal miners are well paid; their average earnings being higher than the average for all industrial workers. Thousands of coal miners make $300, $400 and even $500 a month.

Their work surroundings are not unpleasant by any means. Mine temperatures range between 62 and 72 degrees, with fresh air circulating continuously.

That miners like their work is shown by the fact that mining has a lower labor turnover than the average of all the manufacturing industries. Many who do leave the mines, return to them.

FOR THE HISTORY BOOKS

It is worth remembering that the freight traffic on the railroads of the United States in 1943 was nearly twice that of the peak year of World War I in 1918, while passenger traffic was more than twice as great. The 1943 record was handled without the prelonged congestion and delays of the first world war period.

The 1943 job was done with one-third fewer locomotives, one-third fewer passenger cars, one-fourth fewer freight cars and with 500,000 fewer men.

Back of this performance was twenty years of improvement in plant, equipment and operating methods resulting from more than $10,000,000,000 in additions and betterments.

Back of it also was twenty years of planned and organized cooperation between carriers, employees and users of transportation, both private and government.

This is an example of practical planning by a private industry to meet an emergency when it occurred.

THE SPORT OF FISHING ENJOYED BY THE ANCIENTS

When the men and boys go out with fish-lines and hooks to gather in the wary denizens of deep lakes and shallow brooks, they can reflect that fishing is perhaps the most ancient sport in the world.

Izaak Walton, the Englishman, who about 300 years ago wrote a very famous book on fishing called "The Complete Angler", refers to the belief of some that the art of fishing was originated by Bel, who was a god of the Babylonians in the days before recorded history. Some had the idea that Seth, one of the sons of Adam of the Bible, taught fishing to his sons. Mr. Walton says in this book that a person who would be a good fisherman should have an inquiring, searching, and observing wit.

The searching, inquiring, and observant mind seems characteristic of a good fisherman. He watches the ways of fish. He studies the kind of water they like best, the conditions of weather, clouds, sunshine and food supply that induce them to bite or refrain from biting.

The habits of fish are something of a mystery. The beginner is often unable to see why sometimes they bite and sometimes they do not. The experienced fisherman discovers the kind of bait that is attractive to them, and how that bait should be handled He has observed the ways of fish hundreds of times, and has reached some conclusions as to why they do thus and so, and how they can be induced to take the bait.

Many famous men have been noted fishermen. They found that getting out along the brooks and lakes and on the sea in pursuit of these finny creatures took their minds away from their heavy problems. While they struggled to outwit these wily creatures, their minds clarified on the great issues they had to meet. They returned to their mighty labors better able to meet their problems. It has proved so to countless numbers who follow the fishy trail.—Maquoketa Community Press.

MISUNDERSTANDINGS

When General Jimmy Doolittle was a young lieutenant, he was ordered to fly an infantry general to an army post several hundred miles away. They had scarcely left the airport when they flew into an ugly storm, which caused the tiny plane to pitch and roll. The general was inclined to be nervous, but one look at the placid Doolittle, who was listening intently to what was coming over the earphones, dissipated his fears.

"I don't mind telling you that I was pretty worried up there," the general confessed after they had landed safely. "Lucky you had on those earphones. I could tell by the way you were listening that you were counting on the radio instructions to bring us in, in one piece."

"Heck," laughed Doolittle, "there weren't any instructions coming in. I was listening to the World Series!"

Author William Saroyan found a pair of nice heavy shoes in a department store.

"And now, how about a pair of skis?" asked the clerk.

"Skis? What would I want with skis?" demanded Saroyan.

"But you just bought ski boots," explained the clerk.

"Did I!" exclaimed Saroyan. "I thought they were just well-made shoes."

CARBON COPY

World Series fans remember this act which stopped the show in the Yankee Stadium. A vendor was making his way through the throng near the main gate, energetically shouting: "Popcorn, peanuts, candy!" A short distance behind him came a rather shiftless fellow, mumbling: "Ditto. Ditto."

We can print anything. Call at the Times Office.

HASTY CONCLUSION

At a Southern Army Camp, a corporal and a private were under court-martial on the serious charge of kicking a sergeant. The corporal explained that the sergeant had accidentally stepped on his foot, severely hurting a bunion, and that the kick had been a reflex action. The corporal apologized and was dismissed without punishment. The presiding officer then turned to the private.

"Well, you see, sir when I saw the corporal kick the sergeant," the private said, "I thought the war was over!"

THE MASTER'S TOUCH

Haydn, music teacher to Mozart, was skeptical when his pupil offered to compose a piece which he could play better than the master. Examining the piece after it was written, Haydn exclaimed: "Why here is a note to be played in the middle of the keyboard, when the hands are stretched out to both ends of the piano. Nobody can play such music!"

"I can," said Mozart. He took his place at the piano and when he came to the "impossible" note—he leaned forward and struck it with his Durante-like nose!

H. G. Wells, the English author, was extremely fond of American food. Once an American friend presented Wells with some kernels of sweet corn so that the author could raise his own corn. After sufficient time had passed for the vegetable to mature, the friend inquired how the corn tasted.

"Delicious!" replied the writer, "It's my favorite vegetable."

"How did you cook it?" asked the friend.

"Cook it?" asked Wells in amazement. "Was I supposed to cook it? Why, when the corn stalks were six inches high, I cut them down and served them as a salad."

ONE AT A TIME!

A society matron, anxious to show off the musical talent of her two daughters, asked the French composer, Saint-Saens, to play the piano accompaniment while the girls sang a duet. Saint-Saens obliged Unfortunately, the girls sang in poor harmony. Irritably, the composer banged on the piano and turned to the hostess.

"Madame," he said coldly, "which daughter do you want me to accompany?"

PATHS OF DESTINY

In the war of gallantry, the American Civil War, Stonewall Jackson happened to see two soldiers drawing a bead on a youngster in blue during the battle of Antietam. The Confederate general peremptorily ordered his men to hold their fire.

"He is too brave to die," said Jackson. "I have been watching and admiring him for hours."

The 19-year-old Union private thus saved was William McKinley, later to die, as President of the United States, as a result of the bullet wounds inflicted by an assassin.

VACCINATE SPRING PIGS TO AVOID CHOLERA OUTBREAK

Vaccinate the spring pig against hog cholera now as the pigs reach the weaning age of 8 to 10 weeks. Early vaccination saves cost because the amount of serum needed increases with the size of the pig.

Early listing of pigs with the veterinarian will probably enable him to vaccinate when the farmer is less busy with other work. And vaccinating now will prevent costly waiting for serum later. Last year many Iowa farmer's suffered extensive pig losses from cholera because they couldn't get serum on time.

K. W. Stouder, extension veterinarian at Iowa State College, says only healthy pigs should be vaccinated. Those suffering from diseases or parasites should be diagnosed and properly treated before they are inoculated.

Sow in the early stages of pregnancy may be safely vaccinated if they are handled carefully. However, where pregnant sows are about to farrow, dose of protective serum but not of virus may be used for an emergency vaccination. Then when the litter arrives, both sows and pigs can be double treated.

Reduce feed of pigs on heavy rations about one-half for 10 days to 2 weeks after vaccination, returning them to full feed gradually Stouder suggests. Also, isolate vaccinated pigs from all others on the farm for three to four weeks after vaccination. The veterinarian says they should be kept out of dirty muddy lots to avoid abscesses and infections which often cause loss and are sometimes erroneously called "serum breaks".

Farmers who are using horses should be careful to protect them from heat strokes during hot weather. Good preventives are frequent watering, regular grooming, plenty of salt and frequent rest periods, suggests Dr. K. W. Stouder, extension veterinarian of Iowa State College.

CENTURY FOR JACKSON!

July 4 marked the 100th anniversary of the migration of one branch of the Jackson family to Iowa—a branch that has had one or more members residing in Iowa all of those 100 years. C. I. Jackson, of near Leon, is the last living descendent of the orginal family of Jacksons that came from North Carolina in 1844. At that time, Mrs. M. Jackson with her family of five children crossed the Mississippi river near Nauvoo, Ill., and settled first in Van Buren county, Iowa.

O'BRIEN COUNTY IS IRISH!

An Irish patriot and politician was honored in the naming of O'Brien county in 1851. The county created in that year was named in "remembrance" of William Smith O'Brien who suffered imprisonment and exile, after commution of a death sentence for agitation of the repeal of the legislative union between England and Ireland. O'Brien was a member of parliament and educated at Trinity College, Cambridge.

SHOULD BE A LAW

A low-flying airplane over Howard county frightened a flock of turkeys on the Guy Swann farm near Riceville, and before Swann could extricate them from their huddle 216 of them had smothered.

REGIMENTATION.

The U S Employment Service in ruling that ice deliveries do not constitute essential industry, caused Al M Finch of the Winneshiek Motor Terminal, Decorah, to abandon deliveries to his Decorah customers. If you want ice there you have to go and get it.

LONG-TIME CHURCH TREASURER

Fifty years of service as treasurer of the Eldora Methodist church ended recently for Fred J. Edgar with his resignation. Numerous times within the last half century of his service he tried to resign his church post but the board refused to relinquish him During the period Mr Edgar handled an estimated $150,000 funds His place now is to be taken by D W Dickinson.

TWO ALARM FIRE

Mount Pleasant firemen were called out twice in 24 hours recently to extinguish a fire in a parked car belonging to a Wayland man. The first fire occured on a Saturday night while the car was parked near the Mt Pleasant Presbyterian church. Early Sunday, after the owner had made repairs, the car again caught fire with firemen responding a second time.

TEN TO ONE

Of 11 babies born in Knoxville during the week of June 25 ten were boys and one was a girl, a delivery record which Knoxville Journal asserts is "a good ratio of boys for the girls of this coming generation".

J. R. Tabb of Corwith spent Saturday afternoon visiting at the John Chambers home. His son, Jack, left that evening for Camp Maxey, Paris, Texas, the same camp where Lt. Kilgore of Klemme is stationed. The latter is in Co. D. and Jack is in Co. I.

BETTER IOWA GARDENS

Kohlrabi, turnips, winter radishes, endive and Chinese cabbage can now be planted in northern Iowa. Gardeners in southern Iowa have until the latter part of July to plant these vegetables, all of which may be stored for late fall or winter use.

* * *

White Vienna is a good variety of kohlrabi to plant. For turnips, plant Purple White Globe; winter radishes, Rose China or Black Spanish; and for Chinese cabbage, Chihili or Pe Tsai.

* * *

Fill the seed furrow with water when making mid-summer plantings. After covering the seed with dry soil, protect it from beating rains or hot sun by using boards or a dry mulching material. If no protection is given, it will be necessary to break the crust which forms after a rain or irrigation, to allow delicate seedlings to come through.

* * *

Summer plantings make relatively faster growth than spring plantings. Thus quickly available fertility is even more necessary for summer gardens. Application of fertilizer will be helpful, especially if there is plenty of mositure.

* * *

It is not necessary to remove suckers from sweet corn. Yields may be cut in half if suckering is done after the ears are formed. Apparently no harm is done, however if suckers are removed early.

Cutting back onion leaves is a poor practice. The leaves are needed to produce food, which in turn is stored in the hull.

* * *

Similarly, do not cut back the vines of sweet potatoes. While many gardeners have the idea that cutting back vines will cause roots to form, experiments indicate that yields may be reduced about half. If sweet potato roots have not been developing well, there is some good reason. One cause may be lack of available potash in the soil.

* * *

One advantage of dense shade or a good mulch around vegetable plants is the addition of moisture to the soil. Bare soil exposed to the sun is warmed so much that water is not added to it except by irrigation or rain. If the ground is shaded or mulched, however, the ground is kept cooler than the air. As the warm air creeps through the mulch and strikes the cool ground, moisture is condensed and added to the soil. This phenomenon is commonly observed when warm air strikes a glass of iced water and moisture forms on the outside of the glass.

KLEMME LOCALS

Mr. and Mrs. Art Thompson of Britt visited at the Dr. D. P. Anderson home Sunday.

Gertrude Priebe of Duncan was calling on Klemme friends Saturday evening.

Mrs. Naska Bock is spending this week with her daughter Mrs. Lyle Burr and children of Mitchelville at a cottage at the Lake.

Mr. and Mrs. Francis Buseman and Mr. and Mrs. Melvin Buseman spent Sunday visiting at the Wayne Pavey home at Webster City.

Miss Gladys Schlichting of Mason City spent the week end with her parents, Mr. and Mrs. Fred J. Schlichting.

Miss Jessie Coobs of McGregor, spent a few days with relatives here. She is a registered nurse at Rochester, Minn.

Mr. and Mrs. Marvin Isvik and children returned to their home in Chicago Wednesday after visiting at the parental C. A. Larsen home in Klemme and at the Isvik home in Jewell.

The following went to the Walter Ridder home at Leland Saturday to help Mrs. August Ridder celebrate her birthday: Mr. and Mrs. Emil Beier; Mrs. Frank Ward; and Mr. and Mrs. Ben Ridder and Elwyn.

Mr. and Mrs. Alvin Stokesbary and Ardith and Albert Yahnke of Garden City, Minn, and Mr. and Mrs. Everett Stokesbary of Good Thunder, Minn., came Saturday evening and visited until Sunday evening at the C. A. Larsen home. Mr. and Mrs. E. G. Ell of Belmond visited Sunday afternoon at the Larsen home.

If farmers and dairymen will watch the loss and use of cream and milk on the farm they can greatly relieve the shortage of butter that now exists. For example, calves need whole milk only for the first month; cut down on the amount fed cats and dogs, watch to see that the separator is skimming properly.

KEEP FRUIT TREES COVERED WITH SPRAY

This year the first cover spray for fruit trees should be applied 10 days after the calyx spray instead of 14 days later, as would normally be the case in a drier season, says County Extension Director Paul Henderson. Rainy, muggy weather has been ideal for the development of most plant diseases. Then, too, more frequent spraying is necessary as sprays do not remain effective over as long a period during a rainy season.

Apple scab, brown rot on plums and cherry leaf spot develop rapidly during periods of warm, cloudy days and frequent rains, Henderson states. In fact, in unsprayed orchards this year it looks very probably that such diseases will be so severe as to practically ruin most of the fruit. Scab is later in getting started this year, but it is showing up in southern Iowa. It can easily be observed as a brownish growth on apple leaves.

Either lime sulfur or bordeaux can be used in this first spray. If lime sulfur is used, mix 2½ quarts of the liquid lime sulfur, or 2½ pounds of the dry form, with 1½ pounds of lead arsenate in 50 gallons of water. To this add 1½ pounds of hydrated lime to help prevent the lime sulfur from burning the trees.

Or a 2-3-50 bordeaux mixture can be used with 1½ pounds of lead arsenate. The bordeaux mixture and the lime sulfur help in controlling diseases and the lead arsenate aids in controlling insects.

Pullets raised on clean ground put all of their effort into growth instead of fighting parasites and diseases.

YOU KNOW

I was raised on a farm. They used to pass the pie sometimes before I was ready. I have learned it is a good idea to take some pie when it is being passed. Sometimes it is all gone before you are ready. I Think it is gonna be that way about used cars pretty soon. This is all of our cars.

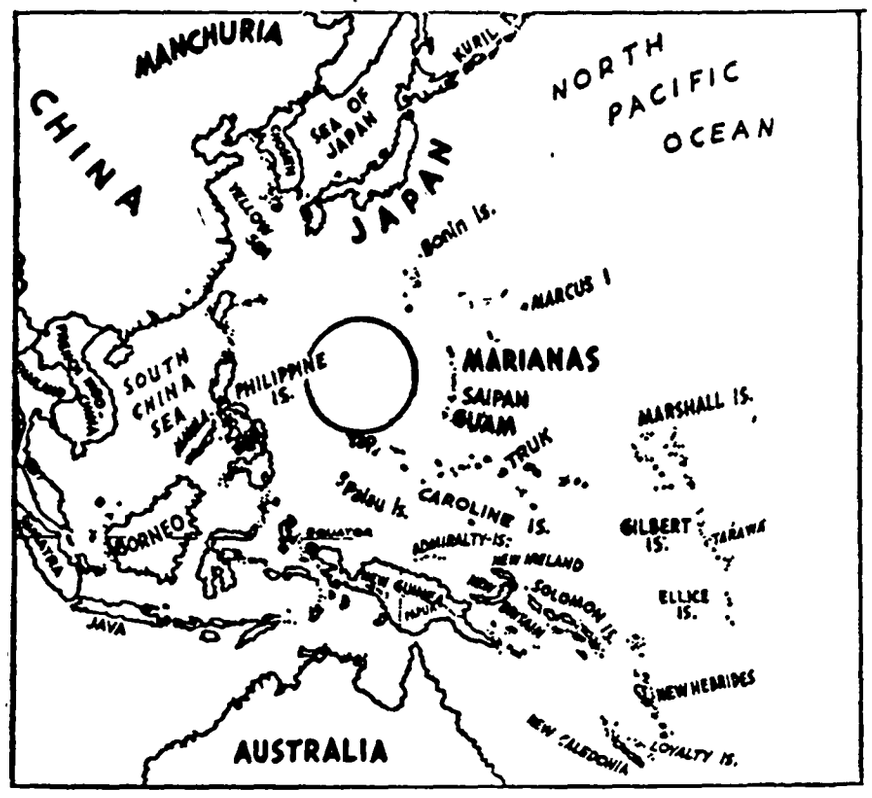
WEEKLY NEWS ANALYSIS

U. S. Navy Blasts Japan's Fleet But Enemy Refuses Showdown; Allies Push Forward in Europe

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)



Pacific—Circle indicates scene of big naval battle in which U. S. fleet clashed with strong Jap forces.

EUROPE:
Last Stand

As U. S. Doughboys closed on the big French port of Cherbourg at the tip of the Cotentin peninsula about 75 miles from Britain, desperate German defenders acting on Field Marshal von Rundstedt's orders to resist to the last man, put up a bloody last-ditch fight, demolishing the harbor facilities to prevent their immediate use when the town fell.

As the Yanks pressed in on Cherbourg, other Allied forces along the 100-mile-wide beachhead continued to probe deeper inland, meeting up with stiff Nazi counterattacks designed to curtail their advances.

Fleets of Allied bombers roared over the battle area, hitting at Nazi strong points and aiming at enemy reenforcements moving up to the front. Ramps in the Calais region from which the Germans were launching their rocket bombs for attacks against southern England and London, remained under heavy fire of Allied aircraft.

Other Fronts

On other European fronts, the Russians reportedly launched a large-scale offensive against the Germans' big bulge on the north end of the 1,200-mile eastern battle line, while Allied troops chased the Nazis up the Italian peninsula to prepared positions guarding the northern plains.

Using strong tank and infantry forces, the Reds reportedly struck at German forces massed to retain the Nazis' last great foothold on Russian territory, even while they were continuing their drive through tiny, tottering Finland from the southwest and east. Not only would the direction of the new big offensive point Red armies toward Warsaw and Berlin, but it would also serve to whittle down a potential Nazi springboard for an encirclement attack against Russian forces to the south.

In Italy, Allied forces moved ahead after eliminating pockets of stubborn German rear-guards, putting up a desperate delaying action to permit the bulk of the Nazi forces to retire behind the new defense line.

BILL OF RIGHTS:
For GIs

Estimated to cost from 3 to 6 billion dollars, congress passed and the President signed the so-called "bill of rights" for vets of World War II, designed to avoid the hardships suffered by soldiers of World War I upon their demobilization.

Under the "bill of rights," vets will be entitled to an unemployment compensation of $20 a week for 52 weeks during the first two years after the war, if unable to find suitable work. Also available will be at least one year of schooling for vets whose education was interrupted by the war, with the government providing $500 for tuition and $50 monthly for subsistence, plus $25 for dependents.

For vets seeking to buy or repair farms or homes or establish small businesses, the government will guarantee 50 per cent of the loan up to a maximum of $2,000, with interest at 4 per cent and the amount repayable in 20 years. The veterans' administration also is authorized to spend one-half billion to provide hospital facilities for the care of returning servicemen.

PACIFIC:
Japs Run Out

Venturing forth from its home waters, Japan's boasted imperial fleet sailed within proximity of the U. S.'s mighty Fifth naval force but dodged a showdown fight after U. S. planes sent one enemy aircraft carrier and three of his tankers to the bottom of the sea between the Marianas and Philippine islands.

Adm. Spruance

Plowing boldly into the foe's home waters to support U. S. marine and ground troops in their assault on Saipan island in the inner ring of the Japs' defense system, the Fifth naval force under command of Adm. Raymond Spruance offered a brave challenge to the enemy fleet close to its major bases, but the Nips broke off the engagement after suffering loss of 373 planes besides the four ships in two days of continuing action.

Meanwhile, U. S. ground forces met bitter opposition on Saipan, about 1,500 miles from the Japanese homeland, as they fought to extend their hold on the central sector of the island.

OPA:
Vote Extension

By agreeing to allow revisions in ceilings of major textile items to reflect parity prices on cotton, senate and house conferences paved the way for extension of OPA to June, 1945. The nation's farm bloc scored another victory in the act's provision that the President take all lawful action to assure parity on cotton, corn, wheat, rice and tobacco.

Whittling down a maze of amendments to the act, the conferees did provide for some changes in OPA, including:

1. Filing of protests against OPA regulations;

2. Adjustment of rent ceilings where they are higher or lower than the prevailing standards, or if landlords' costs or taxes have increased substantially;

3. Permission for retailers to carry higher priced goods in certain lines than they did in the prewar period.

FOOD:
Postwar Stocks

In order to avoid the glut of 1919, the government's surplus stocks of foods will be released through normal trade channels after the war, M. Lee Marshall, War Food administration director of distribution, revealed.

Although original vendors would be given the opportunity to repurchase food stocks, WFA will only accept fair bids and sell in areas where particular types of commodities are scarce, Marshall said.

With the termination of the war in Europe and the shipments of food overseas, there will be no need for the stockpiling of commodities, Marshall said. Coupled with military reserves, present food stocks should provide a large part of the needs of liberated people, who will have to eat while being rehabilitated.

HIGHLIGHTS . . . *in the week's news*

P.O.W. STRIKE: German war prisoners have refused to work in beet fields near Scotts Bluff, Neb., because their pay basis has been changed. Formerly they received 80 cents a day flat rate. This has been changed to a piece work rate of 30 cents for each quarter acre thinned. Lieut. Col. Clyde Dempster said disciplinary action would be taken if the men continued on strike.

EMPLOYMENT: A decline of 100,000 workers per month in war plants has been the trend since the beginning of the year, the department of commerce reports. While in sections shortages of manpower exist, the overall picture of the nation is a downward movement in factory employment, the report went on. In nonwar jobs, employment will remain the same.

CONGRESS:
Spends Less

For the first time since the war broke out, congressional appropriations will fall below the 100 billion dollar mark for the fiscal year starting July 1.

Because of the completion of capital outlays and the large stockpile of war materials, Chairman Cannon (Mo.) of the house appropriations committee estimated provision of 66 billion dollars for the impending 12 months, including approximately 5½ billion dollars for such items as financing the national debt.

Following Pearl Harbor, congress appropriated 147 billion dollars, and then supplied 114 billion dollars for the next year. Declaring congressional appropriations "definitely have passed the hump," Chairman Cannon said they would continue on the down-grade, regardless of war developments.

AGRICULTURE:
Release Trucks

To help in the harvest of this year's big wheat crop, surplus used army trucks will be made available to farmers and haulers through the medium of county AAA offices.

Because of the limited supply of trucks, however, only a small percentage in proportion to actual demand will be available, and the vehicles will be allotted only on the basis of the most critical need.

After certification of an application by the AAA, dealers will then purchase the trucks from the U. S. treasury's regional procurement office at an appraised price, and sell to the farmer or hauler at or below OPA ceilings.

SURPLUS GOODS:
Overseas Disposal

Treated as a valuable national asset, U. S. surplus goods overseas should be disposed of in foreign countries with the aim of realizing the highest possible profit, a business advisory committee established by the government said.

Although keeping one eye cocked on postwar trade, the committee advocated the disposal of surplus industrial equipment, observing that the sooner the devastated countries can be restored to production, the sooner they will cease to be candidates for relief.

In cases of low bids for surplus materials, sales might be made on the condition that the foreign purchasers will buy other new equipment from this country, the committee counselled.

RECONVERSION:
Conflicting Plans

The question of whether policy on the reconversion of industry from a war to a peacetime basis should allow certain manufacturers to resume civilian output while competitors are still engaged in war work, reportedly has divided the War Production board into two camps, with WPB Chairman Donald Nelson favoring the procedure and WPB Vice-Chairman Charles Wilson opposing it.

Donald Nelson
Charles Wilson

In recently relaxing restrictions on use of materials for civilian production in areas with labor surpluses, Nelson declared that the withholding of civilian production until all companies might return to such work would result in regimentation of industry for a prolonged period.

On the other hand, Wilson reportedly contends that manufacturers allowed to resume civilian production before others would enjoy a jump in the market on war contractors, who would virtually be penalized for their efficiency in fulfilling government orders.

WHISKY:
May Ban Corn

Although distillers' facilities have been released from the production of industrial alcohol for war purposes during August, the prospect arose that they would be unable to use corn in the manufacture of whisky during the month because of the War Food administration's opposition in view of the tight feed situation.

Because of this opposition, distillers may be compelled to use wheat, rye and possibly Carribean molasses, it was reported, with restrictions even on wheat.

With farmers already having turned in close to 65,000,000 bushels of corn to the government for processing uses despite the tight feed situation existing, the WFA promised that none of the grain would be diverted to alcohol.

PATENTS

"Distinct patent rights should not be granted for the sole purpose of handicapping future inventors whose discoveries would not otherwise infringe the complete patent," ruled the U. S. Court of Appeals for the District of Columbia in a case involving a canning company.

A concurring judge stated that the decision will "require considerable reexamination—if not readjustment—of patent office practices and procedures, especially with respect to subcombination claims."

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

LETTER TO A LONELY MOTHER

To a lonely mother with a son on the beachhead in Normandy and another in the Aleutians:

Dear Mrs. R.: I have your letter wondering why you should sacrifice the sons you so carefully taught not to hate or to hurt, on a bloody beachhead where every minute they must hate and hurt in order to survive.

You say that you write and tell your sons that, after it's over, life will be the same and we'll all be happy, but that, deep in your heart, you know it won't be, for there will be more wars and more bloodshed all over again.

Naturally you would expect a hard-boiled and cynical newspaper man, trained to look under rocks for all the seamy side of official life, to agree with you that we will have more wars and that your boy on the Normandy beachhead is making his sacrifice in vain. But somehow or other, I don't agree. Somehow or other, I have a sneaking suspicion that things are not going to be so bad, and that we may be able to prevent your son's son from doing what his father had to do in Normandy.

Maybe I am too much of an optimist, but it seems to me, looking back, that we made a lot of progress toward permanent peace between the last war and this. In the end, we failed. But there are a lot of things you do that fail the first time, or even several times, before you finally make the grade.

Kellogg's Dream of Peace.

One of these tries which failed was the Kellogg Treaty to outlaw war. Old Frank B. Kellogg, who wrote that treaty, was just an ordinary American citizen from Minnesota, not much different from the rest of us. He was Coolidge's secretary of state, and not a very brilliant one. But he had one great dream—to outlaw war.

And he kept pecking away at it, and hammering the idea home on the unwilling governments of Europe, until the people of Europe were too strong for their governments, and they just had to sign the Kellogg Pact.

I was with Kellogg when he sailed to Europe to sign his pact, stood with him in the Quai d'Orsay in Paris when, with a great gold pen given him by the people of Le Havre (a city now under bombardment), he scratched his signature to the document which carried the hopes and prayers of millions.

Of course, many of the diplomats who also used that golden pen on that hot August afternoon in 1928 had no sympathy with the hopes and ideals of the people they represented—among them, Count Uchida, whose imperturbable face gave no hint that four years later he, as foreign minister of Japan, would be snapping his fingers at the treaty he had signed.

Cynical newsmen watching the ceremony remarked that this would be another case of the League of Nations—an instrument of peace devised by the United States but which the United States would abandon. There, however, they were wrong.

Frank B. Kellogg, of course, was ahead of his time. But so were most of our great leaders—Washington, Jefferson, Lincoln. The history of progress is a constant succession of men who are ahead of their time.

Stimson's Fight Against War.

However, it did not fail until it had been used—and almost successfully—by another man also ahead of his time, the man who succeeded Kellogg.

Henry L. Stimson, secretary of state under Hoover, was one of the few men in high position who then saw clearly signs of approaching wars, and who figured that, if the world could head off the minor wars in the Chaco between Paraguay and Bolivia, in Siberia between Russia and China, and in Manchuria between Japan and China, then we could build up a machinery of peace strong enough to head off the major war which he knew was coming on the continent of Europe.

His greatest effort was to mobilize the peace machinery of the world against Japan in Manchuria. And he almost made it.

That he failed was due to an isolationist revolt inside his own Hoover cabinet, plus the undercutting of British imperialists who put their own selfish empire ahead of world peace.

I was with Mr. Stimson during part of that trying time. I know how heroically he labored. Three times in all, he went to Europe determined to hew out new machinery for peace.

MAIL BAG

Capt. Dan T. Moore, Washington—Thanks for the gentle reminder that r-a-d-a-r spelled backwards is r-a-d-a-r. . . . **Pvt. Gordon Lange, Camp Grant, Ill.**—Other names for General Donovan's office of strategic services are: "Oh So Secret," "Office of Synthetic Soldiers" and "The Cloak and Dagger Club." Its job deals largely with highly secret intelligence, some of it behind the enemy lines. Tradition is that, to get in you have to be a Republican, though a few lonely Democrats have been admitted.

Walter Winchell

(WNU Service)

Things I Never Knew About the White House:

Truly a product of the melting pot is the White House . . . Charles Pierre L'Enfant, a Frenchman, chose the site . . . James Hoban, a Dublin Irishman, designed and built it . . . Whites and Negroes representing 11 different countries had a hand in its construction.

It cost the gov't just $50, the price of a gold medal, to have the White House designed . . . Congress sponsored a national contest for the design. Hoban won it . . . The prize was either the $50 medal or $500 in cash. Hoban patriotically chose the medal . . . In his 42 years of subsequent work in Washington, Hoban never designed another building.

No one today can tell where the cornerstone of the White House is placed. Successive layers of white paint, from which the mansion gets its name, have effectively concealed it from sight and knowledge . . . Part of the money for building it came from lotteries.

George Washington, who helped supervise the construction of the White House until the week of his death, always referred to it as the Federal Palace or Mansion . . . With typical modesty, which should be a lesson to some of the politicians of our day, he never called the city of Washington by that name . . . To him, whether in public or private, Washington was always the Federal City.

The sit-down strike is neither new nor novel . . . It was tried way back in 1800 by the crews working on the White House. They were ordered to move out of the shacks on the White House grounds in which many lived with their families, so these unsightly structures could be razed . . . They refused because they had nowhere to move and staged the first sitdown strike in protest.

Diplomats now consider Washington the prize post . . . It wasn't so in the old days. Washington and particularly the site of the White House were considered so unhealthy the British gov't decreed its representatives should be awarded additional pay for serving there . . . It did not become the White House officially until Theodore Roosevelt moved in. He ordered that simple name engraved on his official letterheads after it had been almost completely rebuilt.

The White House staff has never been known to betray an important secret . . . Woodrow Wilson, whose life is being dramatized on the screen by Darryl F. Zanuck under the title, "Wilson," inadvertently made known his decision to declare war on Germany to at least two members of the White House staff, but not a word leaked out in advance of the official declaration . . . Some members of the staff also knew of his plans to wed Edith Bolling Galt well in advance of the event but kept the secret well.

Gruff old Andrew Carnegie during his lifetime saw to it that the White House had plenty of Scotch, no matter who was President . . . He'd order it in kegs from Scotland and have it sent directly to Washington and the Chief Executive with his compliments . . . President Wilson, however, refused to accept the Scotch, and Carnegie discontinued the practice.

Andrew Jackson, for sentimental reasons, turned the White House around by putting the formal entrance on the north side, facing Pennsylvania Avenue. He wanted to save his good friend, E. P. Blair, some steps. Blair had built his house on the opposite side of the avenue to be near the President, and Jackson reciprocated by putting the entrance that much closer for his boon friend.

The busiest phone in the White House is not the President's . . . The chief usher gets many more calls because of the innumerable duties and functions which fall to him . . . Petty pilferings are higher at the White House than in any other official building in the world . . . Individuals high in public life have been known to filch knives, spoons and forks for souvenirs . . . Lesser fry will grab anything for the same purpose, even to snipping off tassels from draperies or cutting out pieces of tapestry from chairs.

All packages and gifts sent to the White House go automatically to the White House garage 8 blocks away to be meticulously and scientifically examined against any attempt on the Chief Executive's life . . . The White House has undergone innumerable changes and modifications and has been completely rebuilt twice. Tradition and circumstances have given the White House practically a living personality. It is constantly being quoted in the newspapers as "the White House says"

JUST FOR A LAUGH

Step Aside

Jasper—Dad, I want to be a tank when I grow up.

Mr. Horner—Well, son, I'm sure that's what you will be, I certainly won't stand in the way.

Love makes time pass, versa.

Raking It

Mr. Testy—Great Guns! Is that caterwauling next door?

Mrs. T.—That is Mrs. Lungs practicing her voice.

Mr. Testy—Cultivating? I'll say it's cultivating. It's harrowing.

Could Tell

Fannie—I saw Sue yesterday and we had the loveliest confidential chat together.

Carrie — I thought she wouldn't speak to me today.

Mrs. Nuwed—Darling, will you lend me twenty dollars, and give me ten of them? Then you owe me ten, and I'll owe you, and we'll be straight.

Cause Aplenty

Monthly bills for electricity running excessively high. The owner could not find the cause until he idly asked the cook, "How do you like the electric refrigerator?"

"Oh, I like it fine," the cook replied. "I open the door and light off the whole kitchen."

...is difficult for farm owners to ...much out of these small cash ...mes. Even a farmer with an ...age net income of $2,000 a year ...it hard to put much aside for ...ge or misfortune. The constant demands for maintenance of fertility, repairs, buying machinery and livestock, and so on, all require cash, and there is often little left at the year's end to build up a retirement fund. Often, when the farm operator has to quit work, his family is in difficult straits, and may have to depend on public aid or charity.

The tenant farmer and the farm laborer generally are in worse circumstances than the man who owns his land, once they have to quit working. With little or no savings, the tenant and the farm hand who cannot earn anything are soon hard up indeed. They and their families suffer humiliation and want.

War Changes Things.

The war, of course, has made a great difference in the farmers' situation. The incomes of many are double, in some cases treble, what they were before. But the war—and perhaps our present prosperity—is temporary.

Farm people were left out of the social insurance program not because they were thought to be already secure. The reason for excluding them was that in 1935 the program was new and the administrative hurdles looked very high. But now the Social Security board is convinced that old-age and survivors insurance can be administered for farm people simply, at low cost, and without being unduly troublesome to them.

What would it mean to farm operators and farm hands to have this insurance? It would mean the same protection it means already to those who are under the system. A couple of examples will illustrate the protection old-age and survivors insurance offers.

Back in 1936, when Harry J. was nearly 60, he got himself a job with a construction company. After eight years, he wanted to stop working and retire to his small place in the country. He hadn't felt he could do so, however, because he wasn't sure he could earn a living from farming his few acres. Upon inquiry he found that his monthly retirement payment would be about $27, since he had earned an average of $100 a month. His wife, who was also past 65, would get half that much; so that would make the family income over $40 every month, sufficient for their needs.

Widow Got $79 a Month.

Mr. C. was a newspaper linotype machine operator and had always earned high wages. He hoped to give all five children a good education. The two elder ones were attending the university. Suddenly Mr. C. got pneumonia and died within a week.

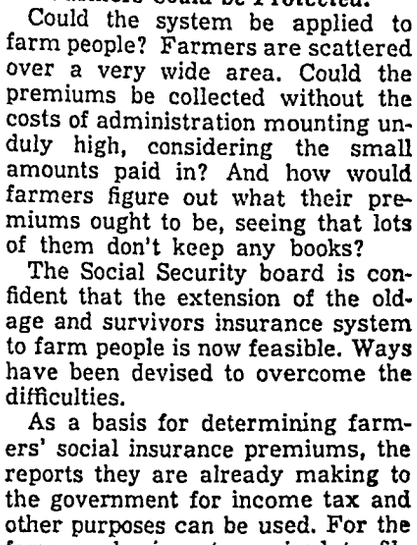
The widow was left with three children still at school and no income save what Mary and Jean could earn by leaving school and taking jobs. She went to the Social Security field office, thinking that perhaps there would be a small lump sum going to her, probably no more than a couple of hundred dollars. She was amazed to learn that she was entitled to monthly payments for herself and the three younger children! She received

A midwestern farmer smiles with satisfaction as he reads the figures on a check received for his produce. Agricultural income is now two to three times the 1939 level, but this happy situation won't last, economists warn. Unless this middle-aged man is fortunate, however, his savings will dwindle away, and he will face old age without security.

about $79 a month under the old-age and survivors insurance program!

Mrs. C. is one of 765,000 persons—workers past 65, their aged wives, widows, and children and dependent parents—who today are receiving monthly payments on account of old-age and survivors insurance. To date the system has paid out nearly half a billion dollars.

The mechanics of old-age and survivors insurance are simple. Every pay day every worker in a covered job pays, under present rates, 1 per cent of his wages as a premium on his old-age and survivors insurance. This is deducted from his pay by his employer, who pays an equal sum. Four times a year the employer sends both contributions in



Many men are able to work even in old age, like this sturdy Florida farmer. He knows, nevertheless, that he will have to quit in a few years, or maybe much sooner. If he could anticipate a regular flow of Social Security checks he could face the future with much less concern.

to the federal government. Together with the money he sends a report of the amount of wages paid the worker, to be duly entered in his social security account in Baltimore, Md. On the basis of these wage records, the insurance benefits are figured.

Farmers Could be Protected.

Could the system be applied to farm people? Farmers are scattered over a very wide area. Could the premiums be collected without the costs of administration mounting unduly high, considering the small amounts paid in? And how would farmers figure out what their premiums ought to be, seeing that lots of them don't keep any books?

The Social Security board is confident that the extension of the old-age and survivors insurance system to farm people is now feasible. Ways have been devised to overcome the difficulties.

As a basis for determining farmers' social insurance premiums, the reports they are already making to the government for income tax and other purposes can be used. For the farmer who is not required to file income tax returns, would figure his income on the basis of the estimated "market value of his services." In doing this he could guide himself by the wages received by his highest paid farm hand. If he employs no labor, the monthly wage rate for farm labor in his locality would serve.

Farmers could pay their premiums at times most convenient for themselves. Some might find it convenient to pay a lump sum annually, and others might prefer to pay in four annual quarterly installments. Low-income farmers could pay their premiums in social insurance stamps if they chose. They would buy these currently and put them in a social security stamp book which could be turned in from time to time as payment toward their premiums.

Collections Through Stamps.

For farm help, the stamp method might be best, the board thinks. The farmer could buy social insurance stamps from any post office or rural letter carrier, and insert them in the stamp books furnished him by his workers when he paid their wages. Half the cost of the stamps would be deducted from the worker's wages as his social security premium. When the worker's book was full, or at the end of its period of validity, he would bring or mail it to any office of the board so that it could be added to his record.

With the stamp system the "small" farmer would find it unnecessary to keep books or file reports about the wages of his paid help. On the large farm the stamp method could be used for temporary or casual workers not carried on the regular pay roll. Wages paid in the form of room and board and the like might be included in the worker's total wage, and the value set on them could be based on data gathered and published from time to time by the department of agriculture.

Farm people have every claim to be included under the old-age and survivors insurance program. Their claim is all the stronger because many of them are already partly under the system. In the wintertime, or in other off-seasons for farm work, many farm people work in industry and pay premiums on social insurance. In a lifetime, their payments amount to substantial sums. And yet very few people ever get benefits because they don't work in covered employment long enough or often enough to qualify for the monthly payments. The inclusion of farm people under the program would at once both rectify the injustice to these workers and plug a big gap in the social security program.

(Left) An elderly woman cashes her old age insurance check in a New York bank. Since February 1, 1940, persons over 65 are eligible to receive the benefits of Social Security payments, even though they have worked only a short time under the system and have contributed little to the fund.

(Right) This New York couple was the first to apply for monthly payments to which they were entitled under the Social Security system. The checks began to flow out in 1940.

SUCCESSES AND FAILURES OF ISRAEL

LESSON TEXT—Judges 2:6-16.
GOLDEN TEXT—Righteousness exalteth a nation; but sin is a reproach to any people. —Proverbs 14:34.

The success or failure of both nations and individuals is ultimately determined by their attitude toward the law of God. He is always right and true. The constant factor in a world order that swings wildly from one extreme to another, is His law, which is perfect and eternal.

God is no respecter of persons. Even Israel, His own chosen nation, found that observing God's law meant blessing, and failure to do so brought judgment and sorrow. No man is great and powerful enough to ignore this rule—and none is exempt from its operation.

I. Remembering God Brings Blessing (vv. 6-9).

Although Israel had not fully obeyed God's command, and had been rebuked by an angel of the Lord for their failure (Judg. 2:1-5), they had come into a measure of their inheritance under Joshua.

They now possessed that inheritance and entered into enjoyment of it (v. 6). It is one thing to have an inheritance, but another thing to claim it and make use of it. Countless Christians have never taken out their inheritance in Christ. All they have is the earnest (Eph. 1:14) or "down payment."

God never meant that any child of His should live a poverty-stricken spiritual life, or should go halting on first one side and then the other. He has made provision for a full-orbed, strong and joyful life. Why not enter upon your full inheritance in Christ now?

As the people of Israel took possession of the land, they went forward in the way of blessing as long as Joshua, and the elders who remembered God, kept them steady and true. We have here an excellent illustration of the power of a godly example. It is far stronger than we think.

II. Forgetting God Brings Backsliding (vv. 10-13).

The fact that a people has been highly privileged and has been exalted to a place of power and honor will not save it in the day when God is forgotten. Israel no longer had God-fearing men to bring it back to God, and so began its awful drifting away from God.

We Americans are rightly proud of our great land, its mighty resources, its fine past and promising future. But wait—what is the future to be? Oh, we say, the most glorious days are ahead. They may be, but only if we, like our forefathers who established this nation, recognize God. If we do not, America will go the way of the forgotten empires of centuries past, and that in spite of all its past achievements and its present promise.

Let us always remember that America is not some vague entity apart from us, for we, you and I, are America, we determine what it shall be, and how it shall relate itself to God. Let us be sure that no one we know ever forgets God.

It is a significant thing that the leaders of our nation so often come from Christian homes, but it is sad that they are so frequently not Christians themselves. Their lives are shaped by the teaching and influence of godly parents who reared them, but what will their children do if they are not brought up in the fear and admonition of the Lord?

Forgetting God is bad enough in its immediate results, but just ahead there is great and certain disaster.

III. Forsaking God Brings Judgment (vv. 14-16).

God not only will not hold a backsliding nation guiltless, but will bring judgment even if He has to turn over His people to a despoiling nation. He has instruments of individual and national chastisement, and He is ready to use them.

Notice that wherever they went the Lord's hand was against them. There is no place to flee from the presence of God. Anyone who thinks he can do it, should read Psalm 139:7-12. It can't be done. That is a comfort to the believer, but it is not a little disquieting to the unbeliever.

God, however, always remembers mercy in the midst of judgment (Ps. 101:1). He sent judges to deliver Israel, when He was sure of their repentance (v. 16). "If there was ever a time when nations needed deliverers, it's now. The systematic looting of subjugated peoples, the deliberate murder of multitudes of Jews, the mass executions of many innocent people in reprisal for some patriotic act of resistance, are evils that cry to heaven.

"If men would call on God not merely for deliverance but in real repentance for sins committed 'perhaps the God who delivered Israel' would send deliverance to suffering people still" (Arnold's Commentary).

Well—why not call on Him now, in earnest repentance and faith. Will you do it?

THINGS for You TO MAKE

Pattern No. 671

THIS chubby-cheeked dolly with movable limbs is in for lots of loving. Three pieces form her soft, cuddly body; the arms and legs are each made from two pieces. Her hair is soft yarn and her pretty clothes may be chosen from the contents of your scrap bag.

Pattern 671 contains transfer pattern and directions for doll and clothes.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

A General Quiz

The Questions

1. What is an etude?
2. What does the term "blood heat" mean?
3. Where are penguins found?
4. When were the Hawaiian Islands discovered by James Cook?
5. What state in the Union has the longest shore line?
6. What name is given to a native of the Aleutian Islands?
7. What is the meaning of the word "cornucopia"?
8. The oldest known printed book, printed from blocks, has a foreword saying it was printed in China in what year?

The Answers

1. A musical study or practice of some special point of technique.
2. The normal temperature of a human being, about 98.6 degrees F.
3. At the South Pole.
4. In 1778.
5. Michigan.
6. Aleut.
7. The horn of plenty. A horn of fruit and flowers—abundance, plenty.
8. In the year 868.

Flags on Capitol Fly Day, Night Since World War I

The office of the architect of the Capitol says that the custom of flying a United States flag night and day at all times from the east and west porticoes of the United States Capitol originated during World War I. It was felt for patriotic reasons that there should be one building over which the flag never ceased to fly.

The Capitol was selected as being typical of the United States, and as being outside of military regulations, which, of course, demand the furling of the flag at sunset.

SNAPPY FACTS ABOUT RUBBER

Latest government figures show that 80 per cent of the nation's war workers travel to and from their war jobs by automobile. Still an important reason why available tires have to be distributed cautiously.

B. F. Goodrich has created and is now beginning to produce an improved general-purpose synthetic rubber, the details of which must remain confidential until after the war. Introduction of a certain abundant natural material has developed a synthetic rubber that approaches natural rubber in characteristics during processing and has proven superior in large truck tires.

In war or peace

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined in two ways: 1. Scrapings were taken from the feet and examined by the bacteriologist. 2. Each subject was examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize with this nasty, devilish, stubborn infection. Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

PFC. BILL ZABILKA WRITES OF ENGLAND TOUR

(Continued from front page)

leaving I noticed a wall with a ditch close-by and I drew my conclusions that this used to be their draw-bridge which went over the hollow of the ground and there probably were battles fought on that draw-bridge.

After leaving this historic building we went to a beach at Rhur where we spent a short while. After a refresher of the ocean breeze we went inland a ways to the St. Margaretts Church, Bodelwoydlan which appeared to have been recently built, but found out later that it was built in 1860. This age of a church is considered a newly built one. We arrived at this church when the second hymn was being sung, so we stayed throughout the service. Their services are, of course, in difference with ours although there are a few similarities such as the order of the service. Their hymn book is small with just the words and not the music which made it difficult to sing. They sing their creed, which is the same as ours, and also the Lord's prayer with the priest answering also in monotone. Their organ and choir is in back of the audience and the priest said this was to help the audience sing better and louder. I was compelled to believe in what he said.

After the service, the priest showed us around the 'small cathedral'. The reason I say that is because it has the appearence of a cathedral, but it would be very small to be called one. The different pillars are made of stone from Italy, Normandy in France and also the best stone to be found in England. The carver for the many picturesque objects in the church was also the same man that carved statues etc. for the House of Commons building in London.

Even though there were quite a few of us, like all Englishmen, the priest and some Vicor invited us in for tea, which our chaplin accepted for all of us. Their home was of brick, like all English homes are, and very large. After some delicious tea and cake, we were at our leisure to look through their home. Their rooms are not so different as we might think. Of course they had all their gold and silver candlesticks and vases out to show we Yanks. All in all they were overwhelmed with joy to have us there and we were likewise. We ended our visit with the chaplain taking pictures of the whole group.

You know, I believe I could write a book about this trip and some more to come, but maybe I better bring this letter to a close. I received a very interesting letter from Dad and if you want any information from him don't hesitate to ask him. Good-night to all.

Sincerely,
Bill

Local Happenings
Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Mrs. Ernest Henschen, Sr., has been ill for the past two weeks.

Mrs. A. G. Koerner, Mrs. Orville Bridges and Mrs. Gerald Koerner and son, Terry were Mason City visitors Tuesday.

Mrs. Mary Waterman has moved into the upstairs apartment in Mrs. C. F. Keraus' house for the summer.

Mrs. Axel Juhl of Clear Lake spent a few days last week visiting her daughter and son-in-law, Mr. and Mrs. Dale Schlei.

Mrs. Wm. Johnson spent Friday afternoon in Liberty township visiting with Miss Gladys Griffen at the Lewis Griffen home.

Mrs. Lyle Wicox and Mrs. Lester Neuberger spent the week end visiting with relatives and friends in the Twin Cities.

Miss Campbell of Clarion, came Wednesday morning and visited until Sunday evening at the Rev. H. E. Harvey home.

Leland Ray son of Mr. and Mrs. Raymond Barz was baptized at the Klemme Reformed church Sunday morning.

Miss Audrey Mau of Des Moines spent the week end with her parents Mr. and Mrs. Lewis Mau of Klemme.

Mr. and Mrs. Keith Albertson and sons, Jimmie and David, spent Sunday visiting with friends at Swea City. Jimmie remained there to spend a week with friends.

Mr. and Mrs. Harold Ridder of Nora Springs, and Mr. and Mrs. Edw. Schaefer were dinner guests Saturday evening at the home of Mr. and Mrs. Herman Paul.

Mr. and Mrs. Harold Ridder and Mrs. Frank Ward visited Saturday at the home of Mrs. August Ridder and son near Forest City. The date was also Mrs. Ridder's birthday.

Mrs. William Johnson and little daughter, Linda, left Saturday evening for Chicago, after visiting for about three weeks at the home of Mrs. Lena Schroeder and Grandma Schroeder.

Mr. and Mrs. Burton Hanson of near Wesley; and Mr. and Mrs. Donald Bacon and two children of Thompson came Saturday night and visited Sunday at the parental Arthur Wellemeyer home.

Mr. and Mrs. Harold Mutch; Mrs. A. H. Dulmes and Dick; Will Mutch and Donnabell Mutch of Grundy Center were visiting with Klemme friends a short time Saturday forenoon.

Henry Lewis became ill suddenly last Wednesday morning and was confined to his bed all of the past week due to a heart ailment. Mr. Lewis is reported to be improving at this writing.

The American Legion and Auxiliary held their regular monthly meeting at the Community Hall Tuesday evening. Lunch was served by Mr. and Mrs. Jake Hess and Mr. and Mrs. Albert Etchen.

Miss Marie Blank had her tonsils removed at the Mercy Hospital at Mason City Monday morning. She is at her home recovering and expects to be back at her beauty shop again Saturday of this week.

Don't throw away your old newspapers and magazines. Save them for the Boy Scouts who will pick them up about once each month. Rural folks can leave their bundles of papers and magazines at the depot.

Mr. and Mrs. Harold Ridder returned to Nora Springs Monday after visiting with relatives and friends in the community for the past two weeks. Mrs. Ed. Schaefer went to Nora Springs with them for a visit.

Leo Esbeck and family have moved their household goods to Ventura and will live in one of the new houses east of the school house on the hill over-looking the lake. Mr. Esbeck will be superintendent of schools at Ventura.

Arthur Wellemeyer returned home Sunday from the hospital at Rochester, Minnesota, where he underwent a major operation on June 26th, from which he is making a good recovery. Louis Perkins and W. C. Keraus took charge of the store while Art was absent.

Pvt. and Mrs. David Brown and little son Ronald were dinner guests on last Wednesday at the Elmer Arnold home. Mrs. Arnold and Evelyn took them to meet their train at Belmond. They were enroute back to his camp at Grand Island, Nebraska.

Waste paper is needed in making war material. Don't burn or throw away your newspaper, magazines, books, etc. but turn them in to the Boy Scouts who will call at your house once a month for them, or you can leave your bundles at the depot in Klemme.

Miss Ruth Stille, of Des Moines, spent all of the past week with her parents, Mr. and Mrs. Lester Stille of near Klemme. Miss Stille had her tonsils removed at a Mason City hospital the fore part of last week and spent the balance of the week at home recuperating.

Mr and Mrs. Dale Schlei entertained the following to dinner Sunday; Mr. and Mrs. Axel Juhl and son Arthur of Clear Lake, Mrs. Arnold Thompson and daughter Patricia of Uniontown, Kentucky, Miss Jeanette Thompson of Radcliffe, Ia., and Mrs. Bertha Schlei of Klemme.

Rev. and Mrs. J. W. Grosshuesch of Sheboygan, Wisconsin, parents of Rev. Calvin Grosshuesch are now residents of Klemme and are residing at the parsonage. Rev. J. W Grosshuesch has retired from the ministry and with his wife have been living in Wisconsin since retiring.

Pfc. David Brown, wife and son returned to camp at Grand Island, Nebraska Wednesday after spending several days visiting with Klemme relatives They were dinner guests at the E. J. Arnold home that day Mrs Brown is the daughter of Mr. and Mrs Steve Day of Hubbard, Oregon and a granddaughter of Mrs Henry Lau of Klemme. While here they stayed at the home of Martha Bredbenner.

Miss Novela Bredbenner's name appeared in the list of 52 women students who were on the honor roll for the spring quarter at State Teachers College, Cedar Falls. Honor students were required to carry 14 or more hours and earn a grade point average of 3.33 or higher.

Mr. and Mrs. R. A. Jorgenson spent Sunday in Kansas City, Mo., at the Hugh Chapman home where they met Capt. and Mrs. Ray Jorgenson, Jr. and daughter, Judy of Dodge City, Kansas. Mr. and Mrs. R. A. Jorgenson were accompanied home by their daughter-in-law and granddaughter who will spend several weeks in Klemme.

We again call the attention house wives to the fact that sons desiring the first allotment canning sugar must apply this week Saturday, June After that time the county ing board says that only half of the allotment will be ed.

HE'S OFF ON HIS FIFTY-FIFTH MISSION

There he goes again — out to pour more destruction on the Axis — once more to face the death of enemy fighters and flak!

He won't hesitate to go out on his fifty-sixth or his hundred and fifty-sixth mission. He knows he might *not* come back, but he keeps on going — giving more and more until the Hitler and Tojo crews are ready to "call it quits."

This is only *your* fifth mission — and a mission which is mighty easy in comparison with the ones he makes *every week.* Stay in the fight by welcoming the Victory Volunteers—at *least* double your Bond purchases and then keep on. Your buying means "bombs away" for the Axis!

NCOCK PROPOSES TO PARE 1944 BUDGET

Hancock county supervisors nday tentatively adopted the 4 budget which calls for a tax of $231,000 for highways, relief county administrative pur- es. This total is $3,500 under year's total. The board fixed g. 3 as a date for a hearing at courthouse in Garner at 10:30 m.

LLION AND A HALF DOLLARS ON DEPOSIT IN FIRST NATIONAL

The report of condition of the st National Bank of Klemme, blished in this issue of The mes, shows a total of nearly a llion and a half dollars on de- sit, to be exact, $1,453,788.19. tal footings amount to $1,523,- 9.62. The total capital accounts mount to $62,653.13.

WILBUR HAEFNER FIRST TO HARVEST OATS IN THIS COMMUNITY

As near as The Times can check, Wilbur Haefner, farmer northwest of Klemme, was the first in this community to harvest and thresh this year's oats crop.

Wilbur combined his oats from windrows last week Thursday and reports a good quality. The oats tested weighed 34 pounds to the bushel and the moisture test was down to 12.20%.

Corn Is Tasseling

Some fields of corn around Klemme have gone into the tasseling stage. Sunday we saw Albert Carolus' field south of his house tasseled out, and a farmer Monday told us that Aaron Stromer's field of corn northwest of Klemme was well tasseled out Sunday

Harvesting This Week

Many fields of grain will be cut and in the shock by Saturday night of this week pending good weather Some fields will be threshed out with combines also. This latter method is becoming more popular every year around here

Old Binder Gets A Rest

Herman Barz had intended to again cut his grain crop this year with his 52 year-old "Standard Deering" binder, but a part ordered last April had failed to arrive, so Herman gave up the idea of using the old binder which had cut fifty-two crops of oats without missing a single year. He plans to use it again next year, however.

KLEMME WOMEN FORM SERVICE UNIT HERE

Mrs. Henry Jost President Of New Organization

A United Service Women's Unit of America Inc. was organized Wed July 12. The unit was formed by Mrs. Henry Jost and organized at her home, by the Meservey unit composed of Mrs. C. J. Jensen Pres. and her capable assistants, Mrs. Victor Zimmerman, Mrs. Leland Koenen, Mrs. George Langlitz. Mrs Beulah Langlitz and Mrs Gobeli.

Officers elected were Mrs. H F Jost, president; Mrs. D O. Turgasen, vice-president; Mrs. Lyle Wilcox, secretary; Mrs. John Clements, treasurer; Mrs. Evert Barz. chaplain; Mrs. Armor Mullin, historian; Mrs. Blanche Fredrick, sergeant-at-arms, and Mrs. David Schwichtenberg, parliamentarian.

After the meeting lunch was served by Mrs. Jost.

PERMANENT PROGRAM COMMITTEE OF HANCOCK COUNTY FARM BUREAU MEETS

The Permanent Program Committee of the Hancock County Farm Bureau consisting of Mrs. L F. Weaver, Mrs Aaron Stromer Mrs. H. J. Johnson, Mr. Walter Kahl, Mr Curtis Greiman and Mr H. H. Stoltenberg, met Friday evening to outline some of the jobs for the following Sub-committees: 4-H Girls Committee, 4-H Boys Committee, Farm Family Living Committee, Drainage and Soil Conservation Committee, Organization Committee, School Committee and Labor Committee.

The following jobs were suggested for the sub-committees in working cut their part of the annual county program post war planning for the Farm home and family; jobs for returning Service men; Some planned program of Drainage and road building & maintenance with special emphasis on the drainage program; Explain the work of the School Code Commission; Survey the sentiment and possibility of putting up a County 4-H Show building for both boys and girls exhibits.

Good pasture conditions which have continued late into the season on this year make it possible to market native lambs later than normal. These fat lambs should be topped out immediately for after the bluegrass matures the ewes give less milk and the lambs become thinner.

U. S. Treasury Department

HANCOCK COUNTY TAKES UP FIGHT AGAINST T. B.

Plans for the 5th annual survey in a continuing fight against tuberculosis in Hancock county have been completed, according to a joint statement from Dr. C. V Hamilton, county medical society president and Dr L. H. Flancher, tuberculosis case-finding director of the state health department and the Iowa Tuberculosis Association.

Aimed toward finding unsuspected cases of tuberculosis, the survey will include tuberculin skin testing of persons known to have been exposed to cases of this disease and follow-up x-rays of those reacting positively to the skin test.

The Hancock county Christmas Seal Organization and the State tuberculosis association will finance half of the cost of the program with funds made available through the annual sale of Christmas Seals The remaining cost will be paid by the state health department

The objective of the survey, according to Dr Flancher, is "to check spread of tuberculosis from the sick to the well."

"Many persons, even through living with known cases of tuberculosis, do not suspect that they may have contracted the infection," he said "Our purpose is to find out whether or not they have and to give them an opportunity to do something about it before serious complications develop."

The doctor told that with present day diagnostic facilities it is possible to discover presence of tuberculosis before appearence of symptoms, and he added that "if tuberculosis is found early, the patient's chances of recovery are vastly improved and with great saving in time and treatment costs."

MERCHANT WILL RETIRE AFTER 37 YEARS ON JOB

C H Schissel owner and operator of a general merchandising establishment at Garner, for the past 19 years, announces he is liquidating his business and will retire.

Mr. Schissel went to Garner from Pocahontas where he operated a similar business. Before that he operated a drug and jewelry store at Gilmore City. He is registered pharmacist and jeweller.

Mr. Schissel has been in business 37 years most of which time was in Garner. The family will continue to reside in Garner.

PICNIC HELD AT KINSELLA HOME LAST WEEK

On Sunday, July 9th a picnic was held at the Mike Kinsella home near Ventura. Those who attended were Pfc. and Mrs. Herb Webner and Denny of Madison, Wis.; Mr. and Mrs. Dan Webner and Etta Lou of near Klemme; Mrs. Willard Palmer and Dorothy of Garner; Mr. and Mrs. Kenneth Schlawin and Bobby of Garnr; Mr. and Mrs. Donald Webner and Earl of Corwith, Mr. and Mrs. N. C. Nelson and Lloyd Brookman of Wesley; and Ted Webner of Garner.

PLANS MADE AT MEETING FOR WAR CHEST DRIVE

A district meeting of War Chest workers was held last Wednesday night at the prison camp at Algona, with a good representation from Hancock county attending. State workers and County chairmen spoke on plans for the coming War Chest drive in October and told of results in the 1943 campaign. The War Chest will again include funds for all war relief agencies, including U. S. O., except the Red Cross

Attending from this county were, Garner, Co. Chm. C. V. Hamilton, Co. Aud. Fred C. Missal, Co. Trea Roy L. McMillin, H. L. Ollenburg and Dale Bardo; Britt, J. M. Townsend, V. D. Koons, L. J. Thies, Carl Frick; Crystal Lake, Rush Gabrielson; Woden, Henry Bode; Klemme, C. G. Waterman. The group went on a brief tour of the prison camp preceeding the meeting.

BEYE NAMED CHAIRMAN OF SALVAGE COMMITTEE

A. B. Beye of Britt has been named county salvage chairman for Hancock by county defense chairman, the Rev. W. T. Wolfram. Mr. Beye is the manager of the Bell Telephone company at Britt.

He will have working with him the following local salvage chairmen: P. J. Kirkpatrick, Crystal Lake; J. I. Overholt, Klemme; A E. Rasmussen, Garner; Clifford Schaper, Britt; Guy Judd, Kanawha.

Mrs. R. E. Disselhorst of Britt is the county chairman of the women's salvage unit working with Mr. Beye.

ANNUAL KOERNER RE-UNION HELD SUNDAY AT CLEAR LAKE

The annual re-union of the Koerner family was held at the State Park at Clear Lake Sunday with a picnic. Those who attended were:

Mr and Mrs. A. G. Koerner; Harry Gibbs and family; Mrs. C A. Arnold; Miss Minnie Lenz; Jimmie Fredin; Mrs Martha Ridder; Gerald Koerner and family; Levi Ridder and family; Glenn Bridges and family; Orville Stokesbary and family; Lester Stille and family; Mr. and Mrs. August Lau; Mr. and Mrs. J. E. Stille; Mrs. D. O. Turgasen; W. F. Stille; Bobby Ridder; and Miss Lois Gast.

Seventy-four people attended the reunion from Klemme, Mason City, Charles City, Rockford and Meservey. After the picnic the afternoon was spent in visiting, swimming, and speed boat riding.

SET DATE OF HEARING FOR DITCH CLEANOUT

Engineer William Henschen has reported in favor of a cleanout of the open ditches in drainage district No. 9 east of Klemme, petitioned for by John P. Christians and others, and the board of supervisors of Hancock county fixed Aug. 28 as the date for a hearing. The estimated cost of the project is about $8,600.

R. E. A. Plant To Be Built Two Miles South Of Klemme

WASTE PAPER IS MOST CRITICAL WAR MATERIAL

Save All Your Paper; Do Not Burn Or Destroy Any

"Today there is no such thing as waste paper -- it is war paper -- and it is the most critical war material now confronting the American people," asserted Herbert C. Plagman, Executive Secretary for Iowa, General Salvage Branch, WPB.

The success of the new campaign, aimed at saving a minimum of five pounds of paper per person per month in Iowa, rests largely with the County Salvage Chairmen throughout the state according to Mr Plagman.

Here in Hancock County, A. E. Beye, Britt, is the County Salvage Chairman and Mrs. R. E. Disselhorst, Britt, is the County Chairwoman. They are delegated to conduct new waste paper salvage drives. The War Production Board urges every civic organization and each individual citizen to cooperate with the local salvage committees in an effort to save every available scrap of paper that formerly was burned or thrown away.

Mr. Plagman pointed out that the greatest need is for brown paper such as paper bags, wrappings and cartons. This type of paper has the longest fibres and is the best suited for making shell casings and supply cartons.

All paper is badly needed, however, even the pieces that go into the waste basket and are generally burned. These should be placed in an empty carton tied up and placed with the other paper bundles.

He pointed out that the new paper campaign is not a one time drive, but is to be conducted each month. All activity will be directed toward getting each home owner and business establishment to place the paper in bundles on the street curb on the designated pick-up days.

"To Win, every scrap counts, so count your scrap!"

MORE HANCOCK COUNTY MEN ENTER SERVICE

Group To Leave For Ft. Snelling For Physical Examination

The following boys will leave July 26, for Fort Snelling, Minn., where they will be inducted into the army and navy:

Verlyn R. Friedow, Kanawha; Frederick A. Van Dyke, Greene; Orlan J. Paulson, Garner; Peter J. Paulson, Britt; Robert G. Jensen, Britt; Donald E. Eiseman, Britt; Don E. May, Corwith; Clarence Schroeder, Garner; Dwane L. Thompson, Kanawha; Richard D. Thompson, Kanawha; Gordon H. Severson, Kanawha; Anthony F. Young, Garner. Thomas M. Burge, of Palm Dale, Cal., is being transferred here for induction.

During June, 7 boys in Hancock county reached their 18th birthday and registered for selective service. They are Milton Alfred Galloway, Jesse Donald Schwichtenberg, Martin Harold Clark, Billie Mewes, Jr., Robert Keith Oxley, Juan Garsia, and Henry B. Fikse.

HANCOCK COUNTY $103,000 SHORT OF REACHING BOND QUOTA

H. C. Armstrong, Britt, county chairman of the 5th War Loan Drive this morning reported that Hancock County was short $103,000 of reaching the total quota of $792,000.

The E bond quota was $574,000 and the sales reported are $511,000 which leaves a shortage of about $63,000. The total purchase of the bonds is 89% of the quota.

There are still two weeks in which to make this quota up and Mr. Armstrong urges citizens to to buy in order to meet the quota without the necessity of having a committee call upon them.

With combining near at hand a pre-season check-up of combines is in order.

NEW PLANT HERE WILL BE AUXILIARY UNIT

Construction To Begin In July; Completion In December

A new REA electric power plant costing about $139,616 will be constructed in Avery township, two miles scuth of Klemme, on a plot of ground purchased from Mrs. Frances Swalve, it was announced by H. L. Bush, manager of the Hancock County REA The plant will be built by the Federated Co-operative Power Association, of which Hancock county REA is one of six members.

Construction will probably get under way this month and work is to be completed by the middle of December. A similar plant is to be constructed near Eagle Grove. The new plant will be able to supply a greater portion of the Hancock county REA load but will be used more for a peak load plant for the main generator at Reeves.

Contracts for the various parts of the plant have been let at varitimes. The building contract was let July 7 to Ryan and Henkel Construction company of Mason City, in the sum of $33,277. The building is to be of concrete and brick and cover a 70 by 40 foot space.

A residence for the plant operator is also to be constructed. Bids were received June 9 and July 7, but only one bid was received in each case and they were rejected.

The power plant is designed so that it can be expanded readily to house more generators.

I. V. Rasmus, Garner, and M. C. James, Goodell, are directors on the board of the Federated Co-operative Power association and they are also on the Hancock county REA board They attended all lettings. Dexter Smith, Hampton, is project superintendent.

4-H GIRLS ATTENDED STATE CONVENTION

Arlene Wille, Marjorie Fox, Carmen Goll, Mrs. Lewis Formanek and Miss Hazel Grimes were the 4-H representatives from Hancock County at the 4-H girl's state conference held on the Campus of Iowa State College, July 10, 11 and 12.

Nearly five hundred girls and leaders from every County in the state assembled at Ames to discuss and listen to many splendid speakers discuss the general theme of "Thresholds".

Reports showed that bonds sold and bought by 4-H girls in the state last year exceeded the doubled original goal which was set a year ago. The total of this amount reported was $1,792,723.95. Hancock County 4-H girls reported $5286.15.

Carmen Goll was one of the 32 girls who carried the allied flags to form an avenue of flags through which the United States flag and two 4-H banners were carried to the platform at the Monday evening party.

Another unusual event for the delegates was having their meals served as they are served to the Navy men in training on the Campus. After all the Navy men had gone down the food line, the girls were then served. The same aluminum trays with divisions and no dishes were used; they sat at the Navy reserved tables and when through eating dissembled their trays at the counter in the manner of true sailors.

LIBERTY FARM BUREAU ENTERTAINED BY 4-H GIRLS

The Liberty Township Farm Bureau was treated to a very good program by the Liberty Busy Bee 4-H Girls, Friday evening, July 14th. Carmen Goll gave an interesting report on her trip to the State 4-H girls convention at Ames.

Charles F. Jackson gave a short talk on the Farm Bureau Organization and Insurance Program.

A delicious lunch was served by the Committee.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. Doan's have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

DOAN'S PILLS

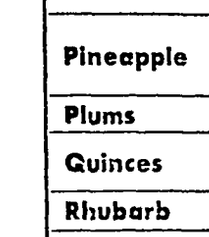
Fruit Preparation and Processing Guide

(See Directions Below)

Canned Fruit

If you want to assure your family of its basic seven fruit requirement, then busy yourself with putting up fruit at home.

Fruits, commercially canned, have carried a high point value and this has made their serving in many families prohibitive. But lucky indeed are those homes in which there are ample stocks of home-canned fruits.



Fruit canning is infinitely more simple than vegetable canning. The reason for that is that fruits are acid and, therefore, can be sterilized more readily.

A hot water bath is ideal for processing the fruit once it is in the jar. If you cannot obtain one, use a regular wash boiler, fitted with a rack to keep the jars a half inch from the bottom. A cover that fits tightly over the canner helps keep the steam in and does not waste fuel.

Steps in Canning.

1. Select fruit in the peak of condition. Your can will yield only what you put into it.

2. Wash fruit or berries carefully, pare and pit according to directions for fruit in the fruit canning chart given in this column.

3. Fruit is pre-cooked for several minutes in certain cases to shrink it, and to give you a better looking pack with as little floating as possible.

4. Use a light or medium type of syrup in which to pre-cook the fruit or cook in its own juice.

5. Pack fruit into hot, sterilized jars and add boiling syrup or fruit juice with which to cover the fruit. Most juice or syrup is added to within one-half inch of the top of the jar.

6. Adjust the cap according to the instructions furnished by the manufacturer. He knows the type of sealing it will need.

7. Process fruit either in the water bath or the pressure cooker according to the time indicated on the canning chart. For a boiling water bath, see that the water boils during the entire processing period.

8. As soon as the jars finish processing, remove them from the canner, set on several thicknesses of paper or cloth and allow to cool. All jars should not be inverted, so watch the manufacturers' instructions on this point.

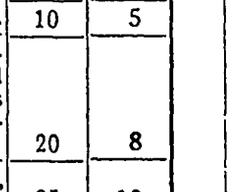
Oven Canning.

This year, I'm not recommending oven canning of fruits because wartime restrictions in equipment have caused many changes to be made in jars and caps, and this method is not safe. Many women had accidents last year and much fruit was spoiled. Play safe, and use the water bath.

Sugar Syrups.

As long as sugar is still rationed, you'll want to use it sparingly so there's enough for peaches as well as for plums and grape jelly in the fall.



Wise homemakers are using the thin or medium syrups, as these will mellow and ripen the fruit but still not consume too much of the precious sugar supply.

Thin Sugar Syrup.
1 cup sugar
3½ cups water

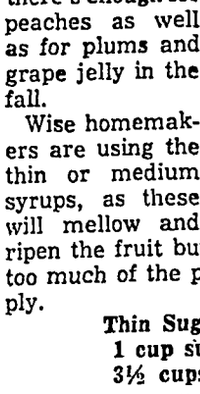
Bring to a boil, stirring only until sugar is dissolved. Keep hot but not boiling.

Medium Sugar Syrup.
2 cups sugar
4 cups water.

Follow directions above.

Open Kettle Canning.

Women who have canned for years on end, still prefer the old-fashioned, open-kettle method for canning fruits. It gives a luscious product, and if the canner is careful, no spoilage will develop.



Care must be taken to wash and sterilize all utensils carefully so that no bacteria will be introduced into the jars to work spoilage later. Unless you are experienced at canning, I do not suggest you try this method, but if you do, here are the directions to observe:

1. Wash and sterilize all equipment. This means jars, rubbers, spoons, spatulas, funnels, in fact, anything that comes in contact with the food.

2. Make sure the food has reached the boiling temperature before filling jars. Fill each jar to the brim as rapidly as possible.

3. Run a spatula down the sides of each jar after filling. Refill with more juice to the rim of the jar.

4. Seal completely, at once.

Lynn Says

Canning 'Rithmetic: If the jars and fruit don't come out even when you're canning, better sit down and do some figuring before you start to can. Here are tips to help you:

Apples—1 bu. (50 lb.) cans 17-20 quarts.

Apricots—4 basket crate (1 bu.) cans 20-25 quarts.

Berries—24 quart crate cans 15-24 quarts.

Cherries—1 bu. (56 lb.) cans 20-25 quarts.

Grapes—1 bu. (48 lb.) cans 16-20 quarts.

Peaches—1 bu. (50 lb.) cans 18-20 quarts.

Pears—1 bu. (58 lb.) cans 20-24 quarts.

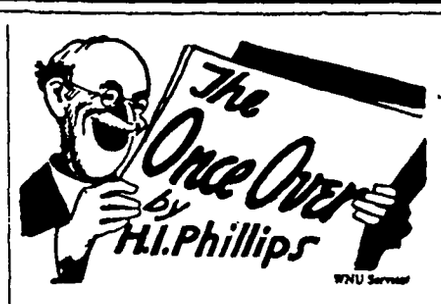
Pineapples—15 pineapples yield 30 pints.

Plums—1 bu. (56 lb.) cans 24-30 quarts.

Tomatoes—1 bu. (56 lb.) cans 15-20 quarts.

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.



PRIVATE PURKEY IN ROME

Well, all jeeps lead to Rome and here I am all tangled up in more monuments, statues, museums, art galleries, forums, circuses, colosseums and old ruins, including King Emmanuel than I ever seen in one place. But the balcony of the Palace Venezia gives me the biggest kick on account of it was that balcony which did a lot to get the world into such a mess. If somebody had only of captured that balcony 10 or 15 or even 20 years ago what a difference it would of made to Italy. (Also to me, eh?)

—*—

The first thing I did was to go to the Palace Venezia to see the place from where Mussolini talked Italy into a state of daffiness and talked himself into and out of a good job. I wanted to see it on account of as a kid I seen so many newsreel pictures of the big bum throwing out his chest and making faces which was mistook for the face of Superman and always bellowing like a mad bull. Well I got to report I seen lots of better balconies, but I guess maybe none which ever got so many people in so much trouble.

—*—

The rail was a little damaged from pounding and there was deep ruts in the stone floor from Chesty strutting up and down for 21 years. Also there was a bad smell which the Italians apologized for because Benito had only been out about a year and nobody could remove the smell of a guy like that in so short a time.

—*—

I got a kick out of the Colosseum. The Colosseum is not no movie picture house and it ain't no restaurant like you would think. It is a early model of the Yankee Stadium with a little of the Yale Bowl thrun in. It looks all shot to pieces but not as shot to pieces as the Yankee Stadium after a outdoor fight. Sergeant Mooney explains to me that it is thousands of years old and was where the Romans played games back before Bennie give up the idea the only good outdoor sport was making funny salutes.

—*—

I also seen the Roman Forum which is the place where Julius Caesar got the knife from some fellow by the name of Brutus and I stood on the spot where Mark Anthony, who is no relative of Dr. Anthony of radio fame, delivered the famous funeral spiel and asked everybody to lend him their ears. Well, he was a better guy than Mussolini, who did not ask to borrow no ears but just talked them right off the peoples heads.

—*—

I also seen Romulus and Remus and I got a lecture on it from an ex-Fascist leader who is now just picking up a few cents here an there, but the story is too deep for me. It is all about two kids and a wolf which gave Italy its start never knowing that some day two salutes and a polecat would almost give Italy its finish.

—*—

Well, I never seen a city so glad to get captured. In fact the people was pretty sore that we didn't take them sooner. The King got out right after I got in, but he is such a little fellow nobody noticed he was gone and some think he is still here.

—*—

Well, I will have to close as I still got about two hundred more statues to see and also the bridge where a man by name of Horatio wrote a poem about a bridge which I read in school. Everything is okay here. Do not worry. It is the big push in France what counts.

Yours,
OSCAR PURKEY, Pfc.

* * *

Elmer Twitchell tuned in on the Orson Welles bond drive radio program and found it stirring indeed, but somewhat confusing. In fact, Elmer got so mixed up that, wanting to do his full duty and not being quite certain what Orson was saying, he played safe by buying all the bonds possible, calling for a ninth inning rally, giving three cheers for Hollywood and writing in a letter approving a change in the economic system.

* * *

Marshals Von Runstedt and Rommel are reported to be in disagreement. It seems that Von Runstedt thinks General Montgomery is not much of a general and has tried to tell Rommel so.

There is one governor whose name we can't help regretting will not figure in the presidential race. Governor Hickenlooper of Iowa. It would have been the joy of the columnists.

—*—

We already had a campaign song:

Vote for Hickenlooper
And get a superdooper!

* * *

What is happening to the Germans in Italy now would be sensational if it were not for what is happening to them at other points.

Shopping Bag

YOUR government asks you to take a marketing bag with you when you go to the grocer's and to take as many packages as possible without paper wrappings. Paper bags are becoming a vanishing item! Provide yourself with a crocheted string bag. This one is made of bedspread crochet cotton so it's strong and durable. When not in use, it folds up into a tiny compact ball.

* * *

To obtain complete crocheting directions for the Folding Shopping Bag (Pattern No. 5746) send 16 cents in coin, your name, address and the pattern number.

Applique Apron

A BIG coverall apron for summer has a "basket" pocket of dark green and bright red cherries, green leaves and basket handle appliqued onto the body of the apron. Make the apron in colorful checked cotton—it's a splendid kitchen "shower" gift!

To obtain complete applique pattern and apron pattern for the Cherry Basket Apron (Pattern No. 5739), sizes: small (34-36), medium (38-40), and large (42-44), send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE NEEDLEWORK

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize! Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

BETTER IOWA GARDENS

Harvesting and handling of vegetables at the proper stage of maturity is step in the art of gardening that is too often neglected. Experienced gardeners know that good quality in vegetables starts with selection of the best quality varieties for planting.

* * *

Rich soil, proper temperature and moisture are other factors that play an important role in producing vegetables of high quality. Cool-loving crops should be planted early in the spring. This gives them time to mature before hot weather sets in. Poor quality vegetable results if cool-loving crops are planted later in the season, so that they mature when the weather is warm and moisture content of the soil is low.

* * *

Protecting vegetables from plant diseases and insect helps to promote high quality.

* * *

To harvest vegetables at the correct stage of maturity and proper handling after they are harvested are especially important for palatability. Over-mature vegetables have lost their succulence and have become tough. Immature vegetables have not developed their full rich flavors because minerals and sugars have not been deposited in sufficient form and quality.

* * *

All vegetables should be kept chilled from the moment they are harvested until they can be prepared for eating. Don't allow vegetables to wilt between harvesting and serving at the table. Much nutritive value is lost from vegetables left standing at room temperature. Raw vegetables for table use should be cold and crisp. Crispness is a criterion of good quality.

* * *

Sweet corn has been late this year because of the backward season. However, first roasting ears have been served in a number of homes recently. The maximum of enjoyment in sweet corn can be experienced only by those persons who grow their own and serve it from the garden within an hour to catch the goodness of the kernels. Harvesting corn rapidly loses its high quality in warm temperatures due to respriation.

* * *

In the final analysis, palatability is judged when vegetables are served at the table. Regardless of whether all the above-mentioned points are observed and practiced, improper cooking of a high-quality vegetables will nullify everything done previously. Proper cooking is essential to retain the high quality of garden produce.

FARM BUREAU MEMBERSHIP HITS NEW HIGH

75,000 Members In State After Annual Drive

The Iowa Farm Bureau hit a new high in membership acquisition today by exceeding the 1944 goal of 75,000. Harry Bryson, director of organization, announced that the paid membership in the state office stands at 75,645.

Not only is this the highest figure on record since the boom days of 1919, but it is also the earliest date in history that the membership goal has been achieved.

Bryson reported that 54 counties in the state had surpassed their quota late last week. He gave much of the credit for the achievement to the regional field directors and to the Organization directors in the counties.

Wayne Tyler, field director in the Northwest Iowa region reported a total of 18,157 members for his area which comprises 19 counties. This was 882 members more than his allotted share of the 75,000.

Don Groves, former field director in North Central Iowa, reported 18,308 members from his region comprising 19 counties.

In Northwest Iowa, Emery Dull reported 15,501 members, which was 246 more than his share of the 75,000 goal.

Howard Masteller, field director in southwest Iowa had a total of 9,195 members, 369 of which were produced after June 24, when the final drive for membership was opened.

In southern Iowa with six counties under his directorship, Ralph Stephens reported 1,985 members, and in the southeast region Loren Airy reported 12,186 members paid.

The achievement makes Iowa among the first states in the American Federation to go over its 1944 goal and undoubtedly again places the state in second place with respect to Farm Bureau membership paid to the American Farm Bureau Federation.

Highest county mebership in the state is found in Benton County where 1778 members have paid dues. Second high honors go to Buena Vista county with 1426 members.

Bryson revealed that 29 counties have now surpassed the 100 mark and that 12 counties have between 800 and 100 members.

Making the most sensational gain in membership since a year ago was Clayton county with an increase of 406 members. Second highest increase over last year was Woodbury county with a gain of 290 members.

KOLUMN KOMMENTS

Vaccinate the spring pig crop against hog cholera now as the pigs reach the weaning age of 8 to 10 weeks. Early vaccination saves cost because the amount of serum neded increases with the size of the pigs. Vaccinating now will prevent possible delay in waiting for serum. Only healthy pigs should be vaccinated! Those suffering from diseases and parasities should be diagnosed an properly treated before they are inoculated.

Hancock County Roads

ALL THOSE LISTED ABOVE IN TOWNSHIP 95, RANGE 23

To the owners of all real Estate described hereinbefore and to lienholders and encumbrancers of record, to all occupants, all highways included in the watershed of Drainage District No. 9 and laterals thereof Hancock County, Iowa, and to whom it may concern:

You are hereby notified that on June 2, A. D. 1944 John, P. Christians Et. al. filed a petition requesting that the open ditches of Drainage District No. 9 and lateral No. 6 of DD No. 9 Hancock County, Iowa be cleaned to grade.

You are further notified that Wm. Henschen, was appointed Engineer on June 2, A. D. 1944 to make an investigation and report and did on July 10, A. D. 1944 file his report and does recommend that the cleanout petitioned for by John P. Christians et. al. be made as prayed.

Said report is now on file and may be amended at any time before final action is taken thereon by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 9, and the 28th day of August A. D. 1944, at the hour of 10:30 A. M is a date and hour thereon. Said hearing to house in Garner Iowa.

All objections to as set out in the prayer ers and recommended the Engineer, and all ages must be in writing filed in the office of the or at or before the time thereon.

The foregoing notice order of the Hancock Board of Supervisors with a resolution adopted A. D. 1911, and in accordance section 7440 and 7441, 1939, and laws amendatory

Please take notice and selves accordingly. Fail your own peril.

Witness my hand and this 12th day of July, (Seal)

AUCTION

4TH ADJOURNED JUNE MEETING

Garner, Iowa, July 10, 1944

The Hancock County, Iowa, Board of Supervisors met in session on above date with F J. Schoun, John Chambers and Penn Ekels, present.

The minutes of the last meeting were read and approved as read.

On motion and second Wm. Henschen is appointed Engineer on Drainage District No. 138 petitioned for by Donald Hamilton et al. He is requested to make a survey and report to this Board on the feasibility and necessity of such drainage.

Supervisor Chambers is hereby appointed a committee to investigate and cause repairs to be made in DD No. 46-3, DD 46-3 L. 24, DD No. 10, lateral No. 7.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in DD No. 5, DD No. 81, Lat 370, DD No. 7, DD No. 1 and 2, lat. No. 12, DD No. 13, lateral No 3A

On motion and second a permit to sell cigarettes is hereby granted to the Sheets Service Station and application and bond is hereby approved

On motion and second a Class "B" permit is hereby granted to the Katslicky Delnik lodge at Duncan and application and bond are hereby approved

In the matter of the petition of John P. Christians et al for a cleanout of the main open ditch, also Laterals No. 6 and No. 7 of Drainage District No. 9, Hancock Count, Iowa,

WHEREAS, Wm. Henschen was appointed an engineer to investigate and make a report on June 2, 1944 A. D. and said engineer did file his report on July 10, A. D., 1944, which report states that he has examined the laterals and main ditch in the district heretofore mentioned and in his opinion the proposed cleanout will be conducive to public health and welfare and the benefits to be derived will be greater than the cost thereof and further recommends that said cleanout be made as prayed

BE AND IT IS THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 9, and Laterals 6 and 7 of Drainage District No. 9 all in Hancock County, Iowa, that the report of the Engineer be and the same is hereby approved as a tentative plan and shall come on for further hearing at the courthouse in Garner, Iowa, at 10 o'clock a. m. on the 28th day of August A. D 1944

BE IT FURTHER RESOLVED THAT the County Auditor be and he is hereby directed to cause notice of said hearing to be published in the Klemme Times, a newspaper of general circulation published at Klemme, Iowa, advising all owners, occupants, lienholders and encumbrancers of record in the district of the pendency and prayer of the petition, the favorable report of the Engineer thereon, the approval by the board of said report as a tentative plan, that same may be amended before final action thereon, the date and hour set for hearing thereon and that all claims for damages and objections to claims for damages and objections to said establishment must be filed in writing with the County Auditor at or before the hour set for hearing thereon.

The foregoing resolution was offered and read by Supervisor John Chambers, who moved its adoption was seconded by Supervisor Penn Eckels, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J Schoun, Penn Eckels and John Chambers, aye. Nays none. Whereupon the chairman declared the resolution duly adopted.

WHEREAS, pursuant to Chapter 167, Laws of the 45th, G. A., it is necessary that the Board of Supervisors appoint one of its body to execute a release of a lease conveying a gravel pit to the County and,

WHEREAS, the Board now desires to release a lease to a gravel pit (known as the Greiman pit, described as the North 300 feet of the East 871 feet of theNE¼ NE¼ of Sec. 14 excepting therefrom the East 33 feet and the North 33 feet thereof) which lease was filed on Dec. 10, 1937, 11:50 a. m. in the office of County Recorder, instrument No. 5513 and is recorded in Lease Book 5, Page 435.

BE IT THEREFORE RESOLVED, by the Board of Supervisors of Hancock county, Iowa, that F. J. Schoun, chairman be and he is hereby appointed to execute release of gravel pit lease filed on December 10, 1937, A. D. at 11:50 a. m. in the office of the County Recorder, instrument No. 5513 and is recorded in Book 5, Page 435, Book of leases.

On roll call, ayes, F. J. Schoun, Penn Eckels; J. A. Chambers. Nays, none. Carried.

Be it remembered that on this, the 10th day of July 1944, the Board of Supervisors of Hancock County, Iowa, met in session for the purpose of filing and considering the estimate for the local budget of said county. There was present a quorum as required by law. Thereafter and on said day there was filed the foregoing estimate:

FUNDS	1 EXPENDITURES For Year 1942—	2 For Year 1943—	3 Proposed Ex. Estimated 1945	4 Est. Unencumb. Bal. Jan. 1, 1945.	5 Est. Income Other Than Taxation 1945	6 Amt. Necessary to be raised by taxation 1945
General	62,810	60,009	75,000	none	10,000	65,000
Court Expense	4,785	4 169	8,000	4,000		4,000
Poor	43 913	37,680	45,000	5,000	3 000	37,000
State Institution	12,102	17 642	20 000	none	1,000	19,000
County School	8,209	9,314	9,000		3,000	6,000
Soldiers' Relief	5,837	5,537	10,000			10,000
Bovine Tuberculosis	6,794	1,435	8,000			8,000
County Bonds	9 191	none	none			
Emergency	20,000	10,000	none			
Bang's Disease	727	28	2,000			2,000
Farm to Market	24,856		100,000	65,000	35,000	none
Secondary Road Funds—						
A. Const. ½ mill (4644.06)	62,055	37,389	100,000	65 000	35,000	none
D. Maint. 3 mills (4644.11)	91,761	74,853	120,000	40,000		80,000
TOTALS	353,040	258,056	497,000	179 000	87,000	231,000

Estimated taxes per $1,000 of assessed value ..... $ 10.44

Thereafter said estimate was duly considered by the Board. The Board being fully advised finds that a date of hearing on said estimate should be fixed and it at the hour of 10 a. m. of said day as the does fix the 3rd day of August A. D. 1944 date of hearing, said hearing to be had at the courthouse in Garner, Hancock County, Iowa. The County Auditor was directed to publish the estimate and notice of hearing as required by law in the official newspapers of the County. Publication to be for one insertion and to be at least 10 days prior to the date set for hearing.

On motion and second Chairman F. J. Schoun is hereby authorized to execute agreement with the Iowa highway commission.

In the matter of a petition of a cleanout of the main open ditch of District No. 5 from the Garner Disposal Plant to the Iowa River petitioned for by the Town Council of Garner,

WHEREAS, Chas. F. Merten, was appointed Engineer to investigate the feasibility and necessity for the cleanout hereinbefore mentioned and make a report thereon and

WHEREAS said Engineer has filed his report which report states that in his judgment the cost of the proposed cleanout is greater than the benefits to be derived and he further recommends that no cleanout be made at this time.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of DD No. 5 that the report of the Engineer be and the same is hereby approved and that no cleanout be made at this time as prayed in the petition of the Town Council of Garner, which petition was filed on June 19, 1944 A. D.

On motion and second the contracts with the John H. Greenlee Elevated Tank Service of Cherry Valley, Illinois for the repair of the elevated Tank at the Hancock County Home are approved.

On motion and second the Board adjourned to July 17, A. D. 1944 at 9 o'clock a. m.

F. J. SCHOUN,
Chairman

Attest: FRED C. MISSAL,
Auditor.

Seaman Schaefer Graduated From Gunnery School Saturday

Donald Schaefer, Seaman 1-c, who has been attending the naval gunnery school at Miami, Florida, graduated from the course Saturday and arrived in Klemme the fore part of the week on furlough which he is spending visiting with his parents, Mr. and Mrs. Roy Schaefer and other relatives.

COUNTY GRANTS BEER AND CIGARET LICENSES

Hancock County supervisors granted beer licenses to the Hidgon Hambuger Hut at Hutchins, the Falada general store, the Duncan general store, the Katolicky Delnik lodge at Duncan and the Garner Gun club at Garner.

Cigaret permits were issued to Butz Lunch, Sheets service station, the Logan grocery, Pringles grocery Falada general store and Higdon Hamburger Hut.

ATTENTION! ALL HOME CANNERS!

Before you begin your 1944 canning, Good Housekeeping Magazine advises you: use the boiling-water bath method for tomatoes and fruits, only. Can all vegetables except tomatoes by the correct use of a pressure cooker to be sure of killing botulinus germs. In the last few years, cases of botulinus food poisoning have cropped up in widely different parts of the country. Buy, borrow, share a pressure cooker—don't can low-acid vegetables any other way. If you want further information, write Good Housekeeping Magazine, 959 Eighth Avenue, New York 19, N. Y.

WEEKLY NEWS ANALYSIS

Dewey Pledges Strong Postwar Market for American Producers; Batter Nazi Defenses in France

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)

Saipan—U. S. marines pay last respects to fallen buddies on Saipan in Marianas islands.

EUROPE:
Big Battle

In a great drive to encircle the Nazi defense pivot of Caen on the eastern end of the 125-mile Allied front in Normandy, British Gen. Bernard L. Montgomery compelled German Field Marshal Von Rundstedt to commit large forces to the raging tank battles on three sides of the town.

Gen. Montgomery

As Montgomery forced Von Rundstedt's hand on the east flank, U. S. troops resumed the attack above the vital communications hub of St. Lo to the west, and U. S. engineers undertook to clear up the wreckage in the port of Cherbourg to permit its early use for funneling in supplies.

With Montgomery reportedly using 100,000 men in the Caen drive and pushing the offensive under a curtain of heavy artillery, tank and aerial fire, the Nazis were compelled to call in reserves to stem the British thrust, which threatened to remove the pivot on which the enemy had resisted Allied advances.

Russia

Within 250 miles of flaming front in north Russia, German troops slowly fell back before the powerful surge of Red forces chewing into the big bulge overhanging the southern end of the battle-line, and Hitler's last springboard to Moscow.

The Germans were compelled to retire from prepared strongholds when large Russian forces broke through their lines on all sides, threatening to encircle them from the rear.

In Finland, the Reds continued their offensive in the face of stiffening resistance both on the Karelian isthmus near the capital of Helsinki, and in the lake country farther to the east.

Italy

With the Germans moving in reinforcements and increasing their artillery and anti-tank gunfire, the Allied advance up the Italian peninsula was slowed by hard fighting.

Still operating in the mountainous terrain which lays before their last major defense line guarding the rich Po industrial and agricultural region to the north, the Nazis were taking every advantage of the rugged country to impede the Allies.

As U. S., British and French forces fought steadily ahead, the Nazis were converting little villages into small fortresses.

MEAT:
Beef Scarcer

Because of a 12 per cent decrease in supply of rationed beef as a result of larger allocations to the army, navy and lend-lease, point values on steaks and roasts for the month of July were raised to their highest levels.

Nearly all cuts of lamb were returned to rationing, with only breast, flank, neck, shank and lamb patties point free. Despite shortages of better grades of pork loins, all pork will continue unrationed.

Point-free for over a week, all so-called soft cheeses, including most varieties except cheddar, were put back on the rationed list at four points per pound. Canned milk was raised to two-third point per can from one-half.

PACIFIC:
Serious, Says Tokyo

Facing compression on the northern end of Saipan island by advancing U. S. troops, the Jap defenders offered vigorous resistance to attacking Doughboys in the mountainous interior after having been driven from the southern extremity.

Sheer cliffs, blind ravines, and rough, wooded ridges bulked before the Doughboys as they fought their way forward over the rugged terrain, broken in many spots only by goat paths.

As U. S. troops tightened their foothold on Saipan, the enemy reported that naval aircraft continued attacks against American shipping supplying the ground forces, and added: "We, the 100,000,000 people of Japan, must realize now, if ever, that the outcome of the battle of the Marianas will exert a very serious influence upon the future war situation."

GOP:
Shape Fight

Under the leadership of Gov. Thomas E. Dewey of New York as its candidate for President and Gov. John W. Bricker of Ohio as vice president, the Republican party will make the 1944 campaign on a platform designed to assure a strong American market for U. S. producers.

In the field of foreign relations, the party's 1,057 sweltering delegates to the Chicago convention approved a platform based upon U. S. cooperation with other nations to preserve world peace without impairment of sovereignty or self-rule and with the consent of the senate in accordance with constitutional provisions.

In addition to guaranteeing the producer a protective tariff to exclude cheap foreign competition, the party agreed to the principle of establishing an "American market price" for agriculture, and approved crop adjustment during periods of abnormal surpluses.

Quick restoration of private business in the postwar world was promised through speedy settlement of cancelled war contracts and orderly disposal of surplus goods. The party also pledged lower individual and corporate taxation consistent with government expenditures when conditions permit.

Knows Answers

Surrounded by a battery of newspaper men in the grand ballroom of the Stevens hotel, "Tom" Dewey gave his first press interview as the GOP's presidential candidate, showing a tactical skill in answering the barrage of questions.

In reply to queries, Dewey said future developments might make compulsory military training necessary; that congressional power to declare war to resist aggression would not hamper operation of a world cooperative program to preserve future peace, and U. S. acquisition of Pacific bases would be left to future events.

Declaring that the party's program did not refer to "high" but rather to "adequate" tariffs, Dewey said the heart of the foreign trade plank was centered in the sentence calling for U. S. cooperation in promotion of world commerce. At first, federal help may be required to assist in providing full employment, Dewey said.

"Are you satisfied with gas rationing?" someone asked.

"Do you know anybody who is?" Dewey retorted.

DIPLOMACY:
Troubled Relations

Finland's refusal to lend its ear to U. S. approaches that it negotiate a peace with Russia, and the tiny Baltic state's determination to remain in the war beside Germany following promises of military aid, led to an open rupture of relations with this country.

At the same time, U. S. Ambassador Norman Armour was recalled from Argentina for consultation with state department officials, following reported increasing Axis sentiment in that South American country, particularly since the invasion.

Meanwhile, Gen. Charles de Gaulle was scheduled to confer with President Roosevelt over alterations in the U. S. attitude toward the French National Committee for Liberation as the provisional government of re-occupied territory.

CASUALTIES:
Total 250,000

As a result of losses of 24,162 men during the first two weeks of the invasion, total U. S. casualties up to June 22 approximated 250,000 killed, missing and wounded.

Total Allied losses in France were 40,549 for the two week period, with the U. S. dead averaging 12.7 per cent of American casualties; the British 13.5 per cent and the Canadian 12.9 per cent.

A large percentage of U. S. losses in the invasion came in the first two days, when elements of two divisions ran into a German division practicing maneuvers on the beaches. Enemy casualties were estimated at 70,000.

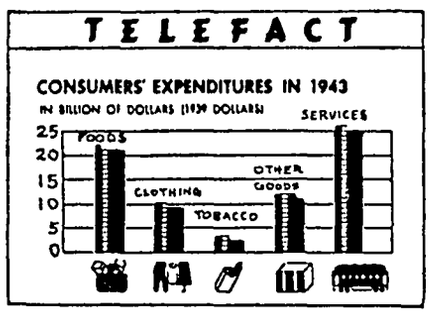
For the first four years of the war, Prime Minister Churchill placed British losses at over 667,000 men.

CHINA:
Japs Gain

Pressing their drive in southern China, the Japs threatened to seize the country's entire eastern seacoast and secure an unbroken rail route of over 1,000 miles.

The Japs pushed their offensive as U. S., British and Chinese efforts to open up a back-door into southeastern China from India slowed in the mountainous Burmese jungle country.

U. S. warplanes joined in the valiant Chinese defense against the Japs, who continued their favorite tactic of driving forward on either side of by-passed strongholds. Allied thrusts to open a back-door to China continued even as the Chinese asked for greater assistance to resist the enemy.



LEND-LEASE:
In Reverse

With the United Kingdom, Australia and New Zealand pitching in, Britain's reverse lend-lease to the U. S. for the two years ending last March totaled 2½ billion dollars, and if continued at the same rate as the first three months of 1944, was expected to approximate 2 billion dollars for the whole year.

Out of the United Kingdom's contribution of almost 2 billion dollars, the U. S. received rail transportation to invasion ports; British planes; airfields and other construction; fresh vegetables and other foodstuffs; lightweight gas tanks; 25,000 miles of steel landing mats; thousands of parachutes, and 2 million pair of woolen socks.

Meats and dairy products constituted a major portion of Australia's reverse lend-lease of almost ½ billion dollars, while foodstuffs made up one-third of New Zealand's contribution of over 100 million dollars.

CIVILIAN GOODS:
Feeling Pinch

With large stockpiles dwindling and scarcities of material and manpower prevailing, the public will start feeling the shortage of civilian goods more and more from now on, an official of the War Production board declared.

Although some demand for such merchandise as electric irons, alarm clocks and aluminum kitchen-ware will be partially met this year, WPB disclosed, manufacture of stoves and other steel products and availability of lumber are expected to be affected by shortages of materials.

In remarking on the continued restriction of textile production because of the tight labor supply, a WPB official declared: "Our manpower is not always applied to the right things—there probably is plenty if it were properly distributed."

JEEPS

The famed army jeep is not so well suited for a general utility farm vehicle as is popularly supposed, according to the U. S. department of commerce. It was found that the jeep is less powerful than a small tractor, has small carrying capacity when used as a truck, and is uncomfortable and ugly looking.

"On the farm," concludes the article, "the role of the jeep seems to be that of a handy, amusing, plucky, but expensive to operate jack of all trades."

HIGHLIGHTS . . . *in the week's news*

NAVAL HOSPITALS: Beds in the U. S. naval hospitals are 85 per cent filled, Vice Admiral Ross T. McIntire, naval surgeon general, stated. Hospitals are capable of caring for 70,000 men, he said. On the West coast, where Pacific area casualties are taken, the hospitals are 95 per cent filled. Some men are being moved to convalescent hospitals near their homes.

HAVEN FOR JEWS: Great Britain has agreed to set up a refuge for Jewish refugees from Nazi-controlled Europe, Undersecretary of State Stettinius revealed. This is the former Italian colonial possession in North Africa. Stettinius continued that large numbers of refugees are arriving in southern Italy daily from Yugoslavia and other Balkan areas.

The Washington MERRY-GO-ROUND

DREW PEARSON

Washington, D. C.

DISCHARGED VETERANS

President Roosevelt has just received a suggestion from Chicago's Mayor Ed Kelly designed to aid in the rehabilitation of ex-servicemen.

Kelly, acting on a proposal from his wife Margaret, head of Chicago's tremendously popular servicemen's aid organization, has urged FDR that men be permitted to wear their uniforms for three to six months after they are discharged, if they want to. Kelly pointed out that 30,000 Chicago boys have been discharged from service and that many return home, after a year or more's absence, feeling thoroughly out of place in the community in civilian clothes.

Many folks don't even know the boys have been off to war serving their country, Kelly has pointed out. Discharge buttons, promised many months ago, are still not issued to men everywhere. Even though disabled, they no longer can enter servicemen's centers for recreation, no longer receive special rates in theaters.

Kelly also wrote the President that, during the last war, men were allowed to keep wearing their uniforms for some time after their discharge. Many walked the streets in uniforms hunting jobs and received preference because they were veterans.

Note—Chicago's servicemen's centers have done one of the best jobs in the U. S. A., have served more than 12,000,000 meals free.

* * *

CONGRESSIONAL SOLDIERS

It's not nearly so bad as in the last war, but several younger members of congress are having trouble as they seek reelection, because they are in congress and not in the army. In most cases, the "slacker" charges are simply whispered.

In one case, political opponents are whispering about a congressman who has received the navy's Silver Star for gallantry in action. He is Lyndon Johnson of Texas, who saw his bunkmate killed beside him in the South Pacific.

Representative Albert Gore of Tennessee, who is 36, is another who has been smeared in a whispering campaign. A father, Gore waived his congressional immunity last winter and was inducted into the army as a private. However, at the request of the President, he returned to congress before he began training.

Others who have felt the lash of criticism because they are serving their country in the office to which they were elected are Wilbur Mills of Arkansas, Jamie Whitten of Mississippi, Lindley Beckworth of Texas, and even Representative Warren G. Magnuson of Washington. The 39-year-old Magnuson, now running for senator, has seen more of the western Pacific theater than most soldiers and sailors in the area, was serving on the aircraft carrier from which General Doolittle's planes took off for the first bombing of Tokyo.

* * *

AIR-COOLED CONGRESS

While war workers swelter in movie theaters and while government officials suffer in Washington's flimsy temporary buildings, the high-ceilinged house and senate office buildings enjoy air conditioned comfort—even with congress adjourned.

Although the capitol air-conditioning equipment is being geared to use the smallest possible amount of freon gas, the fact remains that it took a special deal with WPB to release the 14,000 pounds needed. Meanwhile, movie theaters serving war workers in the South have been denied freon because of military demands.

Capitol Architect David Lynn says he's the man to blame, not members of congress. He says not a single member has taken the matter up with him.

Probably no one is directly to blame, unless it is the WPB officials who played favorites in releasing the freon. No one begrudges the congressmen their air-conditioning, but their buildings, because of thick walls and high ceilings, would be cool even without air-conditioning.

In the army's huge Pentagon building, the freon supply has been cut to the bone. The result, according to workers there, is that the atmosphere is slightly warm. Last year they claimed it was far too chilly, with many colds resulting.

* * *

CAPITAL CHAFF

¶ NBC's popular "Labor for Victory" radio program will be suspended for the summer after nearly two years on the air. Reason is the AFL won't cooperate with the CIO in putting it on.

¶ Insiders report that the recent visit of Polish Premier Mikolajczyk to Washington was highly successful. The Polish government is now expected to purge itself of anti-Russian leaders such as Beck and Pilsudski. In return, Russia will sign a treaty of cooperation with Poland similar to that with Czechoslovakia; also will give the Poles more territory around Lwow.

¶ Taxpayers will get some jolty reading in Prof. Harold Groves' "Production Jobs and Taxes," published by McGraw-Hill for the committee on economic development.

Walter Winchell

(WNU Service)

FBI Items and G-Maneuvers

In the gangster film about Roger Touhy and his gang the producers lost a few good tricks which apparently the gov't agents didn't tell them about—after Touhy and his mob were recaptured. . . . Frixample: When the FBI went into the rooms of two of the gang—they didn't notice a match stuck at the top of the door. . . . To let the gang know if anyone entered during their absence. One mobster had started opening the door when he realized the planted match was gone. . . . So he started firing his revolver. . . . The agent came out shooting too, and two of Touhy's pals were hit by the marksman and went to heaven.

Then there's the episode in the butcher shop. . . . A uniformed chauffeur turns out to be one of the Touhy gangsters. He went to purchase meat in the neighborhood for Touhy (and the others) who didn't risk coming out of the house. . . . The butcher shop, however, was staffed by G-Men. . . . After a signal from one butcher a bike-rider G-Man tailed the chauffeur to the scene where Touhy was hiding. . . . But the confederate was not disguised as a chauffeur in the actual kidnap. . . . The movie people apparently didn't want to offend the devout by sticking to the facts. . . . The disguise worn by the gangster in the meat shop was that of a priest.

The average newspaper reader, recalling Touhy's mob, will think the snatched man is the rich Jake the Barber, victim of that gang. . . . But in the film the producers purposely switched things to give the story more pep. . . . Jake the Barber's real tortures cannot be screened or even written about—so vile were they. . . . So for the screen the authors and director borrowed several interesting items from the kidnappings of a wealthy youth named Rosenthal (in New York) and the Urschel snatch in the West. . . . All the kidnappers are now rusting and rotting in prison on sentences for life.

The most frightful moment in Director J. Edgar Hoover's entire life happened that terrible 5 in the morning—when the night was still black. . . . Hoover and some of the agents attacked the Touhy mob from the rear of the building—other FBI men covered the front. . . . Mr. Hoover, revolver in paw, climbed over the back fence and tread softly to the back door, where he let out the most piercing shriek ever heard anywhere in the whole world. . . . It seems that a poor, little, inoffensive, sleeping black cat was stepped on by the most famed of all G-Men, and it let out one screetch, which the startled G-Man tried to out-holler.

FBI agents the other day were investigating a theft of gov't-owned cigarettes destined for overseas shipment. . . . The foreman, who had denied any knowledge of the theft, produced a package of cigarettes bearing a give-away gov't label. . . . The agent, who had mooched a cigarette with a definite purpose, forthwith arrested the foreman, who was charged with the crime.

One of the problems confronting the FBI these days is the apprehension of individuals obtaining money fraudulently under the Servicemen's Dependents Allowance Act. Sixty-nine convictions have resulted during the first ten months of the 1944 fiscal year. An oddity in the FBI's files on this subject has to do with a Louisville, Ky., woman who, when questioned by FBI agents, offered to return fourteen $50 checks she got illegally, but hadn't spent. She said she had kept all the checks except one, which the soldier himself cashed, and that she was most willing to return them to the Government.

The alertness of G-Men was demonstrated again the other day in Los Angeles. An agent spied a man on the street whom he recognized as a fugitive—a wanted notice had been issued a few days before. Although the suspect produced phony selective service cards, the G-Man was persistent and took his fingerprints, whereupon the fugitive admitted his identity as Walter Ray Carroll, wanted in Washington State in connection with a $25,000 narcotics robbery.

Among the latest rackets discovered by the John Edgar Hoovers is that one used by some fortune-tellers to swindle gullible draft-dodgers. . . . The G-Whizzers nabbed one fortune-teller in Texas. . . . She got neat fees "for keeping men out of the army." . . . Her hocus-pocus, however, was not very effective. . . . Most of her suckers were inducted, anyhow. And she was inducted into a Federal hoosegow, where she can't predict her release.

STROLLING DOWN the roadway to the entrance of the old French convent which is their barracks in North Africa are these five WACs who are assigned to the headquarters offices of Allied force headquarters. They are, left to right, Mary C. Woods, Everett, Mass.; Ellen Condon, Missoula, Mont.; Mary Livingston, Chattanooga, Tenn.; Lucille James, Sioux City, Iowa; and Elizabeth Page, Escanaba, Mich. A nun is passing in the background.

returned to the States. The reason given was "excessive nervousness." The three women were aged 30, 35 and 40 respectively, and had backgrounds of nervous instability. What had been a potential inability to adjust at home under secure routine now became complete maladjustment. Major Janeway said they just "couldn't take it."

No diet deficiencies were discovered. Army food was more than adequate, and in addition, the WACs were the friendly concern of army and navy men. They received oranges, eggs that cost $2 a dozen, and a general supply of "nice spoiling." The navy men—who vied with the tradition of their marine brothers for having this situation well in hand—even obtained pillows for the WAC bunks.

"Every time a girl got a letter from home," Major Janeway said, "Mama wanted to know if she was getting her vitamins. She was, but she didn't know it. Fortunately, their folks started sending them vitamin pills and that settled the problem for us. They ate their pills and felt better."

Too Much Sun Tan.

The power of the North African sun was an unknown quantity to the WACs. Anxious to get a smooth tan, they discovered, to their dismay, that it could very easily be overdone. After a few painful burns,

LETTERS FROM home are the best morale boosters. Sgt. Betty Jane O'Leary of Pittsburgh, Pa., sounds the welcome "mail call."

which kept the victims away from work, sunburn was classified "not line of duty." That meant that any WAC who was not sensible enough to get her sun gradually, would have her pay docked for any time she was off work. They soon learned how to do it gradually.

By November, three more WAC companies had reported for duty in Algiers. In December, one company fresh from the States went directly to Italy.

The healthiest women in the whole Mediterranean area, Major Janeway found, were the Fifth army WACs living in tents very close behind the fighting lines in Italy. They were part of a communications platoon based at Naples and half up toward the front, living in tents, working the command post message center. They were with the Fifth army in North Africa and followed when American troops took Naples.

Major Janeway said that the WACs at the front and those in North Africa, for that matter, are so healthy because they do not have time to spend in "frivolous activities."

There is no special training for keeping the WACs in trim. In winter they don't have much opportunity for exercise, but in summer they swim. In North Africa, a program has been set up which provides each woman, after so long a time, a four-day rest period. A rest camp has been established 20 miles up the coast from Algiers. It was opened first for those earliest WACs who were beginning to look a little fatigued after their 12-hours-a-day, seven-days-a-week grind with no passes from January to June.

No similar arrangement has been made in Italy as yet, but Major Janeway believes that one soon will be.

Only Six Marriages.

In 14 months, there have only been six marriages of WACs in the Mediterranean area. It is possible that a three-month waiting period —known as the "cooling-off" period —after announcing marriage intentions to the commanding officer is the reason. This is an army regulation and applies to both men and women.

In regard to the unhappy stories that have been circulating about the morals of the WACs, Dr. Janeway cited medical statistics which showed definitely these rumors to be figments of somebody's imagination.

The women were homesick at times, but "not too badly," Major Janeway said. Six weeks after the first group arrived in Algiers, however, there was no mail from home, which resulted in many a tearful night. But the regular arrival of mail after that, and the strict regimen took care of homesickness pretty thoroughly.

There have been no battle casualties among the WACs. One woman was injured, and one killed in a jeep accident. There was plenty of bombing, but the bombs fell "just across the street" from the Algiers barracks. The bombs would hit the same spot night after night. During the day the damage would be repaired, and that night it would be undone. Yet none of the WACs was hit.

A piece of shrapnel hit the bed in which a WAC was sleeping, but she was unharmed. There was some dispute between her and the occupant of the next bunk as to whom the piece of shrapnel belonged.

Major Janeway said that the jobs which the WACs perform, and about which "they are very keen" are those of stenographers, telephone operators, drivers, cooks, and all kinds of communications jobs.

Asked if the WACs overseas feel that girls at home are lackadaisical

A WAC in North Africa hangs up some personal laundry in the back yard of the convent which serves as a barracks, giving a homelike touch to the grim business of war.

about not joining up Major Janeway replied: "They certainly do!" She continued:

"It takes a level-headed and very well-balanced woman to stand up against that pressure and maintain her own good sense. It takes a level-headed woman to keep rested and to maintain her sense of humor."

dressers, Cosmetics, More Free Time, Keep Up Girls' Morale

k these WACs must really rmed lives," Major Jane- ckled. "Their sick rate has eedingly low and it's sig- I think, that in the last onths of 1943, the com- which had the lowest sick e the companies which had re the longest.

are ample facilities in Al- w to keep up a woman morale, though the morale was high when there were none. They do find good French hair dressers now. The shops are open again, so that they can buy Moroccan leather goods and jewelry. They can get their laundry done, and there's no longer the strict 7 o'clock curfew. They have 9:30 passes every night and two or three 11 o'clock passes each week.

"They can invite their dates to dinner one night a week in their own mess halls—and the dates are lucky. The WAC mess halls are the best in North Africa. They can even stick cloves in a piece of spam and bake it to look and taste like ham.

"The WACs, even those in Italy, manage to keep neat-looking and freshly laundered. If they've had any time in Algiers at all, they have a good new permanent. They can get powder and lipstick and other toilet essentials at the Post Exchanges. They like to get soap and kleenex from home though."

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

WOMAN'S PART IN NATIONAL LIFE

LESSON TEXT—Judges 4:1-9, 13-16.
GOLDEN TEXT—Who knoweth whether thou art come to the kingdom for such a time as this?—Esther 4:14.

Women of our day have unprecedented liberty of action and almost limitless opportunity to show their ability to meet responsbility and to accomplish great things. They are measuring up to that opportunity both in the armed services and in the multitude of tasks they are creditably carrying on in civilian life.

To those who seem surprised at their response to the nation's need, the church could well testify that women have always served well in those things which count most for God and country.

I. A Woman Can Rule (vv. 1-5).

God has established an order in the world which places woman where she best fits—in the home. There, under the guidance and with the help of her husband, she exerts her most powerful influence in the rearings of children. That is her normal, most effective and most blessed position.

But all too often conditions in the world are not normal, and woman, like man, is thrown out of the customary orbit of existence. Deborah faced such a day. Israel had sinned and been given over to the chastising hand of the Canaanite. Then God heard their repentant cry and was ready to send a deliverer—as He did in the case of each of the judges. Apparently no man was ready to take up the responsibility, or willing to thus serve God, and so He called Deborah. She sat under her palm tree and Israel came to her for judgment.

She typifies many women who have been the leaders of their people, and her story has been an inspiration to women in the church. May many more be encouraged to take up the weighty problems of moral and social righteousness, which the men of our nation (and others) do not seem to care or dare to attack!

II. A Woman Can Lead (vv. 6-9).

Barak was a man of ability. Deborah gave him full credit for his capable service (5:1, 12), but eyidently he lacked that initiatve which would send him into conflict with his people's enemies. Without Deborah he would not go (v. 8), under her leadership he was willing and courageous.

It is easy to ridicule Barak, and no doubt he deserves some measure of censure, but let us not be too severe on him. When the records are all in, it will be known that many of the feats of courage, the high and noble decisions, the victories in the fields of science and culture, and particularly those things that have been accomplished in and through the church, were the result of the leadership of some woman.

Many are the distinguished national and spiritual leaders who have said that all they were and had accomplished they owed to their mothers. Others speak with high appreciation of a noble and inspiring wife.

Think also of the many social and religious causes which have been largely carried on by determined and sacrificial women. Yes, a woman can lead, and often she must lead out to get the men to follow.

Not all the pursuits of life are lived out in peace or in preparation for war. The time comes when battle must be joined, and then we see that

III. A Woman Can Fight (vv. 13-16).

True it is that it was Barak who led his army, but he went out at the word of Deborah. Hers was the responsibility for strategy, for the determining of that important D-day, when the blow must be struck.

The courage of women in the battles for country makes an inspiring story. Not the least of that courage has been shown by those who have quietly stood "by the stuff" at home, who have bravely parted with their cherished loved ones, who have borne the dark hours of loneliness, uncertainty and often of heart-piercing sorrow. They shall not be without their reward (see I Sam. 30:24).

This is the place to say a further word of appreciation of the women of the church who have fought such a valiant fight against liquor, social degradation, vice, evil politics, etc. "Hats off to them!" May they be encouraged to go on.

Then too, one ought to say a word of sad and earnest admonition to those countless women who have used their great freedom in our day as a license to live wicked and ungodly lives. They do not have the courage to stand against the loose moral standards, the common acceptance of intoxicants, the immodest apparel of the day.

Christian women have the golden opportunity of setting a fine pattern of useful living now. Let them make the most of it, for the glory of God.

PATTERNS SEWING CIRCLE

For Sheer Prints

MAKE a pretty and cool-looking afternoon frock for the hottest days in one of the new sheer rayon prints in ice-blues, frosty pinks and lavenders, in lime greens and soft dull yellows. The simplicity of the lines of this frock are a "natural" for soft fabrics.

* * *

Pattern No. 8608 is in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, short sleeves, requires 3¾ yards of 39-inch material.

For Summer Days

COMFORTABLE play clothes make life just that much pleasanter for the very young! This three-piece set of overalls, sun-suit and matching bolero constitute a whole play wardrobe. Use lightweight blue denim, seersucker, chambray or pique in cheerful colors.

* * *

Barbara Bell Pattern No. 1960 is designed for sizes 1, 2, 3, 4, and 5 years. Size 2, short sleeve jacket and slacks, requires 2¼ yards of 35-inch material; sun suit, 1⅛ yards.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago

Enclose 20 cents in coins for each pattern desired.

Pattern No.....Size.....
Name .....
Address .....

Household Hints

Squirt kerosene on nuts and bolts that are to be loosened, once each day for several days, before the machine is to be worked on. They'll come off much easier.

* * *

For cleaning a coffee-stained percolator, put in a cup of salt, fill with water, and let the mixture percolate as for coffee.

* * *

To help in remodeling dated garments, try grandmother's custom of having a "piece bag." In it put all saved zippers, bits of ribbon and lace, and scraps of fabric.

* * *

To tell at a glance which are your good handkerchiefs, iron them into triangles and plain ones into squares.

* * *

To make tassels, cut a cardboard gage length you wish the tassel to be. Wrap floss or yarn over and over the cardboard and tie a thread through the upper end. Cut through lower end and wrap thread around upper end several times to hold tassel together.

Sharp Rebuke Brought Him Memories of Home

A man walked into a restaurant and left the door open.

A big fat man called out: "Shut that door. Were you brought up in a barn?"

The man closed the door, went to a table, sat down, and began to cry. At which the fat man looked uncomfortable and went over to the sorrowful one.

Said he: "I'm sorry. I didn't intend to hurt your feelings. I just wanted you to close the door!"

"I'm not crying because you hurt my feelings," came the reply, "but I was brought up in a barn, and every time I hear an ass bray it makes me feel homesick."

Raindrop Has Its Ups and Downs Becoming Hailstone

A hailstone is a drop of rain that is carried up and down between currents of warm and cold air which alternately coat it with moisture and then freeze the coat, says Collier's.

Consequently, as these coats, or concentric layers, are visible when the stone is cut in two, the number of times it was carried up and down before falling can be determined.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

Wallace Pavey had a new roof put on part of his shop this week.

Mr. and Mrs. Victor Waldek of Hayfield spent Sunday visiting at the Emil Patet home.

Mrs. Arnold Blau left last week for Camp Ellis, Ill, for a visit with her husband who is stationed there.

Patsy Ann Kinsella of Ventura spent several days of the past week visiting at the Dan Webner home.

Grandma Caroline Schlawin is visiting for a couple of weeks at the Lew Griffin home in Liberty.

Mrs. W. F. Pavey, Mrs. John Clements and Mrs. Verner Lewis were Mason City visitors Tuesday.

The Fifty-Fifty Class of the Methodist Sunday school met at the Rev. Harvey home Monday evening for a party.

Miss Harriet Gibbs of Mason City, spent the week end visiting with her parents, Mr. and Mrs. H. R. Gibbs of near Klemme.

Mr. and Mrs. Clarence Johnosn and family of Renwick, spent Sunday in Klemme visiting with relatives.

Mrs. Dale Schreiber and children of Moville, Iowa, came Sunday for a two weeks visit at the E. J Schneider home.

Mr. and Mrs. Keith Albertson and baby David drove to Swea City Sunday to bring Jimmie home, who had visited there for the past week.

Myrna, daughter of Mr. and Mrs. Harvey Barz, was on the sick list and confined to her bed several day the past week.

Miss Betty Etchen, of Des Moines, spent the week end in Klemme visiting with her parents, Mr. and Mrs. John Etchen.

Lt. Lyle Ruka, of Goodell, has been transferred from Lincoln Nebr. to Ardmore, Oklahoma. His wife is with him at Ardmore.

Junior Kinsella of Ventura spent several days of the past week in Madison, Wisconsin, visiting at the Pfc. Herb Webner.

Sgt. Morris Ahrenkeil of Goodell has been promoted to Staff Sergeant, according to a report from the War Department.

Mrs. T. W. Pavey and son of Albert Lea, Minn., were dinner and supper guests at the W. F. Pavey home Sunday.

Mr. Jacob Bock of Eugene, Oregon, came Tuesday to spend a week visiting with his sister, Miss Lydia Bock.

Miss Marie Blank, who had her tonsils removed at the Mercy hospital last week, was off duty all of the week, but returned to her work at the beauty shop Tuesday.

Wayne Pavey and family of Webster City visited in Klemme Saturday night on their way to Plymouth to spend Sunday there with the Woodhouse family.

Mr. and Mrs. Wm. Ax and Irvin; Mrs. Lesley De Merritt and children, and Miss Gladys Schlichting of Mason City, were dinner guests at the Fred Schlichting home Sunday.

Mr. and Mrs. Ed. Greiman concluded a visit at the W. H. Hubbard home at Goodell and returned last week to their home at Scotts Bluff, Nebr.

Mr. and Mrs. Marvin Isvik and children returned to their home at Chicago, Sunday, after visiting with the Larsen family here and the Isvik family at Jewell for the past two weeks.

The Dorcas Society of the Klemme Methodist Church will meet this Thursday afternoon at one o'clock at the church and will work on a quilt. All members are asked to come. Lunch will be served.

The employees of the Northern Lumber Co. here held their annual fried chicken dinner at the yard shop room Thursday evening. There was plenty of chicken and all the trimming for everyone.

Mr. and Mrs. Oscar Grosshuech returned to their home at Yankton, S. D. last Wednesday after a week's visit with the Rev. Grosshuesch family. The men are brothers.

Fruit crop prospects indicate more peaches, pears and apricots will reach the civilian markets this year than in 1943.

Miss Dorothy Baack of Detroit, Michigan and Mrs. Ed. Mauritz of Marshfield, Wisconsin, came last week for a visit at the home of their parents, Mr. and Mrs. Herman Back of near Klemme.

The Northern Lumber Co. made a nice improvement at their yard when they put down a concrete floor near the front of the building between the two alleys. This provides a storage space for kegs of nails and shingles.

Everett Evenson of the U. S. Navy, son of Mr. and Mrs. O. C. Evenson of Goodell, has been assigned to the Naval Air Base at Chincoteague Island, Pocomoke City, Maryland. Mrs. Evenson is with him.

Sgt. and Mrs. Francis Pierson left last week for Brigham, Utah, after enjoying a 15 day furlough spent in this community visiting with their parents, Mr. and Mrs. Carl Pierson and Mr. and Mrs. John Lass.

Mrs. D. P. Anderson rates as one of the early gardeners this year as she had home-grown sweetcorn on the cob for her family on July 11. C. G. Waterman was a close second when he picked a mess of corn in his garden July 17th.

Look at Your Money! An expect tells how the U S. Secret Service makes it easy to detect phony coins and bills and how you can play a vital part in nabbing counterfeiters Read J. J. Floherty's informative article in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

SSgt. John Kleinmaier and his bride, the former Beulah Sulzberger of Ransom, Ill, spent several days visiting at the homes of his sisters, Mrs. Ted Dutheridge and Mrs Ernest Helps. On completion of an 18 day furlough, from duties overseas, where he has been since June 11, 1942, he will return to his post.

Mrs. Godfrey Greene returned to her home in California Sunday. Mrs. Greene had been visiting with relatives in this community for over a month. She is the former Hulda Johnson, daughter of Mr. Joe Johnson of Klemme.

Elwood Harvey and Edward Buntenbach, Jr., were at Estherville on business Thursday. Edward appeared before an aviation inspector to secure the necessary permit to solo in an airplane. He is taking flying lessons at Mason City this summer.

Avis Barz, Evelyn Arnold, Helen Albers, and Luella Theiman spent several days last week at Clear Lake where they had rented a cottage.

Mrs. J. N. Day spent from Friday until Sunday evening at the Alex Ross home at Garner taking care of the Ross house, as Mrs. Ross was with her husband who underwent a major operation at the Mercy hospital Saturday morning.

Mr. and Mrs. C. C. Kilgore of Fort Dodge, accompanied by their son Lt. Lyndon Kilgore of Camp Maxey, Texas, and their daughter, Miss Ellen of Las Vegas, New Mexico, came Saturday afternoon and visited until Sunday evening at the Joe Burgess home near Klemme, and also visited with their many friends in this community.

With pig numbers down sharply, the future civilian meat supply is certain to be smaller than that of the past 12 months.

METHODIST TO HAVE SPECIAL HOBBY SHOW

Would Like To Dsiplay Service Mens' Souvenirs

An international exhibit and doll show is to be given at the Klemme Methodist Church on August 11, afternoon and evening. Last year we had a hobby show which was approved and applauded as a worthwhile wartime recreation. This year the exhibit will be of a different type It will consist of a noted doll collection, and a collection of souvenirs and relics sent and gathered from various nations by the servicemen and others who have made such a collection a hobby.

The committee on collection and exhibit is: Misses Novella Bredbenner, Thelma Chambers, Glenna Grutzmacher, and Mrs. Marian Wilcox. Those having souvenirs from the warring areas sent home by the boys and willing to let us display them please call one of the committee

The exhibition will be open to the public. Lunch will be served. There will be no admission charge

LIBERTY BUSY BEES 4-H CLUB

Mary Joan Haberkamp was hostess to the Liberty Busy Bees 4-H Club on July 20.

Summer and fall garden plans were discussed by the group. Dorothy Moll gave a talk on Latin American Music.

The Club decided to pay expenses of two girls who would attend the 4-H camp at Clear Lake on August 7, 8, and 9.

Marjorie Bredlow had charge of the recreation period, which was followed with refreshments served by Mrs. Haberkamp and Mary Joan.

MRS. FRANKLIN NAMED TO EDUCATION BOARD

Mrs. Floyd Franklin of Avery township was appointed a member of the Hancock county board of Education to fill a vacancy. She succeeds Mrs Harry Ruka of Goodell who resigned.

The board voted to appoint a depository at Woden to service the rural schools of Bingham and County Supt. Charles S. Whitney was appointed to make the necessary arrangements for such a depository.

Will Hold Examinations For Teachers Certificates

Co. Supt. Chas. E. Whitney has announced that examination for uniform county teachers certificates will be offered Wednesday, Thursday and Friday, August 2, 3, and 4, at the Court House in Garner.

Special Normal Training examinations will be offered at the same time.

JO ANN CARPENTER HAD BIRTHDAY PARTY MONDAY

Jo Ann Carpenter celebrated her 11th birthday Monday afternoon when her mother, Mrs. Dwight Hummel invited a number of little girls to her home where games were played and a nice birthday supper was served.

Jo Ann received a variety of nice gifts from her friends.

Strange Bedfellows

SCHMIDT FARM SCENE OF STROMER FAMILY PICNIC

The Stromer family reunion and picnic dinner was held at the Herman Schmidt farm Sunday, with the following present:

Mr. and Mrs. Julius Priebe; Victor Hueneman and family; Fernon Griggs and family; Fred Schmidt and family; Mr. and Mrs. Erwin Priebe and Eleanor.

Mr. and Mrs. Frank Bienert and Franklin; Paul Stromer and family; Mr. and Mrs Paul Goll and Beulah; Mr. and Mrs. Herman Schmidt and Luverne.

The following visitors were present: Wm. C. Schmidt, Rev. and Mrs Calvin Grosshuesch, Rev and Mrs. J. W. Grosshuesch and Eugene Daniels

After the bounteous picnic dinner was enjoyed the many relatives present enjoyed the balance of the afternoon in visiting

Klemme People Attended Sister's Funeral At Ventura, Friday

Funeral services for Mrs. Bertha Kluseman, 76, were held at the United Brethren Church at Ventura Friday afternoon with the Rev K. R. Mead, pastor, conducting the rites. Burial service was in the Clear Lake cemetery.

Mrs. Kluseman was a sister of Mrs. John Neuberger, Mrs Wm. Waddingham and and Mr. Henry Jahnke of Klemme.

Mrs. Kluseman was preceded in death by her husband, who died about twelve years ago, and a daughter, Gertrude.

HANCOCK — FLOYD COUNTIES 4-H CAMP

On August 7, 8, and 9 about 80 4-H girls from Hancock and Floyd Counties will assemble at the Methodist Camp ground at Clear Lake for camping.

From seven in the morning until ten thirty at night, the girls will be busy with nature study, discussion groups, music, organized play, swimming, handicraft, eating, resting and all the good times that go with camp life.

Miss Winifred Martin, Miss Esther Taskerud, Mr Harold Gunderson from the Extension service of Iowa State College as well as several local leaders from County will be present the entire time to assist in carrying out the program.

TWO MORE HANCOCK COUNTY FARMS SOLD

August Brunen, farmer living near Woden, recently purchased the old E. W. Kendall homestead in Orthel township. The farm is now occupied by the Mike Gahan family who will relinquish possession to the new owner March 1, 1945. The deal was made through Ole G. Peterson, Britt realtor.

N. E. Brear recently purchased the northwest quarter of Sec. 1 in Ell twonship from Delbert Sankey. The farm is located about 6 miles east of Garner. Consideration was listed at $16,000.

LESS CHICKENS WILL BE RAISED IN IOWA IN 1944

Iowa probably will market about 5 percent fewer chickens in 1944 than in 1943 when 243 million pounds were sold. Ralph L. Baker, extension poultry marketing specialist at Iowa State Colege, says a larger percentage of this year's sales will be fowl and old roosters. Last year 124 million pounds marketed were in that classification.

From 10 to 12 percent fewer young chickens wil be raised on Iowa farms this year than 1943's record number. With fewer pullets in farm flocks, egg production also is due for a cut, Baker reports. This reduction in young chickens on Iowa farms is more severe for the United States as a whole, with the number of chickens to be raised on U. S. farms estimater at down 20 percent from a year ago.

In 1943, 2½ billion pounds of chicken were sold from U. S. farms sales for the country as a whole in 1944 probably will be down about 15 percent from a year ago, the marketing specialist estimates.

HELLO, FOLKS

Mr. and Mrs. Curtis Greiman are the parents of a baby son born to them at the Care-Others home in Garner, Saturday, June 15th.

Hancock County Men Inducted At Ft. Snelling

STATE LAB FINDS SIGNS OF RABIES IN ANIMALS

Health Department Urges Safe Policy For Humans In Avoiding Infection

While no human cases of rabies have been reported in Iowa this season, the state hygienic laboratory at Iowa City has found positive indications of this disease in at least eight animals and the Pasteur preventive treatment has been given to five persons suspected of being bitten by rabid dogs, the state health department reported today.

In its June monthly report to the health department, the state laboratory listing findings of rabies in five dogs and in a sheep, fox, and cat. Preventive treatments have been given to five persons in Keosauqua following bites received from a small pup and a stray dog.

Though there is no proof, according to the department, that "hot weather makes dogs have rabies, the only safe policy against the disease is to consider all biting dogs or other animals as rabid until it is proven conclusively they are not."

Dogs the department said, comprise the greatest danger to humans and the first sign of the disease in dogs, it was brought out, is a change of disposition.

"The usually playful dog become mean, for example, and any dog with changed behaviour should be suspected."

In the later stages the dog is usually quite excited and snaps at everything that might harm him although occasionally, in so-called cases of "dumb rabies", the dog lies about quite dumb and sleepy, only biting at persons and things that disturb him.

The department said that rabid dogs will die in less that 14 days and suggested that persons bitten by dogs should have their wounds cauterized immeriately in addition to taking the Pasteur treatment if necessary.

AVERY 4-H SUNBEAMS

Marlene Roths entertained the Avery 4-H Club at her home on July 20 with twelve girls and their leader present. Most of the afternoon was spent in making plans for a local achievement day which is to be held at the Henry Busse home on August 15.

The program for the afternoon was as follows:

Demonstration: "Simple fly traps," Lois Ann Lau.

Talk: "State Convention at Ames," Arlene Wille.

Refreshments were served by the leaders after which some of the girls enjoyed several outdoor games.

HANCOCK COUNTY CALENDAR

July 28 — Madison Live Wires at the home of Arlene and Marie Jakoubek.

August 1 — Farm Bureau Board meeting at the Farm Bureau office at 8:30 p. m.

August 7, 8, & 9, — Girls' 4-H Camp at Clear Lake.

THIRTEEN MORE HANCOCK COUNTY MEN IN SERVICE

Leave Hancock For Duty In The Army And Navy

Thirteen Hancock county men left Wednesday for Fort Snelling, Minn., where they were inducted into active service in the army and navy.

They are: Verlyn R. Friedow, Kanawha; Frederick A. Van Dyke, Greene, formerly of Britt; Orlan J. Paulsen, Garner; Peter J. Paulson, Robert G Jensen, Donald E. Eiseman, all of Britt; Don E May, Corwith; Clarence Schroeder, Garner; Dwane L Thompson, Richard D. Thompson, Gordon H. Severson, all of Kanawha; Anthony F. Young, Garner

Thomas M. Burge of Palmdale, Cal., is being transferred to this county for induction and will leave with the contingent.

IOWA OLD AGE PENSION ROLLS SHOWS DECREASE

Des Moines, —Two hundred and 74 elderly Iowans dropped off the old age pension rolls during the first 6 months of this year because they got jobs that made such state support unnecessary, a review of state board of social welfare reports showed.

Another 10 persons left the pension rolls because their husbands, wives or some other member of their families got jobs and 85 cases were closed because the pensioners or some member of their household began receiving allotment checks from relatives in the armed services.

The report also showed that 379 aid to dependent children cases were closed during the first half of the year, the chief reasons being that the children or some members of their families got jobs.

IOWA FARM INDEX REMAINS UNCHANGED

Little Fluctuation Of Prices During Month

The general farm index of prices received by Iowa farmers remained steady this month at 191. The meat animal index rose a point on strength of a small advance in beef cattle prices but crops and dairy products remained the same, while poultry and eggs declined two points when live chicken prices moderated a fraction of a cent.

Feeding ratios also are steady with price stabilization the rule all along the line. The egg-poultry feed ratio and butterfat-dairy feed ratio are at 10 3 and 24 8 respectively and the corn-hog ratio drops a point from 12.8 to 12.7 as heavy marketings forced slight declines in the price of certain of the unsupported grades of hogs.

The quarterly revision of the prices paid index also held steady this quarter at 178. Slight increases were recorded in many lines of consumer goods, notably clothing, but these increases were offset by substantial downward adjustments in the prices of feeder livestock.

OBITUARY OF MR. HENRY LEWIS

HENRY LEWIS was born at Beaver Dam, Wisconsin, December 31, 1888, one of a family of 8 children born to his parents, Llewellyn and Blanche Lewis.

When Mr. Lewis was 3 months old the family moved to Iowa and for a few years lived at Porter's Siding, which was a side-track on the railroad about a mile north of Klemme. After the town of Klemme was started in 1889, the family moved into the town, where Mr. Lewis has lived ever since. He is one of the few people who have lived here continuously since the town was platted.

He attended the Klemme schools, was a member of the Methodist Church and when a young man began a poultry and egg buying business which he continued until the time of his death. In point of years of serving this community, he can be ranked as one of our oldest business men.

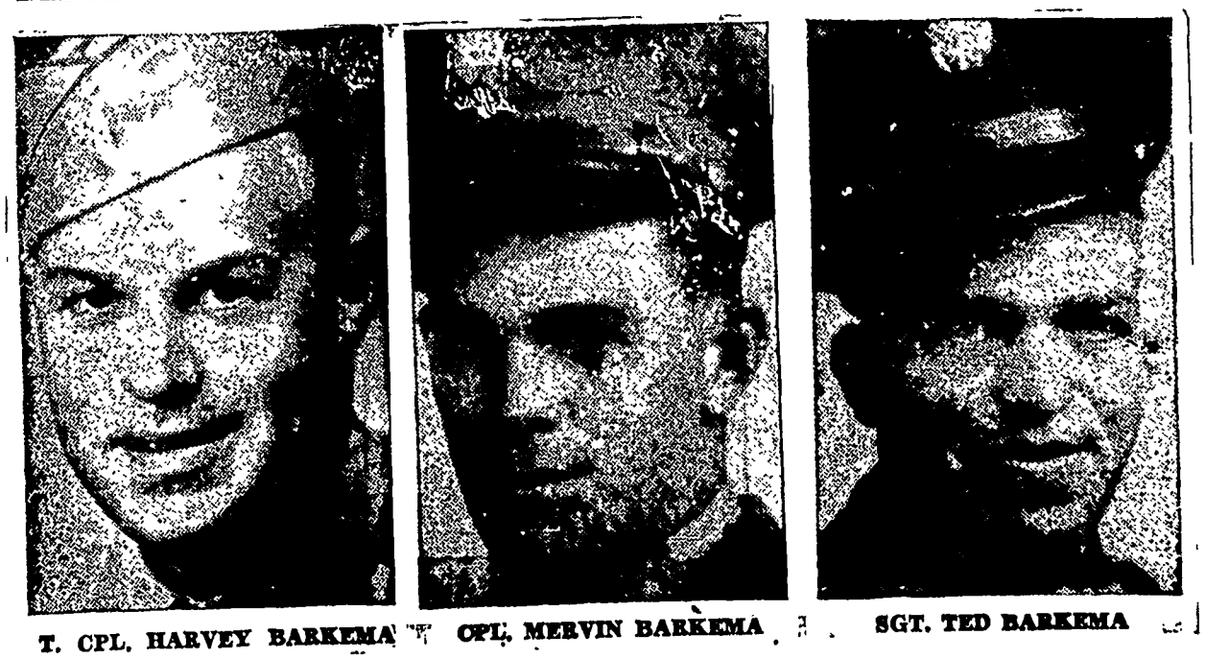
On November 26, 1914, Henry Lewis and Rose Etchen were married and made their home in Klemme. This union was blessed with two children. A daughter, Eva May, who died at the age of 3 in 1918, and a son, Duard, who survives.

Henry Lewis was a pleasant, easy-going man who enjoyed the many good things which this life provides, and had many friends.

On July 4th, Mr. Lewis was stricken with a heart ailment, and died at a Mason City hospital Tuesday evening, July 18, 1944 at about 6:00 o'clock. He reached the age of 55 years, 6 months and 18 days.

Of his immediate family he leaves his wife and son, Duard; four brothers, Charles, Holley, Verner and Ernest; one sister, Gertrude (Mrs. Henry Yahnke); as well as numerous nieces and nephews, and many more distant relatives and friends.

Klemme Farmer Has Three Sons In Service



T. CPL. HARVEY BARKEMA CPL. MERVIN BARKEMA SGT. TED BARKEMA

Before answering the call of their country, these three sons of Mr. Hauko Barkema, farmer living northwest of Klemme, were employed on farms around Goodell and Klemme. The family formerly lived near Goodell before moving to their present farm in Liberty Township. Sgt. Ted Barkema writes he is in a foxhole in France. T-Cpl. Harvey Barkema is serving somewhere in the Pacific. Cpl. Mervin Barkema is stationed at the air transport command, South San Francisco, Cal., and was home recently on a furlough. (Cuts Courtesy Mason City Globe-Gazette.)

Of all the roles which Jay Jostyn, "Mr. District Attorney," has en...cted, one of his favorites is that ...of a virile sea captain. He played ...it on a midwestern station many ...years ago, on a series based on the ...adventures of sea-faring men, and ...it was very, very salty. And Jay, ...who at that time had never been ...on anything larger than a row-boat, ...had a wonderful time.

—*—

Eddie Cantor, who's spent the last ...two months in New York broadcast...ing from nearby hospitals and serv...ice headquarters, is on his way ...back to Hollywood; en route Eddie ...will play his self-named "Purple ...Heart" circuit of rehabilitation hos...pitals.

—*—

Many howls provided by Harry Savoy come during his ad-lib warm-ups before the broadcasts (NBC, Thursday nights). Recently he walked on stage, was introduced by Jimmy Wallington, and asked the audience to take out their handkerchiefs and wave them at him. "Thanks," said the Crown Prince of Confusion, "that's the first clean laundry I've seen in months."

—*—

ODDS AND ENDS—Special footage for Kay Kayser's Columbia picture, "Battleship Blues," will be filmed in Rocky Mount, N. C., his home town. . . . Flower Parry, ex-wife of Jackie Coogan, returns to the screen in an important role in "Hollywood Canteen." . . . Of all the movies in New York, soldiers, sailors and marines receiving free tickets at New York's "99 Park" one night recently, most wanted to see "Back Home in Indiana." . . . A new song by Cole Porter, "Don't Fence Me In," will be sung by Roy Rogers and his Sons of the Pioneers for their special appearance in the all-star musical extravaganza, "Hollywood Canteen."

THE SUPREME COURT PLAY BY PLAY

There was quite a sensation in Washington the other day. Caused by a report the United States Supreme court had agreed on something. It was erroneous.

—*—

Those Supreme court decisions are getting harder to keep track of than the baseball scores. There are more disputes among the justices over what the laws mean than there are among police court lawyers.

—*—

The police court lawyers have this on their side: they sometimes stick to an interpretation for weeks at a stretch.

—*—

The very words, "The Supreme court has reached a decision" today brings the inquiry, "What was the score?"

—*—

And also, "What inning?"

—*—

The other day a decision that had stood for 75 years was thrown out the window by a 5 to 4 vote, with two justices out to lunch. Three Supreme court justices agreed with Chief Justice Stone that the law should be sustained. Four agreed with Justice Hugo Black that it should be brushed off without regard for precedent or past decisions by the high court.

—*—

And the Supreme court is the court to which cases are sent because those in the lower courts can't agree!

—*—

The public looks on in complete dizziness. The lower courts look on with chuckles. And the lawyers of the country look on with a feeling that perhaps they should cease to consult Blackstone and leave everything to a pinball machine.

—*—

There used to be a feeling that a point of law could be settled by carrying it to the highest court in the land.

—*—

In fact, the feeling was pretty well based.

—*—

You thought the Supreme court justices had read the same law books that the rest of us had. And that they had extra qualifications for catching the drift of them.

—*—

You never had the impression that the justices were playing in different leagues, using opposing technics and employing conflicting systems.

—*—

Lawyers took cases to the Supreme court to get them settled!

—*—

Those were the days!!

* * *

Dictators' Jitters

With grandiose gesture Hitler takes
the lead,
Safer in front than in the rear, indeed;
Behind him millions, shattered and
afraid—
Before him Gotterdammerung is
played.
His paperhanging soul reverts to
paste—
His magic carpet long since chewed
to waste.

In dubious refuge of Italian lakes,
A would-be Caesar shrivels up and
quakes—
Shrieks orders to a free and mocking Rome.
Fear in his heart; no country for a
home,
Il Duce bangs his long degraded
head
Against the marble statues of the
dead.

—MARGARET MANN.

* * *

Can You Remember—

Away back when you had to take what you could get for an old flivver that wasn't much good any more?

When Adolf Hitler could make a microphone speech and scare anybody?

Back when a Supreme court decision was supposed to settle things?

* * *

Off Season

**The summer's not the season when
A man is really best off;
Where can he put his pencils, pen,
His notes and watch, with vest off?**

* * *

There are some indications in the news from Normandy that the attitude of some French people is, "We are about to be liberated and gosh how we hate it!"

* * *

We understand that Mussolini whiles away the time sitting in front of a picture of Der Fuehrer and singing, "You made me what I am today: I hope you're satisfied."

* * *

ODT complains that Americans are not heeding its plea to cut out conventions for the duration and help relieve railroad congestion. We understand that all over the country various organizations went into session to take up the ODT complaint. They will probably vote to decide the matter at a convention.

* * *

A butcher has been fined $50 for threatening to use a knife on an OPA investigator. Any understanding of the book of etiquette would have required a fork.

Jams to Help Save on Butter Next Winter

Berries for jams and jellies need picking over to remove the too-soft or wormy ones from the good. Use colander and large pans to make an easy job of this preliminary step.

Next winter when butter and other fats are scarce, you'll thank yourself for putting up a generous supply of jams, jellies, butters and marmalades to help spread bread and rolls.

Fruits and berries are plentiful now and good spreads can be made without using the one cup of sugar for one cup of fruit, in case your canning sugar is at a premium. In fact, in many cases you'll find that three-fourths of a cup of sugar to one cup of fruit will work perfectly well.

To assure success in making jams and jellies, watch cooking time carefully. In most cases, the juice from the fruit or berry is extracted slowly, but when juice and sugar are combined, cook quickly to finish so that none of the bright color of the fruit is sacrificed.

When the fruit or berry is low in natural pectin, use a commercial form and follow directions for sugar and juice.

Ripe Sour Cherry Jelly.
(Makes 7 medium-sized glasses)

3 cups juice
4 cups sugar
1 box powdered fruit pectin

To prepare juice, stem and crush about 3½ pounds fully ripe cherries. Add ½ cup water, bring to a boil, and simmer, covered, for 10 minutes. Place fruit in jelly bag and squeeze out juice. If there is a shortage of juice, add a little water to fruit in bag and squeeze again.

Measure sugar into a dry dish and set aside until needed. Measure juice into a 3 or 4 quart saucepan.

Place pan over hottest fire. Add powdered fruit pectin and mix well. Continue stirring until mixture comes to a hard boil. Pour in sugar at once, stirring constantly. Continue stirring, bring to a full rolling boil, and boil hard ½ minute.

Remove from fire, skim and pour quickly. Paraffin hot jelly at once.

Dried Apricot and Pineapple Jam.
(Makes 11 6-ounce glasses)

4 cups prepared fruit
7 cups sugar
1 bottle fruit pectin

To prepare fruit, add 2 cups water to ¼ pound apricots. Cover and let stand overnight. Drain fruit, grind or chop fine and mix with juice. Crush well or grind 1 medium-sized pineapple or use No. 2 can crushed pineapple. Measure sugar and fruit into a large kettle filling up last cup with water if necessary.

Bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Then remove kettle from fire and stir in bottled pectin. Skim. Pour quickly. Paraffin hot jam at once.

Marmalade, golden tinted and sunshiny as the summer day, will win

Lynn Says

Taste-Tested Tips: Old-fashioned potato salad is a treat made with boiled dressing, seasoned with dry mustard. Try a sprinkle of paprika over the top, and serve with crispy, broiled bacon.

Eggs are still plentiful and are a treat when served curried with a rice or noodle ring. Green peas or beans with baby onions are a good accompaniment.

Salads are refreshing as luncheon or supper main dishes. You'll like vitamin C filled oranges sliced on lettuce with one of the following salads in the middle: Chicken, tuna or egg salad; cottage cheese mixed with slivered, seedless grapes; or, cooked prunes stuffed with peanut butter.

Lynn Chambers' Point-Saving Menu

Chicken Salad with Cucumber and Tomato Garnish
French Fried Eggplant
Rye Bread and Butter
Pecan Custard Pie
Beverage

many favorites this winter:

Carrot-Orange Marmalade.
(Makes about 9 glasses)

6 oranges
4 lemons
4 cups water
6 cups prepared carrots
5 cups sugar

Remove peel from the oranges and 2 of the lemons and chop. Soak in water overnight and drain, saving water.

Cut oranges into small pieces; dice carrots or put through a food chopper. Mix the peel, chopped oranges and carrots and cook, covered, until tender with as little water as possible.

Add sugar and water in which the peels were soaked and cook uncovered until thick and clear. Add juice of the lemons, cook 5 minutes longer. Pour into hot, sterilized glasses or jars.

Conserve is very much like jam, but it usually has raisins or nuts or both in it:

Peach-Cantaloupe Conserve.
(Makes about 5 glasses)

1 pint prepared peaches
1 pint prepared cantaloupe
Juice and grated rind of 2 lemons
3 cups sugar
½ cup English walnuts

Wash and peel peaches and dice. Remove seeds from cantaloupe, pare and dice. Combine all ingredients except nutmeats. Cook slowly until mixture boils. Boil rapidly until thick and clear. Add nutmeats and pour into hot sterilized glasses.

Homemakers who are hunting for new combinations for jellies will like these. Use the long boil method in preparing them.

The last step in jelly and jam making is an easy one. Pour paraffin over the hot fruit mixture as soon as it is ladled into glasses and skimmed.

Jelly Combinations.

Juices Used	Sugar Needed
Currant, 2 cups Red Raspberry, 2 cups	4 cups
Plum, 2 cups Crabapple, 2 cups	4 cups
Apple, 2 cups Pineapple, 2 cups	3 cups
Crabapple, 2 cups Cherry, 2 cups	3 cups

For those who wish to make jellies out of fruit juices, canned this summer, there is a simple procedure to follow. If there is not enough sugar to fill all your canning and jelly-making needs, then the best way of assuring yourself of jelly, is to put up the juice and make it up into jelly when you do have the sugar.

Follow directions for preparing fruit or berry juice as in jelly-making recipes. Do not add fruit or simmer unless recipe directs it. After juice has been extracted, place in jelly bag and squeeze out the juice.

Fill canning jars to shoulder and seal according to manufacturers' directions. Place jars into a boiling water bath (180 degrees) with water reaching an inch or two above the jars. Keep water at simmering temperature and process pints of juice 20 minutes, quarts 30 minutes.

Remove jars and finish sealing, if necessary. Cool as rapidly as possible but avoid a draft.

To Make the Jelly.

When you desire to make the jelly, use your favorite recipe or those with the commercial pectins. These jellies have the same texture as those made from fresh products.

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined in two ways: 1. Scrapings were taken from the feet and examined by the bacteriologist. 2. Each subject was examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize with this nasty, devilish, stubborn infection. Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

Hancock County Roads

ALL THOSE LISTED ABOVE IN TOWNSHIP 95, RANGE 23

To the owners of all real Estate described hereinbefore and to lienholders and encumbrancers of record, to all occupants all highways included in the watershed of Drainage District No. 9 and laterals thereof Hancock County, Iowa, and to whom it may concern:

You are hereby notified that on June 2, A D 1944 John P. Christians Et. al. filed a petition requesting that the open ditches of Drainage District No. 9 and lateral No. 6 of DD No. 9 Hancock County, Iowa be cleaned to grade.

You are further notified that Wm. Henschen, was appointed Engineer on June 2, A. D. 1944 to make an investigation and report and did on July 10, A. D. 1944 file his report and does recommend that the cleanout petitioned for by John P. Christians et. al. be made as prayed.

Said report is now on file and may be amended at any time before final action is taken thereon by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of Drainage District No. 9, and the 28th day of August A. D. 1944, at the hour of 10:30 A. M. is a date and hour set for hearing thereon; Said hearing to be at the Court house in Garner Iowa.

All objections to said improvement as set out in the petition and recommendations of the Engineer, and all objections must be in writing and filed in the office of the Auditor or at or before the time set thereon.

The foregoing notice is by order of the Hancock County Board of Supervisors passed with a resolution adopted A. D. 1944, and in accordance section 7440 and 7441 1939, and laws amendatory thereof.

Please take notice and govern yourselves accordingly Failure at your own peril

Witness my hand and official seal this 12th day of July, 1944.

(Seal)

The proudest title in the Army

IT CONSISTS of two simple words.

Yet every soldier who's worth his salt covets it.

This title is simply:

"Good Soldier."

It isn't just happenstance that so many women in the WAC have earned this title—the proudest in the Army.

For wherever Wacs are working, both here and overseas, there you find a job well done. And done with a spirit so gallant and fine that high Army officers everywhere say of the WAC...

"They're soldiers. *Good soldiers!*"

"Good Soldier"

Making strategy maps for combat

Good soldiers...

Our Men In The Service

Pvt. Bernard Nolte of Camp Roberts, Cal., spent the past week visiting with his parents, Mr. and Mrs. Henry Nolte at Goodell. Pvt Nolte has been transferred to Camp Meade, Maryland.

Matt Smith received a letter Friday from his son, Kermit who is a patient in a hospital somewhere in England. Kermit was wounded in one of his hands by a bullet but is making a good recovery and stated that he expected to leave the hospital in two weeks He said he was in a nice new building, that it was quite and really a "soldier's paradise."

Seaman Eugene Haberkamp arrived Saturday evening from Farragut, Idaho to spend a furlough visiting with relatives in this community.

HANCOCK COUNTY TAKES UP FIGHT AGAINST T. B.

An intensive search for unsuspected cases of tuberculosis in Hancock county currently is being made by Miss Ruth Van Alstine, public health nurse.

Miss Van Alstine's work is the preliminary phase of the 5th annual tuberculosis survey conducted in this county by the county medical society and the Christmas Seal Sale Organization in cooperation with the Iowa Tuberculosis Association and the state health department.

At the request of the family physician, the nurse is calling upon persons known to have had intimate contact with a case of tuberculosis as shown by records of the Iowa health department. She invites these persons to have a tuberculin skin test and later a chest x-ray to learn "if they, too, have been infected with tuberculosis."

According to the nurse, tuberculosis is a communicable dsiease which often does not reveal its presence to the individual during the early stages of infection.

"It is possible," the nurse said, "for a person to have tuberculosis and not know it. Our purpose is to discover such cases before they reach an advanced stage. If cases are found and treatment started early in the course of the disease, serious ill health can be avoided in many cases."

The tuberculin skin test will be made at the individual doctors' offices and chest x-rays of those react positively to the first test will be taken at a date and place to be announced later.

Half the cost of the program will be borne by funds made available through the annual sale of Christmas Seals and the remaining cost will be met by the state health department.

BETTER IOWA GARDENS

Some irrigation is necessary, as a general rule, to start summer gardens successfully Carrot and beet plantings, especially, should be watered if the soil becomes dry. Delicate seedlings cannot break through a hard soil crust. Seedlings require about one-fourth inch of water and plants of moderate size or larger one-half to one inch of water at each application. The amount of waterfall can be approximated either by placing a pan near the sprinkler or by digging into the soil to see how far down it is moist.

* * *

Gardeners who placed boards over part of their carrot and beet plantings have been surprised at what a difference it makes in germination. Good stands of seedlings resulted where the soil was protected from the hot sun. Where the rows were unshaded, germination was poor Bare soil gets too hot in the sun. If boards are not handy, straw can be used. Shaded rows are very important for cool-loving vegetables. Boards, straw, or other mulch covering not only protects the plantings from the sun's rays, but also tends to add moisture to the soil. This prevents the formation of a hard crust.

* * *

Gardeners in southern Iowa have about one week left to get under the wire with plantings of Chinese cabbage, kohlrabi, winter radishes and endive.

* * *

Many gardeners have been complaining this year about a poor stand of beans. Little, if any, yield will be realized from many stands. Too wet a soil may be one cause of poor beans in some instances. Beans need good drainage.

* * *

Gardeners who made later plantings of beans can help to avoid unhealthy plants by observing these points: (1) Never disturb beans while they are wet with dew or rain. (2) Many people do not realize that tiny green insects—known as leaf hoppers— are sucking the life out of their bean as well as potato plants, spreading disease and causing the plants to become stunted Leaf hoppers can be discouraged by spraying or dusting the plants at least once a week until the pods start to set. Dust with a mixure composed of one part of lead or calcium arsenate and ten parts dusting sulfur. If spraying is preferred, use one tablespoonful lead or calcium arsenate and four tablespoonfuls dry Bordeaux mixture to each gallon of water. (3) Poor seed may have been planted without treatment with a good seed disinfectant to kill possible disease organisms.

WHEN IS INSULATION NOT INSULATION?

It seems that nearly every day some new variety of "gyp" scheme is uncovered.

The latest to come to light in Manly is the building insulator who didn't insulate.

Some time ago a big red truck came to town. No one seemed to know where it came from. It stayed here a few days and no one could find where it went—not even the sheriff.

The owner of the truck which contained standard apparatus for blowing insulation into the roof and walls of residences, interviewed numerous property owners and made them such attractive prices for a "complete" insulation job that some signed up to have the work done.

In one place the truck showed up at the premises, went through all the motions of drilling necessary holes to get into the walls and ceilings, put the nozzle in and ran the machinery, ostensibly blowing the insulation into the proper places.

So far, so good! The job was done, and there was nothing phony about collection time. The money for the job was paid over and away went Mr. Insulation Man.

However, Mr. Property Owner, becoming a little suspicious had a local carpenter inspect the walls that were supposed to be full of insulation—and lo and behold—said walls were just as free of insulation as a little boys cheeks is free of whiskers.

In other places work was so shabbily done, if done at all, that it amounted to gross misrepresentation—to say the least.

—Manly Signal

IT IS BEST TO HAVE YOUR FARM LEASE IN WRITING

Tenants And Landowners Have Four Types To Choose

Iowa farm tenants and landowners have a choice of four main type leases when contracting for farm rental—straight cash, flexible cash, crop share cash and livestock share.

But whichever method of agreement is used, it's best to have it written, according to I W. Arthur, extension farm economist at Iowa State College. The essentials of the rental deal are discussed and settled at the time the deal is made instead of waiting until misunderstandings arise. And a written record is provided in case of doubt as to terms of the agreement.

Consider Both Parties

Arthur's advice to landowners and tenants is to pick the lease to suit the common needs of both. Cash leases are best for the tenant who wishes to make his own farming decisions and the landowners who considers his land simply as an investment and wants to assume a minimum of risk and take the least possible part in managing the farm.

Next in line is the flexible cash lease. This applies best when the situation is similar to the above, but the landowner is willing to assume some of the farming risk and the tenant is a bit more cautious and wants his cash rent to vary up and down with changes in level of farm prices.

Most Popular

When the landowner wants to devote more management time to the farm, and the tenant wants to avoid some of the risks of changing crop yields and prices as much as possible, the crop share-cash lease is attractive. This lease is used most in Iowa but it presents its difficulties in dividing the grain and setting the cash rent for pasture and hay.

Finally, the landowner who wants to take an active part in management and assume a part in the risk of the crop and livestock production will find the livestock share lease preferable.

ELECTRICITY CAN BE REAL FIRE HAZARD

By poor selection and installation of electric wiring and fuses, together with wise use of extension cords and appliances, Iowans can avoid many costly fires.

H. H. Beaty, extension agricultural engineer at Iowa State College points out that use of good-quality cords and fuses , such as those approved by the Underwriter's Laboratories, is an important safeguard. Worn cords should be replaced immediately. Rubber-sheathed cords are best for washing machines and other equipment to be used in damp locations or out-of-doors. Also, guards are needed around lamps or extension cords for out-door use.

Wiring installed by a trained electrician helps prevent fires. Most houses are supplied with No. 14 on lighting circuits and No. 12 wire on power circuits. The larger wires are necessary for supplying kitchens or laundries where large relectrical appliances are used.

When a fuse blows out, the cause of trouble should be remedied before a new fuse is installed. For No. 14 wire, 15 ampere fuses are required; No. 12 wire takes 20 amperes. If fuses are replaced by the family itself, a supply of the correct rating should be kept on hand.

Beaty warns against overloading circuits with appliances. And breaking a circuit by pulling on the appliance cord may damage the wires or terminal connections, so pull on the plug itself. Don't attach appliances at lamp sockets. And take care not to leave eqipment, such as flat-irons, attached when not in use.

Use of appliances around water and water pipes should be avoided whenever possible. An insulating link inserted in the chain of a pull-chain socket increases safety if the socket is operated occasionally with wet hands.

In case of emergency, throw the main switch and call an electrician, Beaty advises.

SMALL BUSINESS MAN

(Rossville, (Ill.), Press)

We still like the crack in which some bird says his Uncle Willie, a small businessman, sold out lock, stock and barrel. He promptly reinvested his money in a skunk farm. Upon taking possession of his newly acquired business venture Uncle Willie is supposed to have said: "Now, maybe the government will keep its nose out of my business."

CHOOSE RAYON AND COTTON BLENDS

For work clothes, homemakers will want to choose fabrics of blended spun rayon and cotton. These fabrics withstand commercial laundering. They also tailor well and have a smooth surface that doesn't "fuss up" as much as all-cotton garments.

WEEKLY NEWS ANALYSIS

Allies Move Ahead in Normandy; DeGaulle Visit to White House Poses New Diplomatic Problem

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

Saipan—Wives and children of Japanese soldiers on Saipan island are pictured after being rounded up by Doughboys from caves and jungles back of their lines.

EUROPE:
Yanks Gain

Developing their offensive on the western end of the French battlefront, U. S. troops drove through marshy land to envelop the communications hubs of La Haye and St. Lo against the bitter opposition of an enemy taking every advantage of the soggy ground and hedgerowed landscape.

On the eastern end of the front, British and Canadian troops battled large concentrations of German forces on the approaches of the defensive pivot of Caen, from which Field Marshal Rommel was sending out strong detachments in counter-attacks to impede the Allies' thrust inland toward the important Paris region.

As the Allies nudged forward in Normandy, Berlin announced the replacement of Anti-Invasion Chief von Rundstedt by Field Marshal von Kluge, who led the Nazi sweep through France in 1940, and was at the helm during the drive on Moscow during the first year of the Russian war.

Other Fronts

Calling massed artillery into play from dominating heights, the Germans poured fire on Allied troop movements in Italy to slow their steady drive up the long peninsula to the rich agricultural and industrial regions of the north.

In Russia, German forces continued to give ground before strong Red armies massed along a 350-mile front in the north to escape encirclement and destruction. Near Wilno, the Reds milled on the threshold of the Baltic states, while farther to the south, their pressure forced evacuation of Kowel, bending the enemy line farther back toward Warsaw.

Focal point of German resistance in Italy was below the famed port of Livorno (Leghorn), whose capture promised to give the Allies another good Mediterranean harbor for the easier transport of troops and supplies for the crucial fighting in the north.

DIPLOMACY:
French Problem

U. S. support of the De Gaulle administration of liberated French territory without formal recognition of it as a legal government was the latest diplomatic problem up for settlement in Washington, D.C. with De Gaulle's arrival in the nation's capital for discussions with President Roosevelt.

General De Gaulle

De Gaulle winged his way over from North Africa to seek approval of his negotiations with Britain, under which his administration would take control of liberated territory, arrange for supply and equipment of underground forces through lend-lease, and settle disputed property rights caused by transfers of ownership under Nazi occupation and Allied requisitioning for military purposes.

Although long complimentary to De Gaulle's Free French movement, the U. S. has been cautious in recognizing it as the legal representative of the people, declaring that only an election could determine their choice when circumstances permitted.

TRAGEDIES:
Circus Fire

Overhead the famed Wallandas prepared for their celebrated tightwire act on bicycles as 6,000 happy spectators awaited the performance under the big canvas tent of the Ringling Brothers and Barnum & Bailey circus in Hartford, Conn.

Near a sidewall of the tent, a small flame was noticed. Suddenly, it flared and leaped upward, with great patches of burning canvas falling when fire had seared them off. The cry of "Fire! Fire! Fire!" spread through the panic-stricken spectators, and their frantic shouts mingled with the din of roaring animals in the corral outside.

As the great sheets of burning canvas fell on top of the milling crowd below, adults and children struggled to make their way to safety, but scores were trapped, with some running into the steel ramps through which animals were led into the arena.

As rescue workers dug into the debris, they extricated the bodies of 135 victims, mostly children, and more seriously injured.

Miners Trapped

As scores of relatives of 64 miners trapped in the Powhatan pit near Bellaire, Ohio, waited hopefully at the mine entrance, officials grimly announced that the shaft would have to be sealed off to prevent the flow of oxygen feeding the raging flames underground.

In one last desperate effort to free the men entombed in a dead-end tunnel when a rock fall broke a high-voltage trolley wire along the main passageway and sizzling sparks ignited coal, skilled crews prepared to drill down 350 feet to open a shaft for lowering food and water.

In a previous effort to free the entombed men, rescue workers were cutting a new 500-foot tunnel through coal and rock to bypass the flames and reach the victims, when new fires halted their work.

Train Wreck

Climaxing the string of major tragedies was the derailment of a Louisville and Nashville train in Clear Fork River gorge near Jellico, Tenn., with early reports listing 25 dead and many injured.

Casualties on the troop-carrying train resulted when the locomotive and two coaches left the track and plunged 50 feet into the gorge, and two other cars overturned on the edge of the decline and caught fire.

Although hindered by darkness, rescue workers used acetylene torches to probe the wreckage and remove victims, while mountaineers hoisted the stricken up from the gorge with block and tackle.

CHINA:
Bloody Fighting

Fighting with their backs to the wall, Chinese troops stiffly resisted strong Japanese efforts to seal off the embattled country's whole eastern seacoast and strengthen their grip on the Asiatic mainland.

Chinese forces far to the southwest sought to join up with Allied troops driving through Burma to open up a new supply route to China from India. Only 26 miles of mountainous terrain stood between the two armies.

The 14th American air force joined in the savage battle in China, bombing and strafing the enemy and dropping tons of ammunition to the valiant defenders.

PACIFIC:
Subs Take Toll

With the Allies pressing closer to Japan's inner supply lines feeding her booming war industry, U. S. subs and air forces can be expected to take an increasing toll of enemy shipping, navy secretary James Forrestal declared.

In reporting that U. S. subs recently had sent 15 Jap cargo vessels and two warships to the bottom, Forrestal said such losses crimped the enemy's whole war program, since he must move about 75 million tons of water-borne freight into the home islands yearly, including 75 per cent of his oil and gas supply from the East Indies.

Despite heavy marine losses, Forrestal said, the Japs have lightened the effects through use of huge stockpiles of materials built up before the war, lessening of transport to encircled South Pacific areas, and the utilization of surplus prewar shipping tonnage.

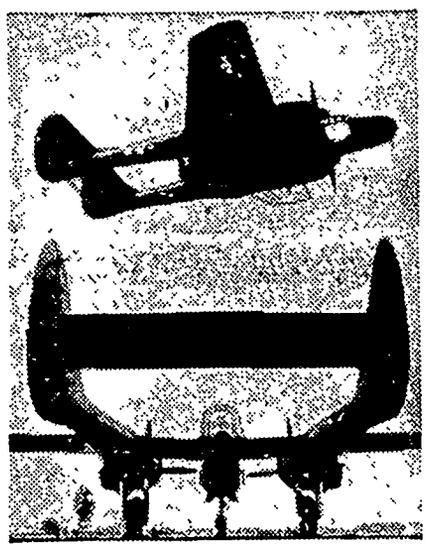
LEND-LEASE:
Steady Shipments

Lend-lease shipments of food to the Allies continued at a steady pace during the first five months of 1944, with some commodities being sent in larger volume and others in smaller amounts, with little net effect on domestic supplies.

During the period, 9.3 per cent of the total U. S. meat supply was shipped under lend-lease, with the major portion consisting of pork. About 15.6 per cent of the nation's pork was sent abroad.

The United Kingdom and Russia continued to receive most of the lend-lease food, with the U. S. supplying 10 per cent of British needs.

'Black Widow'



Although military officials have concealed details, a full and rear view of the new twin-fuselage "Black Widow" fighter plane with a central cockpit, was released. Said to be the largest and most powerful pursuit plane built, the "Black Widow" is especially equipped for night fighting. Blank spots indicate censor's deletions.

BUGS:
Man's Allies

Acting in conjunction with the U. S. department of agriculture, the nation's farmers are turning predatory bugs upon destructive insects to assure crop growth.

In Illinois alone, more than 40,000 wasps and flies were released to combat corn borers threatening the state's rich grain fields. No sure-fire remedy in themselves, however, the work of the predatory insects can only complement clean farming and deep plowing, agronomists say.

When turned loose, the predatory insects crawl through the corn borer's tunnel in the stalks, with the wasps penetrating its body to lay eggs in it, and the flies depositing eggs on the outside. As the eggs feast on the borer even in the pupa stage, they eventually destroy it, while emerging themselves.

ROBOTS:
Inflict Casualties

With all Britain stirred by the robot menace which continued to exact its toll of casualties and damage, Prime Minister Churchill told the parliament that over 10,000 people had been killed or wounded by the flying bombs and he could give no guarantee about the future of this form of attack.

Although declaring that the Allies would not be goaded into diverting attention from the Normandy battlefront by the robots, Churchill said that considerable numbers of U. S. and British planes have been hammering the French coast from which the flying bombs are believed to be launched.

Powered by fuel and compressed air and automatically piloted by gyroscopes, the robots have been buzzing over southern England at speeds of 300 m.p.h. or more and altitudes of about 3,000 feet, to suddenly break off into a 30-degree glide and crash to earth with an explosive force of 1,000 pounds.

ENDS DUST

The dust that lays thick on Texas flying fields is being conquered with Grama grass at Biggs field, Texas, where the army spent more than a quarter million dollars in efforts to keep it down.

Prairie hay is spread over the field after it has been carefully leveled. Then a combination cultivator and roller chops it up and rolls it into the sand. Grama grass seed is then sown, and when the hay rots the grass grows, effectively holding down the soil.

HIGHLIGHTS . . . *in the week's news*

FARM HANDS WANTED: The War Food administration estimates that 700,000 extra workers will be needed during the harvest season. Many of these will have to come from cities. A WFA official said "We will need approximately 12 million workers on farms to meet peak October requirements in harvesting. That means about 700,000 city workers must be recruited."

UNREST: Uprisings in Honduras and Nicaragua are reported as unrest appears to be spreading throughout the small nations of Central America. A dispatch from San Salvador stated that the president of Honduras had already resigned, and that a passive resistance movement was developing against the president of Nicaragua. Guatamala too, was the scene of rioting.

The Washington MERRY-GO-ROUND

By DREW PEARSON

Washington, D. C.

ORLEMANSKI-LANGE TALKS WITH STALIN

Two of the most important diplomatic reports of the war have been received at the White House recently, not from any trained diplomats, but from two private American citizens—Father Orlemanski of Springfield, Mass., and Prof. Oscar Lange, Polish-American leader and a teacher at the University of Chicago, both of whom had interviews with Stalin.

Although less widely publicized than Father Orlemanski's interview, Professor Lange had a long separate talk with Marshal Stalin and, perhaps because he was not circumscribed by church superiors, his report, on the whole, has been the more penetrating and helpful.

New conclusion drawn from the Lange-Orlemanski reports is that Polish-Russian relations, one of the most troublesome problems of the war, are on the eve of a wholesome rapprochement, probably beginning about now.

It was shortly after the receipt of the Lange-Orlemanski reports that President Roosevelt began a series of three conferences with Polish Premier Mikolajczyk in Washington, the results of which exceeded expectations.

If Polish-Russian relations can be settled amicably, one of the worst obstacles to postwar peace will be removed. Poland, for a hundred years partially governed by Russia, has a deep-rooted suspicion of the Soviet, while the Russians, having borne the main brunt of the European war on land, naturally feel they are entitled to areas forcibly wrested away from them after the last war.

STALIN DISCUSSES POLISH BOUNDARIES

In their separate interviews with Stalin, the two Polish-Americans, Father Orlemanski and Professor Lange, heard the reassuring words from the strong man of Russia that his government wants a "strong, independent Poland after the war—a Poland which will be strong both internally and externally, but which will be favorably disposed to the Soviet Union."

Stalin went even further and said that he was ready to help create a new Polish army.

"I am ready to build an army for Poland, equip it fully and arm it with the best guns the Soviet Union can make," he told Professor Lange. "I will do this for at least 1,000,000 men."

Stalin also discussed the question of Poland's future boundaries and revealed that they had already been discussed in some detail at Teheran. In doing so, he let drop a very important point — that, at Teheran, Roosevelt and he had agreed to the breakup of Germany after the war.

"Poland should claim East Prussia," Stalin said, "and should also claim Upper Silesia and all the German territory, up to the Oder river, including Stettin."

NOTE—This would give Poland practically all of Pomerania, a great stronghold of Prussian militarism. Shortly after Teheran, this columnist reported that the Big Three had proposed giving Pomerania, East Prussia and Silesia to Poland, in order to separate the Prussian junkers from the rest of Germany and stamp out German militarism for keeps.

Stalin told his visitors that he was not sure whether Poland should get Breslau (in Silesia) or not.

When these plans for Poland had come up at Teheran, Stalin disclosed, President Roosevelt had been in complete agreement, but Prime Minister Churchill had hesitated.

"He asked me: 'Who is to guarantee the security of this new Polish state?' I answered him simply: 'The armed might of the Soviet Union.'"

POLES IN RUSSIA

Professor Lange had been permitted to visit with the Polish army inside Russia which is fighting side by side with the Red army. He also had talked with various Polish leaders inside Russia, and he told Stalin that he was deeply moved by the splendid treatment given the Polish army by the Red army.

Several Days after Professor Lange had arranged with Wanda Wasilievska, head of the pro-Soviet Union of Polish Patriots, to better the living conditions of Polish refugees in Russia, Stalin informed Mme. Wasilievska that better war conditions now permitted better living conditions and that Polish refugees should share in the improvement.

SCORES POLISH INTELLIGENCE SERVICE

Stalin was quite cynical about the Polish intelligence service inside Poland and the reports of alleged conditions it had made to Premier Mikolacjzyk. All it did, he said, was deceive the Polish government-in-exile in London.

Foreign Commissar Molotoff, who was present during the interview, interrupted at this point to say that, in a recent speech, Premier Mikolajczyk had claimed he had the support of 90 per cent of the Polish people.

Walter Winchell

(WNU Service)

The New York and Hollywood Scene:

Faces About Glammerville: Al Jolson spellbinding a squad of U. S. Marines at the Beverly Hills Hotel pool . . . Bette Davis and Sec'y Morgenthau thrilling the uniformed men at the Hollywood Canteen . . . Dinah Shore thrushing nine ditties for them . . . Bonita Granville showing Lt. Joe Wade the cinemagicians. He's all mended from that New Guinea crackup . . . Ella Logan's real tears as she microphoned "That Old Feeling" to the China-Burma-India sector via the Mail Call program, which isn't heard by the public here . . . Veronica Lake, tiny as a doll, floating to the rhythms of Emil Coleman's and Phil Ohman's crews at the Moeambo . . . Lovely Marianne O'Brien of the Warners' factory surrounded by Marines in the Clover Club . . . Miriam Hopkins at La Rue with her constant companion, who never was itemed as her favorite male. He's a Greek biggie . . . Bob Hope and his Johnny Weismuller hair-do. "No cracks," he warns with a threatening finger, "I'm doing a pirate picture."

Marshal Rommel (according to Britishers who made their escape back to our lines) has a sense of humor, he thinks . . . He made several British officers attend his frequent lectures, during which he affected a pose that the Battle of Africa was a sporting event. He would give these prisoners a testimonial dinner with all the pomp he could muster on the desert. Big entrances, place cards, introductions, salutes and so on . . . And then, while the German staff dined on excellent cuisine, the British prisoners were served a meal consisting of their own K-rations captured with them. Rommel also delighted in pointing out their errors and why they were captives. He was asked by a correspondent: "To what do you credit your success? How will the enemy ever beat you?" . . . With a gleam in his monocled eye Rommel replied: "The German Army is great because of its great organization. I know exactly when I will enter a town. One month ahead I know what suite I will have in which hotel. If, however, some day, I march into a place and go to my suite and find another German general—then I will know we are licked!"

The "Oklahoma" cast is reported doing so much ad libbing that "they are spoiling the show." Guild execs shrug and say: "Look at the box office" . . . The New York Post Office has broken all records in the district. To date this year it has done business totaling 103 millions . . . The book now on FDR's bedside table is "Rendezvous with Destiny." The only comment on the book appeared in a Chicago paper briefly and a story in the Christian Science Monitor. Not a single review has appeared on it yet . . . Hepburn's newest interest, they say, is a famed polo player . . . Add ditty similarities: "Time Waits for No One" and "Tales from Vienna Woods" . . . Lana Turner won't bark about it until she sees it here, but those delicious canapes Ray Bourbon served with cocktails the other sundown were made from dog food . . . R-R-Ruff-Ruffff!

The Late Watch: Shirley Ross and her husband, Kenneth Dolan (who parted last season), are happier than ever. They reconciled after he was quoted here as saying the fault was all his because: "I neglected my wife instead of my clients" . . . There will be a copyright war over U. S. rights to the song popular with the troops, "Lili Marlene" . . . Douglas Miller, who wrote "You Can't Do Business With Hitler," told OWI chiefs that the war with Germany will last at least another year and with Japan two . . . T. Casey, the B'klyn Citizen editor, has written two songs with Johnny Tucker of Hook and Ladder Co. 117 in Astoria . . . All major networks banned the song, "Don't Change Horses," which has nothing to do with politics. It has been networked since April. The authors wrote "Mairzy Doats."

Quotation Marksmanship: Noel Coward: The most terrifying thing to a man is a woman who cries in advance . . . E. Hemingway: The saddest thing in the world is the affection of man and woman; the most fortunate ending is by death . . . J. Porter: She whines him around her finger . . . Mable Bandy: Eyelashes that could sweep the cobwebs from any man's heart . . . L. Corning: Low clouds on the verge of tears.

Sallies in Our Alley: Bob Dunn's office boy requested the afternoon off (on the day of a double-header) saying: "Boss—my grandmother—" . . . Dunn cut him short: "Oh, come now, son. You're not going to pull that chestnut about your grandmother being dead?" . . . "No, sir," was the reply. "She's home on furlough!" . . . At La Conga some velvet-knockers were gabbing about a gal whose beauty was in dispute . . . "She looks," said an admirer, "like something from Vogue!" . . . "a rejection slip."

VARIOUS chemical and physical tests of food samples are conducted constantly in the Quartermaster Corps laboratories, to determine their stability under differing climatic conditions and other influences that would affect their wholesomeness.

under Dr. White's leadership, utilizing the entire carcass for roasts, stews and sausages. Though the conservation of space was a factor then, it did not assume the tremendous importance it did with the outbreak of World War II, when the long supply lines imposed a severe strain on our transport system.

As a result of Dr. White's sharpness, the army achieved additional conservation of space through his suggestion for cutting pork loins in two and fitting one end in the slope of the other, thus forming a single package of half the former size.

As a fruition of the effort to provide a variety of food to troops, three times as many meat items have been developed under the direction of the research laboratory than existed during the last war.

Before the war, packers professed difficulty canning pork luncheon meat in large containers, but careful research overcame the problem. Formerly, the lard in pork sausage had oozed from the meat and collected around the walls of the can, but this liquefication was also corrected. Heading off the inevitability of complaints from a continuous serving of Vienna sausages, a coarsely ground, finely spiced frankfurter was developed for variety.

With the extension of the fighting to the tropical climates, preservation of fats and oils have presented a difficult problem, but under the direction of the research laboratory remedies have been developed.

'Army Spread.'

Most noteworthy of these developments, perhaps, is the socalled "army spread," a combination of butter, cheese curd and milk powder. It was produced following a search for a palatable fat to replace the old "Carter Spread" composed of butter and hydrogenated cottonseed flakes, which tasted tallowy and stuck to the roof of the mouth. Although "army spread" has filled the bill for an appetizing fat, it is of no use as a shortening or in frying.

Due to scientific methods in the preservation of lard and other shortenings, troops afield now profit from the availability of high caloric biscuits. The celebrated hardtack of old was nothing more than flour, water and salt, since no stable shortening had been discovered. But through the use of antioxidants, fats and notably lard have been so treated that they would stay fresh and usable from six to nine months.

Working in conjunction with processors, the dairy products section of the research laboratory under Lieut. Robert J. Remaley has developed an evaporated milk with a concentration of 3.1, surpassing the old figure of 2.1. Of value to the army in the economy of space, the new product should prove of equal advantage to women shoppers in the postwar world.

Advancements also have been made in the production of dehydrated cheese. Previously sold primarily to bakers for fillers, spraying, etc., the cheese retains its essential flavor.

Lieutenant Remaley's department also has been active in the preparation of vanilla ice cream mixes, shipped in the form of dried powder to the various fronts, where fruits or other flavoring agents may be added.

Sea Water for Baking.

Technologists in the research laboratory's baking department are engaged in various experiments on cereals and other components of breadstuffs. One experiment concerned the use of sea or ocean water in the production of bread, since there are many military baking installations in the various war theaters where fresh water is limited.

After careful experimentation with ocean water provided from the country's eastern and western coasts, it was discovered that the variation in salt content of ocean water was not sufficient to require any change in the regular army bread formula other than the omission of salt. Prior to the experimentation, however, the ocean water was treated with calcium hypochlorite on the basis of 0 5 grams to 31 gallons of the water, against possible content of algae, sea weed, etc.

Proceeding on the principle that flour is the most important and the one indispensable ingredient to the production of baked products, the quartermaster corps tests samples from each car offered before acceptance. Made from either hard spring or winter wheat, the flour must produce bread with good volume, grain and texture, creamy white crumb color, and pleasing flavor and taste, according to Technologist Paul V. Holton. Containing about 12 per cent protein and one-half per cent minerals or ash, the army flour is enriched with thiamin (vitamin B1), riboflavin (vitamin B2), niacin and iron.

One of the outstanding developments was the production of a granular dehydrated yeast for use overseas because it will keep well for a year if under refrigeration of 40-50 degrees F. and show no appreciable loss in baking strength if stored at 70 degrees or below for six months. If kept at higher temperatures, however, the yeast quickly loses its quality. Other factors favoring granular dehydrated yeast, which is manufactured in pellets and packed in two-pound size, moisture proof cans, are its quick action during baking and its greater leavening power per unit of weight.

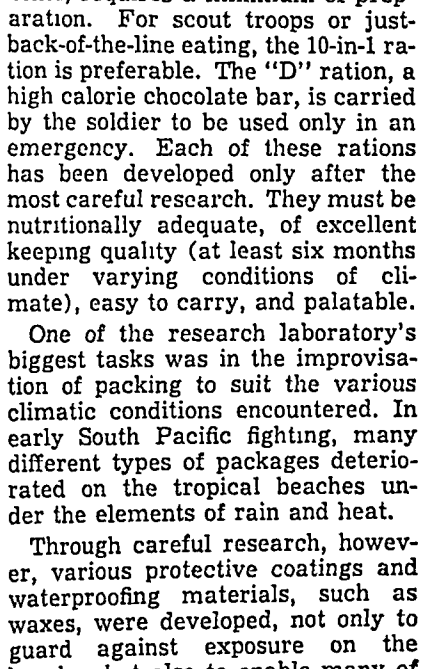
Canned Rations.

To meet the needs of our soldiers under the varying conditions of war, rations have been developed. For instance, when establishing a beachhead there is no time for the preparation of a meal. The "K" ration which may be eaten cold, is designed for such an exigency. The "C" ration is intended for later use when the beachhead is established and the tension is not quite so great. The "C" ration which may be eaten cold but may be made more palatable by heating the canned components, requires a minimum of preparation. For scout troops or just-back-of-the-line eating, the 10-in-1 ration is preferable. The "D" ration, a high calorie chocolate bar, is carried by the soldier to be used only in an emergency. Each of these rations has been developed only after the most careful research. They must be nutritionally adequate, of excellent keeping quality (at least six months under varying conditions of climate), easy to carry, and palatable.

One of the research laboratory's biggest tasks was in the improvisation of packing to suit the various climatic conditions encountered. In early South Pacific fighting, many different types of packages deteriorated on the tropical beaches under the elements of rain and heat.

Through careful research, however, various protective coatings and waterproofing materials, such as waxes, were developed, not only to guard against exposure on the beaches but also to enable many of the packages to be floated ashore to facilitate unloading operations.

The laboratory has a cooperative project called the Guinea Pig Club, of which every employee as well as every officer in the laboratory is a



THE FOOD on Maj. W. E. Harper's plate is equivalent in bulk to the condensed "K" ration, which is contained in the little packages spread on the table.

member. At noons, midmorning, or midafternoon, samples of proposed ration items are served. The tasters are instructed, in the case of two items, to choose the one which they prefer. If only one item is under test, the taster is requested to tell whether he likes the item or not and why. Figures are tabulated statistically, and the popularity of an item may thus scientifically be obtained.

aplains Feel Weight of Responsibility in Soldiers' Marriages

timated that between 30,000 ,000 American servicemen arried English girls. The ot only have changed their but each anticipates the day e will change her residence American city street, or vil- farm. Will these Anglo- n marriages strengthen the onal bonds by the transfer wholesale feminine citizen- these shores. Chaplain B. Richards who has been stationed in England for over a year admits the possibilities, but in a communication to the General Commission on Army and Navy Chaplains he points out some responsibilities that weigh heavily upon him.

"My commanding officer turns the soldier's application to marry over to me. The C. O. takes his responsibility seriously. He asks his chaplain to interview Johnny and his prospective bride, investigate his service record, determine his ability to support a wife, and on the basis of this investigation make such recommendation as he deems advisable."

To determine what to recommend seems to be adding a touch of gray to the hair of many chaplains. Will they make the mistake of giving the green light to the altar that will lead to the woes of unhappy wedlock? Chaplain Richards reports there are international problems that not even a chaplain can escape or solve.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

GIDEON'S FAITHFUL FEW

LESSON TEXT—Judges 7:4-7, 15-21.
GOLDEN TEXT—There is no restraint to the Lord to save by many or by few.—I Samuel 14:6.

Man power is said to be the secret of victory. Our nation is concerned about the shortage of man power in critical manufacturing centers. The armed forces are calling for more and more men and women.

That will all make it a little strange to study and teach the lesson for today, for here is the story of a crucial military campaign in which the leader, Gideon, was told by God to cut down his forces. This happened again and again, until he had less than one per cent of his original force, which was none too large, humanly speaking.

What singular thing was going on? God was at work and He did not want Israel to look to the arm of flesh, but to Him.

Three questions are raised and answered in this interesting story:

I. Quantity or Quality? (7:4-7).

The Lord is looking for men to do His work, but He cannot use men who are afraid or careless. This was the lesson Gideon learned, and it applies to our day as well.

When Gideon started out he had 32,000 men (Judg. 7:3). Not willing that they should glory in their own strength and knowing that many of them were cowards at heart, the Lord told Gideon to let those who were afraid, go home. When the mob had left there were only 10,000 left.

How sad it is that so many are "fearful and afraid" (v. 3) when it comes to going into battle for the Lord. They sing cheerily, "Stand up, stand up for Jesus, ye soldiers of the cross; let courage rise with danger," etc.; but when the bombs of Satan begin to fall, or the bugle calls for an advance into the enemy's territory, they have disappeared to places of comfort and safety. What good are such soldiers? The Lord told Gideon to send them home; perhaps the church should do the same.

Then came the second test which appears in our lesson. Those who took the comfortable and easy way to drink (v. 6), were not alert and ready. Down went the number to 300; but these were men who were ready to obey, who were alert and courageous.

The church needs to learn that large numbers are not the answer to her problems. God is interested in numbers, be sure of that, but He is more concerned about quality than quantity. Let us get more people who are truly regenerated into the church, and not just more people.

II. Man's Power or God's Power? (vv. 15-18).

Strange as was the plan for recruiting, the plan of battle was even more unusual. Lights, broken pitchers, and trumpet blasts are hardly the accepted weapons of warfare, nor does the method sound like military strategy.

This was no time for questions, for logical arguments, for the usual organization of war, for now God was about to work. He was ready to show His power quite apart from the ability of man, and He had a right to work as He would.

Wise and blessed is the church which knows that there comes a time when the thing to do is to put plans aside and let the Lord work. No one will question the value of organization and proper church "machinery," but we need to ask ourselves whether we have not become so organized that we impede the work of God.

Observe on the other hand that it was "the sword of the Lord **and** of Gideon"—not just the sword of the Lord. God is all-powerful. We must not hinder His glorious working. But He works through men, do not forget that! He used Gideon, and He used Gideon's little band.

God's power must accomplish God's work, but that power flows out to the world through yielded and obedient men.

III. Running or Standing? (vv. 19-21).

The enemy "ran and cried and fled." The sword of the Lord and of Gideon had put them to rout. Well may the enemies of God be terror-stricken when He begins to work through His servants.

All this was done "by faith," for we find Gideon's act of turning "to flight the armies of the aliens" listed among the exploits of faith (Heb. 11:34).

Now, see what Gideon's host was doing while the enemy ran (v. 21). "They stood every man in his place." No need for frantic hurry with them, no fear, no excitement.

God works that way. Remember the children of Israel at the Red Sea? The water ahead, and Pharaoh's host to the rear. What to do? "Fear ye not, stand still and see the salvation of the Lord." (Exod. 14:13).

Perhaps the word is coming to us just now—Trust God rather than the power of man! Stand still and see what He will do, for His own glory!

THINGS for You TO MAKE

MEDALLIONS crocheted to look like full-petaled garden daisies combine to make thrilling spring accessories . . . colorful calot with smart bag to match. This daisy pattern is easy to memorize.

Pattern 770 contains directions for hat and purse; stitches; list of materials required.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

For softening and removing old paint and varnish, use a rag to cover the surfaces with a mixture of two parts spirits of ammonia and one of turpentine. In difficult spots, apply with a handbrush.

* * *

Those rubber rollers on your washing machine are precious. If they have begun to lose their grip, rub them lightly with coarse sandpaper to remove the glaze. Then wipe off with a damp cloth.

* * *

The window sills will be easier to keep clean if you wax them each time after washing.

* * *

To remove paint from your hands, try fingernail polish remover. It works like magic and does not leave an odor like turpentine does when you use it. I also find polish remover just the thing for taking off the gum left on your skin after removing an adhesive bandage.

* * *

To wash small pieces of fragile lace, put in a fruit jar filled with suds, shake vigorously for a few minutes, then rinse in the same way.

* * *

When you purchase brown sugar place it in a glass jar and put in a small piece of bread, which will dry out and the sugar will stay soft.

* * *

When men buy their work pants have them get the longest length leg. Cut off at the desired length and save pieces for patches. In this way you have material of same color when needed.

YOU CAN'T BUY
more in aspirin than the assurance of quality and purity guaranteed when you buy St. Joseph Aspirin, world's largest seller at 10¢. Demand St. Joseph Aspirin.

Freckles
Write for **FREE BEAUTY FOLDER**

SNAPPY FACTS ABOUT RUBBER

Add new rubber-producing plants: the ficus pumila linn and the Chrenemorpha macrophylla. Both widely grown in China, if anyone is interested in these tongue twisters!

The peoples of the world should be the ultimate beneficiaries of the war-born, large-scale competition between natural rubber and synthetic rubber, in the opinion of John L. Collyer, president of B. F. Goodrich. He anticipates that this benefit may be in the form of lower-cost materials to the public and the wider use of rubber made possible by its low cost in many new applications.

KLEMME LOCALS

The W. S. C. S. of the Methodist Church will meet August 3rd. with Mrs. Levi Ridder as leader. Hostess are Mrs. Chambers, Mrs. Roy Jacobs and Miss Emma Cutshall.

Mr. and Mrs. Charles Peterson of near Goodell, received word from their son, Edward, who is in army training, that he suffered a severe knee injury and has been a patient for 7 weeks in a hospital at White Horse, Canada.

Jacob Bock, of Eugene, Oregon, who has been visiting with his sister, Miss Lydia Bock and other relatives in this community, left Tuesday for Isabel, South Dakota, for a visit with his two sons and their families.

Mrs. Mary Mutch and daughters, Miss Ada Mutch and Mrs. A. H. Dulmes and son Dick, and Billy McWhorter of Grundy Center visited for a short time last Thursday with Klemme friends. They were on their way to Okoboji to spend a week at the lake.

Leppo Wessels returned home Sunday evening from the Mercy hospital at Mason City where he recently underwent treatment and a major operation. Mr. Wessels is making a good recovery. Fred Wessels and family of near Meservey brought him to his home here.

"Global Glamour"—A new series of paintings by the well-known artist, Henry Clive, depicting typical beauties on all our war fronts. See the fascinating maid from China, reproduced in full color on the front page of The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Birthday Surprise Party Held For Wort Loger Sunday Eve

A number of relatives and friends held a birthday surprise party for Wort Loger at his home near Klemme Sunday evening.

After a social evening was enjoyed, ice cream and cake was served and Mr. Loger presented with a nice gift.

Those persent were: Mrs. Lewis Neuberger; Melvin Neuberger and family; Donald Neuberger and family; Mrs. Lester Neuberger and daughter; Mr. and Mrs. Clarence Lemke; Mr. and Mrs. Frank Schultz; Walter Rosendahl and family; LaNelle Harvey; and Albert Hippen and family.

WAVERLY'S MYSTERY

Following a recent electrical and rain storm, R. E. Doonan, Waverly city engineer, discovered a light bulb in a city street fixture that contained about a tablespoon of water In addition to the water, the bulb had also changed color—it is now blue The bulb had no crack or opening in it and in addition had the protection of the heavy socket above it during the storm. At last reports, the cause of the unusal incident was unexplained.

JOHN GRIEWE
The Sharpening Man

When John G. from Sharpersville
Comes whistling into town,
The ladies all begin to smile
Their husbands start to frown.

For John G is the sharping man
Who sharpens everything,
He sharpens up your Joy of Life,
And gives to it a swing.

He'll sharpen all your knives and saws,
He'll sharpen all your shears,
He'll sharpen up your appetite
And sharpen up your ears.

The Tailor brings his pinking shears,
The Manicure her nippers,
The Cobbler brings his leather knife
The Barber brings his clippers.

No sharpening job's too tough for him
Nor bothers him a bit,
The dullest people like him too
He sharpens up their wits.

He'll help to make you happy,
So don't give him a frown,
When John G. of Sharpersville
Is visiting your town.

I will be in Klemme on or before August 10th. Will stay and sharpen Shears and Scissors for about two weeks. All work guaranteed. Please leave them at Wellemeyer's Store.

JOHN E. GRIEWE. 1tc

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. tc

GOVERNOR'S DAY TO BE ATTRACTION AT LAKE

New State Park Will Be Dedicated Saturday, Aug. 12

Clear Lake, Iowa— Larry Griswold, world famous aquatis, slapstick comedian will be the headliner at the Governor's Day and Water Carnival celebration at Clear Lake Saturday and Sunday, Aug. 12 and 13. Larry Griswold is coming to Clear from a new series of successful performances in the Minneapolis Aquatennial and sports shows in Detroit, Providence, R. I., Boston, Chicago, Cleveland, Milwaukee and Des Moines.

The shows that will be presented along the lake front seawall on Saturday and Sunday evenings and Sunday afteroon will feature three professional acts Besides Griswold will be the noted lady log rollers, who will roller skate, dance, and even do a strip-ease on the log Another comedy team featuring Sif Canale will be there.

A ballet and diving demonstration as well as a unit of singing WAVES from Cedar Falls will also be on the program The Venetian night parade will have 37 boats this year, each featuring a friendly United Nation - the parade will have a surprise ending - could it be they'd blast the Nazis?

Governor Hickenlooper and his family have already taken up their residence at the lake Democratic and republican nominees for the legislature will be here McIntosh Woods, the beautiful new North Shore State Park will be dedicated Saturday afternoon at 1:30 with an elaborate program.

PICNIC HELD SUNDAY IN HONOR OF SOLDIER

A family gathering and picnic dinner was held at the home of Mr. and Mrs. E. J. Arnold southeast of Klemme Sunday in honor of their son Pvt. Roy Arnold, who is home on a furlough after serving in the Aleautians for twenty - seven months.

Those present, besides the E. J. Arnold family were Mr and Mrs F. A. Arnold; Mrs Asa Arnold; Fred J Arnold and family; Barbara Thompson; Mrs C A Arnold; Miss Minnie Lenz; Mrs. Martha Ridder; Jimmie Fredin; Bobbie Ridder; Mrs. Martha Bredbenner.

Dr and Mrs. C. B. Tice and Mary Griffin of Mason City; Mrs. Ella Schneider of Centerville; and Dr. and Mrs. Arnold Tice of Rochester, Minn.

The birthdays of Bobbie Arnold, son of Mr. and Mrs Fred J Arnold, who was six years old Tuesday, August 1st; and Barbara, daughter of Mr and Mrs E. J Thompson, who was five years old July 31st, were observed For this special occasion Mrs Fred J. Arnold had baked a cake for the children which was decorated and had candles on it.

PICNIC HELD SUNDAY IN HONOR OF REV. AND MRS. STUEBBE

Rev Robert Stuebbe, is recently graduated from the Mission House Seminary at Plymouth, Wis., was ordained at the morning service at Peace Reformed Church north of Klemme, Sunday Present for the occasion were his parents, Rev and Mrs K. J. Stuebbe of Manitowac, Wisconsin, and Rev and Mrs D Bosman of Eureka, South Dakota.

At noon about seventy relatives and friends of Rev and Mrs. Robert Stuebbe held a picnic dinner at the Stuebbe home.

Rev. and Mrs. Stuebbe recently moved into the Peace Reformed parsonage and are now quite comfortably settled in their new charge.

DELAYED

Seventen service men missed a train following a stopover in Creston. The train pulled out of the station as the men were seeing the sights of the city. The army privates seemed least concerned about the delay.

MORE MEN LEFT FOR INDUCTION AT FT. SNELLING

The following boys left Britt, Iowa, for Ft. Snelling, Minnesota for induction: (They left at 1:13 A. M July 26th).

Cpl. Wayne Chambers Writes Interesting Story Of Algiers

North Africa
July 4th, 1944

Dear Mom, Dad, and Sis,

With five different states and one U S territory on my record for spending July 4th away from home there is perhaps no good reason why I shouldn't add another hemisphere! The only place I've duplicated is Oregon in '35 and '39 and Alaska in '41 and '42 out of the past nine years! Each year I have thought that "next year" will find me at home, and I ain't fooling this time

My recent trip to the beach has left me feeling swell and I have the first good tan I've had the opportunity to get during the last four years The Mediterranean water is wonderful for swimming. It's less bouyant than Great Salt Lake yet its very easy to float around for long periods of time without much effort.

I recently had the opportunity to visit Algiers too, and on this occasion I got to do the things I wasn't able to do on an earlier visit Most interesting of all was the regular tour of the city, it's old Fortresses, the Cosbah, the various churches, mosques and the museum Much of the hectic history of Africa rulers, pirates and slaveholders was unfolded for us as an English speaking guide took us to many of the old places. Algiers was founded as a pirate's stronghold and was for years the capital of the slave trade—the worst of every country in Europe seemed to drift this direction The gov't (if it could be called such before the French took over in 1830) changed hands frequently from Romans, Turks, Moors, and Arabs. Evidence of the Roman rule is found only in the ruins (4th & 5th century) and I'll have plenty to say about what I've seen of those when I get home. The Turks had a notorious ruler around 1400-1500 One guy was almost as good as Roosevelt, he ruled for 17 years! The Arabs had become pretty powerful about this time and experienced several years of the highest type of prosperity that was known anywhere They continued to degenerate with their life of ease and fell to the French about as easily as the French fell to the Germans in this war.

Several of the buildings occupied by the Moors and Turks are still intact and their architecture is certainly unique The largest Catholic Church in Algiers is built right over a Mosque Many of the pillars are the same and they still have the symbols of the Momammed faith on them. It seems quite anique (when it is pointed out to one) that customary emblems of the cross and other symbols of Christianity should be surrounded by conspicuous symbols, (the crescent-shaped moon of Mohammedism)

The Algiers mosque has a unique story too. It was built during the Arab hey-day so they called in the best builders from Europe to construct it. The contractor happened to be a Christian and he pulled sort of a fast one on the Arabs by building the mosque in the shape of a cross, along a central auditorium with two side wings. This shape seems quite peculiar when one realizes that the cross has no significance to their religion

The Algiers "believers" have a balcony in their mosque which is used only by women and children. The men, of course, use the main auditorium The only women allowed to pray in the main auditorium are those who have made the once-in-a-lifetime pilrimage to Mecca, and the guide guessed that no more than a dozen women in all of Algiers had made the trip.

The original meaning of Cosbah was "fortress."

The Cosbah was really the old-passage ways, gun emplacements, and court yards that was truly the current ruler's stronghold. We paused in one old passageway and sat down on some steps while the guide was lecturing to us. "Right over there," and he pointed to where I was sitting, "Mohammed so and so murdered his own brother in order to get the rule for himself" (I swallowed a few times and looked under myself but didn't see any blood so decided that the corpse had been moved!)

To describe the real meaning of the Cosbah is about like telling someone how hard the wind blows in the Aleutians, both are so unbelieveably out of this world that no one would believe your description so there's little use to try it. Thousands of families live in narrow streets in cubby-hole indentations, in alleys that never get sunlight, in streets with no drains or sewers—that's the Cosbah. Add hundreds of filthy beggers, prostitutes and disease-wrecked lives to this picture and you'll never wish more strongly for some Iowa fresh air! It is possible to reach from building to building with outstretched arms, so narrow are the streets in most of the Cosbah. The Cosbah is "off limits" to all are necessary is beyond me. Frank-Allied personnel, but why the signs ly, I was glad to leave the place. Like all the other contrasts in N. Africa one block from where we left the Cosbah, we were in the public square of Algiers, the nicest part of town.

Well I'll close for now. We're staying busy as the dickens, but that's the way I want it as we have to be on this side.

Love to all,
Wayne

SERVES IN AFRICA— Cpl. Wayne E. Chambers, son of Mr. and Mrs. J. A. Chambers of Klemme, is in the engineer's battalion in North Africa. He was doing government work in Alaska and the Aleutians and was at Dutch Harbor at the time it was bombed. He entered army service on Feb. 13, 1943. He is a graduate of Iowa State College, and his wife lives at Seattle, Wash.
(Picture Courtesy of Mason City Globe-Gazette.)

Two Klemme Men Wounded In Battle After Invasion

NORRIS DODD REPORTS RECORD CORN CROP

Predicts 1944 Corn Crop To Be Largest In History

WASHINGTON, D. C. —Norris E. Dodd, agricultural adjustment administration chief, predicted Saturday that the country's 1944 corn crop will be the biggest in history

He revealed also that the corn supply pinch that threatened to close down processing plants two months ago has been fully relieved and no further trouble is expected

Extensive Trip

Dodd has just returned from an extensive trip to the west coast during which he said he tried to get a complete picture of the food and crop production outlook.

"There are always some spotty areas," he remarked, "but on the whole I don't know when I have seen corn looking better this time of year."

In another three weeks, he said farmers will be able to make a fairly close estimate of their probable corn crop, and more corn that has been held over from last year will come on the market.

The summer campaign to obtain enough corn to carry the processor plants through the summer and early fall has yielded 57,147,492 bushels up to July 24. Another 17 million bushels are under contract for delivery.

74 Million Bushels

This will make a total, he said, of approximately 74 million bushels as compared with the 68 million bushels which were estimated to be the minimum amount needed to assure continued operation of the plants.

While reports on reserve stocks now held by the various processing plants are not complete, Dodd said some of them have enough to assure their operation through November. Most of the plants, he said, have at least eight weeks supply on hand.

KLEMME FARMER NEARS TOP OF CHICAGO CATTLE MARKET

CHICAGO, July 26, —Hancock county cattle were among the sellers of the past week's trade at the Chicago Stock Yards.

Harry Sandry, who farms near Klemme, was represented on the Monday market by a 48 head shipment of 1260 pound steers that was good enough to sell without sorting at $17.40 per cwt., within 20 cents of the day's extreme top.

A new year's high price was established in last Tuesday's cattle trade at Chicago when the extreme top advanced to $17.75 per cwt., the peak, to date, since April of 1943 and the highest July price in 25 years.

DRIVE MADE TO SEARCH FOR T. B. CASES

The 5th annual search for unknown cases of tuberculosis in this county will enter its final stages Aug. 10 when approximately 40 persons are to be x-rayed at Britt.

Only those recommended by their family physicans are eligible for x-rays. Interpretation of the films will be made and the results will be mailed to the family physician, from whom the patients may secure a report.

The county medical society and the Christmas Seal Sale committee are sponsoring the survey in cooperation with the Iowa Tuberculosis Association and the state health department.

BLANKS HAD PICNIC SUNDAY AT WEST BEND

The Blank relatives from this community held a picnic at West Bend Sunday at the Fred Blank home. Those from around here who attended were Mr. and Mrs. Tom Blank and daughter, Marie; Mrs. Tony Ahrenkeil; Mrs. Conrad Quandt; Mrs. Ernest Gerardi and Gracka Maria; and Worthy Usher and family.

LT. KOTHENBEUTEL AND SGT. ARNOLD IN ENGLISH HOSPITALS

Klemme Men Thought To Have Been Wounded After The D-Day Invasion

The war was brought right home when it was learned the past week that two Klemme soldiers had been wounded in battle on the Normandy peninsula in France.

Fred Kothenbeutel received a letter from his son, Lt. Harold Kothenbeutel stating that he had been wounded and was being cared for in a hospital in England By the tone of Lt Kothenbeutel's letter it was thought his wounds were not of a serious nature as he said he expected to return to the front soon.

Sgt. Arnold Wounded

Mr. and Mrs. Fred A. Arnold received several letters from their son, Sgt. Asa R. Arnold, mailed from England. Sgt. Arnold was in on the invasion and was thought to have been wounded shortly thereafter. The extent of his wounds are not known as he was not permitted by the censor to disclose the facts. He was evidently in the hospital for some time as an interval of ten days went by from the time he was last heard of in France until he revealed that he was back in England Later he told that he had been wounded.

4-H BOYS TO USE NEW RECORD BOOKS

New loose-leaf record books will be used in boys' 4-H club work this year Paul Henderson, county extension director, reports that the simplified books will be available at the County Extension Office after Oct 1

With all his records in one book, a club member will keep only one report of his activities Inserts for specific projects will be provided. By leaving the records in the book from year to year, it automatically becomes a long-time record.

Another change will be that members will record only amounts of grain fed Then, when a project is completed, county extension directors will furnish average feed prices for the year. A feed budget column also has been added to the record.

Four counties -- Crawford, Muscatine, Black Hawk and Monroe experimented with versions of the new book during the 1943-44 project year Initial work on the revision was begun by G. A. Lineweaver, assistant state boys' 4-H club leader, when he was extension director in Monroe County.

Place the cream can in a tank of cold water to cool the cream quickly.

TRAINS AT FORT DIX—**Cpl. Marvin Lemke, son of Mrs. Daisy Lemke of Klemme, entered the military service in 1942, was sent to Camp Maxey, Texas, and is now stationed at Fort Dix, N. J. He is a graduate of Klemme high school and before entering the service was employed at the Klemme Farmers elevator.**

World's People Could Be Placed in State of Texas

There are 265,896 square mi. in Texas. The population of t. world is estimated to be abo. 2,000,000,000. If all were in Texa. each person would have abo. .0001 square miles of room.

There are 27,878,400 square fe. in a square mile, which would pe. mit about 2,787 square feet per pe. son. That approximates the den. ity of population of such a city a. Akron, Ohio.

END CONSTIPATION THIS NATURAL WAY!

Millions now take Simple Fresh Fruit Drink instead of Harsh Laxatives!

It's lemon and water. Yes!—just the juice of 1 Sunkist Lemon in a glass of water—first thing on arising.

Taken first thing in the morning, this wholesome drink stimulates bowel action in a *natural* way—assures most people of prompt, *normal* elimination.

Why not change to this *healthful* habit? Lemon and water is *good* for you. Lemons are among the richest sources of vitamin C, which combats fatigue, helps you resist colds and infections. They also supply B_1 and P. They alkalinize, aid appetite and digestion. Lemon and water has a fresh tang, too—clears the mouth, wakes you up!

Try this grand wake-up drink 10 mornings. See if it doesn't help you! Use California Sunkist Lemons.

Get Into Action For Full Victory!

Star Dust
STAGE SCREEN RADIO
By VIRGINIA VALE
Released by Western Newspaper Union.

SAYS Teresa Wright, "I was bewildered and lonesome when I first came to Hollywood, but I had a job to do, and did the best I could." A swell job it was, too, and now she's doing another one; making a screen comeback. After 18 months absence from pictures, due to illness, she is currently appearing with Gary Cooper in International Pictures' "Casanova Brown," and will be starred in two other pictures before very long. After making a hit in two Broadway successes—and refusing a Hollywood contract be-

TERESA WRIGHT

cause she felt she wasn't ready for it—she made four outstanding pictures, won an "Oscar" for her work in "Mrs. Miniver," and was starred in her fourth one.

—*—

At Paramount they claim that Lucy Tarr is the homeliest girl in Hollywood, and Lucy doesn't care. She's been signed for the role of a hillbilly in "Murder, He Says," starring Fred MacMurray. "I've got a job out of my looks," she boasts.

—*—

Ted Donaldson, ten-year-old now completing the role of "Nealy" in 20th Century-Fox's "A Tree Grows in Brooklyn," is to get his first starring role in Columbia Pictures' "Rusty." It's a new sort of boy and a dog story, telling of the reformation of a vicious Nazi-trained dog by a boy. Young Donaldson scored a personal triumph in "Once Upon a Time," with Cary Grant and Janet Blair.

—*—

Some of our top radio commentators will be seen by the general public for the first time in Ralph Staub's Screen Snapshots subject, "Show Business at War"; he's signed up 30 of the leaders, including Louis P. Lochner and Raymond Gram Swing.

—*—

Bob Waterfield, UCLA football star recently given his honorable discharge from the marine corps, has been signed by Warner Bros. for an important role of a paratrooper in "Objective Burma," starring Errol Flynn. Waterfield may make a career of motion pictures instead of returning to the gridiron, as previously announced.

—*—

Hedy Lamarr, George Brent and Paul Lukas will be co-starred in "Experiment Perilous," Miss Lamarr's first appearance on the RKO lot. And that's quite an assignment for the girl—remember, Lukas won the Academy award for the best performance last year.

—*—

One of the oldest and most popular radio shows, the National Barn Dance, soon entering its eleventh year of continuous network broadcasting, has been engaged to appear in person at two midwest state fairs this summer. The entire cast will put on their traditional show at the Wisconsin state fair in Milwaukee on August 26, and at the Indiana state fair in Indianapolis on September 2.

—*—

NBC has a fine new series replacing "American Story." Twelve dramatizations, called "They Call Me Joe," tell the story of the contributions to America made by the various national and racial groups represented among our servicemen. Through the cooperation of the war department, the programs will also be heard by service men and women overseas.

—*—

The war department's morale service division, ASF, through the cooperation of CBS, will broadcast the science and geography programs of CBS' "The American School of the Air" to millions of service men and women stationed all over the world, starting October 9. Programs will be heard on battle fronts, troop transports, hospital ships, submarines and in general hospitals in the U. S.

—*—

ODDS AND ENDS—Betty Hutton began campaigning for that Texas Guinan role three years ago, when she was first signed by Paramount. . . . The Les Tremaynes hold weekly swing conclaves at their San Fernando Valley ranch. . . . Inspired by the success of "Abie's Irish Rose," Anne Nichols is preparing a sequel to it—thinks maybe it will be called "Abie's Irish Offspring." . . . Twelve Welsh folk songs will be used in Bette Davis' "The Corn Is Green"—they'll be sung by choral groups varying in size from 30 to 80 voices. . . . John (Passing Parade) Nesbitt never lives in any house more than a year; he's an architect and designs his houses.

The Once Over by H. I. Phillips

WNU Service

THE PRIVATE PAPERS OF PRIVATE PURKEY

Dear Harriet—

Well, the first thing I am going to do when I get home from this war is to get on a Hudson River ferryboat and ride back and forth on it to break myself of the army habit of jumping overboard and wading ashore.

—*—

The army don't land nowheres no more. It swims or paddles ashore.

—*—

If we was dressed for it it would not be bad, but we do all our swimming and wading all dressed for dry land and mountain operations.

—*—

Half the time I do not know if I am in the army, the navy or a Billy Rose bathing spectacle. I am all mixed up on whether I am a soldier or a sailor. I am too wet to be a soldier and too dry to be a sailor. Except sometimes like in these beachhead operations when I am wetter than they even let sailors get except when they get shipwrecked.

—*—

I never knew Europe and Asia was so short of docks and piers. It seems like no matter what place we got to land on we got to get off the boat out in the middle of the ocean where nobody never got off of no boat before except he was thrown off.

—*—

I should of joined the navy. It is drier and swimming is not so compulsory. Also when a sailor gets off a ship he waits until it has docked. If he gets off before it docks he is dressed for it. I wish Mr. Stimson would design army pants so a G. I. can shake them off in the water like a sailor can do with them sailor pants.

—*—

I been all over this war and I have not yet seen no sailors trying to swim from the sea to dry land wearing clothes for a north pole expedishun and loaded down with everything on their backs but the ship's anchors and trying to carry a anchor chain in one hand and a rudder, steering wheel and barrel of hardtack in the other.

—*—

The real secret of the American army's success on these beachheads is this. The G. I.s is so fighting mad when they get ashore that they can lick anybody and they espeshully hate anybody who is there ahead of them all nice and dry.

—*—

It gets to be a habit. If my shoes ain't full of water now I don't feel the battle is offishul and if I can unbutton my blouse and not have a barrel of water gush out I know something is not regulashun alright.

—*—

Remember how you warned me to keep warm and not get my feet wet on account of I used to catch cold coming from the subway to the flat in a April shower with no rubbers on? Them was the days! I can't understand why being half-drowned all the time now don't put me in bed. Maybe I got double-pneumonia all the time and don't even feel it no more.

—*—

Well this is going to be a great war to get out of and take up a life where I will have some idea if I am a man or a duck. Being a hero is okay but it feels better to be a hero who is not always feeling like he was a basket of wet wash. I hope all the folks at home are dry. All my love—

Oscar.

The New Uncle

There's a new man in that high plug-hat
And those clothes red, white and blue—
There's a new chief in there at the bat,
And he's Uncle Sockeroo!

Of those whiskers there is not a trace—
Of the wrinkles it's the same;
There's a new guy with a younger face—
Uncle Sockeroo's the name!

Gone the long white locks and forehead high
Now he's young and tough and fit;
There's a brand new tag for a famous guy—
Uncle Sockeroo is it!

* * *

Since a gambler left $27,200 in a New York taxi and had it claimed both by the city and federal government the suggestion has been made that taxi drivers can make a hit by advertising "Bankrolls left in this cab will be held in strict confidence."

—*—

"War cannot be measured by the events of a single day. In so gigantic a struggle isolated successes or failures can't play a decisive role." —Herr Hitler.

—*—

Yah, Adolf, that's exactly the thought that sustained the Allies through the tougher years. Remember?

HOUSEHOLD MEMOS
by Lynn Chambers

Pleasant Thought for Pie-Hungry Families!
(See Recipes Below)

Pies Aplenty

Pies are good eating, even in the warmest weather. And better still, there are pies for every season and every mood.

For summer you may like juicy, luscious berry pies, their gay colorful fillings peeking out of a lattice crust. Or you may take the easy way and prepare chiffon pies, light and airy as a feather, with easy-to-make crumb crusts that require no baking. Whatever the type, you're certain to enjoy them.

Full of the goodness of golden peaches is this fruity pie:

Fresh Peach Pie.
4 cups sliced fresh peaches
1 cup sugar
4 tablespoons flour
½ teaspoon cinnamon
1 tablespoon butter

Fill pastry-lined pan with fruit mixture, sprinkling the peaches with sugar and flour mixed. Sprinkle with cinnamon and dot with butter. Cover with a top crust and bake 10 minutes in a 450-degree oven and 30 minutes in a moderate (350-degree) oven. Serve warm.

Any of the berries may be used in this pie as the basic recipe is the same. Try it several times with blueberries, raspberries, blackberries or loganberries:

Fresh Berry Pie.
1 quart fresh berries
⅞ to 1 cup sugar
4 tablespoons flour
2 teaspoons quick-cooking tapioca
½ teaspoon cinnamon
1 tablespoon butter

Fill pastry-lined pan with berries. Sprinkle with sugar and flour. With half of the berries in the pan, cover with tapioca, then with remaining berries, cinnamon and butter. If the berries are dry, sprinkle with 1 or 2 tablespoons water. Cover with top crust and bake in a hot oven 10 minutes and in a moderate oven 30 minutes.

Blueberry Pie: Substitute 1½ tablespoons lemon juice for cinnamon.

Citrus Chiffon Pies are as cool as ocean spray. They are made so quickly, require no baking, and are made-to-order summer desserts:

***Lemon Chiffon Pie.**
3 egg yolks
¾ cup sugar
¼ teaspoon salt
1 tablespoon grated lemon rind
¼ cup lemon juice, strained
4 tablespoons lemon-flavored gelatin
½ cup boiling water
3 egg whites
¼ teaspoon cream of tartar
Cornflake Crust

Beat egg yolks with a spoon in top of the double boiler. Stir in one-half the sugar, then salt, rind and fruit juice. Cook over boiling water 10 minutes until mixture thickens and coats the spoon.

Stir hot fruit juice or boiling water into flavored gelatin. Beat with the hot custard. Cool thoroughly until mixture begins to set, then break up while making meringue. To make meringue, beat egg whites until fluffy and gradually add remainder of sugar. Carefully fold meringue into filling and pile into crumb crust. Place in refrigerator until well set, about 2 hours. Serve cold.

Lime Chiffon Pie: Use lime in above recipe in place of lemon. Green coloring may be added to intensify the color.

Cornflake Crust
4 cups rolled cornflakes
⅓ cup butter
¼ cup sugar

Roll cornflakes fine. Melt butter in pie pan, add sugar and crumbs and mix thoroughly. Press evenly and firmly around sides and bottom of pie pan.

Like custards? Then you will enjoy grandmother's old-fashioned custard baked right into the flaky crust:

Grandmother's Custard Pie.
3 eggs (or, 6 yolks)
½ cup sugar
½ teaspoon salt
¼ teaspoon nutmeg
2½ cups milk

Beat eggs slightly, add sugar, salt, nutmeg and milk. Pour into a chilled pastry-lined pie pan. Bake in a hot oven 15 minutes, then in a moderate oven to finish. Bake until a silver knife inserted into the custard comes out clean.

French Apple Pie.

Make pastry for one-crust pie. Fit into pan and flute edges. Chill, fill with apples (for 9-inch pie, use 4 cups sliced apples, 1 cup sugar, 1 teaspoon cinnamon and 1 tablespoon butter). Then sprinkle with crumb topping:

½ cup butter
½ cup brown sugar
1 cup flour

Bake 45 minutes to one hour until apples are done and topping is delicately browned. Serve warm.

Want Good Pastry?

An old saying goes that "A pie is as good as its crust." No truer words were ever spoken. Unless the crust is short, tender and flaky, the juiciest berries or most luscious fruit can do nothing for the pie. Here are the rules:

1. Keep all ingredients and bowls well chilled.
2. Don't work over the piecrust. The lazier you are, the better the crust.
3. Use a minimum of water for moistening.

Two-Crust Pie Pastry.
(Nine-inch)
2 cups sifted flour
1 teaspoon salt
⅔ cup shortening
4 to 6 tablespoons ice water

To make pastry, sift flour once, add salt and then sift again. Mix one-half of shortening into flour and cut into mixture finely. Add remainder of shortening and cut into flour until mixture has the appearance of coarse meal.

Blend lightly, using just enough water to hold mixture together. Roll on floured cloth and fit to pastry tin.

One-Crust Pies.

The method for making one-crust pies is similar to the two-crust type, but the ingredients are as follows: 1 cup flour, ½ teaspoon salt, ⅓ cup shortening and 2 to 3 tablespoons ice water.

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

Sliced Salami and Bologna
Cottage Cheese-Chive Salad
Green Onions Radishes Celery
Muffins with Raspberry Jam
*Lemon Chiffon Pie
*Recipe Given

Lynn Says

Bit of All Right: Baking powder biscuits are extra special when sprinkled with orange or lemon or cinnamon sugar before baking. Biscuits dressed up like this go well with main dish salads.

Don't waste leftover biscuits by making them into crumbs. They're pleasing escorts when served toasted with peanut butter or citrus marmalade.

Fruit cups are best when chilled thoroughly. Try this combination: Cooked prunes, canned yellow cling peaches, orange segments, peach syrup, honey and lemon juice.

Released by Western Newspaper Union.

PATTERNS
SEWING CIRCLE

Town Cottons

AS SOPHISTICATED as can be and yet pleasingly simple and charming—a cool midsummer afternoon frock with the new, loose over-the-shoulder short sleeve, a long and lovely neckline ending in a big bow of the dress material.

* * *

Barbara Bell Pattern No. 1987 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, kimono sleeve, requires 3¾ yards of 39-inch material.

Sports Costume

TRY this costume in shocking pink, fuschia or a violet-toned cotton—all colors which are high-style this summer. The smartly fitted jumper dress becomes a perfect midsummer street costume when the jacket is added.

* * *

Barbara Bell Pattern No. 1955 is designed for sizes 11, 13, 15, 17 and 19. Size 13, dress, requires 2½ yards of 39-inch material; bolero, 1 yard.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Household Hints

A newspaper used in place of a damp cloth for pressing pants will remove the danger of scorching. The iron slides much easier. Use a sheet of plain paper when doing light trousers.

* * *

When filling salt and pepper shakers and you haven't a small funnel, put the salt and pepper into envelopes, tear off a corner of the envelope and let the salt and pepper sift through. Then none will be wasted.

* * *

To keep greens from packing in jars, cut through two or three times with a sharp knife.

* * *

In washing a sweater, sew the buttonholes together before putting it into the water.

* * *

In hot weather store the bread, well wrapped, in the refrigerator.

* * *

For something delicious, try a generous layer of applesauce between two slices of hot French toast. Sprinkle with cinnamon and serve hot.

Ink Spots

By "JERGIE"

CENSOR'S DREAM TRUE; IDEAL LETTER WRITTEN

BALTIMORE, —A censor's dream of the perfect letter for the folks back home has been received by the Rev. Melvin E. Lederer of Gatch Methodist Church and was read by him to his congregation.

The letter was written by Sergeant Earl W Leef, former member of the church, now with a fighter squadron in the Pacific area.

It follows:

"Dear Friends:

"After leaving where we were before we left for here, not knowing that we were coming here from there, we could not tell whether we would arrive here or not; nevertheless we are now here and not there.

"The weather here is just as it is at this season; not, of course, unlike the weather where we were before we came here, after leaving by what we came by; we had a good trip.

"The people here are just like they look, but do not look like they were where we came from. From there to here is just as far as it is from here to there.

"The way we came here is just like everyone comes from there to here: of course, we had to bring everthing we had with us, for we wear what we would wear here, which is not like what we would wear there The whole thing is quite a new experience here, because it isn't like it is where we were before we came here.

"It is time now, in all probability, to stop this somewhat newsy letter before I give away too much information, as one never knows who a spy is today.

"As ever,

EARL."

ROBBING THE EARNERS

An authority on economics states that the noblest, most perfect civilization ever started in this world was that which surrounded Athens in early-day Greece What caused its degeneration and downfall was the fallacious system of financing, which attempted to take from the rich and well-to-do the wealth they had accumulated through superior industry and ability and give the same to the idle poor and the incompetent Thus initiative and industry were discourged. Finally the rich were taxed maliciously, and industry that gave employment was discouraged Human energy was not used wisely, and the whole plan finally failed This nation will do well to remember that we cannot provide luxury for everybody. Some, at least, must earn what they get.

—"The Black Fez", Dubuque, Iowa

SMITHS GIVE 5 DIVISIONS TO U. S. ARMY

Washington, —The Smiths have done it again.

In a list of 12 names which the war department cited as being the most common on the army's roster, Smiths led the field with 72,000 claimants—the equivalent of 5 divisions or almost one per cent of the army roll.

Considerably behind the Smiths, the Johnsons came in for 2nd place with 48,500 clan members. Others on the list and the total number of men answering to each were:

Brown, 39,000; Miller, 33,600; Jones 31,320; Davis, 31,000; Wilson, 29,000; Anderson, 24,500; Martin, 24,300; Taylor, 22,000; Hall, 15,170 and Lewis, 15,000.

The total of the 12 names mounts to 385,390 men, and accounts for about one-twentieth of the army.

The moral of the story, according to the war department, is that everyone should address letters and packages to troops accurately and completely. The name, rank, serial number, organization, APO number and postmaster at the port of embarkation should be included. The army is responsible for the distribution of 25,000,000 pieces of mail overseas each week, and it's hard to find the right Smith or Johnson if the address is not correct.

SAFETY FIRST
(Indianapolis News)

A woman motorist was driving along a country road when she noticed a couple of repair men climbing telephone poles.

"Fools!" she exclaimed to her companion, "they think I never drove before."

PARADE TO THE FARM

Martin Aasgaard in Lake Mills Graphic: During the past 2 years dozens of books have been written for the guidance of city people who are contemplating buying farms. Practically all of these books have been popular in the cities, indicating a great increase in the number of people who want to break away from the rush of big business and live in the country.

Most of the books, which are written by men thoroughly experienced with farming, fortunately are not too encouraging about the prospects of a city man making good as a farmer. Most of them do not hide the difficulties of farming, the knowledge necessary to be a farmer nor the small profit which even a good farmer can make from the soil.

But we doubt if these books are discouraging enough to prevent a greater and greater influx of city people to the country. Many businessmen have the idea that they are smarter than the average farmer— that what they don't have in knowledge about farming can be more than made up by efficient, modern methods of management plus information which they can quickly gather from up-to-date books.

To many, a farm appeals as a form of retirement—an easy comfortable, slow-moving existance. And no matter what farmers tell them to the contrary, they will not be convinced. The only way a stranger to the country can learn what farming is really like is the hard way. The present parade to the country probably will be followed a few years hence by an equally large parade back to the city.

The big difference between safety and accidents is the man himself.

Love your enemy; then he will come up close and you can take a good swat at him.

There are some things no man can do, and they are the things he thinks he can't do.

The great use of life is to spend it for something that will outlast it.

Sudan grass for pasture may be planted as late as August 1.

USE LABOR-SAVING METHODS IN PUTTING UP HAY

All possible labor-saving methods will need to utilized if Hancock County farmers put up the large amount of hay needed ths year.

Buck rakes used in loading hay cut man hours of labor needed to store 1 ton of loose hay at least in half from the traditional wagon rack method, C. H. Van Vlack, extension agricultural engineer at Iowa State College reports. That was shown in studies made at Iowa State College.

Mounted on either high speed tractors or an auto chassis, the load picked up by the buck rake can be dropped at the barn on top of slings which have previously been placed, or it can be taken up with a grapple fork. Tractor buck rakes usually are mounted on the front, while car bucks are rear-mounted. Unless auxiliary transport wheels are provided on the tractor buck, heavy loadings should not be attempted. Hauls up to half a mile are practical with the tractor buck, while longer trips are feasible with the higher speed auto outfit.

The study made how these results in man hours per ton of loose hay stored: the auto buck rake, hay fork and carrier method, 1.2 man hours; the tractor buck rake, slings and carrier, 1½; and the traditicnal hayloader, wagon rack, hay fork and carier method, 3. These advantages prevailed for field stacking, but the least labor used here was where the tractor sweep rake and stacker were employed. That outfit consumed only .8 man hours of labor for each ton stacked.

Where field baling was done, the study showed the average man hours required per ton of baled hay stored was 2.7. The advantage of labor saving gained in field baling alone does not hold true when the labor of collecting and storing it is considered. The labor required for field baling alone in the studies was: pickup baler, 11 man hours per ton; pick-up baler, automatic twine, 91; rotary pickup baler, .21.

When the hayloader and wagon must be used for storing chopping hay, no appreciable labor saving is obtained by chopping. But if sweep rakes instead of wagons are used with a stationary chopper and blower at the barn, some time can be saved. Important savings are possible with recently developed field harvesters.

While hay cures fastest in the swath, the time is not greatly extended if it is raked when half cured. The leaf loss is thereby reduced and the general quality and color retained. A windrow turner hastens the curing process faster after a heavy rain or dew and saves much hard work. Plans for a home-made windrow turner may be obtained by writing the Extension Service, Ames Also available is "Haying with Less Help," Farm Science Reporter Reprint FS-67, which tells of other labor-saving possibilities.

As fast as hens stop laying now, they should be culled and sent to market.

BETTER IOWA GARDENS

Production of good vegetable seed is one of the most difficult and highly specialized phases of agriculture.

It is not advisable to save mature beans seeds from this year's crop for planting next year. Except in certain dry areas that are irrigated in it is practically impossible to produce bean seed free of disease.

* * *

Seed from hybrid sweet corn never should be saved for planting the following year. Such seed would produce corn inferior to the hybrid plants. Hybrid seed must be produced each year by experts. Open-pollinated seed, such as Golden Bantam, however, will produce true, provided it is grown alone and a reasonable distance from all other kinds of corn.

* * *

It takes 2 years to produce seed from beets, carrots, cabbage, turnips, parsnips and other so-called biennials. The reason is that these particular crops only flower and produce seed the second year. The roots of such biennial crops must be dug and carried over the winter in storage and planted in the spring. There is danger of crossing varieties Beets cross readily and garden varieties of carrots will cross readily with wild carrots.

* * *

It is possible to save pumpkin, squash, melon and cucumber seed with some degree of success. However, varieties within the same species of a vine crop will cross. It is essential when planting melons, for example, to plant only one variety. It must be isolated from other varieties; otherwise, bees and possibly other insects will cross pollinate the plants, which would result in "mixed" seed Isolation of plants is easier on the farm than in town where gardens usually are adjoining. Contrary to the belief of many gardeners, melons do not cross with cucumbers, pumpkins and other vine crops.

* * *

Tomato seed can be saved, but it costs so little that it is hardly worth the time and effort.

* * *

Some old and experienced gardeners have had some success in saving seeds of a few kinds of vegetables In general, however, there are to many pitfalls for the average gardener when it comes to saving seed for planting. In Iowa weather is always a hazard; fall rains may occur and prevent maturity and curing. There is danger cross pollination; and there is the problem of selecting the right plants for seed parents.

NOTICE OF PROBATE OF WILL
STATE OF IOWA,

Hancock County, ss. IN DISTRICT COURT
No. 2773

TO ALL TO WHOM IT MAY CONCERN:

YOU ARE HEREBY NOTIFIED That an instrument of writing purporting to be the last Will and Testament of Henry Lewis, Deceased, dated June 18, 1925, having been this day filed, opened and read. Tuesday the 8th day of August 1944, is fixed for hearing proof of same at the Court House in Garner Iowa, before the District Court of said County, or the Clerk of said Court; and at 2:00 o'clock P. M. of the day above mentioned all persons interested are hereby notified and required to appear, and show cause if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said decease.

Dated at Garner, Iowa, July 28 1944
W. ELMER RAW
Clerk of District Court.
(Publish August 2, 1944.)

If more than 300 feet are needed, the application must be made to the county AAA committee. If lumber is to be used in construction, (other than farm houses), costing less than $1,000, the committee may issue a farmer's lumber certificate. If the construction is to cost between $1,000 and $5,000, the AAA committee may issue a farmer's lumber certificate only if the building has been destroyed and must be replaced immediately.

The total crop p... 1944 is expected to ... same as that in 1943.

POINTS ON THE FOOD SITUATION FROM HERE AND THERE

1. For safe canning follow reliable directions, use clean equipment, apply heat according to rules based on scientific research - and don't use canning powders, states Miss Conie Foote, nutrition specialist.

2. To freeze strawberries, sliced or crushed give best flavor. Berries keep well up to three months without sugar. If sugar is added, a good proportation is 1 part sugar to 5 parts of berries by weight. The first large berries from the patch are not the best for freezing.

3. To prevent floating of strawberries when canning them, add ½ to 1 cup sugar and 2 tablespoons of water to each quart of berries. Bring slowly to the boiling point. Let stand overnight in a covered kettle. Bring to boil, pack into hot jars and process in boiling water bath for fifteen minutes.

4. "Ropey" bread is caused by bacteria introduced through yeast, flour, or utensils. Add 1 to 2 tablespoons of vinegar (to the liquid being used) for each pound or quart of flour used. Sterilize all bread making utensils by boiling in water and vinegar (1 part vinegar to 3 parts of water).

5. Milk is essential in an adeqate diet. "It is often stated that the inadequate milk consumption of farm families is directly related to the quality of the milk produced. One way to keep milk in good condition is to heat it to the boiling point and then cool it quickly.

Around Iowa

LUCKY AND UNLUCKY

Ray Phelps of near Waverly had the misfortune to be the underneath man when the tractor he was driving overturned. Neighbors righted the machine and rescued Phelps. Neither Phelps nor the tractor was harmed.

NO PLACE SAFE

Frank Kinney, Oakland, probably thought he was safe from being run over by cars while walking down the local sidewalk, but such was not the case one day recently. Mr. Kinney was struck by a car as Harry Davis stepped on the starter. Evidently in gear, the car went over the curb and struck the man The fracture of the head of a small bone just below the knee of his left leg, was the injury received by Mr. Kinney.

NEVER TOO OLD

John Butler, an 86-year-old Lenox resident, has been very busy this summer. He had been painting his house When he started the job, he intended to paint only the porches but ended up by painting the entire house.

REALLY AN ANTIQUE

A solid gold pin, evidently a class pin, was found by Mrs. Birtus Copley of Grundy Center as she was working on the lawn at her home The pin bore the words "University of Michigan" and the date 1837 On the back was inscribed the name "William Arnold" and "Ann Arbor". The pin is in perfect condition. The presence of the pin on the lawn cannot be explained by the Copleys.

FAST WORK

A 40-acre field of timothy was cut, raked, baled and and stored in the barns on the R. O Skellenger farm in Adair county, in two days and a half The timothy was cut in half a day by two tractor and two horse-drawn mowers; by working all night, the hay was raked into windrows, baled and put into the barns within short time. The field produced 2,014 bales of hay.

MODERN HUNTER

Charley Howard of near Dows has perfected a new method of hunting wolves. Recently, he found a cub wolf not far distant from the place where he was working. Mr Howard made a dive for the animal but it ran away with the hunter at its heels. The cub soon was caught and sent to its "happy hunting grounds" Mr. Howard corned another cub in a hole, dug it out and sent it on its way as he had the first. The novel method used by Charley was hitting a killing blow with his bare fist. It proved effective, too.

SWIMMING POOL

Flood waters often leave in their wake many strange appearances of wild fowl Flooded basements in Mississippi river towns have been the paddling ground for newly hatched ducklings that became lost on their way to natural waters. Ed Harksen of Davenport found a young mallard swimming in his basement, and in the basement of the Dubuque post office a young wood duck was rescued by Ed Volkert of the Massey Wild Life station.

SHOTGUN TOTIN' GRANDMA

An 80-year-old woman, Mrs Lida Cooper of near Hillboro in Henry county, set out on a hunting tour to find the killer of many of her hens and young chickens. Before the hunt was over she had dispatched 24 oppossums, large and small, and one civit cat. Good hunting!

LABOR SHORTAGE AREA

Two patients, escaped from the state hospital at Mount Pleasant must have heard of the manpower shortage, for they were found several hours after their escape diligently engaged in work on a farm where they had applied for work and were accepted.

GOLFING CARP

The first time a fish ever attempted to use the fairways of the Oneota Country Club near Decorah was during the period of the recent overflow of streams in that vicinity C. L. Knorr and son found a stranded 15-pound German carp on the flooded fifth green of the golf course.

FIRST DEATH

The first death of a white person known to have occurred in Iowa was that of Sergeant Charles Floyd, a member of the Lewis and Clark expedition, at what is now Sioux City during the summer of 1804. A monument commemorating both the expedition and the death of Sergeant Floyd now overlooks the Floyd river at that place. Floyd was the only member of the Lewis and Clark expedition lost on the entire excursion.

NOMENCLATURE

Several Iowa counties are named for signers of the Declaration of Independence, numerous others for presidents of the United States and two, Palo Alto and Cerro Gordo, for victorious battles of the Mexican war. Kossuth county was named after the Hungarian patriot, Louis Kossuth. Lyon county was named for General Nathaniel Lyon, commander of the First Infantry in the Civil War. He was killed in the battle of Wilson's Creek.

TRI-STATE BOUNDRY

The surveyor who drove the iron stake that marks the corner where Iowa, Minnesota and South Dakota meet was Jefferson Davis, afterward the president of the Southern Confederacy On the completion of his surveying there he remarked that within a radius of one hundred miles of this iron stake was the richest farm land in the world.

FIRST FIRSTS

The first white child believed to have been born in Iowa was Susan Ann McCraney, daughter of Mr. and Mrs. Thomas McCraney, Jan. 10, 1833, at Dubuque. Dubuque claims a number of other firsts in Iowa, including the establishment of the first Iowa newspaper, The Dubuque Visitor, May 11, 1836, and the raising of the first U. S. flag at an Independence day celebration at the mouth of Catfish creek, opposite Galena, Ill., July 4, 1818.

NEW VOICE

Patience and hard work helped in working a miracle for Jean Peterson, 15-year-old girl of Durant. When Jean was three years of age, she contracted whooping cough. Following this, her voice gradually became weaker until she could talk only in a whisper. This condition was not changed materially until six months ago when she regained use of her voice and now speaks normally Mrs. George Harling, formerly a speech instructor in Davenport, moved to Durant when Jean was still small and became interested in the case. When Jean was 14 years of age, Mrs. Harling decided that the girl was then ready to make the attempt to regain her lost voice. Mrs. Harling obtained the parents' consent and started giving a series of voice exercises. The trial proved successful and Jean is now able to talk in a normal manner.

MOVED

Thieves who took Howard Allen's car one night recently evidently hadn't been advised that Allen had moved sometime ago. Allen reported the loss of the car to Emmetsburg officials when the automobile was not in the place it had been parked The next morning, a farmer living on a farm south of Ayrshire where Allen formerly lived phoned and advised that the car was left there. No damage had been caused but five gallons of gas had been used.

ANNUAL BALL

An invitation to the Waverly fourth annual firemen's ball was found recently by William Tofte who gave it to Fire Chief Carl Homan The invitation was mailed in Feb 14, 1889, and addressed to William Beebe Wording on the invitation was: "Yourself and ladies are cordially invited to attend the Fourth Annual Ball of Engine Co. No. 1, Waverly Opera House, Friday eve, Feb. 22, 1889, tickets $1.00, music by Northwestern Band."

STORMY DAYS

Various storms took a liking to the Andrew Boone farm near Sheldon recently. During a hail storm Mr. Boone lost nearly 100% of his crop and 35 chickens were killed. While the hail storm was "turned on" a small twister blew an empty corn crib against a hog house. Later heavy wind blew away a hay stack. Two days later, lightning struck the house, stunning the family. The bolt entered the chimney, and went into the basement, covering the entire house with soot.

QUICK GROWING

Warren Stark of near Greenfield, planted a 35 acre field of corn on May 9. The corn was "laid by" on June 15.

FIRST CIRCUS

The first circus put on by Ringling Bros. was in Mc Gregor, Iowa. Around 1860, August Ringling moved to McGregor with his wife and three sons. Al and Gus Ringling formed a club of Young Fantastics in 1869 to perform at a Fourth of July celebration. The following year, after the performance of Dan Rice's Great Paris Pavilion Circus, the Ringling boys, now numbering seven, decided to try the same performances. The ensuing performance laid the foundation for the boys' future life work. Al became a juggler and rope walker; his brothers gradually joined him in other circus acts. In 1884, the Ringling Bros. Circus was organized.

HOT LOAD

Gus Struck, driver of a truck containing a load of hay, did not know for sometime that the hay was blazing. The hay was upset from the truck by the Lowden fire company and others assisting in the work It was completely destroyed and the truck was badly damaged.

Services Will Be Held Friday For Mrs. H. Jahnke, 60

MRS. JAHNKE DIED TUESDAY EVENING AT HOSPITAL

Funeral Services Will Be Held At 2:00 P. M. Friday

Mrs. Henry (Anna Theimann) Jahnke died Tuesday evening, Aug. 1st at a Mason City hospital where she had been a patient for over a week.

Mrs. Jahnke, who was 60 years old, leaves of her immediate family besides her husband five sons, Awalt of Mason City, Fred at Garner, Elmer in the Army in Florida, Paul at Britt and Robert in the Army in Alabama; one daughter, Mrs. Fred Osterkamp, of Britt.

She also leaves three brothers and two sisters; Herman H. Theimann; Henry Theimann; George Theimann, Mrs. G. A. Goll and Mrs. C. J. Wille.

Funeral services will be held at the Klemme Reformed Church Friday afternoon, August 4th at 2:00 o'clock with Rev. Calvin Grosshuesch officiating. Arrangements are in charge of the Wellemeyer Funeral Service of Klemme and burial will be in the Klemme Cemetery.

MRS. EDNA THADA ENTERTAINED LADIES AT HER COTTAGE

Mrs. Edna Thada entertained a number of ladies at her cottage on the north shore of Clear Lake at three tables of bridge last Friday afternoon, after which the hostess served lunch.

The following scores were won in contract bridge: high, Mrs. Geo. Lawhorn; second high, Mrs. R. A. Jorgenson; third high, Mrs. H. D. Ramsey and low score by Mrs. W. F Missman.

Soon after ewes are sheared, both lambs and ewes should be dipped to control ticks, a common external parasite of sheep in Iowa. Standard dip either arsenical or coal tar, can be used if directions coming with them are followed carefully. Dipping should be done on a warm day and preferably early in the morning to give the sheep time to dry.

HANCOCK COUNTY CALENDAR

August 3 — Women's Achievement Day Program Committee at home of Mrs. Ray Baker.

August 7, 8, 9, — 4-H Girls' Camp at Clear Lake.

August 10 — Bingham Boosters 4-H at home of Clarice Nelson.

August 10 — Liberty Busy Bee 4-H at home of Dorothy Moll.

August 11 — Concord Chum 4-H at home of Shirley Moe.

August 14 — Rural Young People meeting at Britt in the evening.

August 17 — Magor Township Farm Bureau meeting at No. 5 school.

August 17 — Madison 4-H boys at Bredlow home.

August 17 — Bingham 4-H boys at Planz home.

August 21, 22 — 4-H Achievement Show.

EXCERPTS FROM LETTER WRITTEN BY MAJOR GENERAL H. C. INGLES TO THE PRESIDENT OF THE IOWA INDEPENDENT TELEPHONE ASSOCIATION:

"It gives me genuine pleasure to inform you that a CERTIFICATE OF APPRECIATION has been awarded to the Iowa Independent Association for its excellent cooperation and patriotic service to our country in the present world-wide conflict."

In sponsoring the activation of affiliated Signal Corps units of highly-trained personnel at a time of national emergency, your company materially aided the Signal Corps in its gigantic task of furnishing to the United States Army the world's greatest military communications system."

THE IOWA INDEPENDENT TELEPHONE ASSOCIATION provided the Officers and Non-commissioned Officers for two Signal Corps Companies in 1942, and this award is in appreciation of that service. The award will be presented in Des Moines, July 27, by Col. Richard Schlosberg, Signal Officer, of Omaha. The Iowa Independent Telephone Companies of Iowa. There are 537 companies and they serve 778 towns and villages. The vast majority of Iowa Farmers get their telephone service from these Companies.

This Company is proud to have contributed its share in this patriotic effort—over 25% of our men employees are now in the armed services.

Central Iowa Telephone Company

WEEKLY NEWS ANALYSIS

Germany Admits 'Grave Situation' As Allies Continue to Advance; Study World Oil Marketing

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

France—Surprised by sniper while on patrol, U. S. Doughboys make for ditch and prepare to return enemy's fire.

SECOND FRONT:

Hedgerow Battle

Beautiful in peace, treacherous in war, the hedgerowed fields checkering Normandy's picturesque countryside were the scene of some of the bitterest fighting of World War II, with desperate Nazis using them to conceal their rifles, machine guns and artillery to impede the relentless advance of the American doughboys.

Farther to the east, Gen. Bernard L. Montgomery's British and Canadian forces girded for a large-scale assault against strong concentrations of German armor in the plains below Caen, while enemy units continued to jab into their flanks to unsettle their positions.

Shortly after he had told his son, Capt. Quentin Roosevelt, that "the old machine is pretty well worn out," 56-year-old Brig. Gen. Theodore Roosevelt Jr., son of the immortal "Teddy," quietly succumbed to a heart attack in an army tent on the Normandy battlefront, where he had been assistant commanding general of the 4th infantry division.

As the Allies edged forward in northern France and received a continuing stream of reenforcements, some allegedly direct from the U. S., American and British aviators were swooping down on German communications lines in efforts to disrupt the flow of enemy reserves and supplies to the flaming front.

German Soil

No longer able to maneuver freely on the vast spaces of Russia, and with its back to its own homeland, the German army on the northern sector of the eastern front found itself confronted with the problem of being forced to stand up and fight or allow the Reds to carry the war into their own country.

As the Russian army became the first Allied force to approach the threshold of Germany, bitter fighting continued to rage before the enemy's "Gothic line" in northern Italy, where the Nazis again took advantage of the high mountain country to slow up the Fifth and Eighth armies advance to the rich agricultural and industrial regions beyond.

As the Germans fell back toward their East Prussian border in the north, German propagandists made no bones about the critical situation, declaring that the time had come for the complete industrial and military mobilization of every man in the Reich capable of working or bearing arms.

PACIFIC:

Spotlight Shifts

The spotlight in the ever widening Pacific warfare shifted back to northern New Guinea, where 45,000 desperate Japanese sandwiched between U. S. beachheads all along the coast, repeatedly attempted to break through the iron ring being forged around them.

In the islands farther to the north, U. S. warships and planes continued to pepper the important stepping stones to the Japanese mainland, with Guam below captured Saipan the major target.

Despite the ferocity of their attacks in New Guinea, the position of the Japanese forces was hopeless, with Yanks occupying large patches all along the 600 miles of coastline to their west, and other Allied forces firmly entrenched to their east.

FOURTH TERM:

F.D.R. Willing

One week before the Democratic national convention met in Chicago, Franklin D. Roosevelt, looking cool in his seersucker pants and white shirt, but wriggling nervously, told a gathering of 200 quiet newspapermen that if the people of the U. S. decreed, he would be willing to serve a fourth term as president.

With the country's objective being a speedy end to the war, a durable peace and the creation of a prosperous economy, F. D. R. said that he would have to accept a fourth term as a "good soldier" if the people again called upon him to remain at the helm of state.

F. D. R.'s announcement was front page news the world over, with both British and Russian papers playing it up without comment. The German radio disclaimed interest, saying: " . . . One is convinced here (in Berlin) that military and political issues which are now at stake are not to be influenced by this or that President of the United States."

DIPLOMACY:

Good Neighbors

Provision of American transportation facilities for movement of goods to Mexico, and close economic cooperation between the two countries in peace as well as war, dominated the formal discussions of U. S. Secretary of State Cordell Hull and Mexican Foreign Minister Ezequiel Padilla.

Secretary Hull

Not only did the U. S. promise to help hold up the Mexican economy by maintaining the shipment of goods to the good neighbor, but it also agreed to furnish technicians and equipment for bolstering the country's own sagging railway system.

Basing their discussions on a program drawn up by a U. S.-Mexican commission created as an outgrowth of President Roosevelt's visit with President Camacho in 1943, Hull and Padilla announced that the two governments agreed to "discourage trade barriers which may unduly interfere with the economic development of Mexico and trade between the two countries."

Oil Parley

Organization of an international administrative agency to provide orderly marketing and development of world oil resources will be the principal topic of discussion of a formal oil conference between the U. S. and Britain.

Lord Beaverbrook

The conference promises to be of particular interest in the U. S. with depletion of American reserves as a result of record war time production for the supply of the major bulk of Allied needs, and with the projected construction of a private pipe-line across Arabia to the Mediterranean with U. S. government funds.

The conference will follow technical discussions between petroleum experts of the two countries, with Secretary of State Cordell Hull and Lord Beaverbrook being in charge of the U. S. and British delegations.

HIGHLIGHTS . . . in the week's news

BUSTLES: Something faintly resembling the old-fashioned bustle has made its appearance in the New York fashion shows. It's only a little bulge, it's true, sometimes in the form of a stiff bow, sometimes a series of fishtail ruffles in the center of the back, but it's a legitimate descendant of grandmother's day. So far it has only appeared on afternoon gowns and cocktail suits.

COCOA: The tight situation will soon be relieved by the arrival of 667,000 bags of cocoa beans from Africa. The new Brazilian crop will soon be coming in, dealers say. Recently manufacturers of cocoa products have had to reduce their grind to 70 per cent of the 1941 base quantity for civilian use, but they can now go on a full schedule again because of the new receipts.

AGRICULTURE:

Bumper Crops

Overcoming machinery and manpower difficulties, U. S. farmers are expected to turn in bumper crops in 1944, the department of agriculture reported, with the wheat harvest anticipated at an all-time high of 1,128,000,000 bushels, 119,000,000 over the former top of 1915.

Prospects were reported good for all grains, with the corn crop expected to approximate 2,980,000,000, the fifth largest in U. S. history. Although near record harvests were predicted for hay, fruits, vegetables and soybeans, and a 20 per cent increase in truck produce for the fresh market is anticipated, the department looks for smaller dry beans and peas, peanuts and potato crops.

Harvested acreage was set at 355,000,000 acres for the 52 principal crops, largest since 1932, and 2 per cent over last year.

Unloading Trouble

Latest problem to arise as a result of the manpower complications resulting from the war, is the unloading of grain cars at wheat markets, with permits needed for shipments from 11 points in the southwest.

With no less than 22,000,000 bushels of wheat standing in Kansas, Oklahoma and Texas because of the unloading situation, it was predicted that about six months would be required to move the crops from these states and Colorado instead of the usual 60 to 90 days.

Large crops and insufficient rail cars were said to be contributing factors to the terminal crisis, but, except for bad weather, there is no threat of grain spoiling in the fields.

Rare Twins

In one of the rarest cases in medical annals, Mrs. Frederick D. Smith of East Port Chester, Conn., (in picture) gave birth to twins 11 days apart, with a 4 pound, 12 ounce girl following a 4 pound, 7¾ ounce boy.

DRAFT:

Depends on War

Future induction of the over 30 group depends entirely upon the course of the war, Selective Service Director Lewis Hershey declared, in discussing present draft policies calling for the induction of all possible able-bodied men under 26, and all men between 26 and 29 not necessary to an essential industry.

In revealing that there were 4,217,000 4-Fs, selective service officials told a congressional subcommittee that one-third of the U. S. population was physically or mentally unfit, and recommended a program of public clinics tied in with private doctors, to improve civilian health.

In commenting on draft policies, Hershey said that unless the military situation should take unforeseen turns, maintenance of the size of the present army would continue to determine induction calls.

POPULATION:

Big Shifts

As a result of military and civilian migrations in the U. S. between 1940 and 1943, the south and west gained more than 4,000,000 inhabitants while the north-central and northeastern states lost approximately 2,000,000.

Twenty per cent increases were noted for Arizona, Florida, Nevada and California, with the latter state alone, with its great shipbuilding and aircraft industries, showing a boost of 1,559,135.

Montana, North Dakota and South Dakota lost more than 10 per cent of their populations, but New York showed the greatest numerical decrease, with 620,939.

TURKEYS

So that servicemen will be assured of plenty of turkeys for Thanksgiving, Christmas and New Years, the War Food administration has ordered that all birds produced and marketed within 24 states and parts of three others, shall be reserved for army and navy purchasing agents until the necessary quantity is obtained. Last year supply services bought 35,000,000 and it is expected that this year they will want even more to satisfy festive doughboy appetites.

The Washington MERRY-GO-ROUND

© DREW PEARSON

Washington, D. C.

SNARL OVER RECONVERSION

One of the worst legislative snarls awaiting the senate when it returns, is reconversion. It has hardly got started on the tremendous task of putting America back to work at peacetime production.

Difficulty began last February with publication of the widely publicized Baruch - Hancock report. Though this at first was hailed as a blueprint for peacetime conversion, many senators now admit it is woefully inadequate, provides excellent protection for capital and profits, but little protection against unemployment.

Only comprehensive plan so far for real unemployment prevention during the reconversion period is contained in the bill written by Sen. Harley Kilgore of West Virginia.

Kilgore had hoped to see his bill sent to the progressive committee on education and labor, headed by scholarly Sen. Elbert Thomas of Utah. But Assistant President Jimmy Byrnes, Bernie Baruch, and Wall Street's John Hancock, aided by army-navy big business elements, pulled the wires and switched the bill into the military affairs committee. There it comes under reactionary, egotistic Chairman Robert R. Reynolds of North Carolina.

The Kilgore bill is an all-embracing measure designed to insure full production and full employment after the war, all within the framework of private enterprise. Surplus property disposal plans are included; also employment training, coordination among government agencies and—most objectionable to the reactionaries—emergency federal unemployment insurance.

Lehman Brothers' John Hancock, who opposes this, has even stated flatly that he thinks a little unemployment after the war will be a good thing—to depress wage levels.

A deal was made by its enemies to place the Kilgore bill under Montana's Senator Murray, who has been pressured by Senator George, Hancock and Baruch to kill it. Meanwhile, the unhappy Murray has been receiving brickbats on the other side from labor because of his stalling.

Adequate plans for reconversion should have been completed before the congressional recess. But sedate, scholarly, unhappy Senator Murray is still sitting on the eggs.

* * *

PIGEONS AND PICTURES

Anxious to insure the speediest possible handling of pictures of the fighting in France, one American public relations officer prepared special cases to hold single rolls of 35-mm. motion picture film. These were to be sent to London from the front by carrier pigeon. A test was made in England, with 20 pigeons sent out one day. Nineteen of them have never since been heard from. . . . Deciding roles of 5-mm. film were too heavy, the officer then devised a special carrier for single three-by-five-inch negatives. No test was made with this carrier, however because G-2 stepped in and ruled the pigeons out. . . . Too easy for the Nazis to intercept, said G-2, with the possibility that negatives containing valuable military information might fall into enemy hands.

* * *

HITLER'S HEALTH

Although intelligence officers aren't saying much about it, Adolf Hitler's health has been attracting considerable attention in Washington lately. Fact is, the Allies have several ways of checking on Hitler's physical condition. Captured newsreels and still pictures are closely compared with previous films for clues. Likewise, recordings of Hitler's latest speeches are compared with earlier talks.

Recently, Hitler made two speeches in one week. Both were broadcast by the German radio. A group of Intelligence officers and diplomats who heard him were surprised at the tone of his voice.

"Hitler sounded listless," commented one expert. "He sounded weary, tired and solemn. There was no power in his voice, no fire, only a dispirited tone of dejection. He seemed to be reading his speech. He stumbled and went over words and sentences several times before getting them straight.

Another expert saw the latest newsreels of Hitler last week, was surprised at how paunchy and pale he looked.

"Hitler has taken on weight," this expert said, "and it's not flattering to him. He seems to be letting himself go and apparently isn't getting as much exercise as a lot of his men who are running backward. His eyes also look hollow. The war isn't agreeing with Adolf Hitler."

* * *

MERRY-GO-ROUND

¶ Howard Costigan, founder of the Washington Commonwealth federation, has started a new movement on the West Coast called the "Party of the Pacific," and stands a chance to win a seat in congress, come November.

¶ Congressman Jennings Randolph of West Virginia is trying out a new wrinkle in campaigning. He is having produced some one-minute films of himself making a campaign speech, for distribution throughout his congressional district.

Walter Winchell

Notes of an Innocent Bystander:

The Intelligentsia: Sumner Welles' "Time of Decision," a Book-of-the-Month special, is rated in Washington and London as the most important book yet on the diplomatic history of this war and the diplomatic future of the world. . . . Look mag's color photo of FDR was taken since his recent illness—the best of him yet. And you can't retouch technicolor! . . . Anita Colby, the darling of the Stork, Morocco and Colony set (who made the Powers girl famous), is now feminine director of the Selznick Studios, if you will pod'n their lorgnette. . . . Eth Barrymore is being booked for a lecture tour. Her subject will be the "high points in the life of the Barrymores" . . . "A Soldier's Letter to Mrs. Luce," in the Nation, should be read by everybody. . . . A Waterbury editorialist complained about a New Yorker's one unimportant error in the same edition the editorialist's own paper apologized for three of its own. Haw! . . . Hero Commando Kelly's Satevepost fee ($25,000) and the $25,000 from Zanuck were taxed $13,000!

"Do Nothing Till You Hear From Me," which was high on the Hit Parade only a few broadcasts ago (and has garnered a mint for Duke Ellington), was written by Cootie Williams, Duke's ex-trumpet genius. Cootie peddled it to Ellington for $25. . . . Its real name is: "Concerto for Cootie" . . . Rooms are so scarce in navy-crowded Norfolk, Va., that Herb Fields and his band (playing at the Palomar) had to rent six motor cars to sleep in. . . . The name Winchell appeared in the Congressional Record long before the current one started worrying those in Washington, who have good reason to worry. His name was Benj. Winchell. The oldest papers in the files of Congress relate to Ben and his son Ruggles. The papers date back to 1758. . . . Radio networks have altered the well-known lines of the song, "Beyond the Blue Horizon." The wordage—lies the rising sun—has been switched to "the setting sun."

Midtown Vignette: It happened in the Stork Club the other night. . . . Corp. Brod Crawford, former Hollywood actor, saw a lieutenant at the bar, a buddy from Movietown. . . . He greeted him by his first name, of course. . . . The lieutenant stiffened and in tones colder than Sophie Tucker's ice-box replied: "Address your superior officer as a soldier." . . . After 15 minutes of heated argument the session ended when the officer gave the corporal a direct order. . . . Infringement of which is punishable by a court martial. . . . A witness to the episode relayed it to a colonel seated in the rear. He was Col. Butch Morgan, one of the real tough guys who fly our fighting planes. He is the most decorated hero in this war. . . . Colonel Morgan walked over to the lieutenant and said: "Lieutenant, where do you know Corporal Crawford from?" . . . "Hollywood, sir," was the reply. . . . "What did you call him in Hollywood?" asked Colonel Morgan . . . "I called him Brod," was the answer. . . . "Well," said the Colonel, "when you meet a friend off post, you address him by his first name, and don't go pulling your rank on him—and that's a direct order from your superior officer."

It has been estimated that 55,000,000 Americans go to the movies every week. The film industry is one place where mediocrity pays handsome dividends. Producers of B films are among America's highest paid executives. Those celluloids also reap the most loot. . . . Too many ambitious youngsters believe that beauty is the only qualification for film success.

Quotation Marksmanship: Raymond Moley: Walks as if balancing the family tree on his nose. . . . V. Kitchen: There's no use itching for something unless you're willing to scratch for it. . . . H. Savoy: She was as light as a feather, and she didn't weigh much either. . . . A. Bierce: A fork is an implement used by a civilized man to put dead things in his mouth. . . . Toni Eden: An American who takes off his coat for his country is worth 10 who just take off their hats to the flag. . . . Billy Sunday: Try praising your wife, even if it does frighten her at first. . . . J. Lorimer: The best way to hold a man is to make him want to hold you. . . . Maude Warrender: Everybody is able to give pleasure in some way. One person may do it by coming into a room, another by going out.

Love Letter of the Week: From Printer's Ink and the page by Hugh E. Agnew, titled: "You are immature if you think: That everything currently popular is really good. . . . That smart and smart alec are synonymous. . . . That you could run the business better than the man who built it. . . . That clever copy is selling copy. . . . That the popular side is the right side. . . . That men over 50 seldom get new ideas. . . . That popular mediocrity is a criterion of taste. . . . That the majority is always right."

TRIBUTE TO THE "FOUNDER OF MODERN AMERICAN AGRICULTURE"—Members of the National Agricultural Jefferson Bicentenary committee meeting in the rotunda of the University of Virginia. In the background is a statue of Thomas Jefferson, founder of the university. Seated directly behind the speaker at the microphone is Herbert A. Kellar, director of the McCormick Historical association, who outlined the plans for a national agricultural museum.

try and engineering also merit adequate attention.

The National Agricultural museum should serve as the headquarters of important national farm organizations and provide appropriate quarters for this purpose. This would add prestige to the institution and increase the opportunity for service.

An essential feature of the museum would be to establish close relations with educational institutions and organizations. On its part the museum should offer general and special courses in the form of lectures, seminars and laboratory research pertaining to various phases of the history of agriculture and of technology in this and other countries. These courses should be open to the public, and qualified students should be permitted to take them for educational credits. In addition, the museum should provide internships for individuals desiring to specialize in the history of agriculture and technology or to learn agricultural museum technique. In reciprocity, educational agencies should invite members of the museum staff to lecture and to give courses to the students of the institutions and to arrange for regular visits of students to the museum for the purpose of information and instruction. In all the activities of the museum its facilities should be developed to promote a better understanding of democracy, as illustrated in our agricultural development. These and like activities fully carried out would undoubtedly justify the designation of the National Agricultural museum as a Living Agricultural museum.

Establish Branch Museums.

In addition to a National Agricultural museum located in Washington, there should be associated with it branch museums situated in different parts of the United States. These would be of such character as to merit the designation, Living Agricultural museums, to an even greater degree than the national institution.

These branch museums should take advantage of the existence in numerous places in this country of notable sites of representative agricultural activities which flourished in a former day and for a considerable period. Where possible such activities should be recreated at the original locations. Among those which come to mind are the production of wheat, corn, tobacco, cotton, rice, sugar cane, indigo, hemp, flax, vegetables, fruits, flowers, cattle and livestock, dairying, stock farming, maple sugar, turpentine and lumbering. As far as practical in each instance operations should be shown for several periods such as the colonial, post-revolutionary, ante-bellum, Civil war, reconstruction and early 20th century. Likewise, wherever earlier periods are shown, some attention should be given to present day operations to show contrast and evolution. Collections of physical objects, such as implements and machines, should also be assembled where pertinent to the particular activity.

The bonanza wheat farming of the Dakotas from the '70s to the '90s has long vanished—yet we know where the Dalrymples were located and have information about them. The lumber camps of the same period in Michigan and Wisconsin no longer exist, yet we have voluminous records of particular companies and a few tracts of virgin timber are still standing. It would still be possible to acquire wheat land and timber, and to reestablish and operate a bonanza wheat farm or an old-time lumber camp.

There are a number of well-known tobacco, cotton, rice and sugar cane plantations in the south, and cattle ranches, dairies and stock farms in the Middle West and West where original ownership of land has passed and original agricultural activities are now changed. Some of these could be acquired and reestablished to operate as formerly.

In other instances the ownership has changed, but the original landholdings have been held together and still produce agricultural crops, though not always the same as before. Westover and Curles Neck and Claremont on the lower James are plantations of this type. Again, there are a surprising number of famous holdings which even today are owned by the same families which were in possession a hundred or more years ago. Shirley, the Carter estate on James river; Folly, the Cochran plantation in Augusta county; Walnut Grove, the McCormick farm in Rockbridge county; and Berry Hill, the Bruce plantation near Halifax, all of which are located in Virginia, meet this pattern. The same is true of the Middleton estate on the Cooper river, and Hampton Hall, the Rutledge plantation on the Santee river, both in South Carolina. In Louisiana, Rosédown, the Bowman family estate and the Cottage, long-time residence of the Butlers, should be added. The list could be considerably enlarged. In other cases such as Mount Vernon, Washington's estate, Stratford, the Lee plantation, Monticello, the residence of Jefferson, and the Hermitage, home of Andrew Jackson, memorial associations operate these places as museums, with major attention given to the main dwellings. The national park service operates Wakefield, the Washington house, and Arlington, the Lee residence, as well as other well-known places.

In keeping with the establishment of branch agricultural museums in various parts of the United States it would be appropriate to set up a Jefferson Agricultural Memorial association which might operate in connection with the Thomas Jefferson Memorial foundation at Monticello, Shadwell, Poplar Forest or other places directly associated with Jefferson. On one or more of these original Jefferson plantations two types of activities might be on display. One would be to carry out and reproduce the agricultural experiments recorded by Jefferson in his Garden Book and his Farm Book, including his development and trial of the moldboard plow. A second would be to relate these early enterprises to the latest and most advanced agricultural experiments of the present day. Set up side by side on the same plantation they would provide striking contrast between the early time and today and would indicate the evolution of agriculture in the United States.

homas Jefferson Was America's First 'Scientific Farmer'

n's ideas with reference to e were far in advance of declared James E. Ward, he division of social sci- Clemson college in a talk icello: An Experimental the meeting of the com- Monticello. He was among to practice crop rotation. scientific farmer and in for his system of rotation his cultivated lands into s of 280 acres each, and each farm into seven fields of 40 acres. The boundaries were marked by rows of peach trees. The seven fields indicated that his system of rotation of crops embraced seven years. He reduced corn to one year in seven and tobacco seems to have been eliminated entirely. He always stressed the maxim that where the soil is left bare the sun "absorbs the nutritious juices of the earth." Consequently, in his rotation system, he did not designate any land to be fallow, but rather cultivated certain plants, especially legumes, because he accepted the idea that such plants would absorb fertility from the atmosphere and store it in the soil. Another observation can be verified by a study of this rotation system. The crops planted on the various fields provided a continuity of employment for both the labor force and the work stock and thereby avoided excessive peak demands.

POWER THROUGH SELF-DISCIPLINE (TEMPERANCE LESSON)

LESSON TEXT—Proverbs 1:7-10; Jeremiah 35.5-10; I Corinthians 9:24-27; I Thessalonians 5:22.

GOLDEN TEXT—And every man that striveth for the mastery is temperate in all things.—I Corinthians 9:25.

Discipline — that word doesn't sound exactly attractive, does it? It makes us think of punishment for wrongdoing, when in reality it is a very helpful word which means teaching. Disciples learn, and thus are disciplined, so that life becomes safer, simpler, and more efficient.

When the Morro Castle caught fire, there was time for everyone to escape, but 134 out of the 500 on board perished because they fought each other. When the President Coolidge sank in the South Seas 4,500 soldiers escaped alive. What made the difference? Discipline, that's all, but it was enough.

There are many kinds of discipline, and all have their important place in preparing men to live well ordered and useful lives. The disciplined life has power to meet trials and temptations. We find in our lesson three kinds of discipline:

I. Home Discipline (Prov. 1:7-10). The training received by the child early in life from its parents is of the utmost importance in forming character. Children should learn the true standards of life, and be held to obedience to them if they are later to walk in the right way.

It is here that they most effectively learn the danger of the use of intoxicants and the importance of keeping their bodies clean and strong for the service of God and country.

Some parents (possibly misled by attractive, but false theories of education) think that the correction or punishment of a child is not to be permitted. They assume that they are being kind to a child by not limiting his development, or trying to direct it. These are the people who "curse their children with kindness," which is in fact the greatest of unkindness.

Only a fool (v. 7) will despise the instruction of his parents, and only a fool of a parent will fail to give that training which is like "an ornament of grace" (v. 9) in the life of the young man or woman.

But the discipline of the home needs the support of

II. Social Discipline (Jer. 35:5-10). The social order, which concerns our relation to our fellow men, disciplines each of us. It makes many and what sometimes seem burdensome demands of us in order that we, as well as those around us, may have the privilege of living ordered and useful lives.

Wise is the man or woman who draws from his fellowship with others that helpful training which gives him stability and grace.

The Rechabites had made a vow that they would not drink intoxicants, and as a tribe they stood by that vow even when tested by Jeremiah. (Note that we say tested, not tempted. He knew they would stand.)

Fine family traditions have great value in guiding and controlling young people. We should, like the good man Jonadab (v. 6), establish a tradition of abstinence from intoxicants which will make all of our descendants say, "No one in our family ever drinks."

The training of home and of society has one great goal and that is

III. Self-Discipline (I Cor. 9:24-27; I Thess. 5:22).

In the life of every one of us there should be that determined purpose that life shall not be lived in careless disorder, or be permitted to run out at loose ends.

We are all running a race (v. 24), and it is for us so to run that we may achieve success. We cannot run with uncertainty (v. 26), we must know where we are going.

We are fighting a fight, and at times it is a desperate, life-and-death struggle. We must not beat the air (v. 26), but strike home the telling blows which will bring victory over our enemies, the world, the flesh, and the devil.

To do this calls for training and self-discipline. It means bringing the body and its demands into subjection. The man who runs in a race does not destroy his chances for victory by using intoxicants, or other detrimental things. Surely we who run the race for Christ must be even more determined that self shall be disciplined for God's glory.

The standard for the conduct of the Christian is higher than is commonly supposed, for he withdraws himself from "every form of evil."

The disciplined believer knows that sin is sin—that what looks comparatively innocent often wears a false face covering real wickedness, or it is the first step on a downward path. To start on that way is to invite disaster. A striking example of this is the social drink—the fashionable cocktail—the friendly glass. **Abstain** is the word—"abstain from every form of evil."

THINGS for You TO MAKE

Gay Little Sun Suit

A BRIEF sun-suit or tiny dress is made twice as gay by means of a bright cherry spray applique. The matching open air bonnet is made perfectly flat and then buttoned together to form a hat. Whole set takes but little material and is a summer joy for any youngster. Pattern includes sizes 2, 3 and 4 years.

* * *

To obtain complete applique pattern and cutting pattern for sun-suit, dress and bonnet for the Cherry Sun Suit (Pattern No. 5737) send 16 cents in coin, your name, address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

A General Quiz

The Questions

1. If the earth were a chessboard, how many of the 64 squares would be water?
2. How many states make up the plateau states of the United States?
3. A yellow flag hanging from a ship's halyard indicates what?
4. How do elephants cool themselves?
5. What was the name of our first national hymn?
6. How many tons of steel are used in a salvo from the guns of a warship's main battery?
7. According to tradition, who was Peeping Tom?
8. What name is given poetically to any vessel carrying rich merchandise?

The Answers

1. Forty-six.
2. Eight (Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah and Wyoming).
3. Pestilence aboard.
4. By waving their ears. Blood circulating through the huge ears is cooled by the moving air.
5. Hail Columbia.
6. Ten tons.
7. The only person to spy on Lady Godiva's ride.
8. Argosy.

Beaver With Direction Made Valuable to Man

Busy little beavers can be destructive, but if their energies are channeled in the right direction they can be most valuable workers for man.

In Idaho, the animals are caught and moved to small canyon streams where they build dams, thus aiding in the conservation of water, the raising of the water table, and the development, thereby, of many small mountain pasture lands covered with lush grasses.

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize! Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

Our Men In The Service

TWO SCHAEFER SAILORS HOME ON FURLOUGH

Mr and Mrs Roy Schaefer are enjoying a visit from tw of their three sons in the Navy.

Merle Schaefer, A. M. M. 1-c (Aviation Machinists Mate First Class) arrived home last Thursday from active duty in the Central Pacific and will enjoy a thirty-day furlough.

Donald J Schaefer A. O. M. 3-c (Aviation Ordnance Man Third Class) arrived home Friday from Miami, Florida where he recently graduated and is with the Torpedo Bomber Squadron. He has a twenty-five day furlough.

The third of the Schaefer boys, Calvin, is on active duty in the Central Pacific at this time.

Too little sleep can be blamed for many a farm accident, according to Harold Beaty of Iowa State College. A sleepy or tired man is more likely to slip, get too close to moving parts such as power take-offs or pulleys, or to drive the tractor into a risky place.

GOOD MANAGEMENT OF POULTRY MEANS MORE EGGS, MORE PROFIT

Poultry Specialist Outlines Plan For Bigger Production

Pullets hatched in Feburary or March will start to lay soon after August 1, says W. R. Whitfield, extension poultry specialist at Iowa State College. Early pullets will lay more and cheaper eggs than old hens if properly housed and cared for.

Some early pullets will lay for a while and then stop laying and take a false molt. Whitfield states this is due to poor management or poor stock, or a combination of both.

Pointers

Here are a few pointers on how to get early pullets to lay through the summer, fall winter and maintain good production during the balance of the year.

The best place for pullets to start laying is in the hen house. If they are allowed to run over the farmstead or left out on range, they will lay for a while in outbuildings, then will stop laying and go into molt followed by a vacation of several months. The producer will get feathers instead of eggs.

When the first cackle is heard cut in the weeds, its high time the pullets were shut in the laying house. Where there is only one hen house on the farm, the ideal situation is to have an all pullet flock. Keeping young pullets in a clean house and away from old birds will protect them against diseases and parasites which could upset the egg basket.

Insulation Recommened

Insulation of the hen house will avoid fall temperatures drops which causes pullets to go out of production. Four days of extremely cold weather can mean the loss of two or three dozen eggs per pullet during the year beause of the molt that follows. The hen house should have a concrete floor as a dirt floor spreads disease from the old flock. Good housing will protect the birds from such poultry diseases as roup or fowl pox, and will reduce the amount of feed needed to keep the birds warm in winter. Many houses have too much window space. This should be reduced. An easy way is to cover the extra windows with cardboard.

Causes of Molt

Three things could throw the pullets into a molt, Whitfield explains. They are: Changing methods of feeding or feed formula from that used during the growing period; treating the birds roughly when handled; and giving the laying birds a wormer whether they need it or not. All should be avoided.

Pullets should be getting a high protein concrentrate consisting of corn and oats, Whitfield states. When they are housed, the same feed formula should be fed with the addition of alfalfa and feeding oil, which serve as substitutes for green feed and sunshine which the birds get on range.

HANCOCK COUNTY OVER THE THE TOP IN BOND SALES

Sales of Bonds by Banks in the County:

Bank	Quota	Sales
Garner	(208,000)	182,249.75
Goodell	(50,000)	37,150.00
Klemme	(176,000)	102.114.00
Kanawha	(170,000)	99,803.25
Britt	(291,000)	280,540.75
Total Bank Sales		701,857.75
Total Post Offices sales		103,543.75
		$805,401.50

There are a number of sales for our credit from other sources not shown in the above.

E Bond quota assigned to Hancock Co. $574.000 sales $577,518.00, per cent of quota 101.

Figures for the total sales are not available yet and will be out about the 10th of this month.

I am unable to give the pledges for the Town and Townships due to the fact that so many of them did not complete their drives and the records for others are incomplete. Some of the Town and Township committeemen did a splendid job, while others were slow.

The quota assigned by the state to our local banks was based of the per cent of deposits held by each.

H. C. Armstrong,
County Chairman

Mrs. P. M. Wilson and Mrs. A. L. Kingery drove to Des Moines Sunday for a few days visit.

Mrs. Carrie Kindon and son, Benj. Liljenberg, Monday moved into the upstairs apartment of Mrs Frank Gruetszmacher's building.

The several Priebe families and relatives in this community held a gathering and a picnic dinner at the Klemme park Sunday.

Seaman Eugene Haberkamp returned to Farragut, Idaho, Tuesday, after enjoying a furlough in Klemme with relatives and friends

Mrs. Armour Mullin and little daughter left Tuesday for Washington for a visit with their husband and father, Cpl. Mullin.

Mr. and Mrs. Emil Beier and Mrs. Daisy Lemke were dinner guests Sunday at the Vernon McLaughlin home near Belmond.

Mrs. Henry Jahnke, who was taken to a Mason City hospital last week for treatment, is still in a serious condition.

Mr. and Mrs. Lyle Liebendorfer of Forest City were dinner guests Sunday at the R. A. Jorgenson home.

Mrs. Lena Schroeder and grandson, Billy Ingle, returned Saturday from Canistota, South Dakota, where Billy took treatments.

Mrs. Frank Ward and Rose and Daisy Schaefer assisted Mrs. Ben Ridder prepare dinner for threshers Saturday.

Miss Barbara Johnson of Humboldt came Thursday for a visit over the week end with Miss Eunice Larsen at the C. A. Larsen home.

Mr. and Mrs. Christ Reibe of Garner were dinner guests at the home of their son-in-law and daughter, Mr. and Mrs. Paul Mueller, on Sunday.

Fred J. Arnold has improved the efficiency of his new repair shop the past week by building storage and parts bins for his supply of machinery repairs.

Sunday dinner guests at the home of Mr. and Mrs. Earl Ruka were Mr. and Mrs. Harold Nelson and daughter, Marian, and Mr and Mrs. Harry Sorensen of Belmond

Ruth Kimball of Boone is here visiting with her friend Marjorie Laú. She came back with Marjorie who had spent several weeks in Boone with Ruth.

Miss Novella Bredbenner returned Tuesday evening from Cedar Falls and Waterloo where she spent several days visiting with friends.

Mr. and Mrs. C. G. Waterman, Mrs. Lyle Wilcox and Mr. and Mrs A. L. Kingery were Mason City visitors Saturday afternoon and evening.

Mr. and Mrs. C. E. Kluckhohn: Mrs. Henry Lewis and son, Duard, LuVerne Lewis ware dinner guests Sunday at the Mrs Tillie Brooks home at Clear Lake.

Henry Schlichting and daughters, Meta and Lydia, and son Freddie of Rockwell were visiting at the F. J. Schlichting home Sunday afternoon.

Mr. and Mrs. Donald Bacon and children, "Chuck" and JoAnn of Thompson came Saturday morning and visited over the week end at the parental Arthur Wellemeyer home.

The Becker families and relatives held a get-to-gether and noon picnic at the Klemme Park Sunday. The gathering was in honor of Seaman Eugene Haberkamp who was home on furlough.

Mr. and Mrs. E. J. Arnold and son Roy, were dinner guests at the home of Mr and Mrs. Bill Johnson, Monday.

Gottlieb Goll took Mrs. Wm. Waddingham to Mason City Friday afternoon where Mrs. Waddingham stayed with her sister-in-law, Mrs. Henry Jahnke who is very ill at the Mercy hospital.

Mrs. Ernest Lewis is taking a vacation this week by accompanying her husband on his route in Minnesota.

Roy and Bruce Arnold drove to Ames last Thursday to visit the Iowa State College Campus and to attend to business matters.

Miss Glenna Gruetzmacher left this morning, Wednesday, on a vacation with three Des Moines ladies, to Minnesota.

Seventeen members of the Klemme American Legion Auxiliary Unit attended the meeting held at the Jay Griggs cottage at Ventura Tuesday afternoon. A nice lunch was served.

Mr and Mrs. Ben Coobs and Peggy; Mrs. Verner Lewis; Mrs. John Clements and son, Jimmy; and Mr. and Mrs. W. F. Pavey went to the Methodist Camp at Clear Lake Sunday to visit with Eleanor Coobs of McGregor.

The house Mr. and Mrs. John Chambers are building in the southwest part of town is nearing completion. The rooms were plastered the latter part of the week and carpenters expect to put in the finish soon.

Art Kudje and family, H. D. Ramsey and family, and Mr. and Mrs C G Waterman enjoyed a picnic supper Friday evening at the Clear Lake State Park with Mr. and Mrs. Leo Esbeck and son of Ventura.

Mr. Eli Schaefer of Hebron, Illincis, came Friday for a visit with his brother, Edw. J Schaefer and many other relatives in this community. Mr. Schaefer was one of the first merchants in Klemme and operated a general store here at the time the town was platted.

Miss Ellen Kilgore of Las Vegas, Arizona, came Thursday for a visit with with her brother-in-law and sister, Mr. and Mrs. Joe Burgess and family, and to visit with Klemme friends. Miss Kilgore is employed by the Union Pacific railroad.

Elmer Howard left Tuesday morning for Albia, Iowa, where he will join his wife. Mr. and Mrs. Howard recently purchased a nice home in Albia. Mr. Howard has rented his land this year to Mitchel Beck, who is farming the Howard place.

Pvt. and Mrs. Loren Gast left last week for San Antonio, Texas, where Loren is stationed in the air corps. They drove their car back after Loren had enjoyed about a three weeks furlough in which he assisted with harvesting and other farm work.

Mr and Mrs. Hans Thompson and daughter, Martha Lou, of Clinton, Iowa, are spending this week in Klemme visiting at the home of Mrs Pete Merkel and with other relatives in the community. Mr Thompson is a brother of Mrs. Merkel.

Paris Capital of Pleasure and Misery Read Prof John Erskine's historical and romantic close-up of the alternately gay and suffering prize of armies, where meet the crossroads of the world, in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Walter Rosendahl has purchased the latest model of hay baler from the Northern Implement Store and expects to have it delivered soon. Walt is one of the "pioneer" hay balers around here and the number of bales he has turned out in the past few years would make a sizeable pile of hay in anybody's back yard.

Mr. and Mrs. Clarence Lemke entertained to dinner and supper Sunday, Mrs. Lewis Neuberger; Wert Loger; Mrs. Lester Neuberger and daughter, Claudia; Mr and Mrs. Melvin Neuberger and children, Elaine and Allan, and Mr. and Mrs Frank Schulz.

A large part of the threshing has been completed in this community. A great many farmers combined their oats this year and each year sees more of this type of harvesting. A few threshing rigs are still in operation. As a rule, the quality of oats is good around here.

Mrs. Ernest Gerardi and daughter, Gracka Maria, came Thursday from Wichita, Kansas to spend a couple of months at the parental Conard Quandt home. Mrs. Gerardi will take charge of the cafe while Mr. and Mrs. Quandt are staying at their cottage on the north shore of Lake Superior at Two Harbors, Minn. Mr. Quandt makes an annual pilgrimage to the north shore each August to get relief from hay fever.

Cadet Nurse Luella Lewis of Des Moines came Monday and visited until Tuesday evening with her parents, Mr. and Mrs. Verner Lewis.

Sunday noon the Henry Lau families gathered at the E. J. Arnold home for a picnic dinner honoring Pfc. Roy Arnold who was home on a three week furlough from the Aleutian Area. Those present at the picnic and during the afternoon were Mr and Mrs. E J. Arnold and family, Will Lau of Garner, Mr. and Mrs Albert Koerner, Mr and Mrs. Lloyd Lau and Cozette, Mr and Mrs. Wesley Lau and Marjorie, George and Leona Lau, Mr and Mrs. Lee Ridder and family, Mr. and Mrs. Orville Stokesbary and family, Mr. and Mrs. Gerald Koerner and Terry, Mr. and Mrs. Glen Bridges and family, Martha and Novella Bredbenner, Shirley Erickson of Decorah, and Ruth Kimball of Boone.

Picnic Held To Honor Former Klemme Residents

Harvey Barz and family and Melvin Neuberger and family held a picnic Monday evening in honor of Mr. and Mrs Carl Anderson and daughters of Sanborn, Iowa who came for a short visit. The occasion was also Mrs. Melvin Neuberger's birthday.

Harley Barz accompanied the Anderson family home for a visit until Thursday, when he will return home on the train. Harley is looking forward to his first train ride.

4-H LIVESTOCK ENTRIES DUE BY AUGUST 10TH

4-H boys who expect to exhitit their projects at the Hancock County 4-H Achievement show should send your entries to the County Extension Director at once. These are necessary in planning stall room and other preparations for the SHOW and SALE.

ED. JACOBS IN BUSINESS HERE 25 YEARS, AUG. 25

Next week, Monday, August 25th will mark Ed. F. Jacobs' twenty-fifth year in the hardware business in Klemme.

Prior to coming to Klemme Ed. learned the hardware and tinning business at the Viken Hardware Store at Garner Later he was employed by the Farmers Elevator there.

Mr Jacobs bought out the Gruetzmacher Bros hardware business here from John and George Gruetzmacher, who then retired.

The old building where Jacobs began business burned down and he rebuilt a double front building, which also burned and he then built his present location as a temporary place to conduct business, but the war came along and he had to delay plans for another double-size building.

Farm House Burned To Ground Tuesday

HOUSE ON EDITH HAUPT FARM BURNED TO GROUND

Most Of Household Goods Saved By Lewis Mau Family

Fire of unknown origin burned the house to the ground on the old Fred Haupt farm, 1½ miles south and west of Klemme Tuesday forenoon. The farm is tenanted by the Lewis Mau family and is owned by Mrs Edith Haupt.

Mrs Mau and daughter, Maxine, were washing in the basement when Maxine came up stairs and found flames shooting along the kitchen ceiling The fire had evidently started upstars in an unused room and the flames spread rapidly.

The fire was beyond control when the Klemme fire department arrived However, most of the furniture and belongings of the family were saved from the flames. Several beds in the upstairs rooms were destroyed as well as kitchen utensils and electrical appliances kept in a pantry off from the kitchen.

The loss was covered by insurance.

SERVICES WERE HELD FRIDAY FOR MRS. HENRY JAHNKE

Services Held at The Reformed Church; Burial In Local Cemetery

Funeral services were held Friday afternoon at 2:00 o'clock at the Klemme Evangelical and Reformed Church for Mrs. Anna Jahnke, 60, wife of Mr. Henry Jahnke of Klemme.

Rev Calvin Groshuesch, pastor, was in charge of the services and gave the funeral sermon. The obituary which was read during the services is printed in this issue of The Times.

The Wellemeyer Funeral Service of Klemme had charge of the arrangements and burial rites were in the Ell Township Cemetery at the southwest edge of Klemme.

Mrs. Jahnke was carried to her final resting place by neighbors and friends: George Buseman, Lloyd Lau, Fred Bell, Ed Becker, Fred Barz and Herman Paul.

Card Of Thanks

We wish to express our sincere thanks to our friends, neighbors and relatives for their many kindnesses; also for the beautiful floral offerings during our recent bereavement.

Henry Jahnke and family 1tp.

SERVICE SOUVENIR SHOW TO BE HELD FRIDAY

The public is invited to attend the Service Souvenir Show at the Methodist Church, Friday afternoon and evening, August 11.

The display will consist of souvenirs that have been sent home by people in the services from various camps here in the U. S. and from foreign countries. Souvenirs from the first Wold War will also, be on display.

A program, including a short talk by Mrs. Florence Schaeffer about her experiences in the WAACs, and an explanation and display of an International Doll Collection by Mrs. A. O. Pelley of Rowan, will be presented at 8:30 P. M.

If you have some services souvenirs to display, be sure to bring them to the church Thursday afternoon or evening. Some one on the committee will be there to receieve them. Each souvenir should be labeled with: 1. The country or camp from which it was sent. 2 The name of the sender. 3. The name of the owner. The committee would, also like a complete list of the articles brought by each person and, if possible, a photograph or snapshot of the person in service.

There is no admission charge for the display, but the W. S. C. S. will serve a lunch at a small fee to those who want refreshments.

SOLDIER HONORED AT DINNER PARTY

Pfc. Roy Arnold was honored at a seven o'clock dinner Monday evening at the home of Mrs. Oliver Potter in Mason City. Other dinner guests were Mrs. E. J. Arnold, Evelyn Arnold, Thelma Chambers, Novella Bredbenner, Eloise Etchen, Ronald Gibbs, Jimmy Fredin, and Shirley Erickson of Decorah. During the evening the group attended a show, visited, and then saw Roy off on his train at 4:30 A. M. Roy is returning to camp at Spopane, Washington.

Klemme Men Won Cups And Ribbons At Ames Show

FARM WOMAN THROWN OUT OF BED BY THUNDER BOLT

During the severe electrical storm last Friday night and early Thursday morning, lightning struck the barn on the Lester Stille farm west of Klemme

Mrs Stille, who was in bed at the time the bolt struck at about 1:30 a. m. was pitched out of bed by the concussion which also broke a large window in the Stille house.

The bolt of lightning struck the barn, melted off electric wires running to the house and damaged a heavy electrical cable in the barn. A patch of boards about the size of a table top was charred in the haymow of the barn and only a foot from the hay. For some reason or other the hay did not catch afire Two horses in the barn apparently were not affected by the lightning.

Damage In Town

A bolt of lightning which struck a large cottonwood tree at the Lloyd Lau residence Friday forenoon, also did a lot of damage around town. The lightning evidently jumped across to electric and telephone wires which followed back causing damage to telephones telephone cables, radios and electric appliances in quite a number of homes in the north part of town.

NOT VICIOUS AFTER ALL

Mrs. Henry Freese of Lowden was badly frightened by a small black animal that didn't belong in her basement — at least so Mrs. Freese contended. After getting over her scare, she investigated to learn that the animal wasn't black at all but was brown. A squirrel, covered with soot, had found its way into the basement by way of the chimney and out through the clean-out door of the furnace.

PERKINS AND THOMPSON WIN AT AMES FLOWER SHOW

L. V. Perkins Won Two Cups and Many Ribbions; Thompson Wins Ribbions

L. V. Perkins and Ed. J. Thompson carried away the lion's share of honors at the Ames Gladiolus Society Show held at Ames, Saturday.

Mr. Perkins entered fifty-two glads and won fifty places. Ed. Thompson entered about thirty specimens and won around twenty-five ribbons, which included a number of frsts and the others seconds and thirds.

Takes Championship Cup

L. V. Perkins won the Grand Championship Cup for his display of three spikes. His winning flowers were "White Gold," in which the competition was very heavy.

He also won the cup for high point grower out of the county and the balance of his winnings were First, second and third place ribbons, close to fifty in all.

This was an "open class" show and the Klemme men competed against large growers and florists from the college as well, which gose to show the high quality of Gladioli that Perkins and Thompson are cultivating.

Both amateur growers expect to have gladioli entered at the State Gladiolus Society Show at Sioux this week end, August 12-13, and at the Southern Minnesota Show at Albert Lea on August 21st.

4-H BOYS AND GIRLS ACHIEVEMENT SHOW

Calves, pigs, colts, sheep and poultry all are being carefully fed and cared for. Garden produce is being weeded and watched. The good and bad points of livestock are being studied.

Articles to make the home a more efficient place are being completed Demonstration teams are practicing.

All this is being done by 4-H boys and girls in Hancock County in preparation for the 4-H achievement Show which will be held in Garner on August 21 and 22.

Plan to see these interesting and instructive exhibits, judging teams and demonstration teams.

DIDN'T FREEZE

The interior of the refrigerator in a Waverly cafe is completely destroyed. One morning recently the person opening the Club cafe for business discovered that the working parts of the machine were to such an extent that some of the thinner pieces of steel could be crumpled Electricians examining the machine have been unable to give cause for the actions of the refrigerator.

A black cat following you is regarded as bad luck. It may be—all depends on whether you are a man or a mouse.

Country Home Setting For Wedding Sunday Eve

MISS DOLORYS COOK BRIDE OF WILLIAM RHEINHART

Cook Home Scene Of A Pretty Wedding Ceremony

The home of Mr. and Mrs. Julius J. Cook was the setting for a very pretty wedding Sunday evening at eight o'clock when their only daughter, Dolorys, became the bride of William Rheinhart, son of Mr. and Mrs. Milvern Rheinhart of Huxley, Iowa.

The candlelight ceremony took place in the spacious living room in front of a large window, banked on each side with gladioli with an overhead drape also of gladioli. The scene was lighted with a candelabras containing seven candles each, placed on each side of the window.

Rev. Kreitzman, pastor of the Evangelical and Reformed Church of Alleman read the double ring ceremony.

Preceding the ceremony Mr. Arthur Savogue presented a piano recital and also played the wedding marches. Mrs. Carol Satra of St. Paul, Minn. was the matron of honor and Lt. Harold Rheinhart of Lincoln, Nebraska, brother of the groom was best man.

The bride wore a gown of white slipper satin with a long train and carried a bouquet of red roses and snapdragons. Her only jewelry was a string of pearls, a gift from the groom and her accessories were white.

Mrs. Satra wore a blue veil formal dress and carried a bouquet of talisman roses and snapdragons.

Mrs. Cook's dress was aquanette and her corsage was of red roses and snapdragons. Mrs. Rheinhart wore an aqua assemble with a corsage of roses and snapdragons.

Sandra Matzinger of Huxley, and Jerry Lee La Favre of Klemme were the ring bearers, while Mary Ann and Marilyn Rheinhart, twins and sisters of the groom were the flower girls.

Immediately after the ceremony a two-course buffet lunch was served to the guests.

Mrs. Rheinhart graduated from the Klemme high school and Morningside College at Sioux City and took post-graduate work at McFails, in Minneapolis, specializing in music. She taught one year at Allen, Nebraska, and three years at the Alleman, Iowa, high school. Mrs. Rheinhart will continue teaching music and typing at Alleman this coming year.

The groom is a graduate of the Alleman high school and has followed the occupation of farming since. He will continue farming and the couple will reside at Alleman.

The following were out-of-town guests at the wedding: Mr. and Mrs. Harlow Witts of Melbourne; Mrs. Carol Satra of St. Paul; Mr. and Mrs. A C Hitz of Alleman; Miss Mildred Hook of Madrid; Mr and Mrs. Ray Crabtree of Des Moines; Mr. and Mrs. Jay Griggs of Ventura; Mr. and Mrs. Matzinger of Huxley; Mr and Mrs. A. C. Matzinger of Huxley; Mr and Mrs. Miller of Letts; Miss Rose Fleming of Ankeny; Mr. and Mrs. Milvern Rheinhart of Huxley and Lt. Rheinhart of Lincoln.

IS AUGUST BRIDE

MRS. WILLIAM RHEINHART

SERVES AS WELDER—Cpl. Armor Mullen, son of Mr. and Mrs. Ben Mullen of Klemme, is stationed at Geiger Field, Wash., as a welder. His wife and 3 year old daughter live in Klemme. He entered the service Oct. 9, 1943.

OBITUARY OF MRS. HENRY JAHNKE

MRS. ANNA JAHNKE was born January 4, 1884 at New Knoxville, Ohio, the second of a family of six children born to her parents, Henry and Elizabeth Duhme Thiemann.

She was baptized in the Evangelical Reformed Church at New Knoxville, Ohio, as an infant. Shortly thereafter the family moved to Missouri for a year and then settled in Hancock County, Iowa.

She attended religious instruction and was confirmed at the Elltown Reformed Church; later transferring her membership to the Reformed Church in Klemme. She attended our public schools and grew to womanhood in this community.

In October, 1903, Anna Thiemann and Henry Jahnke were married. They commenced house-keeping on a farm in Avery Township and have been residents of this community continuously except for nine years which they spent on a farm in Minnesota. They retired and moved to Klemme in 1936.

They are the parents of five sons and one daughter.

Mrs. Anna Jahnke was a good mother to her children, and a true helpmate to her husband.

She suffered from a heart ailment which developed some months ago, and passed away on Tuesday evening, August 1st, 1944, having reached the age of 60 years, 6 months and 28 days.

She leaves of her immediate family her husband, Henry Jahnke;

one daughter:
Esther, (Mrs. Fred Osterkamp) Britt.

five sons:
Ewalt, of Mason City
Fred of Garner
Elmer, U. S. Army Camp in Florida
Paul of Britt
Robert, U. S. Army Camp in Alabama;

also five grandchildren;

three brothers:
Herman H Thiemann, Klemme
Henry J. Thiemann, Klemme
George Thiemann, Klemme;

two sisters:
Sarah, (Mrs. G. A. Goll) Klemme
Mary, (Mrs. C. J. Wille) Klemme;

and many more distant relatives and friends.

Somehow the Bus Driver Guessed Passenger's Name

For the 10th time that day the meek little man boarded the bus that passed his house, labored and dumped a large bundle near the entrance, paid his fare and took a seat.

"Look here," said the conductor, with a scowl, "how many more times are you going to ride this bus with your bundles?"

"Only once more; then I'll be finished," pleaded the little man.

"I don't suppose that on your next trip you'll have a piano put aboard, will you?" asked the conductor sarcastically.

"Well, I hadn't thought to take that, but if you'll give me a lift with it, that'll just about finish our moving."

HELPS HEAL SCRAPES, CHAFE — MOROLINE PETROLEUM JELLY — 5¢-3 TIMES AS MUCH FOR

A Dab a Day keeps P.O.* away

(*Underarm Perspiration Odor)

YODORA DEODORANT CREAM

—isn't stiff or sticky! Soft—spreads like face cream.

—is actually soothing! Use right after shaving—will not irritate.

—has light, pleasant scent. No medicinal smell to cling to fingers or clothing.

—will not spoil delicate fabrics.

Yet tests in the tropics—made by nurses—prove that Yodora protects under trying conditions. *In tubes or jars, 10¢, 25¢, 50¢.* McKesson & Robbins, Inc., Bridgeport, Conn.

To relieve distress of MONTHLY Female Weakness

(Also Fine Stomachic Tonic)

Lydia E. Pinkham's Vegetable Compound is *famous* to relieve period pain and accompanying nervous, weak, tired-out feelings—when due to functional monthly disturbances.

Taken regularly—Pinkham's Compound helps build up resistance against such annoying symptoms.

Pinkham's Compound is made *especially for women—it helps nature* and that's the kind of medicine to buy! Follow label directions.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

Kidneys Must Work Well

For You To Feel Well!

24 hours every day, 7 days a week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try *Doan's Pills*! You may be using a medicine recommended the country over. *Doan's* stimulate the action of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harsh. Get *Doan's* today. Use with confidence. At all drug stores.

OUR OWN IDEA FOR A PARTY PLATFORM

1—We are as confused, puzzled, exasperated and uncertain as anybody else and in the interest of candor start this platform by saying so.

2—If there ever was a time when we didn't profess to know all the answers this is it.

3—We believe that the voters of this country see the futility of words as never before, and that the influence of gas over horse-sense is at an all-time low.

4—We hold that deeds, not words count in this critical hour, and that long-winded keynoters, orators, platform makers and plank builders are in the public mind comparable only to the fellow who yodels at three-alarm fires, gives demonstrations in voice throwing in time of flood and cyclone, and goes in to have a recording made of his voice during earthquakes.

Agriculture.

We are in favor of agriculture, we sympathize with home-gardeners trying to raise iceberg-lettuce, we blame the opposition party for the radish and think the Atlantic Charter should be extended to include the potato bug in the unconditional surrender. We believe in the tomato and promise a better post-war squash.

Labor.

We reaffirm our belief that labor is a good thing and in the interests of candor, admit our main interest in it is the votes. We do not think the question is so much "What will you do for labor?" as "What will labor do for us?"

Foreign Policy.

We promise to change our foreign policy in the theory that any change, however slight, will be a big improvement. We are pretty mixed up ourselves on our foreign policy and wish nobody had brought up the darned thing at this time.

Tariff.

It's high enough on everything, especially restaurant checks, telephone bills and a good rye or Scotch.

Army and Navy.

We are men enough to admit that we owe it everything, that it makes this convention possible and that there isn't a man in either service who would have the gall to devote any of his time in this grave crisis to the trivial business of kidding the public through party platforms.

Air Forces.

Well, it makes politicians, orators, platform framers, gimme-gimme boys, main-chancers and baloney experts seem a pretty scurvy crew, doesn't it?

Money.

We indorse money unqualifiedly. We think there should be more of it. We believe a way can be found to pipe it through hoses. We are against a new zinc penny and believe the dollar bill should buy the article instead of merely paying the tax on it.

Social Security.

We favor social security for all and all for social security. We are opposed to worry.

Business.

We think business is a good thing and that there is a place in it for business men. But we advise steel helmets, plenty of headache pills and extra football equipment. We favor larger matches for burning questionnaires.

Pinup Girls.

We believe they are the outstanding need of American business men and that, profiting on the splendid results to the morale of the army, they should be tried by every plant owner and executive.

Occupying a Pennsylvania Railroad coach recently we saw this sign: "Due to heavy wartime demands we regret it is necessary to use this non-air-conditioned coach." Well, we found the coach one of those old-fashioned ones in which the seats were well upholstered, the upholstery not full of stains and cigarette holes, and the air clean and fairly cool in sharp contrast to most cars advertised as air-conditioned. It was quite a treat. P.S.—The lights were bright enough to read by, too!

Unrationed Remembrance
Of thoughts that come to mind
In looking back, I find
That this one seems the most
Like some provoking ghost;
The days a man could munch
As much of choice free lunch
As he might well have cared to
And generally dared to.
—S. H. Dewhurst.

* * *

The war lords who were not going to stand for any nonsense from anybody seem to be enduring it pretty fully.

Episode in a Fishing Department of a Sports Goods Store

Q—Have you any fishing rods?
A—Sorry; not a rod in stock.
Q—How about a good line?
A—We can't get those either. War, you know.
Q—Could I get a reel of any kind?
A—We haven't had a reel in over a year.
Q—How's chances of a net?
A—Sorry; no nets.
Q—Oh, well, it's all right. I'm fishing a stream where there's no fish.

Put Pears Into Your Canning Schedule
(See Recipes Below)

Relish With Meals

These later summer months find the markets still dotted with fruits that make wonderful jams and relishes. Those of you who want that extra special something to add to your meals during winter will want to take advantage of the crops and put them up in various forms.

Most fall fruit is sweet and requires little of precious sugar in the preserving. Making them into jams, butters or marmalades will give you the joy of having the fruit instead of just the juice.

Pears made into jam or honey have long been favorites throughout the nation, and these are recipes I know you'll like. Commercial pectin assures you of success in making the thick, jellied consistency, and miraculously gives you more jam than you dreamed possible out of a small batch of fruit.

Ripe Pear Jam.
(Makes 8 six-ounce glasses)
3½ cups prepared fruit
4½ cups sugar
1 box powdered fruit pectin

To prepare fruit, peel and core about 2½ pounds fully ripe pears. Crush thoroughly or grind.

Measure sugar into a dry dish and set aside until needed. Measure fruit into a 5 or 6 quart kettle, filling up last cup or fraction of cup with water, if necessary.

Place over hottest fire. Add powdered fruit pectin, mix well and continue stirring until mixture comes up to a hard boil. Pour in sugar at once and continue stirring until mixture comes to a hard boil. Pour in sugar immediately, stirring constantly. To reduce foaming, ¼ teaspoon butter may be added. Continue stirring, bring to a full, rolling boil and boil hard 1 minute.

Remove from fire, skim, pour quickly. Paraffin hot jam at once.

The peach crop is good this year. Peaches and oranges are a delightful combination with just a suggestion of lemon:

Peach-Orange Marmalade.
2 dozen large peaches, peeled
6 oranges
Juice of 1 lemon
Sugar (⅔ as much as fruit)

Cut the peel from three of the oranges into pieces. Cover with water and boil until tender. Drain and grind. Cut peaches and oranges (discard peel of other three) into thin slices and add lemon juice. Measure and add ⅔ of the amount of sugar. Boil rapidly until thick and clear. Pour into clean, hot jars and seal.

Spiced crabapples are good accompaniments for meats. In fact, when you serve meat with a relish such as this, it will even seem to stretch a small meat course:

Spiced Crabapples.
3 pounds crabapples
3 pounds sugar
3 cups vinegar
Stick of cinnamon
Cloves

Take blossoms off the crabapples, but leave stems on them. Steam apples until tender, not soft. Boil vinegar, sugar and spices for 15 minutes. Skim and put in fruit. Boil apples about 5 minutes, not allowing skins to break. Seal in hot, clean, sterilized jars.

Pear Butter.

Wash, pare and core ripe pears. Add just enough water to prevent sticking. Cook until soft, then press through a sieve. Add 2 tablespoons lemon juice, ¼ teaspoon nutmeg and 1 cup sugar to each quart of pulp. Boil rapidly until thick. Pour into hot, sterile jars. Process 10 minutes in a hot water bath.

Pear Honey.

Pare, core, chop and measure hard-ripe pears. Add a little water if necessary to start cooking. Boil 10 minutes. To each quart of chopped pears, add 3 cups sugar, juice of 1 lemon, grated rind of ½ lemon and ½ teaspoon ground ginger. Boil until thick. Pour into hot, sterile jars; seal at once. Orange and nutmeg may be used instead of lemon and ginger.

Quinces and apples are a good combination in this marmalade:

Quince-Apple Marmalade.

Pare, core and chop 6 quinces and 3 tart apples. Cover quince with water and cook until tender. Add apple and cook 10 minutes. Measure. Add ¾ cup sugar for each cup of fruit and juice. Boil to jellying point. Pour into hot jars and seal at once.

Tomatoes spiced with lemon, cinnamon and ginger root are a splendid accompaniment to many meals. You'll like the rich, red color of them, too:

Tomato Preserves.
2 pounds tomatoes
4 cups sugar
1½ cups water
1 lemon
1 stick cinnamon
2 pieces ginger root

Use small, firm tomatoes. Scald 1 minute. Dip into cold water. Skin, but do not core. Combine sugar, lemon, sliced thin, cinnamon and ginger and simmer together 20 minutes. Remove cinnamon and ginger. Add tomatoes and boil gently until they are bright and clear. Cover and let stand overnight. Pack cold tomatoes into hot sterile jars. Boil syrup until as thick as honey and pour over tomatoes. Process 15 minutes in a boiling water bath at simmering.

Ranch Preserves.

Soak dried apricots or peaches overnight in water to cover. Drain. Measure fruit. For each quart, make a syrup of 3 cups sugar and 1 cup water in which fruit was soaked. Boil 5 minutes. Cool. Add fruit and cook until thick and clear. If syrup becomes too thick before fruit is done, add ½ cup water. Pour into hot jars and seal at once.

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Chambers' Point-Saving Menus

Fried Chicken
Green Beans, French Style
Lyonnaise Potatoes
Chiffonade Salad
Cloverleaf Rolls
Blueberry Pie
Beverage

Lynn Says

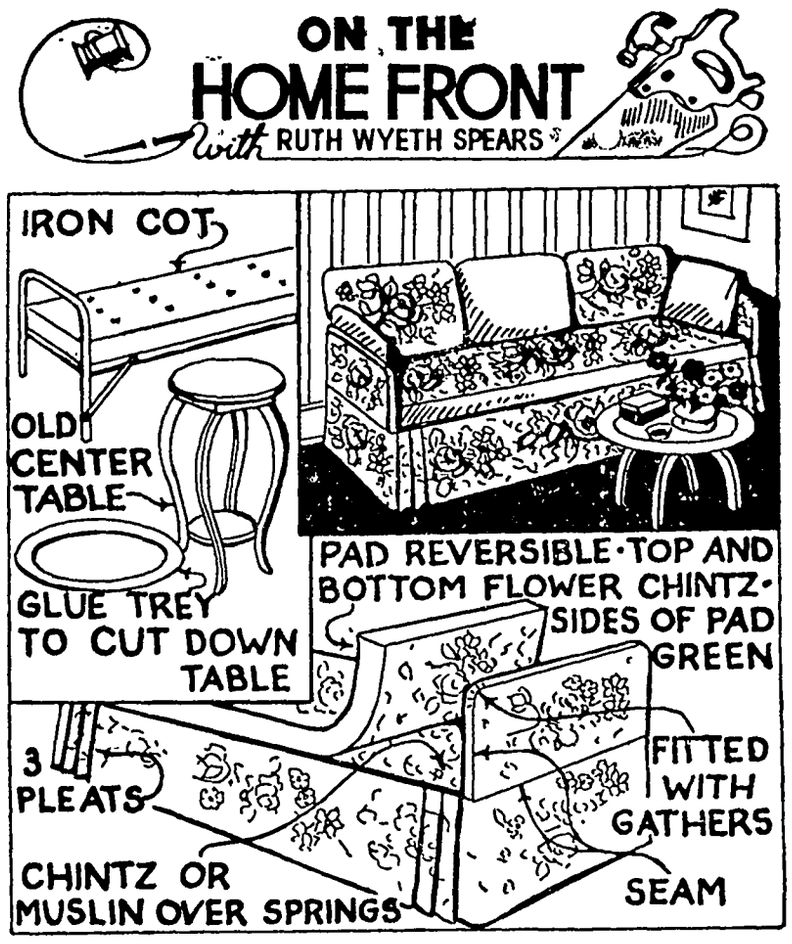
Popular Choice: You'll like fried chicken if it's dipped in cornflakes instead of bread crumbs for a change.

Cottage cheese molds nicely when mixed with garden green onions, radishes, diced green pepper and seasonings. Serve on lettuce for a luncheon treat.

Bread Pudding: Try it with brown sugar instead of white for a different touch. If you make it plain with raisins, try a lemon custard sauce.

Scrambled Eggs on the menu? Serve with jelly, sauteed chicken livers or french fried shrimp. All are combinations hard to beat.

Au gratin vegetables: Cabbage, cauliflower, potatoes and tomatoes. For a topping try crushed cereal like cornflakes with butter and melted cheese.



ARE you using one room for living and bedroom these days? Or perhaps you have had to put an extra cot in some corner of your house or apartment. In either case it is worth while to give a little extra care to the daytime appearance of the bed. A flat box on casters holds all the bedding for the simple cot shown here and slides underneath out of sight.

This arrangement makes it possible to cover the cot and pad with neatly fitted slip covers which give it all the dignity of a real sofa. The contrasting side section of plain material around the pad with end and center back cushions to match it is a nice touch. The improvised table from odds and ends also helps to make the couch do day as well as night duty.

FAMILY HOME Medical Guide
WORTH ITS WEIGHT IN GOLD WHEN SICKNESS OR ACCIDENT STRIKES—CLEAR, ACCURATE, COMPLETE

NOW ONLY $1 FORMERLY OBTAINABLE ONLY IN $5 EDITION

Does sudden sickness or accident throw you into a panic? Do you know what to do if a child runs a rusty nail in its foot or swallows poison—or if a grown person is stricken with agonizing kidney colic or an aged person suffers a bad fall? In the precious minutes or hours before the doctor can call, what you do or don't do may save or cost a life.

The right thing to do you can know *instantly* with Dr. Gillum's quick-reference Family Home MEDICAL GUIDE at hand. In clear, understandable language it covers every type of ailment, tells you what the symptoms are, what to do till the doctor comes, and the best treatment to follow in any event. It is up-to-the-minute, authoritative, sincere, reliable. Every one of its 27 chapters is a mine of valuable information that you simply can't afford to do without. Its 25 handy reference tables, 104 pictures, and 4 complete anatomical charts in color are well worth the cost of the entire book.

In its original form, with cloth binding, the Family Home MEDICAL GUIDE sold for $5.00. Because of the doctor shortage it was felt advisable to bring out an edition—including everything the 625 pages of the original edition contained—that every family could afford. Hence the low price of $1.00.

Do not let a single day pass without sending for this encyclopedic Medical Guide. Fill out the coupon and mail it in TODAY. Remember, if you are not delighted with it...if you do not regard it as the best money's worth you have ever received, simply return it and receive your money back.

MAIL THIS COUPON TODAY!

In Hancock and Adjoining Counties per year in advance $1.50
In Iowa, per year in advance $2.00
Outside of Iowa, per year . $2.50

All subscriptions for papers going to points within the county (and adjoining counties) are considered continuing yearly subscriptions to be discontinued only upon notice from subscribers or at publisher's discretion. All other subscriptions will be discontinued one month after expiration, if not renewed, but time for payment will be extended if arrangement is made by the subscriber.

AWARD CONTRACT

Hancock County Supervisors Thursday awarded a contract to Herry Rehm for the grading of several miles of Hancock county roads Thursday afternoon. The contract totaled about $2,800.

APPROVES BUDGET

Hancock county supervisors Thursday approved the 1945 budget for Hancock county at a hearing held at the courthouse. The budget calls for a tax levy of $231,000 for the administration of county government including highway, engineering ad relief costs.

SIMPLE PRACTICES WILL CUT DRAFT OF PLOWS

Keep Share And Coulter Sharp To Aid In Cutting Roots

Draft requirements for plowing can be cut and efficiency increased by a few simple practices.

E. L. Barger, agricultural engineer at Iowa State College, says experiments with moldboard plows have shown that about 45 percent of the total draft is used to cut the furrow slice. Thirty-four percent goes to lift, turn and pulverize the soil. The remainder, or 21 percent, is required to move the weight of the plow.

Use of shape shares can reduce the cutting draft, especially in soils containing many roots such as alfalfa, clover or native grass sods.

Setting Coulter

Sharp rolling coulters also can decrease the draft in soils containing roots: They need to be properly adjusted to be effective, however, Barger points out. Set them about ½ or ⅝-inch to the land or to the left of the shin.

In stubble plowing or under average conditions, it is best to run coulters about one-half the depth of the furrow. A deeper setting is desirable when plowing sod. Under most conditions the center or hub of the coulter should be directly above the point of the share. Coulters need to be sharpened frequently by grinding

Good Scouring

Good scouring helps decrease the draft necessary for lifting, turning and pulverizing the furrow slice. Maintaining a correct hitch and keeping all moving parts of the plow well lubricated will cut the draft necessary to propel the weight of the plow.

NOW IS THE TIME TO WORK OVER STAWBERRY BED

Proper care of the strawberry bed following harvest can help assure profitable crops during the third and even the fourth season after planting. H. E. Nichols, Iowa State College extension horticulturist, recommends that during July a part of the extra plants will then have a better chance to produce new runners and hence new plants for the next year's crop.

Mowing the bed is the first step Rake off all leaves and the mulch, and destroy Burning off the bed is a questionable practice, because the crowns of the plants may be damaged unless conditions are just right. However, it can be done on a dry windy day when the soil is moist Destruction of the mulch and foliage helps greatly in control of strawberry diseases and insect pests.

The plants can be thinned with a plow or a hoe the number to be left will depend upon the soil, rainfall and variety. If too many are removed, a poor row and yield will result while leaving too many will result in overcrowding the following year. In general, the width of the rows should be cut down to 12 to 14 inches, with 4 feet between rows. Later cultivation is similar to that of the previous year.

BETTER IOWA GARDENS

Gardens should be cultivated at least once a week during dry weather. This helps to conserve all possible moisture. A wheel hoe, speedy cultivator or other cultivation tool may be used.

* * *

Prompt harvesting of vegetables at the proper stage of maturity not only will prolong their period of production but also will provide better enjoyment in eating.

* * *

It isn't too soon to start digging potatoes when half or more of the tops are dead. In many gardens potato plants are completely dead but still not harvested.

It's dangerous to leave potatoes in the ground after maturity. If the soil is moist, there usually is considerable loss through rotting. Another point in favor of prompt harvesting of potatoes is the possible loss of vitamins which occurs when the soil gets hot.

Potatoes should be dug either in the evening or early morning Because newly dug potatoes sunscald easily, they should not be exposed to the sun for any length of time. While new potatoes are easily scuffed in digging and handling, scars will heal and a thicker skin will develop in storage.

Potatoes should be thoroughly dry before they are stored. And they should not be stored in large piles. By storing potatoes in small or shallow piles, heating is avoided in the center of the pile.

The corncrib is a good place to store potatoes on the farm. They should be covered lightly with straw or other material, to exclude the light, as tubers exposed to light turn green.

Or potatoes may be stored in basement rooms during the summer provided there is good ventilation and it is not wet.

* * *

Onions should be harvested as soon as about 90 percent of the tops have bent to the ground Prompt harvesting at the right time will make better stored onions.

* * *

Onions can be left in the garden one or two days to dry. Then they should be tied together in bundles and hung in a dry, well ventilated place to cure thoroughly Or the tops may be cut off within 1½ inches of the bulb and the onions placed in mesh sacks and hung up to cure.

MUCH SMALLER POTATO CROP LIKELY IN 1944

Iowa's 1944 potato crop will be much smaller than that of 1943 reports C. L. Fitch extension horticulturist at Iowa State College

Excessive rainfall which delayed planting hardened the soil and made roots shallow has caused the production cut Such a combination always spells poor nutrition Fitch explains When heat comes, tip burn of leaves and stoppage of growth result Right now a heavy population of leaf hoppers is further injuring leaves All possibility that yields of early Warbas and Cobblers will be generally good has passed.

Fitch says far more damage is done to potato yields in Iowa by excessive moisture than by drouth Largest yields result in a season when the previous fall was wet but the spring is dry so that the roots go deep and when the later rains are moderate but adequate

"We are trying to grow a cool weather mellow soil crop in a hot state on heavy soil" Fitch says His bulletin "Twenty Rules for Potato Growing in Iowa" shows how to get the good surface drainage that would have made a real crop in the wet season of 1944 Copies are available from county extension directors or vocational agriculture instructors.

NEED CERTIFICATES TO BUY LUMBER FROM SAWMILLS

After August 1 Hancock County farmers can not buy lumber from sawmill producing more than 100,000 board feet a year without certification from the county AAA committee.

County Extension Director Paul Henderson says that ruling was continued in War Production Board order L-335, just revised. The revised order governs over-all control of lumber production and distribution.

The farmer needs no certification when buying from a small mill producing less than 100,000 board feet annually, nor when he has logs sawed at a mill producing less than 100,000 board feet a year.

Where less than 300 board feet of lumber are needed, it still may be obtained on application to the dealer -- without AAA certification -- if it is available.

Sawmill operators affected by the order may consult the Timber Production War Project, Iowa State College, Ames, for interpretation as it affects them.

Around Iowa

DOWN TO FINE POINT

According to Henry Bemiss, West Union, a perfect cribbage hand is held only once in 3,000,000 hands. In a recent game with Mrs. Bemiss, Henry held the perfect hand for that game.

DOWN THE WELL

Herman Wessels of near Sheldon luckily managed to get the tractor he was driving over an old well which had been filled in years previously but had been softened by recent heavy rains. One wheel of the tractor was off the ground, but by clinging to the steering wheel, Wessels got the machine to firm ground Mr. Wessels tested the depth of the mud and as far as a ten-foot stick would reach he found soup-like mud. It was the first time Herman had any knowledge that a well had previously been there, but Mrs. Wessels who had lived on the farm as a child remembered it.

NEW PET

Ethan and Bruce Brayton of Somers have acquired a new pet. It is a baby skunk. When the small pet first came to the Braytons, the boys fed it milk with a medicine dropper.

HOME UNDER NEW CONDITIONS

Men cutting and shocking oats on the Alfred Billerbeck farm near Reinbeck, were very careful not to unduly disturb a nest full of small meadow larks The men placed the oat bundle in such a manner that the nest was exposed to view after it had been tied into one of the oat bundles The mother bird then went on taking care of her young in her new surroundings.

MADE NEW ENTRANCE

To say that Claude Gifford made an imposing entrance into the Boone Dairy at Boone would be putting it mildly. Gifford intended to back his car out of a parking lot in frount of the dairy; instead he put the car in second and the next minute found himself almost inside the building Curtis Smith, an employee of the dairy, was slightly injured but Mr. Gifford was not injured, nor was the car badly damaged. The heavy glass window of the building was pushed in as were some of the foundation blocks

OATS SHOCKERS

Time that ordinarily would have been spent "talking things over" following a regular meeting, 19 American Legion members used to shock 35 acres of oats The Corning men did the good turn for J. Wolford, recently hospitalized.

PRODUCTION OF LUMBER MAKING SLOW PROGRESS

Hampered by a shortage of labor and by flooded areas, Iowa lumber production is moving slowly toward the 1944 goal of 60 million feet.

Flooded regions have slowed down production, especially in the eastern third of the state which produces much of the total lumber output, reports G. B MacDonald area forester. However, the June 1 report of the Iowa Timber Production War Project shows 9,324,000 feet of lumber production was stimulated by workers on the project during the first five months of 1944.

In cutting lumber, Iowa farmers and other producers are urged to cut trees in such a way as not to destroy woodlots. This can be done by taking out the larger trees and leaving the smaller ones for future cutting. During World War I, much damage was done in Iowa because trees were cut without regard to size. As a result, many woodlots were destroyed and, in many instances, serious land erosion on hillsides occured.

Many farmer-owned sawmills in Iowa have been forced to shut down during the crop season because of the labor shortage. MacDonald emphasizes that if Iowa is to meet its goal, much lumber cutting will have to be done when farm labor is available.

BOYS EXCEED GIRLS BY 86

County Supt. Charles S. Whitney filed his school census report in the office of the county auditor Tuesday.

The census discloses that Hancock county has a total of 1,990 boys and 1,904 girls between the ages of 5 and 21.

CULL HENS NOW FOR EFFICIENT PRODUCTION TO MAINTAIN PRICES

Regular culling of hens will reduce egg production costs and save feed. Paul Henderson county extension director, says every poultryman should set a production level standard. When egg production falls below that standard, hens should be culled. In addition, any hen which is obviously a non-layer should be removed.

A good production standard to set is 50 eggs daily for each hundred hens. A 50 percent production level should give a fair return during the summer months. At this level, feed for each dozen eggs will be around 18 cents a dozen if the hens average 6 pounds each and if the feed is a 26 percent concentrate with grains fed free choice. When production drops to 40 eggs, feed cost will rise to about 21 cents a dozen, and a further drop in production to 30 eggs will increase feed costs to nearly 26 cents a dozen.

The difference in costs is due largely to the feed needed to keep the hen. One hundred non-laying six-pound hens will eat about 20 pounds of feed daily. One and one-half pounds of additional fee is needed for each 10 eggs produced For lighter hens, somewhat less fee is needed

When production goes below the standard level, more hens are needed to produce the same number of eggs. At 50 percent production, 100 hens will lay 125 dozen eggs a month. At 40 percent production 125 hens and at 30 percent 167 hens would be needed to produce this number of eggs.

An other incentive for culling hens is the likelihood that the highest prices for fowl will be received during the summer months. If non-producing hens are sold during that period, it will help to hold up the price of this year's crop of roasters. With most meats off the ration list, the demand or chickens probably will not be as high as last fall However, with fewer chickens to sell, prices may stay up if the market isn't flooded with fowl at the same time the young chickens are sold.

A poster showing how to cull hens and a bulletin, "Sorting the Laying Flock", are available at available at the county extension office at Garner.

CHECK BINDER NOW FOR REPAIR NEEDS

Worn Or Improperly Adjusted Parts Can Cause Costly Delays Later

In checking over grain binders to get them ready for the 1944 crop, watch carefully for worn or improperly adjusted parts. H. H. Beaty, extension agricultural engineer at Iowa State College, says such parts can cause much costly delay if not discovered before the machine is put to work.

If the machine needs new slats, be sure the new one are the correct length. And in putting them on, place the rivet burr on the side of the slat farthest from the canvas and place the head of the rivet on the roller side.

Check for Squareness

Elevator canvas frames may be checked for squareness by measuring diagonal distances across the elevator with a straight section of narrow board. If the distances are not the same, adjust the frame by the tie rods which run to the main frame, or in the upper elevator by the attachment of the elevator frame to the goose-neck frame at the back.

Inspect, too, for worn bearings at the ends of rollers and for loose roller shafts and loose pins through the roller shafts, Beaty advises. Where roller shafts are loose, remove the roller from the frame, center the shaft in the roller and fill the enlarged hole around the roller shaft with babbitt. In adjusting elevator frames, avoid binding the ends of the rollers, for they must turn freely.

Clutch Trouble

To avoid clutch troubles, inspect the faces of the dog and dog stop arm. Unless they are worn badly enough to need replacement, faces of worn parts may be filed so they are square with each other and cannot slip past until properly tripped. Other parts here which may cause trouble are worn cam rollers, worn dog springs and trip springs.

If inspection shows that the hard spool or insert in the needle eye in the tying mechanism is grooved, it should be replaced or turned part way around so that the wear will come on a new area.

Extension Circular 209, available from county extension directors, contains detailed instructions for inspection and adjusting binders.

MISS LOUISE ROSENFELD ACHIEVEMENT DAY SPEAKER FOR WOMEN

Mrs Harold Oxley states that Miss Louise M. Rosenfeld, Acting Assistant Director for Home Economics in the extension service of Iowa Stat College, will speak at the Hancock County Women's Achievement Day program This will be held in the Opera House at Garner from 1:30 to 4:00 on Tuesday, August 22.

Achievement Day will be more like a women's annual meeting than the Achievement Days previously held.

A brief review of the high lights of last year's program will be given by representatives of the various townships Also a preview of the 1944-1945 Home Project program will be presented

A social hour will follow the program This will give persons an opportunity to look at the 4-H Girls' Achievement Show exhibits which will be on display and to renew friendship with women from all parts of the county.

Members of the hostess committee are: Mrs L. F. Waever, Mrs Louis Schleusnor, Mrs. Albert Etchen, and Hrs. Henry Johnson.

An invitation is extended by Mrs Oxley and her committee to both town and rural women to attend the Women's Achievement Day program.

Great Painter Designed Planes in Middle Ages

The great artist Da Vinci designed several "flying machines." Neighbors said after his death that he tested one model near Florence, possibly in the spring of 1506, taking off from the top of Swan mountain. He kept his experiments secret, recording his observations in code.

He studied birds to learn the secrets of flight. He applied himself to problems of center of gravity, equilibrium, airfoil, and other principles that face modern designers. He worked out a theory for gliding. He chose the bat's wing as the most practical model for an airplane wing. One of his "flying machines" resembled an ironing board with wings; the flier was to operate it lying down—the position Orville Wright took when he made his successful flight 400 years later.

Another Da Vinci model had four movable wings that were made to flap in pairs by ropes and pulleys; the flier stood in a suspended gondola. The landing gear consisted of ladders instead of wheels. A third design resembled today's helicopter. Instead of wings it had an overhead propeller shaped like a modern steamship's screw. There is no record of the model which Da Vinci tested. He failed not because he didn't understand flying, but because he lacked an internal combustion engine and fuel.

Oil Companies Turn to Science to Find Deposits

Not many years ago the drilling of a wildcat well was almost a pure gamble. Early wildcatters punctured cow pastures and prairies for no better reasons than wishful thoughts or hunches. If the project resulted in a dry hole—as it did about 19 times out of 20—the risk-taker was out of luck, and usually out of the wildcatting business as well.

Gradually big oil companies got into wildcatting, either directly or by grub-staking individuals. In the latter case the prospector, who is useful as an assembler of leases, is cushioned against the shocks of dry holes and lives to wildcat another day.

The oil companies, intent on taking some of the gamble out of wildcatting, and able to finance research, turned to science for help. They got it from physicists—short-haired professors in corduroys and knee boots who went into the dust and mud of Texas, Oklahoma and California to work out the problems. In the last 10 years especially they have developed methods and instruments to such good effect that wildcat wells are only about a quarter as risky as they once were.

Everybody Color Blind

A considerable part of the retina of every human eye is color blind. The outer edge of the retina is totally color blind, perceiving only gray. Only in the center of the retina are all colors seen. In the band surrounding the central full color area only yellow and blue colors can be distinguished. This area in the normal human eye is red-green blind.

Studies of many persons disclose that the three fields of color vision vary greatly both in area and shape not only from individual to individual, but also in the two eyes of the same person. Because of these differences color vision tests have been suggested for the identification of people. Fingerprints may be mutilated, but a person can not change his fields of color vision. The size and shape of the color fields of the retina can be ascertained by an ingenious optical instrument known as a perimeter.

Irrigate Seed Flats

Workers at the Massachusetts Agricultural Experiment station have perfected a method of watering seed flats by subirrigation which promotes more even germination, and reduces loss of seedlings. Why not try this method in preparing your seed flats this year?

Inside the seed flat, put an insert of waterproof paper. On this waterproof paper place a layer of gravel, about one inch deep. Now place a 2½-inch flower pot on the gravel, in the center of the flat. Then fill the flat with a mixture of equal parts of soil and sand, and pack this around the pot and the edges of the seed flat. Firm and level the soil, and sow seed in drills, or broadcast and lightly cover. Apply water in the flower pot, until the soil surface becomes moist. Excess moisture will drain into the layer of gravel in the waterproof insert. Water whenever surface soil shows signs of dryness.

Plant Food

The best time to make application of plant food is just as the frost is coming out of the ground. Then the soil is spongy and honeycombed, and will allow the plant food easy access to the soil, so that the plant food is readily available to the grass roots the moment active growth begins.

Early application, before the grass has made any top growth, will save labor too, because the plant food need not be watered in if application is made before top growth begins. Simply apply 4 pounds of complete balanced plant food per 100 square feet of lawn, scattering over the surface as evenly as possible. Early spring rains will wash the plant food into the soil.

LIME MUST BE REPLACED IN HANCOCK COUNTY SOIL

Hancock County farmers spread 7034 tons of limestone on their farms last year", according to Alfred V. Josten, Chairman of the Hancock County AAA Committee. "Each year natural causes and the corn and other crops take their annual toll of the lime in our soil. This lime must be replaced", continued Mr. Josten, "if Hancock County is going to continue to produce the crops it has in the past.

It has been estimated that each year the crops raised in Iowa take out of the soil about 3 million tons of lime. The largest amount ever spread in a single year has been 2 million tons. If we were to catch up with the lime needs of Iowa's soil, it would be necessary to spread six million tons a year for the next ten years. Lime neutralizes acidity in the soil and stimulates crop yields, so its use will really pay dividends.

"The month of August is a good time for spreading lime", Mr. Josten pointed out. "The small grain fields are open now and lime spreaders can work without running into the difficulties they have in the wetter seasons. The local committeemen will be very glad to explain the provisions of the 1944 program and will be glad to help farmers obtain lime."

Mr Josten said that he believed, with the cooperation of everybody and taking advantage of every opportunity, the amount of lime spread in Hancock County this year can exceed the amount which was spread last year

PUSH EARLY FARROWED PIGS FOR FALL MARKET

The decrease in spring pig production probably will alleviate gluts on the market this winter. But the market price support program both suggest that it probably will pay to crowd the early farrowed pigs along, and market at weights of 200 to 240 pounds, says E. L. Quaife, extension swine specialist at Iowa State College.

February and March farrowed pigs if they have done well, should be weighing 150 to 175 pounds. There still are many late 1943 fall pigs on farms at these weights. Wherever feed is available, these pigs should be confined soon, and full-fed for late August and September markets.

To encourage greater feed consumption, give these hogs a thick slop daily, preferably at noon. Shelled corn soaked from morning to night or night to morning also will increase feed consumption when fed with other grain. A small amount of good alfalfa or clover hay fed every day will be a welcome addition to the ration.

SUPRISE BIRTHDAY PARTY FOR MRS. KLUCKHOHN

Mrs. C. E. Kluckhohn entertained a number of young ladies at her home Monday afternoon at a birthday surprise party for her daughter - in - law, Mrs. Eugene Kluckhohn, whose twenty-first birthday was being observed.

The ladies were entertained at three tables of Court Whist and Mrs Verle Keraus of Garner won high score and Miss Arlene Schmidt, low score.

Mrs. Kluckhohn then opened her many gifts which the ladies had brought and Mrs. C. E. Kluckhohn served a nice lunch in the afternoon.

Out of town guests were Miss Mary Jane Lucas and Mrs. Verle Keraus of Garner; Mrs. Harold Wicks of Clear Lake, and Mrs. R. A. Jorgenson, Jr. of Dodge City, Kansas.

Card of Thanks

We wish to thank all, including the Klemme fire department, who answered our call for help Tuesday and who helped us save a large part of our household goods and belongings.

Lewis Mau and Family. 1tc

STORE EGGS NOW FOR USE IN THE FALL

Waterglass or Freezing May Be Used to Preserve Eggs for Fall

Now, while eggs are plentiful and prices are low, is a good time for producers to store eggs for eating next fall. Ralph Baker, extension marketing economist at Iowa State College says it is wiser to store eggs than to keep a few old hens to produce eating eggs while waiting for the pullets to come into production. By letting young pullets and old hens run together, the chances for spreading disease are high.

Probably the best method of storing eggs are by using waterglass or by freezing. or 35 or 40 cents enough waterglass can be purchased at a drug store to preserve 15 dozen eggs.

Select Right Age

Poultry industry specialists state that only real fresh eggs—not more han 8 hours old—can be satisfactorily stored in the shell. Really fresh eggs retain their firm yolk, white characteristics and good flavor for several months. The eggs should be placed small end down in a crock or stone jar, in several layers, and covered with a waterglass solution. This is made by diluting 1 part of commercial waterglass with 9 parts of boiled water. This is enough to cover 15 dozen eggs. A thin layer of white mineral oil poured over the waterglass will help to avoid evaporation of the water.

If freezer lockers are available, eggs can be frozen. It is best to let eggs remain in the shells at a temperature of 70 to 80 degrees F. for 3 to 5 days before they are broken out and frozen. "Aging" the eggs helps to avoid the gummy yolk which shows up with real fresh eggs.

Preparing For Freezing

To prepare eggs for freezing, separate the yolks from the whites, using the egg shell or an egg separator. The whites need no treatment and may be placed immediately in a container for storage. The yolks should be placed in a deep bowl and mixed throughly. An egg beater may be used if care is taken not to whip in air. With every 2 cups of yolk mix 1 teaspoonful of salt, or 2 tablespoonsful of corn sirup, or 2 tablespoonsful of honey.

Whether you use salt, sirup or honey depends on how you plan to use the eggs. Most all recipes will work well with salted yolk. A few foods such as scrambled eggs, cannot be made with sweetened yolk, but sweetened yolk works fine with baked goods or mayonnaise.

Place the prepared yolks in airtight waxed cartoons, glass jars or tin cans and store them in the freezer.

WEEKLY NEWS ANALYSIS

Reports of Revolt in Germany Follow Bomb Attack on Hitler; Yank Forces Push Guam Drive

Released by Western Newspaper Union.

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

DEMOCRATS:
1944 Platform

Declaring that their platform really was Franklin D. Roosevelt himself, the Democrats meeting in Chicago for their national convention renominated the President for a fourth term, and called for the continuance of New Deal domestic policies and the creation of a world organization to preserve peace through use of force if necessary.

For agriculture, the Democrats pledged price guarantees and crop insurance, and declared their objective to be to keep it on a parity with industry and labor; extend rural electrification and develop broader domestic and foreign markets for farm products.

For the postwar period, the Democratic platform asked compensation for workers during demobilization, reduction or repeal of wartime taxes and simplification of the tax structure, and encouragement of risk capital and new enterprise.

Besides U. S. participation in an organization to keep world peace, the party's foreign relations platform called for extension of the administration's trade policies, and reaffirmation in the principles of the Atlantic Charter.

PACIFIC:
Jap Shakeup

With the invasion of Guam, U. S. forces took one step closer to the Japanese and Asiatic mainland, even as the enemy reorganized his government at home with the fall of Premier Hediki Tojo and his cabinet.

In reorganizing the government under leadership of two confirmed militarists and advocates of Japanese expansion southward, official Tokio declared that the objective was to give the civilian element

During battle on Saipan island in Pacific, U. S. marines fight way through burning streets of Garapan.

greater participation in the general war effort, heretofore controlled by Tojo and the army clique.

Despite their belief in Jap expansion, the new leaders have been noted for their disposition to accomplish it without interference with Allied interests, and some quarters suspected that their appointment might be an intimation of a friendly enemy approach to the U. S.

U. S. forces streamed into rocky, desolate Guam to retake one of the first American possessions seized by the Japs after Pearl Harbor, following 17 days of heavy naval and aerial bombardment, which came on the heels of occupation of Saipan island in the Marianas.

FARM VALUES:
No Spree

Although good returns on heavy volume have stimulated agriculture during World War II and led to a brisk turnover in farm lands at increasing values, no runaway credit extension has marked the realty dealings.

With operators purchasing two-thirds of the record number of farms sold in 1943, 51 per cent of the transactions were for cash, and most of the remainder involved large cash down payments.

Because farm land values were about 75 per cent of the 1912-'14 level when the war broke out, they are still about 50 to 60 per cent below the inflated prices of 1920 despite their steady rise. although the average rise in value has been about 37 per cent, increases have totaled as much as 53 per cent.

Inflated values above real earning possibilities in some localities has hindered the Farm Security administration's tenant purchasing program.

British forces clean out Nazi snipers on outskirts of Caen.

EUROPE:
Stubborn Foe

Allied forces continued to slug forward in Normandy, gaining ground by the yard in the face of stubborn German do-or-die resistance all along the curving front.

Fighting was intense both on the western end of the front where U. S. forces pressed forward against the enemy holding out behind the cover of the tall, thick hedgerows checkering the countryside, and on the eastern end where British armored columns broke through the foe's formations in the open plains. With about 75,000 men facing the British in this sector, Nazi Marshall Rommel attempted to curtail the Allied drive by sharp counter-attacks.

British forces exerted the heaviest pressure in recent fighting because the open country allowed use of their armored equipment behind terrific artillery barrages. Bad weather continued to hamper full scale operations of the Allied air force, both in support tactics and bombardment of enemy communications behind the lines.

Internal Revolt

With the Allies pressing in on all sides, Hitler is faced with internal revolt within Germany, with the Nazis reporting that a clique of army officers sought to establish a new government and prepare the groundwork for surrender.

Climax of the sensational plot was the attempted assassination of Hitler with a bomb, which exploded within 6 feet of him, causing him slight injury and more seriously hurting 13 of his aides.

Moving swiftly to quell the revolt, which reportedly had the support of high ranking army officers, the Nazis executed several of the ringleaders and designated Gestapo Chief Heinrich Himmler as commander within Germany to suppress the uprising. Rebels' plans reportedly called for seizure of control of the country through military units.

Addressing the German people over the radio after the attempt on his life, Hitler roared: " . . . I am convinced that by stamping out this very small clique of traitors . . . we will now at last create that atmosphere in the rear at home which the fighting front needs. . . ."

Russ Advance

Russian armies continued to exert the strongest pressure on the eastern front, continuing their drive on East Prussia in the north and rolling deeper into Poland farther to the south.

As the Russians pressed the Germans on the east, Allied troops moved against the Nazis' vaunted "Gothic line" in northern Italy, with an easing of their problems of supply promised with the capture and hasty repair of the western seaport of Livorno, through which 17,500 tons of shipping can be cleared daily.

With German resistance stiffening around East Prussia, the Russians swung the brunt of their attack further southward in Poland, outflanking the big industrial city of Lwow and fanning out on the open plains below Warsaw. The Russian breakthroughs continued to force the Germans to pull back to prevent encirclement from the rear.

WORLD BANK:
Stability Sought

Seeking to stabilize the internal conditions of countries and minimize possibilities for unrest in the post-war world, 44 allied nations came to agreement on raisng an $8,800,000,000 fund, whch would be used to make currencies available to individual states for settling trade balances.

At the same time, the nations moved to agreement on a $10,000,000,000 world bank, which would extend $2,000,000,000 in long-term loans to different countries for reconstruction and development, use the other $8,000,000,000 to guarantee similar loans made by private investors.

With U. S. participation in the two projects dependent upon congressional approval, the U. S. share in the $8,800,000,000 fund would be $2,750,000,000, and its contribution to the $10,000,000,000 world bank would be about $3,000,000,000.

BEEF:
July High

Because of smaller shipments and stiffening market competition, prime long-fed steers came into increasing demand, with buyers at the Chicago yards paying $17.65 per hundredweight for choice cattle, the highest price for July since 1919, and peak for any month since April, 1943.

This year's July top compared with $17.10 paid in 1943; $15.85 in 1942, and $13 in 1941. Highest July sale on record was the $18.75 in 1918.

The majority of steers and yearlings also shared in the price advance, with top heifers rising to $17.35 to equal the highest July sale on record, and the best return since August, 1920.

GI READING:
Politics Permitted

Even as the army expanded the list of magazines permitted to circulate among GIs to 189, Sen. Robert Taft (Ohio) pressed for a relaxation of regulations designed to curb the distribution of political literature in the services.

Declaring that an amendment to the Hatch act only forbid the circulation of government printed material to soldiers, Taft said it did not prevent the transmission of any political literature to troops if sent by individuals, corporations or political parties at their own expense.

In expanding the list of magazines whigh might circulate among GIs regardless of the political material they may possess, the army said it based its action on studies of soldiers' reading habits abroad and purchases at posts at home.

Home Front

Tobacco

Because cigarette manufacturers have only about one year's stocks of tobacco on hand, and a recent War Food administration order restricted their purchase of 1944 flue-cured tobacco for aging to 70 per cent of the amount they processed last year, smokers may continue to feel the pinch of short supplies.

Iron Ore

During the first six months of 1944, lower Great Lakes blast furnaces consumed 44,290,320 tons of iron ore, approximately 198,000 tons more than the previous record set last year. As of July 1, stock piles on U. S. and Canadian docks totaled 26,655,414 tons, about 550,000 more than at the same date in 1943.

Oil

U. S. oil production soared to 4,602,350 barrels a day during the week ended July 15, increasing about 500,000 over the same period last year. As of the same date, gas stocks stood at 82,252,000 barrels compared with 75,391,000 in 1943.

RAIL FINANCE:
Big Deal

In one of the railroads' biggest financing deals in years, the Great Northern considered plans for calling in $119,887,700 of bonds and notes, to further cut fixed interest charges to about $10,000,000 yearly, compared with $12,506,172 in 1943 and an average of $18,194,079 for the 1921-'31 period.

Under the Great Northern's tentative proposal, it would cover the redemption with the issuance of $100,000,000 of new general mortgage bonds, and the remainder from funds from its treasury. About $4,000,000 would be paid in premiums for calling in the old bonds and notes before maturity.

With the completion of the new financing, the Great Northern would then have an outstanding bonded debt of approximately $249,000,000, besides an additional amount of equipment trust certificates and conditional sales obligations.

MARSH HARES

Gov. James H. Davis of Louisiana has signed house bill 675, thereby officially changing the name of muskrats to "marsh hares." The intention of the framers of the bill was to increase the sale of muskrat meat. The new name, it is hoped, will be attractive or at least neutral, in contrast to the somewhat repellant impressions conveyed by "musk" and "rat."

The flesh of the aquatic rodent is esteemed as a delicacy in Louisiana and where muskrats are common.

HIGHLIGHTS . . . *in the week's news*

AMERICAN DREYFUSS: Oberlin M. Carter, former U. S. army engineer who has been called the "American Dreyfuss" because of his long fight to clear himself of a court martial conviction, died in Chicago at 88. He was charged and convicted of defrauding the government of two million dollars in connection with a project in Savannah, Ga.

NO MORE POLYGAMY: The Navajo tribal council, elders of the Indian tribe of 50,000 living in New Mexico, Arizona and Utah, has formally banned plural marriages.

CHOLERA: An outbreak of cholera in India has resulted in 34,850 deaths in three months. Fatalities are largest in the districts of Muzzafarpur and Champaran, in north Bihar, official sources say.

DREW PEARSON

Washington, D. C.

ELECTORAL COLLEGE SQUABBLE

Those who have carefully dug into the history of the electoral college admit privately that Jim Farley's legal counsellors, who hatched the idea of electors disregarding the popular vote, did some smart thinking, not from the viewpoint of a fair election but in regard to historic precedent.

Most famous case in which the electors flouted the majority of voters was in the election of 1876 between Hayes and Tilden. But there have been other interesting and more recent cases, though they didn't upset a national election or attract much attention. For instance:

In the Teddy Roosevelt-Alton B. Parker election of 1904, Maryland cast seven electoral votes for Parker and only one for Roosevelt, though Roosevelt had the majority of the popular vote by the very slight margin of 109,497 to 109,446. . . . In the Taft-Bryan contest of 1908, Maryland electors again ignored the will of the people by voting 6 to 2 for Bryan, though Taft got a slight edge of the popular vote by 116,513 to 115,908. . . . California electors split their vote in the 1912 Wilson-Taft-Roosevelt fight by a 2 to 11 vote in the electoral college for no particular reason. Wilson ran second in the popular vote, with Roosevelt first, but two electors disregarded this and voted for Wilson anyway.

History is dotted with isolated cases where a few electors bolted the wishes of the people of their state and voted as they pleased. This, it must be admitted, was what the Constitution specified, though general custom has ruled otherwise.

In the McKinley-Bryan contest of 1896, one California elector plumped for Bryan, though the people of the state voted for McKinley. One Kentuckian did the same thing in the same election. . . . Michigan in 1892 saw only 9 of its electors vote for Benjamin Harrison and 5 for Grover Cleveland, though Harrison got the popular vote. . . . Ohio cast one electoral vote for Cleveland in the same election, though Harrison carried the state by a slender margin.

All of this background indicates why FDR's politicoes, though not admitting it publicly, are scrutinizing credentials carefully and are not at all happy about the electoral college threat in the South.

* * *

RED 'TIRE-TAPE'

Strange as it seems, American motorists soon will have a chance to buy German and Japanese tires. Behind this is a story of inexcusable government red tape and procrastination.

Inside fact is that, immediately after Pearl Harbor, U. S. officials began buying up all sorts of tires in South America, accumulating tires imported to Latin America from every part of the world, some of them five to twenty years old. Several hundred old Japanese and German tires were found among Brazilian stocks.

When these tires were originally imported into the United States, they were allocated largely for military use, some for lend-lease, some for government agencies.

Last November, however, synthetic tire manufacture was increasing and it was decided to sell a large number of these imported tires to civilians. Here came the first red-tape hitch. The tires had been purchased by the Rubber Development corporation, an FEA agency. But Rubber Development did not want to sell the tires to Defense Supplies corporation, a Jesse Jones agency, except at the price which it had originally paid in Brazil. This price, in order to get the tires away from Brazilians, had been high.

But Jesse Jones and his Defense Supplies corporation, being shrewd bargainers, didn't want to buy at that high price.

More Red Tape.

Finally, Rubber Director Col. Bradley Dewey stepped in to help cut the red tape. Rubber Development's high price was met. But then, more delays developed.

Finally, on February 28, 1944, Colonel Dewey signed a strongly worded directive demanding once again that the tires be turned over to civilian use. However, it was not until June, four months later, that the transfer to Defense Supplies corporation was finally completed.

Thus, seven whole months were wasted while the tires gathered dust.

POLITICAL CHAFF

It wasn't what the governor of North Carolina said to the governor of South Carolina, but rather what several governors of North Carolina said to each other en route to Chicago. On the North Carolina Special were favorite son Governor Broughton, ex-Gov. O. Max Gardner, and ex-Gov. John Ehringhaus. . . . All came to the convention together, in addition to North Carolina's Lieut. Gov. R. L. Harris, ex-Speaker Will Smith, and ex-Congressman Frank Hancock.

Walter Winchell

(WNU Service)

The Private Papers Of a Cub Reporter

A visiting movie star was asked which man she would enjoy meeting most . . . To the amazement of the interviewers, she said: "Albert Einstein" . . . The noted scientist was lecturing in Manhattan and he agreed to see her . . . With the scribes scribing and the flashlight bulbs bulbing, the star in an awed voice said, "It's a thrill to think that I am talking to the one man who knows more about the stars than any other living person."

"Not quite," replied Einstein. "No one can predict what a star will do—to get her name in the papers."

They tell the one about the colonel, speaking at a dinner in his honor before embarking for Africa . . . "I thank you," he concluded, "for your kind wishes regarding my welfare, and I want you to know that when I am far away, surrounded by ugly, grinning savages, I shall always think of you."

Jackie Coogan, recently back from paratrooping in Burma and India, said that his Burma Glider group landed near a small tribal village 150 miles back of the Jap lines . . . Having the assignment to construct an airport in less than 12 hours, Coogan called over a Thugee (native chief) and asked that he parade the villagers that he wished to recruit as workers.

Hundreds of them were girls wearing very little. One, however, was better groomed than the others . . . Draped to her ankles was a huge towel with the words: "Mayflower Hotel, Washington, D. C."

At an airport the other day, a dejected sailor sat waiting for hours. He appeared so depressed a sympathetic bystander asked him what the trouble was . . . He said he had just come in from the South Pacific for a four-day furloaf. His home was an hour and a half away by air . . . He had just been put off one plane in favor of a higher priority . . . He hadn't been home in two years. His father had died in the meantime, and every hour now seemed an eternity . . . But what really got him down, he added, was that two planes had left for his home burg but couldn't find room for him —despite the fact that the last person to board the plane was a civilian —carrying a golf bag!

When Norway was invaded civilian Germans fled Sweden because they expected that country to be invaded next . . . A German who had been buying up dollars at half the price took a train one night from Stockholm. His suitcase contained about one million dollars in small and large bills . . . He knew he could not get by Swedish customs with it, and that even if he did, the Gestapo would catch up with him in Germany . . . Not long after midnight the train stopped at a small station. The German hurried out with his valise, found a dark spot near a tree, buried his treasure, took careful note of the spot and boarded the train . . . Thru his window he made a note of a sign on a door (on the side of the depot) . . . It said KVINNOR . . . A few weeks ago he got permission to return to Sweden. At the station he showed the ticket seller the memo of the name he had copied down. The ticket seller's eyebrows jumped high and then he grinned . . . KVINNOR in Swedish means WOMEN . . . The frantic dope is now traveling all over central Sweden at night, hoping to find the right depot, not knowing that even if he is that lucky, the Swedish authorities are waiting for him.

This is how Russia whipped its Black Market . . . In Russia the soldiers get additional pay for each battle they are in, and not having anywhere to spend it, they send it home. The kinfolk are making more money than usual (in spite of what you hear), and all this is why Russia now has too much surplus coin, as well as a Black Market which gets 40 rubles for nylons and 50 for a bottle of Scotch . . . The Soviet gov't, being realistic about it, decided to go into the Black Market racket, so now they have gov't-owned stores in all communities . . . They are called: Government-Owned Black Market Stores" (or whatever the Russian is for that), and any citizen can shop in them . . . In this way, the gov't gets back all that surplus money . . . And keeps the citizens honest at the same time . . . Over here surplus money is being enjoyed only by the "mobs," who keep it all since they rarely pay taxes.

Marine 1st Lieut. Mitchell Paige (just returned after 26 months in the S. Pacific), one of two living enlisted Marines in this war to hold the Congressional Medal of Honor, has the unique distinction of being the only infantryman in this war to be grounded! . . . Wearied by the comparative "inactivity" of a forward training camp in New Guinea (following the Guadalcanal campaign), Paige "stole" a ride on a B-25 scheduled to bomb Rabaul . . . The hero was then "grounded" for the duration.

Guard's 154th Birthday Finds It Fighting Axis Seven Seas, in Addition to Peacetime Duties

Originated n. of Treasury ck Smuggling

er he took over direc- e treasury in George on's cabinet, Alexander discovered that the nt was losing a lot of eded revenue because sk smuggling that was along the coast. Ac- he told the President ething would have to Washington brought er to the attention of and that body, acting arkable celerity, pro- nds for the establish- the Revenue Cutter So it was that on August he U. S. coast guard . The service is cele- its 154th anniversary . It has the longest rec- the nation's sea forces, aken part in every war Revolution.

post - Revolutionary days perated a handful of tiny tters concentrating on the of import duties for the ublic, the coast guard has in scope of its activities e until today it has more 000 officers and enlisted is fighting the Axis all world.

, the Tariff Act of 1790 uthorized the building of ue cutters to insure the of customs. But our fathers realized that this might prove valuable as a nit. So it was decided to the men and ships on a basis. President Washing- missioned Hopley Heaton of pshire "to command a cut- e service of the United

ndred and fifty-four years st guard vessels are operat- art of the navy, sweeping of enemy subs, and coast nding craft are spear-head- asions, putting marines the South Pacific and the France. The coast guard ded the fondest hopes of its

e military usefulness of the ard, which has reached a his war, was apparent soon organization. In 1797, n ships bound for England zed and boarded by priva- French vessels, operating t blessing of the Revolution- rnment of France.

ght French Privateers.

in 1799, the U. S. navy was rganized and new ships were to aid the cutters in their gainst the French. But it is ng to note that of the 22 ptured, 18 were taken by t guard, which also assisted apture of two more.

undeclared war against aw the establishment of the t of transferring the coast om the treasury department avy in time of war. Ever s date, the alert, trim, fight- st guard cutters and men ned the navy by presiden- lamation on the outbreak of es.

peace with France was re- n 1801, the cutters were re- to the treasury department n economy measure by the essed government several ecommissioned. But when,

EXPERTLY handling their landing craft, coast guardsmen bring a barge loaded with soldiers to shore through the treacherous surf of the South Pacific. This boat was swamped, but the crew managed to land the troops entrusted to their care.

during the coming years, fears of a war with England caused anxious naval authorities to survey our naval strength, additional cutters were authorized and built, all of which served with distinction in the War of 1812.

The Civil war wrought havoc with the revenue cutter service, although all its vessels fought on the side of the Union. Trained crews and officers, torn between divided loyalties, left the service to join their respective sides. To fill the places of these men, having decades of service and experience, relaxed standards made possible the admission of some unfit, morally and mentally, and soon after the war a complete reorganization of the service was necessary. And this reorganization was thorough.

New ships were constructed and in 1876 an academy was established to train officers. Although at first the academy was merely a barkentine, "The Dobbin," anchored off New Bedford and later the "Chase" at Baltimore, no move did more to establish the "esprit de corps" of the coast guard, retain and pass on its traditions and raise the service to the high standards of unity that it has achieved today. The present coast guard academy at New London, Conn., compares favorably with Annapolis and West Point.

Police Duty in Alaska.

Meanwhile the service was entrusted with new duties, while its old functions were enlarged with the growth of the nation. The acquisition of Alaska was an important event for the coast guard, for to it was given the obligation of enforcing law and order in the territory. When the Japs invaded the Aleutian Islands, the decades of experience of the coast guard in the wild unpredictable waters of the Arctic is bearing fruit.

In 1915 the coast guard was merged with the life saving service and for the first time the name "COAST GUARD" was officially recognized. The merger of these two units was a logical development, for the cutter and life saving units were both branches of the treasury department and had operated closely for many years. The lighthouse division was not made an official member of the coast guard "family" until 1939.

World War I found the coast guard, as usual, ready for anything. A terse presidential message "Plan One . . . Acknowledge," transferred the coast guard ships and personnel into the navy for the duration. Coast guard officers were assigned to duty at naval stations and on naval ships throughout the world with many being given command posts. The cutters as usual were placed in convoy and escort service.

The period following the Armistice saw the construction of the modern coast guard fleet. New Diesel and steam cutters were designed and built. Smaller, fast, patrol boats were developed. New equipment was installed on shore stations. Air power was made a vital part of the coast guard with the construction of bases on the Atlantic and Pacific. A fleet of planes of the newest design were assigned to the service and so coast guard aviation, long a cherished dream, was a reality.

When the country thinks of coast guard law enforcement, it usually associates it with Prohibition. Although the coast guard was given the unpopular job of enforcing that unfortunate act it managed to make the best of it In fact through Prohibition the coast guard developed a valuable intelligence unit which today serves the cause of national defense as part of the naval intelligence. But prohibition was only one of the law-enforcing jobs of the versatile coast guard. The Narcotics, Oil Pollution, Whaling and Alien Smuggling are just a few of the marine laws enforced by the nation's maritime police force.

But greatest of all the hundred fifty-four years of the coast guard history has been this great global war that will rid the world of tyrrany and oppression. Three of the guard's cutters made naval history by signal success against the submarine. First it was the Campbell, which in 12 hours of gruelling action depth-bombed five enemy U-boats and shelled, rammed and sank a sixth in a running battle while guarding a convoy. Then followed the Icarus, 165 feet of fighting fury, which sank a U-boat off the Carolina coast and took 33 prisoners. The Spencer, sister ship of the Campbell, reached her peak of glory by sinking a sub stalking a convoy.

RELAXING with a bit of nonsense, a coast guardsman on Saipan dolls up in Japanese garments. He is garbed in a silk kimono and brocaded obi. He shades himself with a fancy parasol while he takes aim at a parakeet with a Jap machine gun.

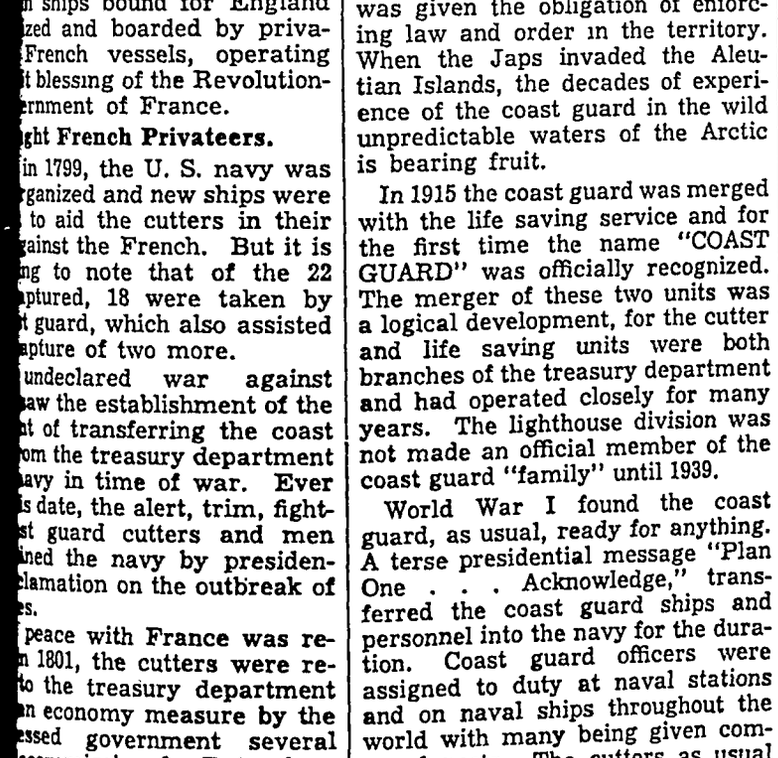
Beach Patrol.

The famed beach patrol reached its heights with the capture, conviction and elimination of the sub-landed, would-be saboteurs who were trapped by an alert coast guardsman on Long Island's desolate shores. On guard against other landings coast guard dogs and horse patrols now are ready to give any intruder a warm reception. The port security force, a similar unit, protects piers and harbors.

This war has seen the full development of coast guard aviation. Where once coast guard fliers flew in bad weather on many an errand of mercy, they now skim over the vast expanses of the ocean acting as air umbrellas for victory convoys, on constant alert for lurking subs. To the fleet of flying boats of peacetime have been added the deadly "Kingfishers," sleek, trim planes flown by the same experienced men who fly in any weather, under any conditions.

One more new branch of the service is the SPARS, the women's reserve of the coast guard, aimed at replacing coast guardsmen on shore stations throughout the country. SPAR officers train at the academy at New London and enlisted personnel at the new training school at Palm Beach, Fla. Over 7,000 SPARS are now on duty but by the end of the year 9,000 will be wearing the coast guard blue.

So, whether in peace or war, the coast guard's greatest pride is to live faithful to its motto, "Semper Paratus," "Always Ready." And coastguardsmen are always ready—to save lives, patrol beaches, capture smugglers, watch for icebergs, or fight the enemies of their country.



EWMEN on a coast guard cutter assigned to rescue work in glish channel keep anxious watch as they scan the choppy waters diers who were tossed into the sea when their invasion barge was This flotilla of cutters saved hundreds of men during the D-Day

t guardsmen landed the ma- at Tulagi. They were under Guadalcanal. They were in again at Tarawa. They d landing barges storming the s of Cape Gloucester and inville, Kwajalein and Eniwe- the Marshalls, Hollandia and and Biak in the invasion of New Guinea.

recently, when navy task moved against Saipan in the as, coast guardsmen operated assault transports and tank landing ships, and coxswains and gun crews were at their posts in the LCVPs that swarmed to the Saipan beaches.

On the other side of the world, coast guardsmen landed 'em in North Africa, on Sicily and at bloody Salerno. On D-Day when the Liberation Armada swept across the English channel to breach Hitler's vaunted Festung Europa in Normandy, coast guardsmen were under the terrific Nazi fire that made a literal hell of the beach. Coast guard crews operated transports, LSTs, LCIs and landing barges in those heavily mined waters. A flotilla of coast guard 83-footers—dubbed "match boxes"—boldly and tirelessly poked amidst wreckage and mines to save the lives of more than 800 American and Allied soldiers and sailors in the first 24 hours of invasion under heavy shell-fire from German shore implacements.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

THE PRIEST IN THE LIFE OF ISRAEL

LESSON TEXT—I Samuel 2:27-30, 35; 4: 12-18.

GOLDEN TEXT—For every high priest taken from among men is ordained for men in things pertaining to God.—Hebrews 5:1.

Failure to observe God's law inevitably brings disaster. That is true in the family, and in the nation. It follows even though the man who sins is in a high and favored position in God's service.

Our lesson which brings before us the work of the priest in Israel also reminds us of the sacred relationship of father and son. These are important matters inviting our careful study.

1. A Holy Calling: (2:27, 28).

Eli was the high priest in Israel, an office ordained of God, and by Him established in the household of Aaron. The priest was to stand between God and man, there to seek His forgiveness for the sins of the people, and His grace and mercy upon them. He was to teach them the law of God and to seek for them divine guidance. He was subject to special laws, and had great privileges of service.

Such a man must not only be holy himself, but unusually diligent about properly rearing his sons who would follow him in this office, which was by God's ordinance an hereditary one. He had to be both a good minister and a good father. Eli was the former, but he failed as a father.

In the New Testament, Christ becomes our High Priest (Heb. 7:26; 9:11), and those who minister for Him are to bring men to Him—the "one Mediator between God and Man" (I Tim. 2:5; Heb. 9:15). In this new covenant the minister has a high and holy calling, but it also is made clear that all believers have the liberty to come boldly to the throne of grace (Heb. 4:16); hence they too are called "a holy priesthood" (I Pet. 2:5).

II. A High Responsibility (2:29, 30, 35).

As already suggested, Eli was evidently a man of personal piety and integrity in office. We honor him for that, but we regret his failure to properly rear his sons who were to succeed him.

It is not enough to meet one phase of our responsibility before God and then, because of our faithfulness there to seek to justify weakness elsewhere. One sometimes hears the expression, "But he is such a good man," as an excuse for failure, but it just will not do.

Eli did remonstrate with his boys, but he waited until it was too late—or did it in such a way and at such a time as to be ineffective. His failure at this point is declared (v. 29) to be a placing of his sons above God in his thinking.

What a solemn warning to indulgent parents! "Not to rule and restrain our children, to give them their own way, is to honor them more than God. Ere we think it, weakness becomes wickedness in ourselves and in our children too." God has "made every parent . . . a king in his home, that he may . . . command his children in the way of the Lord" (Andrew Murray).

God will not permit such sin and failure to pass unnoticed. He will set aside those who fail Him (v. 30) and bring them into judgment. He has others who are willing to serve Him (v. 35). Evidently young Samuel was the one in mind here.

It is both significant and encouraging to note that in the midst of the wicked and immoral surroundings created by Eli's sons, God had the tender vine of His own planting—the life of the boy Samuel, growing up in the temple. He was already hearing God's voice and learning to obey the call.

III. A Heavy Judgment (4:12-18).

The Israelites went out to battle against the Philistines. Meeting defeat, they thought to gain victory by bringing the ark of the covenant into battle, and who had the effrontery to appear as "priests" with the ark but the wicked sons of Eli.

Swift and awful was the judgment of God. Not only was there defeat, but the ark was lost to the heathen Philistines, and the two sons of Eli were killed. When Eli heard the news of what had taken place, he too fell and died. Here was the tragic end of a life that had begun with promise, and all because of weakness, failure and sin.

There is a pointed lesson here for us. The people of Israel depended on the ark itself, an outward symbol of godliness, when there was no spiritual life in the heart—and they went down to failure. Will we go through the motions of religious exercises, talk easily of prayer, appoint men who please our itching ears (II Tim. 4:3) to preach to us, and then go on our careless, worldly, indifferent way, supposing that our formal religion will save us? Paul tells us in II Timothy 3:1-5 that "having a form of godliness but denying the power thereof" is a sign of the "last days," of "perilous times" which have come upon us. May God save us!

PATTERNS
SEWING CIRCLE

Crisp House Frock

THE youthful capped sleeves with their romantic little ruffled trim—the slim, sleek lines of the front—the trim buttoned back and the big tie-bow all add up to as neat a bit of house dress charm as you've ever encountered!

ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE

Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined in two ways: 1. Scrapings were taken from the feet and examined by the bacteriologist. 2. Each subject was examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't compromise with this nasty, devilish, stubborn infection. Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

BIBLE SOCIETY ISSUES 7,901,450 COPIES IN 1943

Cincinnati, Ohio, —The American Bible Socity has statistics to prove that its product is still popular.

Last year the non-profit society recorded its greatest volume of business in its 128-year history. It sold or gave away 7,901,450 Bibles.

Of this number, 2,645,879 were given to members of the armed forces, while 50,000 were put on life rafts that men adrift on the sea might read them.

George Bruce Cameron, local representative of the society, looks forward to an even busier time in the postwar era, for he says it will take years to catch up with Europe's depleted Bible supply.

The society has set up a Bible press in Sweden, where it will print Bibles in the various languages of the oppressed people of Europe.

Poor drainage in Webster County last year is estimated to have reduced he corn yield 4000,000 bu., oats 50,000 and soybeans 20,000.

GIVES RULES ON CHRISTMAS GIFT TO SERVICE MEN

Postmaster Says Parcels Must Be Mailed Sept. 15 To Oct. 15

Christmas gifts for members of the armed forces overseas must be mailed between Sept. 15 and Oct. 15.

In order that Christmas parcels may reach the addresses on time and in good condition, arrangements have been made by the post-office department in co-operation with the war and navy departments for handling such packages.

No requests from addressees are required in connection with Christmas parcels mailed to army personnel during this period, the postmaster said. Senders must label each package "Christmas parcel", however. Special effort will be made to insure delivery of such packages before Christmas.

Christmas parcels must not exceed the present limits on overseas packages of 5 lbs. in weight or 15 inches in lenght or 36 inches in length and girth combined. Not more than 1 Christmas package will be accepted for mailing in any 1 week from sender to the same soldier or sailor.

All packages must be packed in boxes of metal, wood, solid fiberboard or strong double-faced corrugated fiberboard reinfroced wtih gummed paper tape or tied with strong twine—or both. It is recommended that fiberboard boxes be wrapped in heavy paper. Addresses must be legible, complete, and written in ink or typed.

No perishable items may be sent, and the mailing of fragile articles is discouraged. Intoxicants, inflammable materials (including matches and lighter fluid), poisons and any item which may kill or injure another or damage the mails are absolutely prohibited.

Postage must be fully prepaid. Senders are advised to send Christmas greeting cards by 1st-class mail, although they may be sent 3rd-class if unsealed. Mail sent 3rd-class is not returable, however.

No packages addressed to members of the army or other persons receiving mail through A.P.O.'s overseas can be insured or sent C.O.D. Mail for navy, marine corps or coast guard personnel may be insured or registered if it conforms to existing requirements as to weight and size.

The postoffice department recommends money orders as Christmas gifts, since at many places where U. S. troops are stationed there are prohibitions against the importation of U. S. currency. However, domestic money orders can be cashed at A.P.O.'s wherever they are located, and they are paid in foreign currency at the prevailing rate of exchange.

MAIL CHRITMAS PARCELS NOW TO WAR PRISONERS

May Be Mailed Only By Next Of Kin, Red Cross Ruling

Christmas parcels for prisoners of war in the European area should be mailed immedately to insure their arrival by the holiday season.

Parcels may be mailed only by next of kin of prisoners, and must bear the label issued by the war department. Such labels are issued every 60 days, and there will be no special Christmas package label this year.

The Red Cross Christmas package, now being made up in packaging centers, includes turkey, plum pudding, sausages, butter, deviled ham, cheddar cheese, bouillion cubes, tea, honey, strawberry jam, mixed salted nuts fruit bars, dates, diced pineapple, chewing gum, playing cards, smoking tobacco, a pipe, cigarets, a game and a washcloth.

Shipment will be made in time and in sufficient quanity to provide each prisoner and civilian internee in Europe with a holiday box, officials said. The Red Cross package will be given prisoners in addition to Christmas boxes sent them by their family, it was explained.

MERLE L. SCHAEFER COMMENDED FOR SERVICE IN PACIFIC

Merle LeRoy Schaefer, AMM 1|c, son of Mr. and Mrs. Roy I. Schaefer of Klemme, has received commendation from Admiral Jones for service performed in the Pacific war. Merle, with patrol squadron 53, participated in the bombing of Taroa May 13 and 18.

The remarks of the squadron commander, D. Perry, jr., regarding him are as follows: "During period of this cruise (Nov. '43-June '44) this man has participated in the Gilbert Islands campaign and the Marshall Islands campaign. He has taken part in night harassment bombing operations, A|S patrols during the day and night air rescue work. He further participated in the rescue of the thirteen pilots who went down at sea early in 1944."

LITTLE "CITY HICKS"

Tomorrow they will emerge into a world of miracles! Right now they are the children of America busy at war. Ration stamps, War Bonds, fathers and brothers in the armed forces ... these things, for the moment, are more important than their pleasures and pastimes.

Many of these little "city hicks" have never seen a farm ... never ridden on a load of fresh-mown hay. It's not much fun to travel now. But tomorrow they'll zip down to Uncle Bill's farm ... any time ... in sleek, new, even more comfortably appointed post-war Rock Island ROCKETS.

Today's children will bask in a brighter, more beautiful America ... tomorrow ... when our nation, the war won, resumes its march of progress in the building of the peace.

PFC. WALTER KLOTZBACH WOUNDED IN BATTLE

Tuesday afternoon Mr. and Mrs. Levi Klotzbach received a telegram from the War Department notifying them that their son, Pfc. Walter Klotzbach was slightly wounded while in action in France. The War Department further stated that they would report on the progress of Waler's injuries.

Pfc. Klotzbach is a graduate of the Klemme High School. He entered the service on June 20, 1942 and has been over-seas 22 months. He has seen service in North Africa, Tunisia, Cicily, and Italy. He was in England a few months before "D-Day" and was in on the invasion of Normandy.

The last letter the Klotzbach's had received from Walter was written July 14th and he stated that he was then in France.

KLEMME YOUTH GETS PURPLE HEART MEDAL

PFC. KERMIT V. SMITH RECOVERING FROM WOUNDS

Klemme Youth Awarded Purple Heart Now In England

The following V-Mail letter was received Monday by Mr. and Mrs. Matt Smith from their son, Pfc. Kermit Smith, who was wounded in Normandy:

Dear Mom, Dad and Ruth:

How is everyone at home? I'm fine and out of the hospital now. You'll notice my change of address, however, I'm still in England and no doubt will be for a while.

The mail has failed to catch me. So, for that reason, don't have much of a base to write from. You can look for a package soon as I've sent the Purple Heart Medal of Merit to you.

My hand turned out quite well, and is almost as good as ever. I am quite sure of getting back with my old outfit, which I'd much rather do than go into some new compay.

What do you think of the war situation? It's looking quite a lot brighter, don't you think so? Guess a lot of people will be made happy when the whole thing is over.

Must close for today, will drop you a line as soon as I'm settled permanently. Love,

Kermit.

UNITED SERVICE WOMEN MET AT HENRY JOST HOME

The United Service Women's Unit met Wednesday afternoon of last week at the H. F. Jost home with 9 members and 2 visitors present.

After the regular meeting 2 new members joined.

The Unit plans to put on a rummage sale about Oct. 1st and are making plans for a Service quilt to be given away at that time. They will also serve coffee and doughnuts.

The afternoon was spent working on a lap robe for the Veterans.

Lunch was served.

HELLO, FOLKS!

Mr. and Mrs. Reno Harms are the proud parents of a 7½ pound baby boy born to them on Monday, August 14, 1944. They now have a family of two boys and one girl. The Harms family live in the tenant house on the Bellamy farm. Miss Grace Harms of Belmond is helping with housework and caring for the new baby.

Mr. and Mrs. Paul Lauen are the parents of a baby girl born to them at the Belmond Hospital. They now have a boy and a girl in their family. The Lauens live 8 miles south-east of Klemme.

Mr. and Mrs. Elmer Bier are the parents of a baby boy born to them at their home in Liberty township on Saturday morning, Aug. 12th.

DECORATED

CAPTAIN GLENN BOWLES

Capt. Glenn (Bodge) Bowles, son of Mr. and Mrs. Glenn Bowles of Indionola, Iowa, received a citation and a Bronze Star for meritorious achievement on the Italian front, according to a letter received by his parents.

Before entering the armed services, "Bodge" Bowles was athletic director and typing teacher in the Klemme High School. He entered the army in May 1941.

The award was given Captain Bowles, former star Simpson college basketball player, for risking his life to put out a fire in an ammunition dump, established to supply his command. The citation reads as follows:

"On May 8, 1944, Captain Glenn Bowles discovered a fire in the regimental ammunition dump where approximately 40 tons of ammunition was stored.

"Realizing the imminent danger of an explosion and without regard to his own safety, Captain Bowles unhesitatingly grabbed some of the burning ammunition and then extinguished the fire although several explosions occured while he was doing so.

"Although suffering from several burns, Captain Bowles refused medical attention until the fire was completely extinguished. This heroic achievement of Captain Bowles is in keeping with the high tradition of the armed service."

Capt. Bowles has been overseas since November, 1943, when he was assigned for duty in North Africa. He left for Italy in Feburary this year and fought on the Cassino front.

A note of humor was injected into a couple of letters recently received, one from Captain Bowles to his parents, and a second from his brother, Sergt. George Bowles, radar man in the communications service in Italy, to his sister, Mrs. Lewis Blake.

Captain Bowles was in a tough battle and he wrote that he was wondering about George. A few minutes later he happened to glance behind him and there was George who, he said, had no business up on the firing line.

"I impolitely escorted him to the rear," Bodge told his parents in a letter.

FARMER AND SON BOTH INJURED IN HAY BALER

Last week Friday Walt Greiman, son of Ben F. Greiman, was injured in a hay baler he was operating.

The gasoline motor on the machine caught afire and Walt tried to extinguish the blaze and in doing so caught his hand between a V-belt drive and the pulley, mangling two fingers severely.

Saturday Ben F. Greiman suffered three broken bones in his left foot while working on the machine. Mr. Greiman was standing on the machine when he slipped and his left foot was caught by the needle of the machine which crushed his foot against the frame of the baler, breaking three bones in his foot.

Both father and son are at home and making a good recovery from their accidents.

KLEMME FARM INJURED IN RUNAWAY SATURDAY

John Pannhoff, farmer living northeast of Klemme, suffered a fractured leg Saturday when his team became unruly and ran away, throwing him out of the wagon.

Mr. Pannhoff was taken to the hospital at Mason City for treatment.

CITATIONS FOR KLEMME SOLDIERS

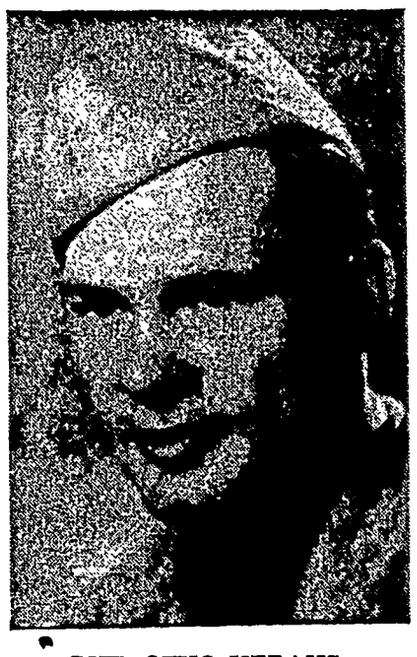
15TH AAF IN ITALY,—2nd Lt. Earl F. Rietz, ward of Mrs. Mary E. Church, R. F. D. No. 1, Klemme, Iowa, bombardier of the B-24 Liberator, "Patsy Jack", has flown 25 missions in the Mediterranean theater, including major attacks on enemy aircraft factories, oil refineries and other strategic targets in Rumania, Austria, Germany, Italy and France.

Lt. Rietz came overseas last January. He holds the Air Medal and two Bronze Oak Leaf Clusters for "meritorious achievement in aerial flight while participating in sustained operational activities against the enemy."

Lt. Rietz received his commission at Deming, N. M., on July 7, 1943. Lt. Rietz graduated from Klemme high school in June 1937.

15TH ARMY AIR FORCE, —Private Otho K. Keraus, Klemme, Iowa, is a Armorer in a 15th AAF P-47 Thunderbolt fighter group in Italy which has been awarded two Distinguished Unit Citations. These awards are the highest military honors which can be presented to a unit.

The first citation was awarded for a mission over the Island of Sardinia on July 30, 1943, during which 20 planes of the group destroyed 21 enemy aircraft. The second citation was awarded in recognition of the feat of destroying 37 enemy planes in the Villaorba, Italy, area on January 30, 1944, the greatest single aerial victory of the Italian campaign. Both citations honor the high quality of the combined efforts of all ground and flying personnel in the preparation, planning, and execution of the two missions.



PVT. OTHO KERAUS

15TH ARMY AIR FORCE, —Master Sergeant Donald O. Turgasen, Klemme, Iowa, is a Communications Chief in a 15th AAF P-47 Thunderbolt fighter group in Italy which has been awarded two Distinguished Unit Citations. These awards are the highest military honors which can be presented to a unit.

The first citation was awarded for a mission over the Island of Sardinia on July 30, 1943, during which 20 planes of the group destroyed 21 enemy aircraft. The second citation was awarded in recognition of the feat of destroying 37 enemy planes in the Villaorba, Italy, area on January 30, 1944, the greatest single aerial victory of the Italian campaign. Both citations honor the high quality of the combined efforts of all ground and flying personnel in the preparation, planning and execution of the two missions.

BIRTHDAY DINNER AT R. A. JORGENSON HOME SUNDAY

A birthday dinner was held at the R. A. Jorgenson home Sunday in honor of Mrs. Bessie Starboard and Joe Liebendorfer of Hampton, and Mrs. Ray A. Jorgenson, Jr. and daughter Maryl Judy of Dodge City, Kansas, who have birthdays in August. Others present besides the above were Mr. and Mrs. Lyle Liebendorfer of Forest City, Mrs. Joe Liebendorfer and Mr. and Mrs. R. A. Jorgenson. Mr. Liebendorfer's birthday was August 3; Mrs. Starboard's August 11; While Mrs. Ray Jorgenson's is August 19 and her daughter Judy's is August 24th. Mrs. Lylie Liebendorfer had baked a nice cake for the occasion, and the honored folks all received nice gifts.

Assistants will be selected by the superintendents. Entries and record books will be taken care of by Miss Roberta Noe. Weighing and tagging calves will be in charge of Mr. Clark Lackore.

The annual 4-H and F. F. A. baby beef sale will be staged at the Garner sales barn at 2:30 p. m. on August 22.

A night watchman will be hired to watch the livestock both nights and all boys will be expected to stay at home or wherever their parents arrange for them. No boys will stay at the barn.

Each exhibitor should bring his own feed, pans, halters, pails, forks feed, straw, hay, brushes, combs, etc. Swine showmen should have hand handles.

4-H GIRLS AND WOMENS PROJECTS AT ACHIEVEMENT SHOW, AUGUST 21 - 22

At the Opera House in Garner, August 21 and 22, the following schedule of events will be open to the public:

Exhibit of: Home Efficiency articles made by the club girls; Club Booth; Victory Garden Products.

The above exhibits will be on display from 11:00 a. m. Monday to 4:30 p. m. Tuesday.

Beginning at 1:30 Monday, club demonstration teams will demonstrate some of the practices learned and articles made by 4-H girls during the year.

Beginning at 1:30 Tuesday, the Home Project women will hold an Achievement Day Program..

Highlights of last year's program and a preview of the 1944-45 program will be given. Miss Louise M. Rosenfeld, head of the Women's Extension Service at Iowa State College, will give a talk.

Both rural and town people are invited to attend these events.

CHURCH MEETING HELD AT ALDEN MONDAY EVENING

A meeting was held Monday evening at the Evangelical and Reformed Church at Alden which was attended by the following from the Klemme Church:

Rev. Calvin Grosshuesch John Meinders, Emil Lau, Paul Stromer, John Kaduce, Jr., Herman Schmidt, Alvin Goll, Milvern Barz, Albert Schmidt.

BAPTIZED

Larry Merlin, infant son of Mr. and Mrs. Raymond Barz was baptized at the Klemme Evangelical and Reformed Church on Sunday morning, August 13, 1944, by Rev. Calvin Grosshuesch.

THREE PICNICS HELD IN PARK SUNDAY

KLEMME PARK FAVORITE SPOT FOR FAMILY PICNICS

Need For More Tables And Seats To Take Care Of More People

Three more family gatherings and picnic dinners were held in the Klemme Park Sunday. Most places around it was hot, but a nice cool breeze in the park made it a most comfortable place to eat and visit.

More tables and seats are needed to take care of the demand for the Sunday picnickers, and something should be done about it, so there will be ample room for everyone.

Following are the groups who enjoyed our Park Sunday:

Neubergers Have Picnic

Several of the Neuberger families and relationships held a picnic in honor of the August birthdays in the family Those thus honored were Mrs. Raymond Wille and Mrs. Walter Blumer.

Those who enjoyed a big picnic dinner together were: Mr. and Mrs. John Neuberger and daughters Ruth and Faye; Wm. Neuberger and family; Walter Blumer and family; Mr and Mrs. Merlin Neuberger and Dean; Mr. and Mrs. Raymond Wille; all of this community, and Mr. and Mrs. Walter Neuberger of near Thornton. Mr. and Mrs. Wm. Waddingham of Klemme were guests.

Born Family Has Picnic

Another picnic was being enjoyed in the Park Sunday by the Geo. Born family, who had gathered in honor of their friend, Mrs. Martha Dreier, of Milwaukee, Wis., who was in the community visiting.

Those present were Mr. and Mrs. George Born; Mr. and Mrs. Fred Nuehring; Mr and Mrs. Irwin Nuehring; Mr. and Mrs Earl Nuehring and son; Mr. and Mrs. George Thiemann; Mr. and Mrs. Raymond Barz and son; Mrs. Clara Barz and daughter, Avis; Miss Patricia Kudje; Pvt. Allen Barz of Madison, Wisconsin, and Mrs. Martha Dreier of Milwaukee, Wisconsin.

Friends Of Rukas Picnic Here

A group of friends of Mr. and Mrs. Earl Ruka, from Goodell and Belmond, enjoyed a picnic dinner in the Park Sunday in honor of Miss Mary Riley of St. Louis, Mo., who was here for a visit with the Ruka family.

Those present were Mr. and Mrs. Harold Nielson, Mr and Mrs. Harm Branner, Mr. and Mrs. Don Brannner and son, Mr. and Mrs. Walter Branner, Doris Michelson and June Branner, all of Belmond.

The following were from the Goodell community: Mr. and Mrs. Glen Avery, Mr. and Mrs. Roy Johnson, Cena Nielsen, and Mr. and Mrs. Gus Okrueg. Mr. and Mrs. Earl Ruka, Klemme, and Miss Mary Riley, St. Louis.

The group had attended the morning services at the Goodell U. B. Church where Rev. Harold R. Knight baptized Randall Lee, son of Mr. and Mrs. Don Branner, and grandson of Mr. and Mrs. Earl Ruka.

After church services they came to Klemme to enjoy a dinner together in the Park.

RURAL SCHOOLS WILL GATHER MILK WEED PODS THIS FALL

About 2,000 mesh bags, to be used in the milkweed pod program, arrived at the office of the County Superintendent last Saturday. The bags will be distributed from the central office to every school in the county, and every child in the rural schools who is big enough to collect pods.

To fill our quota we must average one bag full for every half section in the county.

Complete instructions on time to collect, how to dry, store, and dispose of the pods will be in the hands of teachers and pupils by the first week in September.

If the pupils and teachers enter into this with the same spirit and enthusiasm as in the scrap and the bond drives and sales, the program will succeed. We are assured cooperation from the Board of Supervisors.

—Chas. S. Whitney.

The Rooseveltian doctrine of "don't change horses in the middle of the stream" now applies only to one horse in the team.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for August 27

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

ISRAEL'S FIRST KING

LESSON TEXT—I Samuel 9:15-21; 10:25-27; 11:12-15.

GOLDEN TEXT—Honor all men. Love the brotherhood. Fear God. Honor the king. —I Peter 2:17.

"Well begun is half done," says the old proverb, reminding us of the importance of a good beginning. While it does not guarantee success (see next week's lesson), it is eminently desirable, and truly helpful.

Israel had foolishly tired of being a God-ruled nation and had begun to demand a king.

Samuel was directed of God to the man of His choice, Saul, in a very remarkable way. He entered upon his service as king as an obedient and earnest ruler. (Would God that he had continued in that way!)

We note a number of favorable elements which indicated the possibility of a successful reign. He was—

I. Wanted by the People (9:15, 16).

A ruler forced upon a nation is sure of opposition, but here the people were clamoring for a king to rule over them. The way was wide open to the interest and the affection of their hearts. Saul was just the type to please them. Physically he was head and shoulders above the people —a desired thing in a ruler (see 10:23). He was mentally fitted (10:25)—humble (9:21), spiritually right (10:6-9), tolerant and kindly (11:13), and a good military leader (ch. 11).

II. Chosen by God (9:17).

All these qualities commended Saul to God as well as to the people. In fact, he was God's choice. A man could not enter upon high office with any more auspicious token for good.

Observe that what looked like a purely chance visit to Samuel, when Saul was on business for his father, was the occasion for the making known of God's choice. Out of a simple experience in daily life came an event which changed his entire destiny.

III. Anointed by the Prophet (9:18-20).

The man of God's choice had met God's man, Samuel, who proceeded to instruct him, and to privately anoint him as king. It was a tender scene. The aged prophet, rejected by the people as God's ruler over them, quietly and sweetly obeyed God's command to anoint the young man to be king.

Public recognition, which came later, was important, but, with Saul as with every servant of the Lord, the personal anointing of God, in the hidden place of communion with Him, was the matter of highest importance.

IV. Humble in Attitude (9:21).

That pride, which was ultimately to be Saul's downfall, was beautifully absent at the beginning of his reign. Although of good family, and well-equipped, he saw himself as poor and insignificant, not ready for such an honor.

That is the right attitude for one who is to serve God. Pride and self-assurance do not befit the man who stands in the presence of the Almighty.

V. Guided by Principle (10:25).

Saul did not enter upon his office, new as it was to both him and to Israel, without a Constitution, that is, without principles of action. Samuel, the Lord's prophet, wrote down "the manner of the kingdom" in a book. How interesting, and how important.

Rulers who imagine themselves so wise that they need no controlling laws, and so powerful that the law may not question their decisions, are certainly not rulers after God's plan. Knowing the heart of man, his weakness and pride, God has provided true principles by which the ruler is to be guided, yes and controlled.

VI. Forgiving in Spirit (10:26-27; 11:12, 13).

Some "worthless fellows" despised Saul and would not recognize him as king. The urge of the flesh was to destroy them, and especially did that seem proper because of their worthless nature. But Saul, in true kingly spirit, said that there was to be no revenge, just rejoicing.

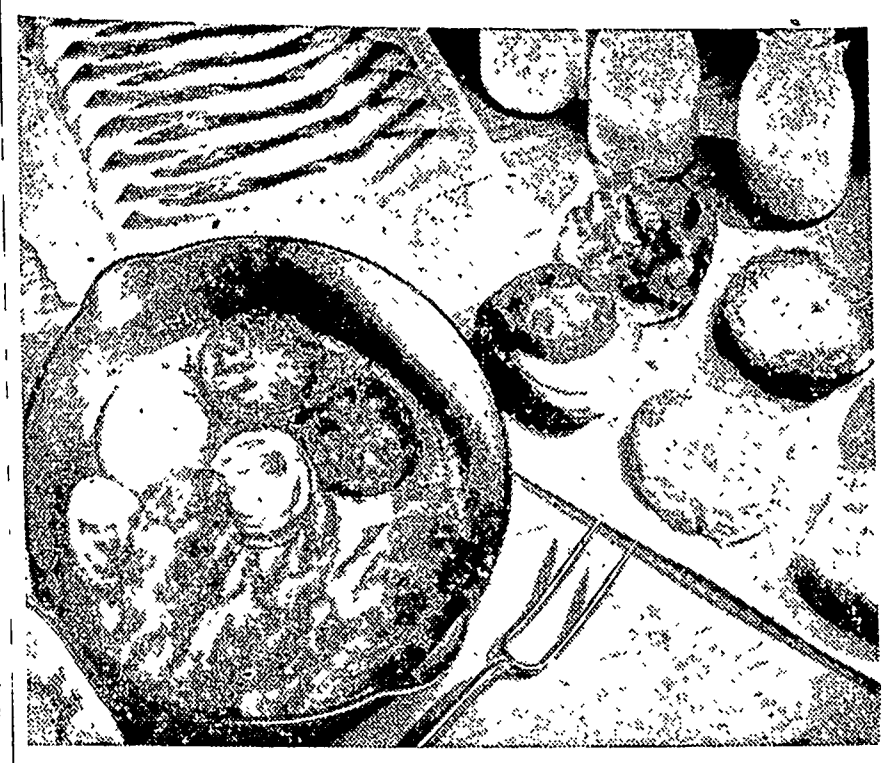
To be of the right spirit toward one's enemies is the hall mark of Christian character.

VII. Established in Office (11: 14, 15).

While there is the secret whisper of God in the heart, and the personal anointing by the Lord's servant, there should be the public recognition which establishes the Lord's servant in the eyes of all people. Saul had this at Gilgal. It placed him among the kings of the earth, and prepared the way for his dealing with other nations as well as with his own people.

Applying that truth to those who serve Christ, we say that there is upon the church the obligation to recognize God's call and anointing by giving that official recognition which sets the testimony and service of the individual free to exercise itself among men in general.

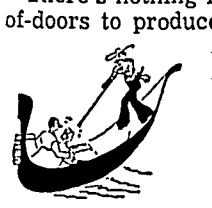
HOUSEHOLD MEMOS... by Lynn Chambers



Bacon Sandwiches Make Grand Outdoor Eating
(See Recipes Below)

Picnic Tips

There's nothing like the great out-of-doors to produce great appetites. And there's nothing that tastes so good as food eaten in the great wide spaces in sand, under the pines amid the smoke of a fire.



Our recipes and suggestions today are designed to fit those who want to do part of their cooking at home, and finish when they arrive at the picnic. It is easy to lay out a swell spread when everything is well organized and planned ahead.

You'll like the recipes because they're not fancy. They do make for some downright good eating, though, and will give you a grand experience in outdoors eating.

Food is best packed in hampers or tied in cloth. It's easiest to carry that way. If you have anything breakable, use a metal container.

Best Type of Fire.

For those of you who want to cook outdoors, use the trapper type of fire. Never start cooking until the wood has burned and is a bed of glowing red coals.

To make this type of fire, place 2 medium sized logs (green) 6 to 8 inches apart. Between these set up dry twigs and shavings. Carry something that will make the fire start easily, a bit of tissue paper with a few dry twigs. The logs can be adjusted to fit the cooking utensil.

Our recipe round-up starts with the favorite hamburgers. If you snuggle in the extra cheese, you'll like the flavor:

All-American Hamburgers.
(Serves 6)

1½ pounds hamburger
⅓ cup milk
1 teaspoon salt
Dash of pepper
¼ pound American cheese
4 tablespoons butter
6 buttered buns

Mix meat with milk, salt and pepper. Form 12 thin patties of the meat about 3 inches in diameter. Cut 6 slices of cheese slightly smaller than meat patties and place the cheese in between the meat patties, sandwich-fashion. Seal edges well. Melt butter in a skillet and fry the patties slowly for 10 to 15 minutes. Serve on toasted buns.

Hot Cheese Frankfurters.
(Serves 10)

20 frankfurters
20 slices of bacon
¾ pound sharp cheese

Split frankfurters lengthwise and fill with long strips of cheese. Wind a strip of bacon, spirally, around each frankfurter and fasten at ends with toothpicks. Toast on forks or long-handled toasters over fire until bacon is browned and cheese is melted. Place in a hot toasted roll and serve with relish.

Creamy Scrambled Eggs.
(Serves 6)

6 eggs
½ cup milk

Lynn Chambers' Picnic Menu

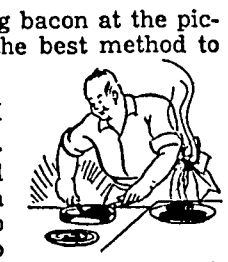
*Bacon Sandwich
*Roasted Corn Cherry Tomatoes
Cocoa
*Rocks Fresh Fruit
*Recipes Given

½ teaspoon salt
4 tablespoons butter
¾ cup diced American cheese if desired

Beat the eggs well. Add salt and pepper, if desired. Melt butter in heavy skillet and pour eggs into pan, stirring well as the mixture begins to thicken. When eggs are partially cooked, add cheese. Serve on toast when thick. Do not overcook.

Bacon is a grand outdoor appetite tempter. It is also an important concentrated source of food energy that you'll need after working hard outdoors.

If you are frying bacon at the picnic, then this is the best method to follow: Place the strips in a cold skillet over a low fire. Turn frequently until all parts of bacon are evenly crisp but not brittle. Do not let fat smoke. For extra crispiness, drain off the fat as the bacon cooks.



Bacon Sandwich.

To make delectable sandwiches, fry the bacon as directed above with thick slices of fried onion and tomatoes served on toasted buns.

Have you caught some fish? Nothing will taste better than a chowder made in a chowder kettle over a bed of coals:

Fish Chowder.
(Serves 6)

5 slices bacon, diced
3 medium onions, diced
2 pounds fresh fish, boned
2 teaspoons salt
1 teaspoon pepper
5 to 6 medium potatoes, sliced or diced
1 quart milk
4 tablespoons butter
2 tablespoons flour

Fry bacon and onion together until onion is light brown. Cut fish into small pieces and rub with salt and pepper. Add potatoes to chowder kettle. Cover with boiling water and cook 30 minutes. Blend flour with ½ cup milk. Add remaining milk to fish and stir in flour mixture. Add butter, simmering constantly. When mixture thickens, serve in soup bowls with crackers.

Like vegetables cooked outdoors? Then, here is one:

Roast Corn.

Use fresh sweet corn. Remove corn silk but leave husks on. Dip the ear, husk and all into a pail of water and lay on a grate over a hot bed of coals. The water turns into steam within the husk coating and thus cooks the corn, making it steamy and juicy instead of dry and tasteless. Corn may also be roasted by burying in the ashes.

Cookies and fruit make the ideal campfire dessert. Take cookies easy to carry such as:

Rocks.
(Makes 5 dozen)

1 cup shortening
1½ cups brown sugar
3 eggs
1 teaspoon cinnamon
¼ teaspoon cloves
3 cups sifted flour
1 teaspoon soda
1½ cups walnuts
2 cups raisins

Cream shortening and sugar. Add eggs and beat well. Add sifted dry ingredients, chopped nuts and raisins. Drop from spoon onto greased cookie sheet and bake in a moderate (350-degree) oven.

If you wish additional instruction for canning fruit or berries, write to Miss Lynn Chambers, 210 South Desplaines Street, Chicago 6, Illinois. Please enclose stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Lynn Says

Campfire Cozy: Make sure the drinking water is safe on your camping trip. Boiled water always is, sparkling water isn't necessarily.

A hole dug in the earth in the shade of the tree, lined with small stones makes a nice outdoor refrigerator. Moist caves, shallow underground streams, small drops or falls are all good "refrigerators."

Be sure to put your campfire out. Water is the best thing, soil next best.

A canoe paddle makes an excellent bread board or a checker board! Paint squares as for checkers and play with cookies or candies.

SEWING CIRCLE PATTERNS

Jiffy Play Set Is Simple to Make

Barbara Bell Pattern No. 1988 is designed for sizes 1, 2, 3, 4 and 5 years. Size 2, dress and bonnet, requires 1¾ yards of 35 or 39-inch material; 6 yards ric-rac trim.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.
530 South Wells St. Chicago

Enclose 20 cents in coins for each pattern desired.

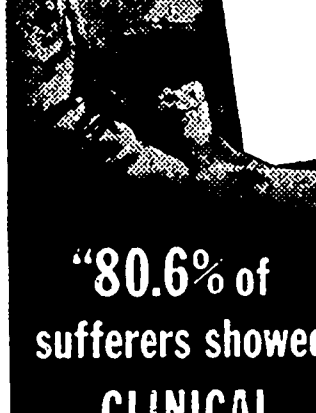
ATHLETE'S FOOT NEWS

"80.6% of sufferers showed CLINICAL IMPROVEMENT after only 10-day treatment with SORETONE



Foster D. Snell, Inc., well-known consulting chemists, have just completed a test with a group of men and women suffering from Athlete's Foot. These people were told to use Soretone. At the end of only a ten-day test period, their feet were examined in two ways: 1. Scrapings were taken from the feet and examined by the bacteriologist. 2. Each subject was examined by a physician. We quote from the report:

"After the use of Soretone according to the directions on the label for a period of only ten days, 80.6% of the cases showed clinical improvement of an infection which is most stubborn to control."

Improvements were shown in the symptoms of Athlete's Foot—the itching, burning, redness, etc. The report says:

"In our opinion Soretone is of very definite benefit in the treatment of this disease, which is commonly known as 'Athlete's Foot'."

So if Athlete's Foot troubles you, don't temporize with this nasty, devilish, stubborn infection. Get SORETONE! McKesson & Robbins, Inc., Bridgeport, Connecticut.

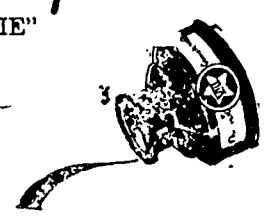
By "JERGIE"



THE RUBBER INDUSTRY

Americans who read of it could only be pleased by the announcement made recently by Colonel Bradley Dewey, head of the Office of Rubber Director, that the synthetic rubber industry in the United States has now reached the point where we can be independent of natural rubber production in alien lands Colonel Dewey stated that he has tendered his resignation and intends to return to private business on September 1 For the three months ending June 30, he declared, output was running at the rate of 836,000 tons per year against an average import of from 550,000 to 650,000 tons of crude rubber per year before the outbreak of the war. The only problem now he said is in the manufacture of heavy tires and the problem is due principally to the manpower shortage.

Colonel Dewey stated that since the Baruch report had recommended that "all controls and the war agencies administering these controls should be liquidated when no longer necessary" and this time had now arrived, he was therefore submitting his resignation. He added·

"I feel there is no reason to maintain further the broad powers that were given to the Rubber Director only because they were essential to the meeting of an emergency which now no longer exists Consequently I am recommending that the Office of Rubber Director be abolished priority powers incident to the allocation of rubber goods manufacturing industry may need . . . be given to a rubber division within the WPB.

After many false starts by its predecessors the present Office of Rubber Director has done a good job. The synthetic rubber industry has been set up. Now are we going to permit it to languish after the war is over so that the wealthy rubber interests in the Pacific may sell us natural crude rubber?

BOYS MUST RETURN TO BETTER AMERICA

Returning soldiers must find an America as good as, or even better than the one they left when they went overseas to war.

No. 1 on the list of "musts" for our fighting men is an opportunity to find and take a job they want, not have to work where they are told or accept the charity of Government support.

Back from the horror of oppression in Fascist Europe, our boys want to be able to turn their radios up loud and listen to whatever programs they hapen to like. They want magazines and newspapers to print news that is not colored by Government propaganda. They want this nation to be governed by law, not by man.

They want to find an America in which men, if they desire, can still criticize the Government to their heart's content. They want the right to tell the Government what ought to be done. They don't want the Government forever telling them what they have to do.

These boys want America back, with its freedom, its opportunity, it challenge and its reward. They want the chance to live their lives in liberty and in the pursuit of happiness as their forefathers have done.

That is what we must see that they get.

Some things are going on at home here that fill me with disquiet.

There are entirely too many persons in this country today who are making it their chief business to obtain big profits for themselves out of this war.

We see pressure groups trying to obtain for themselves privileged positions in the postwar era, actually at the expense of those who have been sent over-seas to fight for them and for all of us.

We see, also, in some places in the government itself, what appears to be efforts to build up powerful agencies and machines which, required perhaps during the war emergency, will be carried over into the postwar period. We realize of course, that power must be centralized in Washington and in the executive branch of the Government during the war emergency. But I am much disturbed to see, here and there, the constant effort to expand these powers beyond the emergency. And I say that such efforts, no matter by whom or with what laudible intentions they are made, can be carried on to an extent that would lose us here at home everything for which our millions of men and women are spilling their blood.—By Senator Arthur Capper of Kan.

OUR POSTWAR MILITARY STRENGTH

There was a reassuring note in the statement made by Congressman James A. Wadsworth, of New York, recently as he was leaving a conference with Gov. T Dewey at Albany. Representative Wadsworth said Governor Dewey agreed with him there must be no weakening of the United States military strength after the war is over. In part Mr. Wadsworth said: "We discussed generally having this country strong and kept strong after the war. We discussed it by contrast with 1920 and 1922, when we entered into a disarmament agreement, sank one-third of our navy, promised Japan that we would not fortify the Philippines, and made ourselves pretty nearly helpless to our great distress later on."

There is little question now that this disarmament conference was a mistake, because it was not taken seriously. The mistake was understandable. During the first World War we were told we were fighting a war to end end war, that this would be the last one, the dictator nations would be crushed forever and peace kept by some sort of a super-government. There was no partisanship in this belief. Democratic Senators went along with Republican Senators in ratifying the agreement. In the Democratic National Convention at Houston, Texas, the Democratics criticized the conference in their platform for not having made the disarmament more sweeping, taking in destroyers and other small craft as well as battleships.

We are now about to win another world war. Doubtless a great deal will be said to the effect that there will never be another one and we can rely with safety in the future on some sort of international police force. We do not believe that Uncle Sam will be fooled again. We know now that one generation by agreement cannot guarantee peace for the next generation. Of course we will go along with any sensible program to "outlaw war" and so far as possible postpone the outbreak of another. But we will not, unless we are completely off the beam, consent to the weakening our defense forces to the danger point.

It may also be said in passing that it will be a long time before Uncle Samm again is in a mood of appeasement sells scrap-iron to another potential enemy, or any other material which can be made into shells that can be fired against our boys. That too is unthinkable now. We learn by experience.

Pvt. Larry Miller sends us the following—a "cosmopolitan conversation" overheard when a soldier returned from overseas was trying to get service in a cafe:

Waitress· HAWAII, sir, you must be HUNGARY.

Soldier: Yes, SIAM, but I can't RUMANIA here long. VENICE lunch ready?

Waitress· I'll RUSSIA a table. What'll you HAVRE?

Soldier: Anything at all, but can't JAMAICA little speed?

Waitress: I don't think we can FIJI so fast, but ALASKA.

Soldier: Put a CUBA sugar in my JAVA.

Waitress: SWEEDEN it yourself, I'm only here to SERVIA.

Soldier: DENMARK my bill and call the BOSPHORUS He'll probably KENYA. I don't BOLIVIA know who I am

Waitress: No, and I don't CARRIBEAN, see! You ARARAT!

Boss: SOMOA your wisecrack What's got INDIA? Do you think this arguing ALPS business CANADA noise. SPAIN in the neck.—North English Record.

BERNICE FLOOD FILES $6,415 DAMAGE SUIT, RESULT OF CAR ACCIDENT

Bernice Flood has filed a damage suit against Henry A. Greiman in district court as a result of a car accident in Garner May 2, 1944. Plaintiff asks a total of $6,415.50 damages on two counts.

Plaintiff's petition states that after the car she was driving had already entered the intersection, a car owned by the defendant and driven by Donald Kirchner, with the knowledge and consent of the defendant and under the direction of Marjorie Greiman, daughter of the defendant, entered such intersection at a high rate of speed and collided with the car driven by the plaintiff. Plaintiff charges negligence on the part o Donald Kirchner.

Plaintiff asks damages of $6,115.50 for permanent injuries, loss of time, pain and suffering and medical care. On the second count the plaintiff's petition asks $300 for damages to the Flood car and loss of use of the car owned by her husband, D. Flood—Garner Leader.

BETTER IOWA GARDENS

The last summer plantings of vegetables should be made between now and the end of August. Small globular radishes, leaf lettuce, spinach and kale will mature rapidly enough before freezing weather sets in.

* * *

Thick stands of earlier summer plantings should be thinned out and individual plants in the row spaced according to distances recommended in the Iowa Garden Guide. Excess carrot and beet seedlings may be pulled up. Excess Chinese cabbage seedlings, however, should be cut off at the ground level. Chinese cabbage does not transplant like common cabbage Following these suggestions will help to insure the best quality vegetables for winter storage.

* * *

Information on vegetable storage may be found in pamphlet No. 70, available from the county extension director or from the Iowa State College Agricultural Extension Service Ames, Iowa. Gardeners who plan to construct a cave storage for vegetables and fruits can obtain a blueprint with full specifications for 15 cents from the Agricultural Extension Service. Ask for Midwest Plan 73402.

* * *

Many persons confuse muskmelon with cantaloupe. The rind of the muskmelon usually is netted; sometimes it is smooth. But all varieties of muskmelon are shallow-ribbed. The true cantaloupe usually is deep ribbed and has a hard and warty or scaly rind. The flesh of both muskmelon and cantaloupes may be green or salmon tinted.

* * *

The pineapple melon resembles the common netted melon. It is oblong in shape and has tender flesh. A novelty melon is the snake melon or snake cucumber. The fruit is long and slender, bent, twisted and furrowed The fruits often reach a length of 3 feet and a diameter of several inches.

* * *

Pollination of melons is carried by insects Lack of fertilization, as a rule, causes premature dropping of the fruit, while incomplete fertilization causes misshapen melons.

KEEP DOWN HESSIAN FLY BY CULTURAL PRACTICES

While a recent survey showed the Hessian fly infestation to be only 20 percent in southeastern Iowa and 12 percent in southwestern Iowa, farmers need to plan to reduce the population still further by cultural practices.

All wheat stubble should be plowed under as soon as possible after harvest, according to Harold Gunderson, extension entomologist at Iowa State College. Ground should be disked when volunteer wheat appears. This destroys the flax seeds on the wheat stubble and prevents the flies from finding a place to lay their eggs if they do emerge.

Fields where wheat is to be planted this fall may be readied for seeding and disked and harrowed to kill volunteer wheat and weeds. But planting should be delayed until the safe-seeding date. Gunderson says this usually is from Sept. 20 to Oct. 1.

Iowa farmers have tended to reduce wheat acreage in the last 2 years. That means the Hessian fly will concentrate its eggs and thus even the present low population might cause damage if effecitve cultural methods are not practiced.
